From: Tim Tribble
Topic: 5435 Message: 5435

Sacramento Regional Fire & EMS Communications Center
just cam on at 1900 hrs and announced that all
alerting tones, lights and pagers were down and to
monitor the radio. They have changed the dispatch
format and are voicing everything. I do not know if
this is planned or an equipment failure.

OK, found them, with all kinds of options for querying for info:

Southern California: http://weather.noaa.gov/pd/casframes.html
Nortrhern California: http://weather.noaa.gov/pd/canframes.html

And a "pop-up" help frame is at http://weather.noaa.gov/pd/sclistonlinehelp.html

Probably more than you really wanted to know...

5438. Malibu Fire Update - 4am Tues

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-01-07 12:23:31 UTC
From: Harry Marnell
Topic: 5438 Message: 5438

The request Monday afternoon from the "Pacific IC" at Malibu was indeed for 10 "Engine strike teams" (50 engines, plus a team leader for each team)

Then at 2300 Mon night they ordered another 15 Engine Strike teams (75 more engines) - 10 "type 1 teams" (- Fullsize structure engines, 1000 GPM pump - 400 Gal. tank - staffed with 4), and 5 "type 3 teams" (- wildland engines, 120 GPM pump - 300 Gal. tank - staffed with 3

These resources will be coming from throughout the state, probably comprised mostly of State OES engines staffed by firefighters from local paid & volunteer departments.

If I can determine some sort of listing of who's going, I'll post it

Scanner Feed at http://68.164.62.234:8000 and/or http://64.172.222.187:8000

From: Smokey Behr
Topic: 5441 Message: 5441

I just picked this up on one of the IRC channels. If you're on the east coast experiencing connectivity troubles, or trying to connect with an east coast site, here's a reason:

><ManinBlak> Anyone in the Richmond VA area who's seeing phone/inet issues, there are 42 DS3's down after a cut on a I95 bridge
><ManinBlak> 1200+ feet of cable will need to be trimmed and replaced, so this prolly won't be a quick one :-)

I am surprised that no one posted this but .....
last night 01/08/03 at around 540 pm there was a fire on the people mover
at the Bart /SFO connection a San Francisco fire fighter (13 year veteran)
was critically injured when she fell of the engine 25(I think) as it
pulled out of the barn she suffered severe head trauma and is in grave
condition, please pray for her and her family and her fellow fire fighters.

Here's part of the story on the KGO-TV web site:
http://abclocal.go.com/kgo/news/010903_nw_firefighter_injured.html
....
San Francisco Fire Department Lt. Barry Wong says Melinda Ohler, 40,
has undergone two surgeries at San Francisco General Hospital to
relieve bleeding or pressure from head injuries from the accident
that occurred only 100 feet from the fire station. He says one
operation took place last night and the other early this morning

Ohler, who has been called determined, funny and dearly loved, is
part of San Bruno Engine Company 42 and was responding to a reported
fire at San Francisco International Airport.

Wong says Ohler began training to join the force in 1981 and was
hired in 1989. She is a registered nurse and is known as a "great
field medic."

The call turned out to be a minor electrical problem in the AirTrain
facility at SFO. ....

Bummer! My prayers are for her and the family.
Regards,
Minor K7YJ Fort Collins, CO

Well, that is kind of misleading. She is NOT part of San Bruno Engine 42, she is a member of Engine 42 of the San Francisco Fire Department. Station 42 is ON San Bruno Avenue just south of Silver in the Bayview district. Brian mentions type O blood is needed. I am sure if anyone calls the SFFD they will get information on where to donate (I would guess Irwin blood bank on Masonic but not positive.

You expect a Mickey Mouse operation like KGO to get which department she
is with correct?

Don

5451. Ukiah may lose CDF air base by July 1st

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-01-16 04:19:30 UTC
From: Mobile11@aol.com
Topic: 5451 Message: 5451

Mendocino County supervisors, residents object to plan to shut down facility January 15, 2003 By UCILIA WANG THE PRESS DEMOCRAT UKIAH -- The proposed closure of a state fire department air base in Ukiah, driven by the state budget deficit, drew protests Tuesday from rural residents and Mendocino County supervisors, who argued that the shutdown would not save the state money. The California Department of Forestry and Fire Protection wants to close the 40-year-old air attack base in Ukiah and reassign the two air tankers to bases in Santa Rosa and Chico. The CDF also wants to eliminate lookout posts staffed by people whose job is to spot smoke and fire in remote regions throughout the state, said Karen Terrill, a CDF spokeswoman. The lookout posts no longer have the significant role they once had because fires are often reported by motorists or residents using their cell phones. The posts affected by the proposal include the ones at Lake Berryessa in Napa County and Mount Konocti in Lake County. The air base closure would save the department $391,000 next fiscal year, said Louis Blumberg, a CDF deputy director. The CDF is facing a $1.7 million shortfall under Gov. Gray Davis' proposed budget."We are forced to take some budget cuts, and ours have been crafted carefully to make sure safety is not compromised," Blumberg said. "We chose to consolidate our air operations as opposed to closing fire stations."To save money, the department also plans to stop using a base in Porterville in Central California and slash its travel budget by $200,000. The Ukiah base closure would go into effect starting July 1 if the state Legislature adopts Davis' budget for the department. To many residents in the county, the end of the base is unthinkable.Lorie Egerer, who lives near Hopland and went through the 2001 wildfire in which two air tankers crashed while battling the blaze, said the CDF's proposal would delay the department's response to fires in remote areas."If it weren't for the tankers, we might have lost our house," Egerer said during a county supervisors' meeting Tuesday. "I don't want to see the base closed."County supervisors voted to send protest letters to Davis and Andrea Tuttle, the CDF director. The letter to Tuttle also includes demands that CDF officials appear before the supervisors to explain their budget cuts. The Ukiah base is home to two tankers and five CDF firefighters and staff during the fire season, which typically runs from summer to fall.Under the proposal, one tanker would be relocated to the CDF base at the Charles M. Schulz-Sonoma County Airport and the second one to its base in Chico. Funding for the firefighter positions at the Ukiah base would be eliminated. But those firefighters would be reassigned to vacant positions within the department, Blumberg said.The department also would save money by not having to rent and maintain the base. A command plane that is based in Ukiah and used for supervising firefighting efforts would likely be moved to Sacramento and serve as a backup plane, Blumberg said.The base closure proposal wouldn't sacrifice public safety because the air tankers have been converted to fly faster and to hold a larger volume of retardant than their predecessors, said Frank Kemper, a CDF division chief in Santa Rosa.But air tanker pilots said they would still need more time to fly from Santa Rosa to a fire in Mendocino County than from Ukiah. "With the exaggerated response time, fire will grow quickly, and the cost of fighting the fire would exceed the amount saved," said John Butts, a tanker pilot. 5456. Marks-Nielsen Incident, Fresno City, Fresno County, California, United States of Amaerica, North America, Western Hemisphere, Earth

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-01-18 20:44:12 UTC
From: Tim Tribble
Topic: 5456 Message: 5456

The Marks-Nielsen Incident has been going on for a
week now. It is a fire in a 240,000 cubic yard debris
fire. The smoke from the fire is causing a significant
health risk to persons in Fresno area.

i was litening to cal-star on neu east and they were givin a ground
contact and they said that it was ebbetts pass fire dept and that
they were on cal-cord and i could not pick that up from my location
so does anyone know of a ebbetts pass fire dept and the frequency for
it
this was in alpine co ca so maybe its alpine co fire but i only know
of 3 district for the county
and the nearest one would be district-2 (markleville)
so if you could let me know or point me in a direction
thanks a million
captain biddle

Alpine County has 4 Fire Departments
Alpine County FD
Bear Valley FD
Kirkwood VFD
Markleeville VFD

There is also a USFS station in Markleeville. Nothing
from CDF.

Ebbetts Pass Fire District is HQ'd in Arnold, Calaveras County, and mainly provides first-response service when CDF is unstaffed in winter. They cover the area surrounding along Hwy 4 from Hathaway Pines (east of Angels camp) to the Alpine County line. A lot of their area is within the boundaries of Stanisluas NF.

Radio freq is 46.48, and possibly 46.26; Also apparently have high-band radios with CDF (151.175), CALCORD,
and prob Stanislaus USFS freqs (168.75R, 171.5R)

Units are 410s to 440s, including Paramedic Rescue 431

Station 1 - Arnold
Station 2 - Big Trees Village, Camp Connell/Dorrington
Station 3 - Hathaway Pines
Station 4 - Pinebrook

5461. CDF / CHP 1 Page Guides

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-01-20 03:18:48 UTC
From: Nick
Topic: 5461 Message: 5461

I hate blasting emails out to every group in the world... but the scope of my little creation makes it apply to a wide audience. The state CDF & CHP guides are pretty much finalized now; I have added major freeways to the CDF map, fixed a few messed up freqs, and adjusted the color a little bit so it looks better if you don't print in color (like me). They are in PDF format now so the old links will not work anymore. You can get them, and future updates, here:

http://members.cox.net/scanchico/map.html

If you have anything you want changed/added/whatever let me know off-list, and I will see if its within my power. Enjoy.

Nick

Handcuffed Woman Freed in Lingerie Shop

http://story.news.yahoo.com/news?tmpl=story2&u=/ap/20030120/ap_on_fe_st/britain_handcuffed_shopper&e=3
Mon Jan 20, 3:44 Add AP - Feature Stories to My Yahoo!

LONDON - A woman who slipped into an erotic lingerie store to look around drew far more attention than she intended when her hands got stuck in sexy handcuffs and she had to be rescued by firefighters.

A crowd gathered to watch the fire crew free the embarrassed shopper from the police-style cuffs with a hacksaw, Sarah Nosec, an assistant at the Ann Summers store in Wolverhampton, central England, said Monday.

Nosec said the unidentified woman was in the store in the city's central plaza on Saturday with two friends when she began trying on the handcuffs.

"People mess about all the time with the handcuffs and they jammed," she said. "We tried everything to get them off, but we couldn't, so we had to get the fire brigade out to saw them off. She was very embarrassed."

The West Midlands Fire Service said it sent out an entire crew to deal with the emergency.

"I think there was about six firefighters in the shop and they all wanted to come along as it was the highlight of their day," Nosec said.

5468. Sonma County Fire Frequency Changes

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-01-22 19:15:16 UTC
From: Tim Tribble
Topic: 5468 Message: 5468

Effective 1/27/03 Sonoma County Fire Agencies will
have an new channel lineup. You can find a copy of it
in the files section of this group. The new dispatch
center will be known as REDCOM. American Medical
Response (AMR) is running the center as a Fire/EMS
combined dispatch center.

From: Ed Tobiasz
Topic: 5471 Message: 5471

Fire and Aviation Management
NIFC Posts Analysis of 2003 Fire Season

Summary

Much of the Interior West and portions of the Eastern Area will see an above-normal fire season for the following reasons:

Long-term drought persists and will intensify over much of the interior West area. Mountain snowpack and water year precipitation remains below average for most of the western states with the exception of northern/central California and pockets elsewhere. The outlook for February through April calls for above normal temperatures and below normal precipitation over the Pacific Northwest, Northern Rockies, portions of the Great Lakes and the Ohio River Valley.

Weather

It has been much drier than normal this winter from the east slopes of the Cascades to the Great Lakes and wetter than normal over northern/central California, the Southeast and East Coast states. Drought conditions have persisted over much of the West for the last four years.

El Ni?o, characterized by warmer-than-usual waters in the tropical Pacific, is the main weather factor driving circulation patterns this winter. It is important to keep in mind that El Ni?o typically brings dry winter/springs to the northern states and wet weather from California to Florida. Also, long-range forecast are more accurate during El Ni?o events. This El Ni?o is of moderate strength and should persist through the spring. The winter and spring outlooks reflect these typical El Ni?o patterns.

Outlook

Southern Area: Heavy precipitation during October, November and early December continued to reduce and eliminate long-standing moisture deficits across the eastern seaboard (see the 3-month and 48-month Standardized Precipitation Images above). The portions

of South Carolina and Georgia with residual long-term deficits will continue to improve through this spring. While drought has been mitigated in these areas, the amount and frequency of rain events in the spring play a large role in determining what kind of fire season the eastern states will experience. It appears that Texas, portions of the southern tier, Florida and the eastern seaboard have the lowest probability of a significant fire season this spring and summer. Other states in this area are likely to see normal fire activity this season with a very good likelihood of successful prescribed fire application over the next several months.

Eastern Area: Many of the storm systems responsible for the heavy rain and snow across the east by-passed the Great Lakes, Upper Mississippi and Ohio Valley areas. As a result, low soil moisture and river levels exist across most of the Lower Peninsula of Michigan, northern Illinois, northern Indiana and northwestern Ohio. Drought is expected to gradually expand into extreme southern Wisconsin, central Indiana, central to northeastern Ohio, and northwestern Pennsylvania. Currently, portions of the Lake States remain without snow cover, meaning that grass fuels have remained erect and dry. Much of the early snow along Lake Superior has melted, and winter precipitation across the Lake States continues at below normal levels. With these conditions, we are expecting an early start to the fire season in Michigan, progressing from the southern part of the state in late February to the Lake Superior Watershed in early April. Fire season initiation could be as much as 2 to 3 weeks ahead of normal in this and other Lake State areas.

Central States: During a moderate El Ni?o, wetter than normal conditions typically occur across much of Nebraska, eastern Colorado, Kansas and portions of North and South Dakota. As a result, some improvement is expected in those areas (see Drought Monitor and Outlook images below). Further northwest however, conditions are typically dry and mild. As a result, drought intensification and expansion is expected across extreme western North Dakota.

In the West: Nevada, Utah and Colorado, should receive enough precipitation this winter to make some improvement, although drought conditions will still exist. Drier than normal conditions are expected across most of Idaho, Montana and western Wyoming. In fact, snowpack in most of these areas is currently at

60-80% of normal (see the Mountain Snowpack image below). This trend is forecasted to continue and will intensify the drought conditions that exist in those areas. Drought conditions go back five years or more in southwest Montana. The period of 1998-2002 is the driest five-year period on record. This area has essentially missed over a full year's worth of normal precipitation during this period. With seasonal precipitation running below normal over the majority of the west, spring rains will be a crucial factor determining fire potential this summer. If spring rains are plentiful, the fire season should trend towards normal, however if the spring is dry, fire season will initiate early and conditions are likely to worsen later in the summer.

Southwest Area: Severe to extreme drought persists over Arizona while New Mexico drought conditions remain abnormally dry to moderate. Well over 600,000 forested acres in Arizona are infested with bark beetles, increasing the potential for timber destruction from wildfires. Across Arizona, New Mexico and western Texas, wetter than normal precipitation is forecasted for the remainder of the winter and spring, which should result in widespread drought improvement. Overall, if the long-term precipitation forecast is correct, fire season is projected to start later, be shorter and less severe than 2002. More grass and brush fires are anticipated this season, but there is potential for fire danger to spike to near record levels during the peak dry season due to the impacts of long-term drought.

Alaska: Warmer than normal temperatures are forecast for most of Alaska this winter and spring. Southern Alaska is expected to have above normal precipitation through the remainder of the winter, which may not increase snowpack in south central Alaska due to the warmer temperatures forecasted. These mild conditions should result in a quicker thaw and transition into green-up which could result in a shortened fire season. However, a cool spell occurring after the snowpack melts could significantly retard green-up. Ultimately, shorter-term weather patterns, such as the strength and placement of the upper ridge, have a stronger influence on fire potential in Alaska.

It will be interesting since the two things the state ousted from CDF seem to be the Ukiah Air Attack Base closing and I think 22 lookouts across the state. Cutting 22 lookouts alone will save the state $750,000. Butte made the decision and Sawmill and Bald are being cut loose. Bald didn't do much for CDF, was looking over more USFS land then anything. However Sawmill is Paradise's guardian angel. That will be a missed lookout this season.

Shasta had a story in the Record Searchlight but from the story, it looks like they haven't made decisions on which ones are closing, only that they have to close several. Out of the list of lookouts they mentioned, Lateur Butte was not mentioned and is right in the middle of the county. Hmmmm

Tehama County only has 1 CDF lookout. The other 3 that cover our area are USFS. I might be mistaken with Eagle Pk being CDF and not USFS.

However, the state has made the choice that each unit can cover certain lookouts temporarily during times of high fire danger, dry lightning etc. Isn't that "all" summer?

Maybe we all need to program the local 7digit emergency number to CDF dispatch in our cellphones and help lookout this summer.

Jake

Hi Jake. More of the same further South. Amador-El Dorado is struggling with the issue, and is asking the VIPs if they would consider staffing the lookouts. Don't think we have the people resources for long-term, 7-day coverage. El Dorado County may cough up some funding for their lookout, but that will not happen in Amador. I've heard a similar comment from a CDF person down here - the logging industry on Fed land gets most of the benefit from the lookouts. Most fires in populated SRA areas are initially reported by citizens and confirmed by lookouts. I think we'll know in a month or so how all this is going to shake out.

Hi Jake & All -
Here is some info on the lookouts being closed.

First the Budget Proposal, notice that word? The fight has just begun. Butte Co. in particular is going to really get hit hard. Walt Pennington and other LO's up there are working very hard w/legislators, local officials and others who might listen to try and either stop the cuts or at least mitigate them. Check out the lookout board on Yahoo.
****
BUDGET:
11 FIRE PROTECTION
Program Objectives Statement
The fire protection program protects California's forest, brush, and
grass covered wildlands from potential damages resulting from uncontrolled
fire on private and state-owned lands and enhances the quality and usefulness of the resources. The program provides ``basic fire protection'' to SRA
and other wildland areas, and seeks to hold fire damage at or below the 5-year average and minimize the impairment of economic, social and environmental benefits. The underlying assumption is that uncontrolled fire is a public nuisance which must be abated by a combination of fire
prevention, fire control and cooperative fire protection.
Major Budget Adjustments Proposed for 2002☐03
☐ Reduction Issues in the December Revision
☐ $150,000 General Fund and 4.4 personnel years for closure of 22 lookout stations.
☐ $150,000 General Fund and 1.1 personnel years for closure of two
airbases.
☐ $33,000 General Fund for Out-of-State Travel.
☐ $5,000,000 General Fund for increased Federal Emergency Management
Agency (FEMA) reimbursements.
☐ $54,000 General Fund and 0.8 personnel years for various administrative activities.
☐ Other Reductions
☐ $269,000 General Fund and 7.0 personnel years pursuant to Control
Section 31.60.
☐ $462,000 Reimbursements and 10.0 personnel years pursuant to

Control Section 31.60.
☐ $62,000 Federal Trust Fund and 1.0 personnel year pursuant to
Control Section 31.60.
☐ $1,053,000 General Fund/Reimbursements and 23.0 personnel years
for

Forest fire Lookout Assn. (National) director (CA/NV) Kathy Ball is
working hard at the regional and national levels to help stop or at
least mitigate the cutbacks. LO's (yes my wife and I are some) from
all over CA are writing, calling, buttonholing etc. local officials,
citizen groups and anyone who will listen trying to stem the cuts.

In the mid '90s CDF had 77 active LO's, last year they were down to
22, 10 of those were only opened late season by the Governor. Once
the LO closes it is usually doomed. We know it firsthand here in
Central Ca.

Even the FS LO's are not safe. They curtail maintenance even though
the tower is active until it gets so bad it is unsafe, let it go
during a wildfire and other subtle ways. This year they went to an
online hiring system that really sucks! Some areas are even saying
that there will be NO REHIRES. Every one starts new!

We volunteer as LO's cause we really don't want the money. Interestingly enough we spent over 300 hrs. on the tower last summer, sometimes both sometimes one. After we tallied up mileage and gas we figured it cost US $1700. The tower we were on has a 75% "urban interface". Roughly 75% of the smokes were in that area also. We had 50 smoke reports for the year, 15 were "firsts" (we beat the cell phones). Most folks would probably not put up with the conditions. No potable water, peeling paint, a poor outhouse, cold showers, rotten mattresses, windows that are painted shut and more. But it was fun and enjoyable and a good service to the community. We had 49 people that staffed from May 15th to Nov. 8th.

Hope this provides some info to chew on! We are toying with the possibility of working in the Lassen NF this year. Maybe we will see a few of you. Take care

Excellent info Terry. Thanks a lot for the post and we welcome you to the list!

Would you have any insight for those of us who would be willing to volunteer (a.k.a NO money) at a lookout that would otherwise be shutdown?

I know CDF VIP program up here is thinking about doing the staffing instead of paid FF and wages.

Thanks again!
Jake

Hi Jake
Longtime reader and lurker here. Enjoy the board very much.
Insight?? VIP program in some ranger units is active and well run, in others they ignore it. We tried for several years to propose to MMU to let us take on Deadwood LO above Oakhurst. They ignored the offer and finally closed it in 1994 and turned it into a radio vault. Go figure. Never hurts to try though. First thing to show them is that there is an interested "group".

The USFS is a lot more open to people stepping up to take over a LO. Just look at the Buckrock Foundation (www.buckrock.org). Kathy has a real powerhouse there. Drop her an email for advice, she is a really great person. (kvab@...). She is also the CA/NV director for the FFLA.

Volunteers have staffed our LO (Miami Mtn.) since "95. We had 79 show up last spring for the orientation mtg. Out of that 49 actually worked, some more than others. Last year we repaired the catwalk floor, installed a drain line for the sink so the yellow jackets would not come up the drain into the tower cab, installed a new lightweight shutter on the east side, installed high speed internet service, partially completed scraping paint off the windows and installed a new threashold. We will complete the burglar alarm system, video surveillance system,
a new server and several on-line web-cams in the next couple of months.
We also added an oil-filled electric heater last year.

We had a pot-luck at the end of the year and the FS gave everyone a certificate and a nice polo shirt with the tower logo on it.

Take care.
Terry & Lynne

well i just found out that nevada is only getting one large air
tanker that will be bases out of battle mountain air base (middle of
nevada) for the 03-fire season
but they said they would make up by putting 6 air tractors that are a
bit bigger than a small plane so i think there only good for putting
out spot fires not major incident like we had last year
and this year may be even worse the way the snow pack is looking
so thats my 2 cents

Actually, those Air Tractors are basically crop
dusters. They typically carry 800+ gallons of
retardant/water.

Pros: They're extremely manuverable and can land about
anywhere to be resupplied by a water tender, thus
decreasing turn-around time to about nothing. Cheaper
to operate.

Cons: Difficult to fly in high wind. Lower payload
may be blown away. Lower payload can reduce coverage
level.

I've never worked with SEAT's (Single Engine Air
Tanker), so this is just what I've heard.

Scott,

Are you sure it's because of budget cuts? Remember,
the entire Federal Tanker program is under scrutiny
and this may be a result of that.

Those FEMA FREQs will probably do you as much good as those gas masks some of these "survivor" stores are selling. The masks must be put on in seconds or its too late. They are really a waste of money. Seriously, regular fire, police and EMS frequencies will be the way to go should, God forbide,another WTC type attack occur. With the Orange alert, these stores are selling this stuff that in reality is a good idea BUT for a different reason here in California.....Earthquakes. The suggestions to stock up on water, canned food, radio with extra batteries, etc., etc., have been on PSAs for quite awhile and are certainly a good idea.

5506. Chico Fire & Butte CDF

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-02-16 03:10:03 UTC
From: Nick
Topic: 5506 Message: 5506

Chico Fire had a confirmed commercial structure fire at about 5:30 which took all the south engines, leaving only 5 and 3 on the north ends. Then about 20 minutes later Butte CDF had a confirmed residential structure fire with a possible person trapped inside. There were no engines covering the south end, and responce time was agonizingly long. There was a crash on the 99 north of town during the responce, and CDF diverted a few incoming units from the structure to the accident. Chico Fire got another structure fire (I missed where/what) that took all the city units from the first fire plus some from the north end... so after a while there were just no units to respond anywhere. Right now there is only E2R covering the west side of Chico. Also, I got these pictures of the new display on the back of E6, it appears like they are in some sort of tuft war ;)

http://pages.sbcglobal.net/scanchico/ChicoE6a.jpg

I was working in the yard yesterday and the grass is green and the ground is just about %100 saturated from the rains we've had this past month or two. I wonder what can burn also. Although I back Mike up when I monitored a 1/4acre veggie on the county line.

There are a lot of major control fires starting up in the hills outside of Redding. That will provide some good radio traffic for training etc. They should be operating on either a control channel or tact 11/12. Also, I'm seeing some tanker traffic around Red Bluff as they practice VOR approaches etc. Monitor the victor freqs and RDD 119.800 and RBL 123.000 freqs for the airport coordination.

Latest news on Redding City Fire and their happenings....

New fire station (Station 8) located at the corner of Churn Crk and College View in the northeast corner of town will break ground on April of 2004 and be completed by November of 2004.

The crew to cover Station 8 will come from existing Station 7 at the Redding Municipal Airport. The city is still figuring out how they will cover the airport but it will most likely be a contract fire company.

The city was closing down Stations 2 (Canyon Crk) and 4 (Placer) and combining them into a larger station that would house both equipment and be located on Buenaventura and cover the same area as 2 and 4 covered. This plan is put on hold now since real estate deals between the city and possible property buyers dropped.

Some of this info came from recent article in Redding Record Searchlight.

Most CDF Lookouts will be staffed by VIP volunteers as they have always augmented the paid staff anyway. It just means that CDF saves some money and more VIPs will be needed to man the towers.

Where does one find information on the qualifications needed to volunteer and
on how to volunteer, by the way?

Find your unit's headquarters station and walk in the front door.
Explain you want to sign up for the volunteers in prevention (VIP)
program and they'll soak you up hopefully. From there inquire about
the lookouts. If they are doing VIP coverage this year that would be
fun.

In the Nevada-Yuba-Place CDF Unit they have five lookouts. Three of them have been solely staffed by VIPs for years.

They are Martis Peak in the Truckee/North Lake Tahoe; Banner Mtn at Nevada City; Oregon Peak in the Dobbins area of Yuba County.

Two of the lookouts; Wolf Mtn at Grass Valley and Mt. Howell at Colfax were staffed with paid CDF employees. But they were manned with VIPs to cover days off or other times when the paid staff were unavailable.

For what its worth, Butte County Fire engine 60 is stuck in the snow at the Butte/Plumas county line right off of Hwy 162. The engine was responding to a possible TC, ended up being an elderly lady who drove her car way too far in the wrong direction. The engine located the lady in her car, and attempted to turn the engine around in (reported) one and a half feet of snow on the roadway. Still undetermined how the lady made it so far in the snow with her car.

5536. [tomanddarryl] Receiving TVRO and other radio services being made illegal?

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-03-31 00:44:38 UTC
From: Dan Fuller
Topic: 5536 Message: 5536

Found on another list.
I don't know about you but this seems to me to be going a *little* too far this time.

[tomanddarryl] Receiving TVRO and other radio services being made illegal?

Hello,
I noticed there are comments on draft bills in a number of states, including MA, making the rounds of the internet sites mostly under "Firewalls being made illegal".
The comments are in regard to the broad wording of the bills technically making things like VPN and NAT illegal because you are hiding information from your ISP.
I read the text of the MA and CO bills. The purpose seems to be to prevent stealing of communications services. The definition of communications service mentions commercial services but goes on to include almost any communications method. It seems to cover TVRO and even AM/FM radio. The draft bills make it illegal to even receive any radio service with the express consent of the service provider.
It is reasonable that we are allowed to listen to broadcast services that are meant for the general public, but what about listening to certain services on radio scanners or certain feeds on TVRO?
This may be a small issue but I feel it is better to correct it before it becomes law rather than having to go to court to prove your view.
I remember some critics of the DCMA brought up issues that were considered unreasonable because it was not in-line with the purpose of the law. However now we are seeing the DCMA being used to remove pricing information from web sites, and preventing third-parties from making compatible products for equipment.
Articles, draft bill texrs, and comments on the internet effects are at:

El Dorado Command is now operational for testing purpose on tones 9, 10, 11, 12.

For testing purposes we will begin ³simul-selecting² all dispatches and radio traffic in El Dorado County. We will be doing one tone a day. Today, Wednesday, we started on tone 9. Tomorrow will be on tone 10, etc.

After a long and tedious process of re-engineering this frequency and its infrastructure, we are optimistic that all the complications have now been worked out. Nevertheless, please advise Camino ECC of any interference or complications that may arise. We anticipate going live with El Dorado Command on April 1st, at 0800. (This is no joke either!)

Just thought I would let you know that the fire - although a very major one - was NOT at the Reno Gazette Journal - it was a pallet yard on Kuenzli street - just West of Kietzke lane - this is several blocks at least from the RGJ building - the fire was mostly in the pallets and from what I copied on the radio in Aircomm only minor damage to the building - the efforts were hampered by high winds and due to the layout of the scene they had problems with opposing hose streams - Probably something you would understand a lot better than me - also last night about 11:30 just a couple of blocks from where I live a Reno officer was shot (near Reno Fire Station 3)after he made a traffic stop - the suspect was also shot and last I heard both survived and are in hospitals - pretty exciting end to the Month of March in Reno - Joe

ya thanks joe my bad thats what the radio station was saying for while but buy the time
they figured out that it was not the RGJ i was too busy at that point in time
so thanks for picking up the slack for me (lol)

When I working in Davis, Davis PD dispatched the City, and UCDPD dispatched UCDFD. They have first alarm Auto Aid agreements and 2nd alarms gained a truck company from the City of Dixon (Solano Co.) DFD, UCDFD, and the City of Dixon all respond Auto Aid to district 9 (west of Davis / east of Dixon along I-80) for TC's and fires.

5551. re - Davis FD

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-04-07 13:01:39 UTC
From: zerg90@webtv.net
Topic: 5551 Message: 5551

My bottom line question would be - if the College FD was disbanded, would anyone really miss it? (Which I am sure is the unstated question in the proposed study).

If no one wants to tackle that question :-) on the list, then how about this? - What is the typical response to a alarm bell call in a college building? - What is the typical response to a report of smoke or flames in a college bld? Are the 2 FDs on entirely different radio nets with seperate dispatch centers? Can they intercommunicate via radio? How?

The Boston area has several very large college and universities. All of them have PDs, fire marshalls/inspectors, and security services - but none of them have FDs. Harvard University has a "fire group" which I think is a bunch of maintenance men who have special pagers and bring keys to firefighters at calls on campus.

(MIT and Harvard are in Cambridge - Suffolk University, Emerson College, and Boston University are in Boston - Boston College is on the Newton / Boston border - Tufts University is on the Medford / Somerville border - Brandeis University and Bentley College are in Waltham.)

I can't speak for Davis, but I know the local Junior College here (Shasta College) operates its own FD, under the Fire Technology Program, and is considered a station under the Shasta County Fire Dept. (Station 73) and as such, dispatches and communicates on the County/Local CDF Net.

Perhaps something similar is in order for Davis, but this is just my opinion.

I work for UCDPD and I am currently in the application process to become a student firefighter with UCDFD.
I am not sure if it is per the SOP, but with the great frequency of false alarms, an automatic alarm, or fire alarm pull, will be responded to be Truck 34. If Truck 34 confirms the alarm to be a working structure fire, E34, (and possibly) E32, E31, and Rescue 31, will be dispatched. These are per the University/City Aide Agreements.
I will find out more better information for you as soon as I can.

UC Davis' station 34 is located adjacent to UCDPD Headquarters. Both Police and Fire are dispatched from this location as well. The city has its own dispatch center. However, the dispatches for both city and University departments are on the same frequency. In several cases, the secondary and tactical frequencies are the same as well.
UCDFD and UCDPD operate as their own fire and law enforcement. However, they are in the process of consolidating with the city departments. This will be a great help to the city as well as outlying community, because UCDFD provides the only Truck (T34) in the immediate area.

All fire calls that are on campus are handle by station 34 which is on campus. They also respond to 1st and 2nd alarms in the city and traffic accidents on I-80 west of the davis exit. There are two separate dispatches, but they're on the same frequency

From: Tim Tribble
Topic: 5551 Message: 5556

To answer your first question, yes. UCDFD is the Operational Area Coordinator for Yolo County under the State's Fire & Rescue Mutual Aid Plan. They are a vital and viable part of the Fire/Rescue community. As noted in other posts regarding this, UCDFD is a first responder into portions of the City of Davis. It also provides qualified students an opportunity to work as Firefighters while attending school. UCD is not the only University to use Student Volunteers. Now, does this mean that they need to be a "stand alone" department, that depends on a couple of factors. If the City of Davis is just going to absorb UCDFD and keep the station and equipment operational and in place and just take over administration, that is not a bad idea. If, however this is going to be a straight close'em down deal, that would be bad. For example, the next closest Truck Company would have to come from West Sacramento. The response times on campus and on Hwy 113 I-80 would be increased. The HazMat unit at the University would be lost. Those are all major considerations, especially considering some of the labs at UCD.

To answer the second question about why UCD has a department one has to know a little history. Although as you state the Boston area Universities don't have their own FD's, Davis was a mostly volunteer department when the university first came to town. The City of Davis could not provide adequate fire protection to the campus so UCD created their own. Just across the causeway CSU Sacramento does not have it's own department, but right across from the campus is a Sacramento City Fire Station. The City of Sacramento could provide adequate fire protection to the CSUS campus so their was no need for the University to maintain their own department. The UCD Medical Center in Sacramento is inspected by UCDFD but is protected by the City of Sacramento for the same reason.

Harry,

You're not being PC, again. They are not "controlled burns" they are "prescribed burns." They no longer go out of "control" they go "out of prescription."

Remember, it's not what actually is happening, it's how you phrase it. I'll bet you didn't know that the Iraqui Information Minister was trained by the Forest Service!! :-P

5564. BTU CDF Veg Fire Coutolenc IC

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-04-08 23:00:46 UTC
From: Nick
Topic: 5564 Message: 5564

BTU CDF has a half acre veg fire (first one of the season?), 3+ engines and Butte Crew 1. Coutolenc Rd cross of Lacrecia (?) Drive Tac on White 3. Fire is contained but has a 2 hour mop up.

151.4 BTU Dispatch
154.295 White 3

Also a single car TC on Skyway, medics requested flight care but Enloe is out of service and CalStar has a 30 min ETA. They will do ground transport.

No more updates, im off to class, listen for yourself ;)

ShoutCast Stream:
http://www.daicahosting.com:8002

Nick

What other agency do they have out there?

Uhm, the Honorable OES 293 (I think) engine went with them. They could have gotten mutual aid from Paradise Fire if needed, its pretty close to them too.

And speaking of, OES E297 is still in Chico Station 2 doing all the normal E2 runs... did OES toss out a few engines to whoever wanted them, or did Chico get it because their E2 and E2R died and I missed it?

Nick

5567. North Zone

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-04-08 23:42:53 UTC
From: Helitack
Topic: 5567 Message: 5567

anyone know what freq North Zone (north-ops)uses for aircraft (dispatch) orders? hoping that its similar to the what South Zone uses to order up A/C thru the forest districts. Hopefully it is in the 164.xxx range or something close!

thanks

Rick

It depends on where you are listening from. It is not 162-174 it is Low Band off of Saint John and Grey Butte. Some other locations bring it off their Mt tops to their dispatch via UHF or microwave. With the new ordering system almost all of these requests are now via the computer system and the North Opps or South opps systems mainly a back up. UCK Also many of the orders are on the CDF intercom. Can you hear Saint John? If so I will look it up for you.

Thanks Frank for the info. I'll have to plug in the freq and see what happens. I do know that South Ops still uses the 164.9125 for advising one or more forest's of new A/C orders, Aircraft status and moves especially when Riverside gets a bit busy and can be heard as far north as Tulare County.

Thanks again

Rick

5571. Fire History map

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-04-10 19:52:00 UTC
From: Harry Marnell
Topic: 5571 Message: 5571

Found an interesting "Fire History (1908-2001) Map" for Humboldt County at http://www.co.humboldt.ca.us/planning/maps/fire_plan/firehistory.pdf

A legend, but no narrative to go along with it. First time I've seen an overall fire map like that.

Nick,

We do not necessarily "toss" them out. It is a much more complicated process. First, we take a State map and blow it up to wall size and cut out each of the 6 Mutual Aid Regions. Each map cut out is placed on the wall and the Regional Chief is then blindfolded. We hand him pins, corresponding with the number of engines they will be receiving on the order. We then spin thme in a circle for several moments. (This is most critical as we don't want to induce hurling.) The Chief then places the pins on the map and that is where the engine goes.

Due to the current budget issues, this proceedure has been modified for the issuance of the 12 Water Tenders. Instead of paying for the travel of all the Regional Chiefs to come to Sacramento, we substituted them with 12 Lab Monkeys from UCD. Instead of buying pins for them to stick in the map, we let them hurl their own feces at the map. Since each Region will get 2 Water Tenders the two largest globs from each hurl were considered the winning sites.

At this time I should point out that this is not an exact description of how an OES engine assignee is chosen, but it does represent the statistical probability fairly well. No watches were given to any monkeys during the chosing of the assingees. I have no problem with my attitude, so why should you?

Q. If a Strike Team of Engines is traveling south bound on I-5 at 65 mph for 4 hours and another Strike Team is traveling North bound on I-5 at 60 mph and they both meet in Roseville at 1500. Where did they come from?

A. Who cares, if they are both traveling on I-5 and meet in Roseville, we have a much larger problem to deal with.

And now, for something totally different.

At least with Copter 205 you can usually hear the helo "whoo-whooo-whooo" noise in the background. Unless they have a really good noise-cancelling mic... or go to digital. Have you heard the (digital) LAPD pursuit Tracy recorded about two months ago? The air unit booms in over everyone like God talking, with NO copter sounds at all. Their dispatchers tell me they miss the easy voice recognition they used to have... now most everyone's voice sounds about the same.

From: Dan Fuller
Topic: 5579 Message: 5579

From another list, but on topic for most.
[tomanddarryl] TWIAR NEEDS FUNDING SUPPORT NOW!!!

Greg Williams k4hsm asked if I could post this.
TWIAR NEEDS FUNDING SUPPORT NOW!!!
At last check there was less than $10 in TWIAR's bank account. It costs approximately $100 per month for us to carry This Week in Amateur Radio to you via satellite and through the internet. It may sound like a lot, but in actuality, that's less per month than what other bulletin services cost per week!!!
We rely primarily on support from our affiliates (repeater owners, radio clubs, and listeners) to continue bringing TWIAR to you weekly and up-to-the-minute. We pride ourselves not only on being the most up-to-date news service dedicated to Amateur Radio, but also on having reliable audio delivered to our affiliates in a timely manner and having the greatest web site known to mankind and all that is holy (gotta plug it, ya know!).
Just think, if every one of our affiliates donated just $10, we could keep TWIAR running for over 2 years!!! That little bit can go a long way. Please help us to help you by encouraging your club treasurer, repeater owner, or yourself to giving any amount you can to This Week in Amateur Radio.
If you wish to make a donation, please send a check or money order made out to Community Video Associates, Inc. and mail to the following address:
Community Video Associates
This Week in Amateur Radio
P.O. Box 30
Sand Lake, NY 12153
In addition to keeping TWIAR on the air, we will announce your repeater or club during the ID breaks of our next available program.

Fire Station 26 is located on the portion of Lakeshore Park,at the corner of South Norfolk Street and Marina Court.The new fire station is approximately 10,900-square feet.

The Fire Station project includes the construction of a new two-story 6200 square foot fire station,a new parking area for the fire station.The station is designed to accomodate 3 fire fighters,with the flexibility to house other fire/safety staff.The station provides a bay for Engine 26 and one reserve engine or truck.It also has a medical clean up room,and a hose and equipment storage and repair area.

Dispatch frequency is 153.785 Control 12

Fire Chief is Brian Kelly

5590. re - Davis FD

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-04-23 20:53:24 UTC
From: zerg90@webtv.net
Topic: 5551 Message: 5590

Thanks to everyone for their comments. Could I follow up on one thing?

Quoting - All fire calls that are on campus are handled by station 34 which is on campus. They also respond to 1st and 2nd alarms in the city, and traffic accidents on I-80 west of the Davis exit. There are two separate dispatch centers, but they're on the same frequency

My guess - 1st alarm is the initial alarm (typically 2 pumpers and 1 ladder). A second alarm is an additional alarm bringing 2 more pumpers and 1 more truck (for a total of 4 engines and 2 aerials assigned to the incident).

Therefore - first alarms on campus are handled by Station 34. First alarms near the campus are handled by a mixture of Sta 34 and City FD units. 2nd alarms on campus would be primarily mutual aid units. 2nd alarms near the campus would get a mixture of FDs.

Or would a second alarm on campus also get student firefighters on reserve rigs from Sta 34 perhaps? Or maybe student firefighters live in the campus station and go on some first alarms?

Sorry for sounding like a lawyer - just trying to get the nitty gritty.

Peter S

Peter,

Station 34 has 2 engines, 1 Tiller Truck, 1 HazMat Squad and support vehicles. The student firefighters are assigned to ride on any of the apparatus once they have completed training and are certified. I believe they live at of at least "sleep over" at the Firehouse. From my experience monitoring UCD Fire they send only Co. 34 units to a first alarm on campus. I am not privy to their staffing patterns for the second engine or how they do "call backs" for student firefighters not at the station.

Wow - that's a cooking fire already but the high winds and lack of rain can do that. Luckily no structures are involved.

With Fire in Their Eyes Buffs Find Passion in Chasing Sirens
By ROBERT F. WORTH

By day, Ira Rubin takes care of his ailing mother and works as a production manager at a matzo factory in Jersey City.

At night, he flicks on the police scanner and enters a lurid world of fires and disasters.

If he hears the dispatchers call in a serious fire, he will often jump into his Mercury Marquis and race to the scene to watch. If not, he may simply monitor the nightly mayhem by two-way radio from the renovated 19th-century firehouse where he helps run a canteen service for firefighters. On weekends, he often puts on a gray kilt and Glengarry hat to play the bagpipes at fire and police department events.

Advertisement

In short, Mr. Rubin belongs to that quietly eccentric band of people known as fire buffs. Their ranks include lawyers, salesmen, doctors, locksmiths, even an heiress or two. All of them seem to share a single experience: at an early age, they heard a siren and saw a bright red fire engine bolt past. They have been chasing fires ever since.

It is impossible to say how many fire buffs there are in the New York area. There are about 100 subscribers who pay $100 a year to help support Citywide Radio, a channel that buffs use to communicate about fires and other disasters (461.225 megaherz on the dial). But many prefer to keep their habit private, tuning in to police scanners or pagers and devouring Fire Department bulletins and industry magazines. Some belong to groups like New York's Fire Bell Club, or canteen services like the one Mr. Rubin helps run, the Gong Club of Jersey City.

When asked about their hobby, some buffs get a little defensive.

"It's not about pyromania," said Doug Kahn, 39, a night assignment editor at Channel 11 who got his first scanner at age 15. "It's about watching what the firefighters are doing. I hate to make it sound like a spectator sport, but it's kind of like watching guys fight a battle and rooting for them."

Some buffs take pictures at fires and then donate them, negatives and all, to the department, which then uses them in training.

"Buffs are very good for us," said Vincent Dunn, a retired fire chief who spent 42 years on the job in Manhattan and the Bronx and has written three

books about firefighting. "Some of them know more about the fire service than we do, and they help get our point across."

Most buffs are also quick to point out that their passion has a distinguished history. Gov. Alfred E. Smith chased fires in Lower Manhattan as a boy in the 1880's, and Mayor Fiorello H. La Guardia would often speed to the scene of a major fire. Buffs claim the well-known photographer Weegee, who often slept in his car with a police radio on during the 1940's and 50's, as one of their own. And during the 1970's, when the almost nightly fires of the South Bronx could be seen from miles away, large crowds would often drive up from Manhattan to watch.

"The scene of a fire in those days had the strange quality of a social event," recalled John Miller, now the chief of the counterterrorism bureau at the Los Angeles Police Department, who grew up in Manhattan running uptown to photograph fires in the Bronx. "They'd all stand around talking, swapping notes about the big one they saw the other guy missed, how fast they got there, and which engine came first."

But many buffs now say their hobby is dying. There are far fewer fires to see than there were 20 years ago, largely because of improvements in building codes and fire prevention, along with the surging economy and dropping crime of the 1990's, which helped to reduce arson.

"Thank God there isn't the kind of urban blight there was in the 60's and 70's," said David Bookstaver, who grew up in Manhattan with a scanner taped to the handlebars of his bicycle. "But there's not enough now for a young kid to get interested in."

On a recent Saturday evening, Mr. Rubin, 49, sat for several hours under the Gong Club's dusty tin ceiling, lamenting the passage of the great age of fires. Every now and then the radios on either side of him would emit a sudden burst of voices, and he would tilt his head back slightly, listening to the dispatchers. None of the fires was big enough to be worth chasing.

Mr. Rubin serves as the archivist of the Jersey City Fire Department. He talks about fires of the past with a kind of melancholy nostalgia, like a Harold Bloom of the fire buffs' world.

Mr. Rubin was still talking about the lost romance of fire buffing when a group of visitors from Boston arrived at the Gong Club door. They were members of the Sparks Club, Boston's largest buff group. They had just come from a two-alarm fire on Wooster Street in SoHo, and they soon got into a vigorous discussion of comparative firefighting methods with their Jersey City counterparts.

The terror attacks of Sept. 11, 2001, had a powerful effect on fire buffs. Many say the attacks taught everyone else what they already knew about the heroism of firefighters. But there is a new uneasiness, too. In the past, buffs would often say goodbye with a traditional phrase: "I'll see you at the big one." Not anymore.

"It was enough to make the whole thing seem morbid," said Mr. Bookstaver, who is now the spokesman for the State Office of Court Administration.

While some buffs may have grown away from the habit, others have developed it into a career in journalism (Mr. Kahn) or public service (Mr. Bookstaver).

And starting in the early 1970's, a few began using their expertise more directly as a way to make money. It was then that John Delventhal was coming home one morning when he happened to see a Cadillac spin out and strike a building on Houston Street. He caught the whole thing on videotape, sold it to a network, and a business model was born. He and a friend formed a company called Action Movie News, which was soon followed by another, the Broadcast News Network.

Their successor today is the Breaking News Network, a 24-hour pager service that condenses breaking news for journalists and other clients. It is run by Robert and Steven Gessmann, identical twin brothers and lifelong buffs, out of a small suite in an office park in Fort Lee, N.J.

The Gessmanns spend their days listening to fire and police radios; they take calls from a network of freelance buffs from Maryland to Connecticut. They type up each item as it comes in and send it out on the pager, a constant diet of fires, suspicious packages, car chases and false alarms for their 2,000 paying subscribers, who pay amounts ranging from $8 a month for individuals to $300 a month for commercial accounts.

But some buffs look down on the Gessmann brothers for mass-marketing their pastime. "To me it's not a business," Mr. Rubin said.

Some buffs, in fact, speak of their hobby as though it were a kind of cult, complete with its own relics and sacred texts. On a recent afternoon, Barry Gintel and Marty Schwartzberg gave a tour of the Bell Club's office on East 23rd Street. (The room, as it happens, is a bit of a fire hazard: no windows and no sprinklers, with the exit sign not lighted.) The club owns a chunk of the B-25 bomber that crashed into the Empire State Building in 1945, and a piece of the Hindenburg. There are countless plaques and photographs, century-old leather fire buckets, helmets and a massive, old-fashioned alarm bell.

With all this hero worship, why do buffs not take the final step? Why are they not firefighters? For some, the answer is simple: they failed to pass the rigorous physical exam. Others say they prefer the role of the spectator. Still others chose a career that was seen as more lucrative, but have been haunted ever since by a parallel life, one they will never live.

"Would I have been able to walk into a burning building?" Mr. Schwartzberg said. "Do I have that intestinal fortitude? I'll never know."

Very good article Harry thanks

I think I fall in to the last part the best have been haunted ever since by a parallel life, one they will never live. I my self was a vol. when I was a kid back in conn. growing up my dad was a captain one older brother got in a few years ahead of me it was all just so natural to do it until we as a family moved to California every thing in the SF bay area was paid and you needed so much schooling i bailed from the task my younger brother did not he took all the fire science corses and is a paramedic/ dispatcher with Santa Clara city now.

How about the rest of you out there any good stories as to lost opportunities ???

and also what drives your passion to listen.....sounds like chat room topic to me 8 PM tonight cencalfire

JEFFREY IN HOLLISTER <><

Therefore, my brothers, I want you to know that through Jesus the forgiveness of sins is proclaimed to you.

From another list
[tomanddarryl] Special Event

This might not be appropriate for this list, but we have a lot of hams here, so:
I would like to announce "The World's Longest Yard Sale Amateur Radio Special Event Station".
deKalb County Alabama Amateur Radio Club will operate an amateur radio special event station in conjunction with"The World's Longest Yard Sale"!
The World's Longest Yard Sale annual event extends from Gadsden, Alabama, to Covington, Kentucky, via the U.S. 127 Corridor with more than 450 miles of scenic beauty, tons of yard sale items, and many friendly people.
The World's L o n g e s t Yard Sale Amateur Radio Special Event Station will operate as W4GBR along the yard sale route on the Lookout Mountain Parkway located near Fort Payne, Alabama. W4GBR can be found on the frequencies of 28.470(10m), 21.270(15m), 14.270(20m), 7.270(40m) and 147.270(2m), MHz. The yard sale and special event operations will be August 2-10, 2003.
Out of town yard sailors and amateur radio operators are invited to visit our station. Special event station information and local directions can be obtained on our local repeater 147.270MHz 100.0Hz PL.
To receive a W4GBR Special Event Certificate, mail the order form found on the website or mail your contact information and $4.00 U.S. to:
W4GBR Special Event
2113 Dogwood Blvd. NE
Ft Payne, Al 35967
For additional information please contact the above address or see the following:

From: Nick
Topic: 5608 Message: 5609

They are continueing the search for about another hour, they tried to contact the registered owner of the boat and had no luck, so they don't know if it just floated away from a dock or if he floated away from the boat. There was some talk about calling out BCSO SAR, but I never heard them actually get dispatched... I guess they have enough DART divers. Chico Fire is now trying to keep the city engines staffed with half their people in Bidwell.

5613. North Zone

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-05 01:51:57 UTC
From: raven@accessbee.com
Topic: 5567 Message: 5613

The U.S.Forest Service uses frequencies between
415.225 and 415.575 for mountain top link freqs.
There are several on Slide Mtn that Minden uses
for their remote base and a link to North Zone.

5614. (no subject)

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-05 03:37:49 UTC
From: Nick
Topic: 5614 Message: 5614

I am updating my CDF 1-Page guide to include county fire dispatches in areas where CDF is not the primary fire/medical responce agency. Here in BTU, CDF is the county fire so it works out well; however, on a trip into Sonoma County, listening to LNU West was like listening to drywall. I want the scope of this guide to remain wide, so I don't want to include anything that is on a trunked system. I also don't want to bother with checkback nets... I know many counties have dispatches on one freq and then one or many other freqs for responce checkback. I think that would get into too much detail for a statewide map. You can check out my current version here:

http://members.cox.net/scanchico/maps/CDF_1Page.pdf

So if anyone lives in a county fire area where CDF is not really a factor until the vegitation fires, or have any other ideas about what you would like to see on the map, send me the info off-list and I will update guide. Thanks for your help.

Topic: 5614 Message: 5615

Hi Nick. Those maps are very nice. I have some stuff for Santa
Barbara since they're contract. I know Placer county has an active
county dispatch. Not quite sure the difference between county
dispatch, and their 151.325 CDF though.

A couple of years ago, someone posted the following list of link frequencies used in Cal by the USFS. Sorry I don't have locations, and I don't remember if this was just for Region 5 North, or North and South both.
415.2250/411.2250
415.2500/411.2500
415.2750/411.2750
415.3000/411.3000
415.3250/411.3250
415.3500/411.3500
415.3750/411.3750
415.4000/411.4000
415.4250/411.4250
415.4500/411.4500
415.4750/411.4750
415.5000/411.5000
415.5250/411.5250
415.5500/411.5500
415.7500/411.7500

Im not sure what your all looking for but these 2 freqs work, no link freqs required:

168.625 AIRGUARD
41.790 North Ops in Redding Area
46.970 North Ops traffic I heard on this freq in Sacramento.

From: frank ealand
Topic: 5619 Message: 5620

cross band links are how the Forest Service and other agencies control a base station on a mt top. They receive the VHF freq and repeat in on a UHF freq. The dispatcher transmits on a UHF freq that is repeated to UHF.

There are multiple links on slide. Going off of memory there are links for air guard, north opps Forest Service dispatchers net, and I am not sure but believe both the Tahoe NF ad the Toyabe have forest net links there also. They are all in the 415 Mhz range down and that's the only portion of the link you need to listen to. No need to listen to the uplink.

Frank

5623. Chico FD / BTU CDF dispatching

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-12 02:03:21 UTC
From: Nick
Topic: 5623 Message: 5623

Chico Fire has always responded into the county for near-city limit emergencies, but recently I have noticed BTU CDF (Oroville) dispatchers directly dispatching Chico FD on the Chico Fire net. Oroville will do the pre-announce, then Chico Fire picks up the rest of the dispatch on the Chico Fire net. Oroville then dispatches the full assignment on BTU local. The Chico engine will check back on both nets. Before Chico Fire would just sort of announce that Engine # was on an auto-aid run, now it seems a little more direct and formal. Props to interoperability, and props to the state for letting us run their OES297 to death, even if it is that weird green/yellow.

Yeah, it was floating out in the water with no one on board, they did a pretty wide search and didn't find anyone and could not reach anyone at the registered owners house, so chico fire just tied the boat up at the fish & game dock and left it for someone to come and claim. Turned out to be nothing I guess, but it was a good drill for the DART & SAR team.

You are right, it doesn't work. The city can handle themselves most the time. They do spend > 1/4 of the city's general fund on fire protection, but sometimes they still need county help, and should ask for it sooner. The county doesn't wait around to ask for city help... they will send our engines and cancel them later. Better to be safe in this business.

At least I think so.

Nick

5631. FIRE SEASON IS ALMOST HERE

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-16 01:51:31 UTC
From: Jeffrey
Topic: 5631 Message: 5631

Today I Saw copter 106 (Santa Clara unit C.D.F.) practicing bucket drops at Lexington reservoir
on Friday I saw a USFS copter doing same in Watsonville area (don't ask me why there)
heard CZU 1700 dispatch a wildland fire on side of HIWAY 17, been seeing much more CDF stuff driving up and down 101
.....SUMMER IS HERE DUST OFF THE SCANNERS ENTER THOSE AIR FREQ.S!!!!!!!!!!!!!!!!!!!!!!!!!!!!
and find out what USFS copter are in your area instead of fixed wing bombers!!!!!!!

JEFFREY IN HOLLISTER <><

Therefore, my brothers, I want you to know that through Jesus the forgiveness of sins is proclaimed to you.

5632. USFS LOOKOUTS

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-16 15:57:51 UTC
From: raven@accessbee.com
Topic: 5632 Message: 5632

The El Dorado National Forest has started to staff
their lookouts. Heard Bald Mtn on the air today.
Seems a little early, considering the weather and
the high fuel moistures at this time.

From: Jake H
Topic: 5632 Message: 5634

I guess now is a good time as any. CDF Lookouts are hurting across the state. Each unit will have to fund their own lookout attendants from their own local budget rather then rely on the state to fund them directly. Tehama/Glenn unit is lucky to have 3 USFS lookouts with direct coverage of state lands. The 1 CDF lookout (Inskip Pk) will be staffed as normal this year with local funding from Tehama Glenn unit.

If you're wondering if lookouts in your area will be staffed, give your local CDF HQ office a call and simply ask. They would be glad to tell you yes or not. If you get an answer, go ahead and post it here.

Thanks!
Jake

I was with Jake when this started today... the most we could find out
was Copter 205 left Vina to some incident in NEU. We were too far
north to pick up most of the radio traffic, Copter 205 was told to
contact command on tac 5, and thats about all we could gather.

5640. NEU FIRE

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-18 17:48:38 UTC
From: raven@accessbee.com
Topic: 5640 Message: 5640

The NEU fire (actually a Tahoe NF fire) broke out yesterday afternoon several miles east of Foresthill. Fire was near Chickenhawk Ranch (name of fire was "Chicken"). At one time a heard 10 acres heavy fuel with wind on it. Had ten engines, 3 watertenders, four crews, one bulldozer, and finally one helicopter (205). They had real difficulty finding crews and equipment for the fire. H205 stayed overnight at Auburn airport, but left around 0800 this am for Vina. Fire was pretty much picked up at dark last night. The USFS is there this morning mopping up.

Auburn newspaper article on the incident:

From: Jeffrey
Topic: 5646 Message: 5646

as of 6:00am this morning estimation is 2000 acres with projections of loosing another 2000
six engines total on scene four more 4x4 engines on order for today as well as two ground crews
two dozzers on scene but very steep terrain is difficult, one chopper in route at 8:am this morning in addition USFS will do a fly over this morning for a sit rep only .....
Just an observation the Battalion chief 4617 sounds exhausted guess we would be too.....
assuming four guys per rig x 6 thats twenty four firefighters and two dozzers against this 2000+ acre wildfire in high 80's temps and high winds , rugged hills and canyons!!!!!!!

5649. Re: [SoCalFire] Re: CDF 3-0 and 2-0 staffing

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-20 16:45:18 UTC
From: Harry Marnell
Topic: 5649 Message: 5649

It's too bad CDF doesn't ever get the kinds of budget support in Sacramento to staff their equipment adequately. I would agree that 2-0 staffing is "ok during non fire season," if that means they only respond to "non fires." A 2-0 staffed engine borders on useless for all but most medical calls and very minor fires (and false alarms.)

I assume CDF's "justification" for funding only 3-0 staffing (rather than the much more effective and safe 4-0, as substantiated by a number of studies) is that their mission isn't to "do" structural firefighting, with its associated and now generally-accepted "2-in/2-out" standard. But in the real world, we all know that CDF, the third largest fire department in the nation, handles structure fires all the time. And their highly-skilled and trained firefighters virtually NEVER get the recognition they deserve as such.

I admit that I'm very much an "outsider," but a long-time observer of both urban (e.g. LAFD) and rural firefighting, and dispatcher for urban, suburban and volunteer FDs for a number of years; but it seems to me that Sacramento's allocation of their admittedly scarce budget dollars to CDF firefighting has long been wholly inadequate. Perhaps within CDF management the REAL commitment is to its "Resource Agency" duties, such as timber harvest plans, forest pest studies and control, archaeology and the like, rather than to putting water on fires. Perhaps the firefighting side of CDF should become a separately administered and budged agency of its own, and start getting the attention and funding to really become the state's fire department, as it truly is and as its personnel deserve. But something tells me there's a ton of politics and "turf" already invested in keeping things as they are.

Soap box mode now off.

Does anyone have any contacts in the Seattle area? I've searched yahoo
groups and couldn't find any group that seems to have what I need.

I'm heading up there in two weeks and would like to program my PRO-93 with
the "control" freqs for the trunked systems in the area. I'm trying to
avoid entering every freq when only the control freqs are needed.

5659. Calif Fire Comms, News & Links page has moved

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-22 08:32:41 UTC
From: Harry Marnell
Topic: 5659 Message: 5659

For those who check the daily fire news links and other (mostly) Southern California fire communications info and website links, please note that the old "qsl.net" server appears to be dead.

The new permanent URL for the page is:
http://www.snowcrest.net/marnells/lafire.htm

Harry

5660. New file uploaded to norcalfire

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-23 15:51:37 UTC
From: norcalfire@yahoogroups.com
Topic: 827 Message: 5660

Hello,

This email message is a notification to let you know that
a file has been uploaded to the Files area of the norcalfire
group.

File : /ICS420-1AppendixB.pdf
Uploaded by : tcomm_specialist <tcomm_specialist@...>
Description : CA Three-letter ID's

You can access this file at the URL

http://groups.yahoo.com/group/norcalfire/files/ICS420-1AppendixB.pdf

5661. Three-letter ID's

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-05-23 15:55:56 UTC
From: Tim Tribble
Topic: 5661 Message: 5661

In an attempt to solve the issue regarding the use of three-letter ID's in messages I have uploaded to the files section the pdf version of appendix B of the FOG manual. This contains all the three letter ID's that are used in the California Fire & Rescue Mutual Aid System.

Station/Engine info for
Tehama County http://www.norcalscan.org/tehama/cdfstations.html
Butte County http://www.norcalscan.org/butte/cdfstations.html
Shasta County http://www.norcalscan.org/shasta/cdfstations.html

And yes - it is a monumental task to record engines and stations for everywhere in the state. Even station numbers to each location is close to impossible unless you have official documents/maps etc. CDF has a little book called the CDF Radio Plan that is an official booklet each engine carries. If you know somebody in CDF and ask real nice, you can get the book which lists engines and their locations.

I did a mixture of buying compass maps (which are 60% accurate for station numbers and their location), cross referencing with a copy of CDF Radio Guide, listening for a long time on the scanner to match station locations with responses, and literally driving around to some unknown station to see what number is plastered on the front wall ;)

Jake

Sean,

There are two "master lists" one for the North and one
for the South. They are about 33 pages each. They are
also marked "For Official Use Only Do Not Duplicate"

You are going to have to do like Jake did and just
figure it out on your own.

Tim, I would think that data would be readily available in somones database. At one or more of the local, regional, or Sac HQ that info would have to be available. Same for Camps/crews, plus all HFE equip.

Much the same as you knowing @ any given time where each & everyone of the OES apparatus are assigned to a given agency.

Just my 2 cents worth!

Danny

Tehama/Glenn unit is declaring fire season Monday June 2nd. Usually the whole area does it at once, so SHU, BTU and NEU as with the rest of the norCal shoudld start then too.

Just got severe thunderstorm/tornado warning - large red cell going into Trinity County. Hmmmmm

BTW, I put out, incorrectly, that this is east of Mt. Hamilton in Santa Clara County. Its actually west of Patterson in Stanislaus County, east of Alameda County. 106 met its heli-tender at Tracy Airport for fuel (airport didn't have jet fuel).

The Fire at last report is approx 350 acres in rolling to moderate terrain. The fire was 20-30 acres at the arrival of the first engine. So far committed are 19 engines, 2 dozers, 1 Air Attack, 2 Tankers, 3 CDF Copters, 1 East Bay Regional Park Copter, 2 Fire Crews with more on order. The Comm Van from Morgan Hill is enroute and the MKU from BEU has been ordered to the fire.

5697. SmokeReports online for 2003 fire season

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-01 11:38:46 UTC
From: Ron Angle
Topic: 5697 Message: 5697

Good day. As many states throughout the West declare the 2003 wildfire season open this week, we would like to remind you that SmokeReports will be online once more.

We are currently at http://www.withmy2hands.com/smokereports/.

Our new URL, www.smokereports.com should be up and running by mid-week as we switch servers.

SmokeReports is a large wildfire news digest featuring agency and media news reports of wildfire activity in 11 western states. We try to summarize what is happening throughout the west and have it available online by 10 a.m. each morning. Our front page prime feature is "The One Minute Overview". Inside pages provide more in-depth coverage of wildfires of 1,000 acres or more in size.

One caveat. We are NOT an initial attack news site; nor do we report anything related to scanners, resources, or unit IDs. There are more than enough groups filling that need.

For those that receive news by email, we also maintain a Yahoo group.

http://groups.yahoo.com/group/smokereports/

The news group follows the same guidelines as the web site: Western U.S. news of thousand acre wildfires.

Come by and visit; we have no advertising and we do this as a public service. And have a safe 2003 season.

Topic: 5699 Message: 5699

sounds like the first sierra fire of the year is here alot of units
enroute to the verdi nv near the ca/nv state line area for a wildland
fire sounds like its off I-80
as i get more info i will let everyone know
i.c is N.D.F training-2
frequencies
COMMAND 169.8750 H.T.F PEAVINE TONE:123.0
TACTICAL 154.2800 WHITE FIRE-1
AIR TO GROUND 170.000
AIRCRAFT
AIR ATTACK 3 UNIFORM VICTOR FROM MINDEN
TANKER 09 FROM CEDER CITY
N.D.F HELITAK IS ENROUTE WITH A CREW
ALSO EASTERN SEIRRA-1 IN ENROUTE

5700. RED FLAG WARNING

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-02 12:39:14 UTC
From: Jeffrey
Topic: 3929 Message: 5700

RED FLAG WARNING TODAY FOR THE NORTHERN SACRAMENTO VALLEY. THIS
WARNING IS FOR NORTH WINDS AND LOW RELATIVE HUMIDITIES...

THIS WARNING INCLUDES FIRE WEATHER ZONES:
215.

DISCUSSION: A HIGH PRESSURE RIDGE IS BUILDING ALONG THE WEST COAST
TODAY. A MODERATE NORTH WIND GRADIENT IS DEVELOPING ACROSS SHASTA
COUNTY THIS MORNING BEHIND A WEAK LOW PRESSURE AREA LOCATED OVER
IDAHO. THE COMBINATION OF THE VERY WARM TEMPERATURES NORTH WINDS AND
LOW HUMIDITIES TODAY WILL PRODUCE RED FLAG WARNING CONDITIONS OVER
THE NORTHERN SACRAMENTO VALLEY.

NORTH WINDS OF 10 TO 20 MPH WITH LOCAL STRONGER GUSTS TODAY WILL
COMBINE WITH LOW HUMIDITY LEVELS TO PRODUCE RED FLAG CONDITIONS FOR
AN 8 TO 10 HOUR PERIOD LATER THIS MORNING AND THIS AFTERNOON.

PLEASE ADVISE THE APPROPRIATE OFFICIALS AND FIRE CREWS IN THE FIELD
OF THIS RED FLAG WARNING.

3454?
Is sta 14 {Sunol} a CDF O/O facility? If so aren't the SCU units numbered in the 1600 series? Could the njine possible be 1634?

My roster shows the numbering plan for CDF Units as follows:
Unit #
AEU 4500
BDU 3500
BEU 4600
BTU 2100
CZU 1700
FKU 4300 {Almost an oops}
HUU ?
LMU 2200
LNU ?
MEU ?
MMU 4200
MVU 3300
NEU 2300
RRU 3100
SCU 1600
SHU 2400
SKU 2600
SLU ?
TCU 4400
TGU 2500
TUU 4100

And the 5 contract Cnty's using a traditional numbering plan.

Danny

5715. Re: [NorCalFire] Request Unit #'s

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-04 19:57:49 UTC
From: caladded@aol.com
Topic: 5710 Message: 5715

Engine 1684 and Dozer 1641 (or 42) and ALCO Engine
3454 Not sure if CDF has a 2nd Engine coming out of it or not, if they
do, I would guess its 1694 but not positive.

Ed

From: Tim Tribble
Topic: 5710 Message: 5716

CDF Sunol Units are: Dozer 1641, Transport 1641, Dozer
Tender 1641, E-1664, E-1684, Utility 1634.

Dozer 1642 is at Del Puerto and ther is no E-1694.

5728. Re: [NorCalFire] Request Unit #'s

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-05 00:11:43 UTC
From: Danny
Topic: 5710 Message: 5728

Ben, A huge monster thank you for the unit details for CZU/SCU.The perfect collection of what I was asking for. If we can just get other group members to send in there data for the unit they live in/near then it won't take very long to complete the 21 units that make up all of CDF.

Now a few follow-up Q's if I may. Do any of the other remaining 22 sta's have a # {similar to Sunol's 14} associated w/them? Is there any way to post the BC #'s for the different sta's? Where are the unit HQ's for both & do they operate apparatus @ them? Does SCU still man there 3 & CZU there 2 lookouts?

Again a very big thank you. This is a really great start.
Danny

Columbia Helicopters has pre-positioned three of their heli-tankers in potentially high use areas. One at Durango, Colorado; one at Prescott, Arizona and one at Redding, CA. These heli-tankers are not on contract; but are on Call-When-Needed (CWN) status. Columbia is betting that the heli-tankers will be used extensively this summer.

3454 is a ALCO engine that is staffed by CDF/Sunol
through a contract with ALCO to protect the Sunol
area, not staffed by volunteers.

From: captainbiddle
Topic: 5741 Message: 5741

ALL AIRCRAFT STILL IN AIR AND THE HEAVY TANKER HAS BEEN CALLED OUT (I
DONT KNOW WHAT THE TANKERS NUMBER IS)AND CREW 425,427, AND 429 FROM
N.D.F ARE ENROUTE ALL LONG E.T.A'S DUE TO TRAFFIC IN RENO
FREQUENCIES
ALL CHANNELS ARE STILL SAME
COMMAND:H.T.F PEAVINE 169.8750 TONE:123.0
TACTICAL:WHITE FIRE-1 154.2800
CREW NET:158.8650 (THIS IS N.D.F'S CREW NET)
AIR TO GROUND: PRIMARY 170.2250
AIRCRAFT
AIR ATTACK 3 UNIFORM VICTOR FROM MINDEN
TANKER UNKOWEN FROM MINDEN
HELITENDER 403 FROM N.D.F MINDEN
CAPT BIDDLE

5742. Unit Numbering Plan

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-07 03:35:10 UTC
From: jplmac43
Topic: 5742 Message: 5742

Would anyone know if the numbering plan{s} for federal agencies
{BIA, BLM, FS, FWS, NPS} are organized/make since similar to the
CDF plan as follows:

40-49 Dozers/Transports/Tenders
50-59 SS/Utilies/Dumptrucks
60-69 Type 1 Njines {4x4}
70-79 Type 2 Njines {2x4}
80-89 Type 3 Njines {Urban interface full size}
90-99 overflow for Njines, misc equip, water tndrs

And what is the seperation # in the 90-99 bracket for engines and
water tenders?

Danny

5743. FIRE IN THE COLD SPRING VALLEY (UPDATE-2)

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-07 04:45:50 UTC
From: captainbiddle
Topic: 5743 Message: 5743

FIRE CONTAINED TO LESS THAN 15 ACRES BUT MANY RESOURCES STAYING
OVERNITE ALSO I DID FIND OUT WHAT THE TANKER TYPE WAS IT WAS A DC-4
VERY NICE WATCHING IT FLY BACK TO MINDEN TO GET RETARDENT
capt biddle

Hello,

This email message is a notification to let you know that
a file has been uploaded to the Files area of the norcalfire
group.

File : /Western States Fire Rotorcraft Roster.xls
Uploaded by : jplmac43 <d952@...>
Description : A works in progress project to create a roaster of ALL agency helicopters in the western states. Yes I know a good # of them are contracted, but I would still like to add to the WIP roster. Thank you for any help.

You can access this file at the URL

http://groups.yahoo.com/group/norcalfire/files/Western%20States%20Fire%20Rotorcraft%20Roster.xls

To learn more about file sharing for your group, please visit

Have heard a few reports 6-7-03 @18:30'ish in the area of Frenchman lake,
Plumas NF. It is quite a ways from Tahoe area though. Looks nasty in that area.

Later,
Rich

Anyone know of a web app or program to convert township/range/section to lat/long?

That would make it easy to plot on various mapping programs....

5764. Re: [NorCalFire] Santa Cruz Fire PLs

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-09 07:30:01 UTC
From: caladded@aol.com
Topic: 5762 Message: 5764

Kelty list white 1,2 and 3 in S. Cruz as using 162.2
personally, I never use a PL with white because I might miss something big
and everybody uses it. OTOH, it might come in useful to prevent hearing outside
agencies for that Exact reason, everyone uses them.
Ed

5766. Air Attack

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-11 14:01:28 UTC
From: Jeffrey
Topic: 5766 Message: 5766

Can someone up north (redding area) confirm for me what Air Attack is sitting at your airbase up there? Reason I'm asking is Hollister still has yours(120AA) and Im looking for 460 AA

JEFFREY IN HOLLISTER <><

Therefore, my brothers, I want you to know that through Jesus the forgiveness of sins is proclaimed to you.

From: Howard W.
Topic: 5769 Message: 5769

I just saw three trucks of the Eldorado Hot Shots heading east on highway 74 through Hemet. We don't have any fire activity in the area at the present. Anybody know why the crew is in my neck of the woods?

From: Jake H
Topic: 5766 Message: 5772

Remember Jeff how air attack numbering works. CDF air attack has the first two numbers matching the unit number they belong to with a zero on the end. The CDF copters have the first and last numbers with a zero in the middle to match the unit. Copter 205 belongs to unit 25. Air Attack 240 belongs to unit 24, Redding. Air Attack 120 that you mentioned would belong to Ukiah I believe, unit 12.

We have 240 sitting on the tarmac up here at Redding catching some cool sun ;) Some will probably be moving around a little for last minute training etc.

Thanks, Hwy 74 through Hemet is not a route they would normally
take if enroute to an assignment in R-3. I knew it had to be
something besides a fire dispatch.

Lots of dead trees in local mountains.

Howard

5778. Re: Air Attack

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-13 17:29:51 UTC
From: Mark
Topic: 5766 Message: 5778

I saw a email yesterday that showed a bunch of CDF tankers will be delayed in start the fire season due to maintenance issues. So alot of the normal tankers won't be where they should be until mid july. It looked like most where waiting there FAA certification flights after having wing work done on them.

From: zerg90@webtv.net
Topic: 5780 Message: 5780

1. Do any CDF wildland engines or any USFS engines carry Jaws or defibs?

2. Do any helos carry Jaws?

3. Re the Shasta Veg fire - did they dispatch 8 engines all on the first / initial alarm (dispatch)?

4. Do all/most of the CDF and USFS stations close completely in the winter in Northern California? Do they leave the engines in the very rural stations, or do they mothball them in Redding or Tehama?

Thanks for your help - Peter S - Boston MA

5781. Re: [NorCalFire] Some Questions

From: Mike
Topic: 5780 Message: 5781

1. Do any CDF wildland engines or any USFS engines carry Jaws or defibs?
I think most have at least a defib. Not all have jaws.

2. Do any helos carry Jaws?
I dont think so.

3. Re the Shasta Veg fire - did they dispatch 8 engines all on the first
/ initial alarm (dispatch)?
Yes thats a full CDF wildland dispatch. The Redding Fire engines were also included becuase it was in the MTZ (Mutal Threat Zone)

4. Do all/most of the CDF and USFS stations close completely in the
winter in Northern California? Do they leave the engines in the very
rural stations, or do they mothball them in Redding or Tehama?

Thanks for your help - Peter S - Boston MA

I can only speak for the CDF engines in Santa Clara
County, but at least 2 wildland engines carry defibs,
all carry O2 and pretty extensive first aid kits, and
one of the engines carries a jaws. The helicopter
does carry a defib and has access to the jaws if
needed, what Santa Clara does if there is a major
accident requiring jaws, they contact San Jose and fly
the rescue crew into the scene.

I have never heard of a helo flying a rescue crew from San Jose anywhere.
I am not saying they don't ...anybody ever hear of that? I would bet one
of the South Santa Clara Fire units or County Truck 12 May have jaws. Just a
guess. I would assume both Lifeflight and Calstar have defibs.

Don't be so sure. The new San Diego FD copter will
carry a mini Holmatro extrication tool as well as a
ten person hand crew and their tools. Most likely
it'll have a medic on board too. Oh and the hand crew
will be trained to Rescue Systems 1 and Vehicle Rescue
standards. Now there's a resource!

We just got some Holmatro tools in the dept and they are VERY nice. Perfect size to fit on a helicopter, all self contained. I can see the need for remote extrication where rural fire departments don't have the money to buy any extrication equipment and the copter can fly in with the equipment.

Jake

Guess we need someone who knows for sure locally who can get the jaws to a remote site. Considering the number of bad crashes on 152 over the years, I would guess some unit within a reasonable distance has a pair.

Interesting point John about your bird down your way. The closets FD helo around here is Sacramento Metro. Although the PD helos in Oakland and San Jose really help out the FDs when needed. Wonder if 106 can get to a pair quickly if needed, then are certainly close enough to the area.

Ed as far as 152 pacheco pass is concerned Ive recently learned that engine 1691 (model25) is now equiped with jaws and is/or will be a ALS engine in the very near future as for CDF copters doing rescue work down here in the boonies south of Hollister copter 406 has been used as a rescue copter and has hauled equipment as well as hauled out victims it does not happen often but it has happened..

5796. 2 Changes For California Fire Season

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-15 18:38:43 UTC
From: zerg90@webtv.net
Topic: 5796 Message: 5796

http://www.bayarea.com/mld/cctimes/news/6010226.htm

Inmate crew members will now receive 2 days off their sentence for every one day worked fighting wildfires.

The 22 CDF fire towers will not be regularly staffed in order to save $700,000. The towers had been providing 7% of the initial reports on fires.

In Santa Cruz County 4 CDF engines carry the jaws. and most of them
carry defibs - all should be carrying them in the next month or so.

> 2. Do any helos carry Jaws?

> 3. Re the Shasta Veg fire - did they dispatch 8 engines all on the

Depends on the CDF unit or Forest where they store the engines. Most
CDF stations move the engines to stations that are used year around.

Yep, "Moderate New Members" is the only way to go.

Just takes two clicks at

http://groups.yahoo.com/group/TankerLocations/settings?mode=15 and
http://groups.yahoo.com/group/CalFireHelicopters/settings?mode=15

Thanks to everyone for your replies. That was very interesting. If someone wants to develop a list of CDF stations that stay open in winter, and / or a list of any federal engines in Northern California - I can paste a list together if you folks can supply info from the various areas. In fact - I suppose that Jaws equipped engines could be marked with a "j" and defib equipped engines could be marked with a "d" - like 'SHF E5272 - jd' - but that would take a lot of work to bring that all that info together. (I think I can hear Danny M chomping at the bit all the way over here on the Right Coast :-)

Oh wait - Jeffrey from the CenCalFire list - aren't you already working on this? Or something similar?

I'd expect to see a fire helo carrying a Hurst tool, however I don't forsee an air ambulance carrying one. Weight is a serious issue with a air ambulance - from the positioning of a scalpel to the location of the heart monitor - everything is placed for a reason. Now true, some items HAVE to go in certain places, but anything that can be put anywhere is placed there because of a weight issue. There's been times I was unable to fly along due to weight issues. And any time I do fly along, there's the understanding that when we get to the scene, the pilot may well look at me and give me the boot based on the patient and crew weight. And we're not talking about a 400 pound patient - this could be with a 200 pound patient, depending on the crew. What would the ideal flight nurse be? A retired horse jockey. If CALSTAR did carry a Hurst tool, I think that thing would be left at so many calls it wouldn't be funny. "Sorry, Sir. We can't transport you. We're overweight. But we've got this dandy Hurst tool." Now I do see an advantage for a fire helicopter to have one, but it would probably be a rare instance where they use it. First off, a helicopter can't just land ANYWHERE. Well, ok, with a well set up LZ, it can. But a well set up LZ requires LZ security and a ground crew. And that ground crew probably has the JOL already. Granted there could well be that remote location where the air ambulance can get there before any ground units, however it's not the responsibility of a Flight Nurse to extricate - we fly with 2 Flight nurses and a pilot. That wouldn't be sufficient to extricate. Flight Nurses aren't trained to extricate, they aren't trained to perform cliff rescues, they can't put out a fire, etc. Those are jobs suited for a fire rescue crew.

I'm guessing this 10 seat helicopter is a BIG helicopter. CALSTAR can land in a 75x75 area. I don't think that 10 seater can. :)

Just my .02. Refunds cheerly provided. ;)

5830. HWY 50 FIRE

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-18 00:34:08 UTC
From: captainbiddle
Topic: 5830 Message: 5830

The Highway-50 Fire is burning 2 miles up Hwy-50 from the Hwy-395/50 Junction just south of Carson City. The fire started at 2:30 today. Cause is under investigation. Currently the fire is approximately 450 acres. The fire is burning in brush and grass, with patches of coniferous forest. No estimate of Containment or Control at this time.

Approximately 200 firefighters are on scene, with:

30 Engines
3 hand crews
3 water tenders
2 helicopters
2 single engine air tankers
2 dozers
1 heavy air tanker

1 heavy air tanker is on order

The fire is being managed a unified command made up of Carson Fire Department and the Nevada Division of Forestry. Jurisdiction at this time is a combination of Carson City and NDF.

15-20 structures are in the general area of the fire and are threatened. No structures are damaged. There are no active evacuations at this time.

Highway 50 is closed until further notice. Nevada Highway Patrol and Carson City Sheriff's Departments are on scene directing traffic and handling road closures.

Agencies supporting the fire include the Bureau of Land Management, US Forest Service, Tahoe-Douglas Fire Department, Carson City Fire Department, East Fork Fire Department, Reno Fire Department, California Division of Forestry, and Nevada Division of Forestry.

Here is a little news snippet I just read...

And the Forest Service has taken the rare step of shifting a contingent of smokejumpers from their usual Redding base to Southern California to help stamp out wildfires as soon as they spark.

This is a very interesting story...sort of an Apocalypse This Season pronouncement.

Danny -

There are spammers who will subscribe to a list, send their spam,
and unsubscribe all within a 10 minute period of time.

Others will subscribe, sit for some time (I had one sit for three
months on ScanNorCal) and then send a batch of spam.

A number of list owners like Jake and I have adopted the 'moderated
until verified' stance for new members to fight this problem. Note
that our lists don't have a bunch of off-topic traffic.

I've heard that part of the reason for that is that most jumpers are Class C fallers. They'll be put to work doing project work and helping to mitigate the problem. My personal goal is to call for a stick of jumpers to land within city limits, but I don't think that'll happen.... LOL

5838. HWY 50 FIRE (UPDATE-2)

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-18 15:27:10 UTC
From: captainbiddle
Topic: 5838 Message: 5838

HIGHWAY 50 FIRE

The Highway-50 Fire began two miles up Highway 50 from the Highway 395/50 Junction, just south of Carson City at 2:30 p.m. today. The fire is now 1,180 acres, is staffed with 279 fire fighters, is not active, and has an estimate containment of June 18, 2003, at 6:00 a.m. Carson Fire Department and the Nevada Division of Forestry jointly managed the fire. Three air tankers, two single engine air tankers, and a heavy air tanker dropped 17,500 gallons of retardant on the Highway-50 Fire.

In addition to fire line building and mopping up, crews are presently providing enhanced structure protection by burning out grasses and brush behind houses in Voltaire Canyon. Voltaire Canyon is north of Highway 50, and west of Highway 395.

Seventy homes and 35 businesses were threatened during the height of this fire. Approximately 150 girls and youth camp personnel were evacuated from Clear Creek Youth Camp. Voluntary evacuations occurred in Voltaire Canyon and Clear Creek. Voltaire Canyon is north of Highway 50, and west of Highway 395: Clear Creek is on the south side of Highway 50 and west of Carson City.

Highway 50 was closed for a time, creating massive traffic jams in and around Carson City for over three hours. The fire has impacted wildlife habitat, and Lake Tahoe's recreation areas and businesses. The fire also jeopardized Carson City's municipal water supply.

Fire line resources include:

25 Engines
7 Hand Crews
6 Water Tenders
3 Helicopters
4 Dozers

Cost: $60,000
Injuries: None
Supporting agencies: Forest Service, BLM, Tahoe-Douglas Fire Department, Carson City Fire Department, East Fork Fire Department, Reno Fire Department, and Nevada Division of Forestry.

It is an AM Aircraft frequency, but not one used in
CA.

Enough fires have broken out in Arizona in the past 48 hours that federal fire managers are sending 10 additional hotshot crews to the region to supplement the 20 crews already in place. Seven active wildfires are currently by worked by federal and state firefighters.

5848. Wind-Driven Blaze Destroys 200 Homes Near Tucson

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-20 04:53:23 UTC
From: Editor
Topic: 5848 Message: 5848

New York Times, June 19 ☐ A wind-driven wildfire roared through the upper reaches of the Coronado National Forest today and destroyed as many as 200 homes, businesses and other structures in the mountain town of Summerhaven, fire officials said. Dozens of firefighters had to flee for their own safety.

In the space of a few hours, the so-called Aspen fire more than doubled in size, pushed by wind gusts of 40 to 60 miles an hour and fed by bone-dry brush, Douglas firs and Ponderosa pines on Mount Lemmon, at an altitude of 8,200 feet. Late this afternoon, a huge cloud of smoke, clearly visible from Tucson, 30 miles to the south, billowed into the sky.

more at www.newyorktimes.com

SmokeReports will be following this story overnight and will have full wrapup of this and other major fires in Arizona. Look for updates by 0700 PDT.

From: Editor
Topic: 5851 Message: 5851

NOAA WX

NOW... SHOWERS AND THUNDERSTORMS ARE CONTINUING TO DEVELOP ALONG THE BORDER OF SHASTA AND SISKIYOU COUNTIES THIS AFTERNOON...STRETCHING FROM INTERSTATE 5 EASTWARD TO SR89. STRONG GUSTY WINDS...FREQUENT LIGHTNING...VERY HEAVY RAINFALL AND SMALL HAIL MAY ACCOMPANY THE STRONGER STORMS. THE STORMS SHOULD DIMINISH AFTER SUNSET. GC

This is showing up pretty good on Doppler radar
http://www.wrh.noaa.gov/radar/latest/DS.p19r0/si.kbbx.shtml

For a much more vivid impact image, check out the recent lightning hits on www.lightningstorm.com

From the pattern of these hits and the indications of minimal accompanying rain, expect new fire starts to really kick up by this weekend. Days off may start to become precious for those in uniform.

5852. Lassen NF and Lookouts

From: Jake H
Topic: 5852 Message: 5852

Turner Mtn in Lassen National Forest has been shutdown for health and safety concerns of the building. However with CDF losing lookout staffing, Lassen USFS and Tehama/Glenn CDF have agreed to staff CDF's Inskip Pk lookout with Lassen NF personnel 24/7 until late Fall. They will report on both TGU Local 151.370 and LNF Forest net 172.225.

This explains the two veteran old voices of Turner Mtn now on Inskip Pk giving the weather and lookout reports. ;)

Jake
(info from local paper, wasn't aware Turner was down)

5854. Hum from ear piece on BC895XLT

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-22 04:22:06 UTC
From: jlq2
Topic: 5854 Message: 5854

I experience an annoying hum through the ear piece when it is plugged into the "EXT SP" jack of my BC895XLT. It is at all times, both when scanning and when receiving.

Is anyone else experiencing this? Is it normal for this unit or scanners in general?

Thanks for your assistance!

From: DAVE HUSBANDS
Topic: 5854 Message: 5855

it is not at all "normal". if you have an output that is dedicated for the earpiece it should be used as the "ext. spkr." as such may have an output that is too high. if not, try reversing the a.c. plug to determine if you have an obnoxious ground loop. all the best,dave.

From: Ed
Topic: 5856 Message: 5856

SCU with MMU at El Toro Ranch off highway 152 in Eastern Santa Clara
or Western Merced county. unknown acres
8 Engines 1 or 2 dozers request 2 helos 4 air tankers

SCU 151.445 Tac 9 / 151.385 unknown on Airshow but usually
is Air tactics 5 (old Green Air 151.295) for this area.
Ed

5857. Pacheco pass fire blows up

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-23 21:21:43 UTC
From: Ed
Topic: 5857 Message: 5857

151.445 is coming is strange , kind of hit and miss.....but
the fire apparently blew up and overran an Engine , but no injuries
IC just requested 10 more Engines , additional handcrews to total 8.
3 additional dozers . Helo 106 was down , but just became available
is is responding , I believe he requested addtional air tankers also.
IC mentioned fire has doubled in size in heavy brush but I didn't
hear an actual size of the fire yet.

SCU 151.445 / Tac 9 151.385 / Air show Tactics 5- 151.295

Ed
They are sending two Strike Teams

ED or Jeff, as time permits would you keep an ear listening for a better location other than 152/El Toro. I'm trying to track incident {has the IC given it a name yet?} & UTL in either my Calif. RATG or AAA maps for Santa Clara/Merced/San Benito Cnty's. I do however see that there is a huge amount of real estate in that country that has the potential to really grow.

From: Mark
Topic: 5857 Message: 5863

For a reference location this would be in the Bell Station area of Hwy 152 (east of casa de fruta)- Steep rugged light to heavy brush - AKA hells hole since its all cattle country.

From: Jake H
Topic: 5852 Message: 5864

Health concern was lead-based paint, asbestos, rats and an unstable foundation. The building will eventually be replaced but for now the Forest and the CDF unit have a 5 year agreement to staff Inskip Lookout instead and that agreement can be extended as needed.

The frequencies you put up are Riverside County Fire Dispatch (151.385) and San Bernardino County Fire Dispatch(151.445). Are there tones or anything like that, because I am just picking up there regu;ar dispatch.

Please let me know anything ASAP.
Thanks
Ryan

> Ed

This incident got much more interesting in the last half hour.

A little after 13:00 IC said it was looking pretty good and he estimated containment around 18:00. At that time he had four hand crews and various other resources.

Around 14:00, IC had things to say like, "Contact Hollister base and tell them I need a helicopter, I need it right now", "this fire just doubled in acreage", etc. He ordered up 4 additional hand crews and more engines

Around 14:15, IC ordered 4 _more_ hand crews, for a total of 12 on the incident (some confusion at first as to whether that was 8 total or 8 more; turned out to be 8 more over the 4 on-scene), 3 dozers, etc. Oh, and more air tankers.

And then around 14:22 or so, a Division Chief assumed IC for the incident, and there's more command personnel inbound.

4 hand crews on-scene -> 12 total ordered for the incident in a real short period; this could get really interesting. Not to mention ordering 4+ air tankers, but from the comm traffic it seems they only have one available.

Thanks for the heads-up, Ed.

Cheers.
-Bryce

Ryan,

The frequencies above are licensed to the State of California on
behalf of the California Dept. of Forestry and Fire Protection,
who reuses them throughout the state.

If you are hearing the CDF San Bernardino Unit (San Bernardino
County Fire is another agency now) and the CDF Riverside Unit's
operations on these frequencies, I suspect you are not anywhere
near Pacheco Pass in Santa Clara County, where these frequencies
are also used by the local CDF Units.

Don

Sorry for the intrusion into our normally on-topic traffic, but a couple of recent events have lead to this message.

We normally are used to 'instant' posting of messages to these lists. There are factors, however, which impact the speed of message distribution - SPAM, and YahooGroups' server farms.

As the owners and moderators, we see multiple attempts to SPAM these lists daily. Most of these attempts come from non-members or members who will subscribe, send SPAM, and unsubscribe within a short period of time (one to six hours). On the other hand, some of these attempts come from 'sleepers' who subscribe and sit for months before sending their SPAM. To combat this, the list owners have set the lists up so only members can post, and new members default to "moderated" posting status. In general, this status remains set to "moderated" until the list owners know the member is legit, and is not an account set up to send SPAM.

YahooGroups operates multiple servers to process the messages sent to these groups. As you might expect, servers are computers too, and occasionally overload - resulting in delays of message processing. This is why you may see the reply to a message in your in box before the original message shows up.

Please keep these factors in mind when you post and don't instantly see your message hit the list. The chances are your message is there, working through the process.

5879. Tier-3 grass file San Jose east foothills

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-26 18:18:17 UTC
From: Bryce Wolfson
Topic: 5879 Message: 5879

Had access problems, called TIER 3 + extra 4WDs (for access issues) before any units were actually on-scene. Early estimates from SJFD put it at 3 acres, and CDF 5-10 acres. Containment estimated at 15-20 acres.

Lots of San Jose and SCU CDF, plus Helo 106. Divisions A and B; apparently "air division B" "has no ground units assigned yet", so pretty much everything's in A.

Mutual aid inbound units include a CDF rig all the way from CZU/Felton. "Additional aircraft" on order. Turns out to be 6 air tankers + some additional helos, but they're talking about dropping the order to just the two tankers out of Hollister and no additional helos.

Started about 10:15-10:30; at this point, it sounds like it's mostly under control, with only one exposed line left. FWIW, I'm registering 101F at my residence 3 miles to the south, but winds of only 3-5mph.

San Jose Cmd 3: 154.115
CDF Tac 2: 151.16

Cheers.
-Bryce

That's actually a second incident.

I realized after hitting send on the last post that I didn't give the actual location; it was up off Aborn with staging at Fowler & Yerba Buena.

While that was calming down, a battalion chief on that fire called in on SJFD primary "emergency traffic" to call a TIER 1 for a fire at Yerba Buena and Nieman (dispatch allowed as how they had just started receiving calls on it), and that he was leaving the one fire to go the other.

This new fire turns out to be easy access from one side, with basically no access from the top. Early on the first BC ordered the CDF helo mutual aid, but nothing else for MA. However, because of the close proximity of the other fire, BCs had a serious concern about "having enough resources if this one goes to a TIER 2". A few minutes ago dispatch pointed out that, with the additional this-n-that that had been ordered along the way, they technically were already at about a TIER 2-1/2, just without all the standard notifications for a TIER 2, and would they mind if they just called it officially? So now it's officially a TIER 2.

Since CDF Tac-2 is already in use for the other fire, CDF seems to be working on White 2. I haven't noted specifically what freqs air ops are on.

SJFD Cmd 4: 153.980
Fire White 2: 154.265

Just declared main body of the fire knocked down a couple of minutes ago.

> except I am now outta that hot sun :-)

Registering 104.5F now, foothills east of 85 & 101 in South San Jose. Gonna be a busy day. ;-) Especially since every agency is sending the whole GD cavalry to every incident.

Earlier incident pretty much wrapped up, with Water Tender 18 the only SJFD apparatus left on-scene with the remaining CDF response.

Cheers.
-Bryce

5884. Fire pics from today

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-27 04:11:36 UTC
From: Nick, KG6NMP
Topic: 5884 Message: 5884

Well I picked a good day to drive 650 miles up I-5, I saw 3 fires on my trip from San Diego to Chico, and got pics of them. I am tired and its 100 degrees so you don't get a pretty website, but you can look at the pics all the same.

Controlled burn in Hamilton City:
http://pages.sbcglobal.net/nickspace1/HamiltonCity/

Veg fire somewhere in the valley:
http://pages.sbcglobal.net/nickspace1/SomewhereOnI5/

Veg fire about 10mi south of Sac County:
http://pages.sbcglobal.net/nickspace1/WoodbridgeVeg/

I will add them to my webpage later, those links won't work after that, but it will take me a week at least.

Enjoy, Nick

5885. Another TIER 3

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-27 00:00:02 UTC
From: Bryce Wolfson
Topic: 5885 Message: 5885

Another TIER 3, made it up to TIER 3 before any attack has begun, just now making access. About 1.5 miles NW of the first one this morning, perhaps 3mi N of the second one.

Initial report was 'area of Quimby/Mt. Hamilton", current reports from fire crews place it at Mt. Pleasant/Norwood, residence on Higuero (sp?) Highlands threatened, reported by CDF, SJFD responding protection.

Engine 16 "out of service mechanical, overheating, we've got lights going and such".

SJFD Cmd 3: 154.115
CDF Tac 6: 151.325

Long day continues; registered 108.9F here at 4:00, now still over 105F.

Cheers.
-Bryce

5888. example of a perfect fire post

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-27 17:57:37 UTC
From: Jeffrey
Topic: 5888 Message: 5888

Lets all try this format and see if it works for us

here is a suggestion make a word doc. with the

time=,conditions=,units=,frequencies used=

bars already in place then fill them in and cut and paste in e mail dont
save changes and your ready for the next post !!!

Subj: Re: Old Topanga Fire(Calabasas, Los Angeles County)

time ,use military time 14:00.
conditions= Fire burning S of Mulholland Dr & E of Old Topanga Rd in Calabasas
(LA TG 0559 G7). Running uphill in heavy brush, 5 acres. Unified
Command: LACoFD, LAFD, CDF (threat to SRA land).

units requested or responding =

frequencies used= LACoFD: Fireground Blue 3 (470.6125), A-G Tac 19
(154.400)
LAFD: Command Chan 11 (860.7625)

hope this is clear and works for all.....let me know

JEFFREY IN HOLLISTER <><

From: Bill Snyder
Topic: 5887 Message: 5889

> ...with all these calls coming in so (rapidly)...try to
> put the time of dispatch in the subject line of your posts...

(By "time of dispatch" I assume you are referring to details of a particular transmission or update, and not the original Time of Alarm.)

The Subject line is not a good place for the time stamp. Updates to an incident are normally generated by a Reply to a previous message (forming a Thread). You don't want to see the prior message's time stamp propagated in all the Reply messages.

Instead, consider placing a (accurate) Time Stamp at the beginning of the message body. And, optionally, 24-hr time is even better than am/pm.

> And how about a COUNTY name...either in the Subject line or very near
> the beginning of the text.

Agree! At or near the beginning of the message body text would work nicely.

And since the discussion topic is aimed at reducing confusion when nearly simultaneous posts come in for multiple incidents, why not take a page from tried-and-true Incident Command System procedures? Every large/significant incident managed under ICS will be uniquely named, often right at the initial size-up. Subsequent radio dispatches and references to an incident will carry the Incident Name for easy identification.

So, if every post regarding an in-progress incident carries its official Incident Name, and if each message body references the time the information was gleaned, and indicates the county in which the incident is located, confusion can be greatly reduced.

For example:

- -

Subj: Re: Old Topanga Fire

14:00. (Calabasas, Los Angeles County)

Fire burning S of Mulholland Dr & E of Old Topanga Rd in Calabasas (LA TG 0559 G7). Running uphill in heavy brush, 5 acres. Unified Command: LACoFD, LAFD, CDF (threat to SRA land).

LACoFD: Fireground Blue 3 (470.6125), A-G Tac 19 (154.400)
LAFD: Command Chan 11 (860.7625)

- -

Thoughts?

Still to big for Helos. And to top it off that is not the primary mission for helicopters. If it was LA County and City would already be carrying them - if they need them they get a usar team and fly them in with there equipment.

5913. Re: [NorCalFire] wildland fire. hwy 78 near esparto

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-06-30 02:13:51 UTC
From: Harry Marnell
Topic: 5898 Message: 5913

There wouldn't be two Hwy 78s in California. SR 78 runs in San Diego County from I-5 near Oceanside to I-15 near Escondido, then continues easterly near Ramona and Julian to SR86 in Imperial County, and on to I-10 near Blythe in Riverside County.

Might be a County Road 78 in Norcal; I know Yolo has a lot of "numbered roads like that.. "Road 87, Road 14" etc.

hm

From: Harry Marnell
Topic: 5898 Message: 5916

Yep, yahoo has been doing weird stuff this weekend. On one of my groups I posted a question, and got two replies before I even got my own question back. I woulda thunk when an email goes out to the list it goes to everyone... but then there are so many bounces these messages make it's amazing it runs as smoothly as it generally does.

I think we've gotten spoiled.

Harry

This would County Road 78. That is if Esparto is still
in Yolo County.

NorCalScan.org is back up after a 4 day outage of a data center in Florida. Immediately following a major upgrade to the data center things started failing left and right. The hosting company that has space in the data center was not amused at the very expensive outage.

While I haven't announced anything publicly yet, there will be an announcement shortly about the "new" website ;) I've just been getting things online and quietly letting people beta test some stuff.

Jake

I do believe that CDF airtankers are carded for
initial attack on their prior to arrival of ground
units but they often confer with the ranking BC or
engine company before they start their retardant
drops...

5939. update San Benito county(Hollister area) wildfire

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-02 23:59:13 UTC
From: Jeffrey
Topic: 5939 Message: 5939

fire is now at 100 + acres still growing wind is strait to the east now

grass land hay feilds wood chip piles saved about twenty structures but
fire still going pretty good

At 04:52 PM 7/2/2003, you wrote:

5942. Rap up report San Benito county(Hollister area) wildfire

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-03 02:18:07 UTC
From: Jeffrey
Topic: 5935 Message: 5942

Ed and all
location was hudner and 25 burned all the way to almost shore road and
almost to san philipie
(dunville area)

Fire was contained at 150 + acres with a wood chip pile and several hay
bail stacks

burned up ,,tons of smoke due to wood chips and hay saved about 12
structures however they reported sig property loss not sure if thats the
hay or what,,power lines and phone lines are down in the area about twelve
poles need to be replaced and restrung

Im going to try to get a pic of 4675 when he heads back to town he drove
through a wall of fire and was nailed by tanker 81 twice!!!

lots of fire jumping line on this one 35 mhp wind did not help any I got
some pics and a guy with a press
pass got a bunch he is sending me I will post them in cencalfire

5944. The new NorCalScan.org

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-03 04:38:10 UTC
From: Jake H
Topic: 5944 Message: 5944

Just wanted to officially announce the "new" NorCalScan.org site dedicated to Northern California Radio, as well as the conclusive and unsurpassed source in CDF monitoring information and other fire radio secrets. Some of you have seen parts of the site up in June. Thanks for beta testing and making sure everything loads up great!

http://www.norcalscan.org

Some new features never seen before include:
1. Online fire scanner 24/7 for Northern California!
2. Good size Photo Gallery with pics from inside the incidents!
3. The popular Fire Center 2003 with detailed fire radio info
4. CDF Major Incident described play by play while you listen on MP3!
5. How communications are organized around the Incident Command System at a fire
6. Growing 1-stop guide to all your ham radio repeaters in Northern California

And your favorites are still there:
1. Aerial Firefighting secrets
2. How CDF Radio works
3. Detailed and confirmed freq lists for each NorCal County
4. Fast links to major scanning websites in California
5. Exclusive CDF Frequency List Design
6. Detailed info on NorCal Caltrans and UP Railroad "Valley Line"
7. Popular "Monitoring After Sept 11th" article

Thanks everybody for your support! Have fun and enjoy the site.
Jake

P.S. and subscribe to the only National magazine devoted just to scanning - Scanning USA!

well Jake just to let you know your site does not work well with webtv.
when I go to the site some of the pages including the main page has
"garbble" on it. looks like two pages put together on one and you cant
read it. also the weather bar is right in the middle of the pharagraph
as well as the scanning usa link. Now this is reported using webtv
only.

5953. Commercial structure fire, downtown Chico (453.750 mHz)

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-05 19:15:25 UTC
From: Ron Angle
Topic: 5953 Message: 5953

All six City of Chico FD stations have responded to a structure fire at 330 Flume Street. At 11:30 a.m., a plume of dark smoke could be seen from most parts of the city. The smoke is blowing to the northeast east.

Both aerial ladders are in operation. The fire is in an old two story structure. Rumors at the fire scene indicated that this structure was the original Enloe Hospital facility.

I was shopping in the vicinity and followed the smoke, so I do not know about any of the IA radio activity. All indications are that a general alarm was sounded upon size up.

There did not appear to be any significant damage to exposures. Firefighters were using the aerials to contain the fire, which seemed to be centered in an air condiditioning housing on the rooftop. At ll:30 a.m., flames were still quite intense on the rooftop.

Because Chico's Saturday Farmers Market is about fifty yards away at Third and Flume, there are large crowds of spectators and photographers.

Off duty FF are now filling Chico's empty stations. However, they are just now dispatching at least one reserve engine to the scene. This would be the third alarm.

--ron 12:13 p.m.

5954. Re: [NorCalFire] Commercial structure fire, downtown Chico (453.750 mHz)

Yahoo group: norcalfire (2003 — 2004)

From: Nick, KG6NMP
Topic: 5953 Message: 5954

Ron was right, this fire was a big one. From what I could tell, they had every primary engine out, a few reserves, and they requested Light/Air Support 42 from the county, but they were unavailable. Instead Pratrol 4 (a red pickup) brought out Chico's Air 1, which is basically a trailer carrying as many air tanks as they can cram on it. From what I could see the structure was basically lost, but they didn't let it spread. The building had a several story cement wall as the front, and they couldn't get to the fire behind it from the street very well. I didn't have my camera when the fire was activly burning because like Ron I just happened upon it, but I went back later and took some pictures, they were still using the ladders to shoot water down into the structure and cool it off. Here are the pics:

http://members.cox.net/scanchico/pic-flume.html

Still nearly every chico engine is at the incident, a few are available at scene, but the stations are staffed around town with volunteer/backup FF's right now.

Hey,

I was initial attack on the Beskeen incident, it was
10 acres of thick matted grass and eucalyptus grove,
one triple wide trailer unoccupied completely
destroyed, picked up with initial dispatch and
helitak, one tanker drop... just spotted across a rode
into a grazed field with no threat except to fences,
one engine was left on scene overnight for patrol and
mop up and patrolled it the last 3 days. this is
actually in Sacramento county, Herald Fire Department
response area, in the area of Rancho Seco...

Date: 2003-07-07 23:09:42 UTC
From: Ron Angle
Topic: 5961 Message: 5961

The Shasta-Trinty forest is working a wildfire along I-5 at the Pollard Flat exit. I seem to recall that as being about midway between Dunsmuir and Lake Shasta but I can't find it on my DeLorme.

Resources are being sent from other forests including a fair amount of aircraft. One FF is being Med-Evac'd for heat exhaustion.

I have no report on conditions. STF is dispatching Pollard Incident on 171.575.

=========

It seems like Red Flag Wx here around Chico but checking the RAWS data for 3 p.m., the wind is still southernly and the RH values are in the mid 40s.

By Thursday, it is all going to heck with low RH and temps to 110.

Just mentioning here because this is a location of big fires every year. LA County Fire has a 3rd alarm + ?? others for a brush fire started by a car fire on I - 5 near 138 on the grapevine. near Castaic (sound familiar) CHP was blocking lane 4 but now are diverting ALL traffic (fire has grown to 100 acres +) on CHP webpage , Los Angeles area. I am going to re-subscribe to SoCalscan ....its that time of year :-)

Thank you for that list. You may want to remove the asterisks for the
Silver Freq (151.01) repeaters at Mt Pierce and Pratt, as those are now
licensed under WPWW675. Dunno where Cahto's license is, though.

Harry

Topic: 5974 Message: 5974

Anyone hearing any action on 168.650? I thnk that they might be making more use of this freq for flight following these days. Peter S

5975. San Jose FD channel change

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-08 14:46:38 UTC
From: Bryce Wolfson
Topic: 5975 Message: 5975

Sounds like the SJFD channel lineup change is going into effect today. We'll see soon enough -- original target date was 'June 2003'.

07:32 announcement on SJFD primary (154.010, for now anyway):

"Attention all stations, please check your e-mail for a message regarding the San Jose Fire channel change that will go into effect at 08:30."

Must be time to finally put 155.025 (new primary) in my radios as 154.010 gets relegated to 'Tac 7'.

I believe there's a .xls file in the bayscan files section with the main parts of the new SJFD channel lineup.

Cheers.
-Bryce

Below story cut and paste from www.redding.com Redding Record Searchlight o=
n
Tuesday, 7-8-03. Nice tanker drop picture online. Also was monitoring North=
Ops
last night and they are putting Tanker 15 down for maintenance today and re=
questing
multiple air resources for this fire to start this morning. A call when nee=
ded air attack
unit from Santa Rosa I believe is coming up also to the Pollard Fire. Copte=
r 102 is up
here also. I have ShastaTrinity National Forest 171.575 in the live scanner=
but not
sure how much traffic is over the forest net. This fire will be going throu=
ghout the day
today but the winds have died down, they are hoping for containment by toni=
ght.

Firefighters struggle with sloping terrain, poor access

Margo Horner
Record Searchlight

July 08, 2003 ☐ 2:32 a.m.
POLLARD FLAT ☐ Two firefighters suffered heat exhaustion Monday afternoon =
while
fighting a wildfire here.

Both were evacuated and were doing fine, Rebecca Franco, a spokeswoman for =
the
U.S. Forest Service said Monday.

The fire started Sunday evening on the west side of the Sacramento River. =

Firefighters worked through the night and nearly contained the flames to 5 =
acres.

But early Monday, a spot fire jumped across the river and blazed up, Franco=
said.

"The wind had blown sparks or something from the fire to the east side of t=
he river,"
she said.

Flames on the east side of the river spread to more than 50 acres by eveni=
ng.

Crews also continued to battle the 5-acre blaze on the west side of the ri=
ver.

No structures are threatened, Franco said.

"We are hitting this fire very aggressively," Franco said. "We're hitting =
it hard so we
can keep it as small as possible."

Two hundred fifty firefighters from the U.S. Forest Service and California=
Department
of Forestry and Fire Protection battled the flames late Monday. Four helico=
pters, four
tankers, 10 hand crews and 10 engines were called to fight the fire.

"It's moving moderately up a very steep hill heading east towards a ridge,"=
Franco
said.

Steep terrain, slopes of more than 50 percent, made it difficult for crews =
to contain
the fire.

"Our one problem is access," said Franco. "It's very hard to get in there. =
There are no
roads to the east side of the river," she said. "It's going to take hand cr=
ews to hike in
there in deep, treacherous, rocky terrain."

The exact cause of the fire is under investigation, but officials have det=
ermined the
fire is human caused, Franco said.

"It could go on for one or two or three days," Franco said. "We (firefighte=
rs) will
continue all night long. You can count on it."

Reporter Margo Horner can be reached at 225-8215 or at mhorner@....=

Interesting story Jeff, thanks for posting it.

BTW, CDF dispatching full response to Highway 4 @ Skyway near
Crocker. Seems like things are sure picking up, especially yesterday
For those who missed it San Jose sent Task Force 29 to the Fuel Tank farm
fire on the Monterey Coast last night. BC229 Eng29 and Foam 29.

Repeat request, FWIW...

I would really like to ask again that in either subject lines or near the top of these fire posts that the actual *name* of the ranger unit, forest, county or whatever be spelled out at least once, rather than just the mnemonics, such as BEU, which abound throughout the state. BEU looked to me like "Butte," although the highway references, of course, nixed that assumption.

Even if it's just in the FIRST post, it would help.

Harry (with the short, um, memory)

5984. Wildland Fire Sitrep Sources

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-10 23:16:50 UTC
From: Bill Snyder
Topic: 5984 Message: 5984

Do you like to get a comprehensive overview of current wildland fire activity in a geographical area of interest, but don't quite know where to look?

Use the following links to compile your own personal wildland fire "Morning Report." These links are just a few favorites among the multitude of information resources available:

- - - - - - - - - - - - - - -

Wildland Fire Sitrep Sources

NIFC Incident Management Situation Report ("Morning Report") -- A daily digest report of wildland fires in forested areas greater than 100 acres, and in grassland areas greater than 300 acres. Adobe Acrobat format.
http://www.nifc.gov/news/sitreprt.pdf

NIIC USA Wildfire Incident Management Situation Report -- This abbreviated form of the NIFC "The Morning Report" covers only fires over 500 acres.
http://www.fs.fed.us/news/fire/mreport.shtml

NICC Geographical Area Coordination Center (GACC) Index -- Links to NICC GACC sites. Quickly drill down to regional Detailed Situation Reports and other regional information. Here you can generally find detailed reports on each incident by GACC. If you need more Sitrep details than this, perhaps you should make friends with the Incident Commander!
http://www.nifc.gov/news/gaccs_map.html#map

NOAA National Fire Weather Forecasts -- Map displays Red Flag Watches and Red Flag Warnings for all states. Good fire weather links.
http://fire.boi.noaa.gov/

NIFC Current Wildland Fire Information -- Hot links at your fingertips. Rather like a control panel, linking you quickly to what you need to know. A good resource for a fast wildland fire overview.
http://www.nifc.gov/information.html

USFS Large Incidents Map -- National Large Incidents spotting map.
http://firemapper.sc.egov.usda.gov/modisrr/lg_fire2.php#

USFS MODIS Active Fire Mapping Program - MODIS satellite-generated current active fire detections plots overlaying large regional relief maps. Shows actively burning areas as well as previously burned areas.

http://activefiremaps.fs.fed.us/

USFS Fire & Aviation Newsroom -- Latest USFS news on current "Big Fires".
http://www.fs.fed.us/fire/news_info/latest_news.html

Yahoo Wildfires and Forest Fires media links -- Links to recent media articles.
http://news.yahoo.com/fc?tmpl=fc&cid=34&in=us&cat=wildfires_and_forest_fires

CDF Major Incidents -- Links to Major Incident Command Team (MICT) temporary web sites for large incidents.
http://www.fire.ca.gov/cdf/incidents/index.html

USFS Pacific Southwest Region -- Provides links to regional national forest sites for detailed information about major incidents when they occur.
http://www.fs.fed.us/r5/fire/

Incidentally, if you prefer "push technology," subscribe to FireLine E-Mail List, and have the NICC USA Wildfire Incident Management Situation Report appear automagically in your e-mail box daily:
http://www.cidi.org/wildfire/fire.htm

The whole system is so interlinked that one can hop through most of the major sites from any listed gateway that maintains an abundance of links.

When you find the sites you prefer, try bookmarking them in a bookmark folder named "Sitrep" or "morning report" or whatever. They'll be there with your morning coffee.

This list is anything but complete. Please share your favorites.

Flowers Ln in Happy Valley 18:19
Shasta county CDF
151.160 dispatch
151.445 Tact 11
151.295 Air Attack

2 acres of grass, moderate south wind, moderate spread

Local Redding FD Engineer personal house on Flower Ln requested 5 additional engines over the phone due to multiple cars involved and 2 structures involved as he sees from his house. Battalion Chf agreed and also bumped the order for crews. Tehama sending engines up.

I know a retired Redding Fire captain on the road and can't raise him on the phone.

Copter 205
Air Attack 240
2 tankers

From: caladded@aol.com
Topic: 5994 Message: 5994

For those who want "guidelines" especially min. of 5 acres, moderate rate of spread..... I could NOT have put this out, since it did NOT apply. I caution using so called guidelines, I would PREFER people instead use common sense when putting out calls.

This was a Very interesting call despite the small area, simply because of the history of this area, specifically 1991 . There are plenty of areas ripe to burn, area above Silicon Valley and San Mateo County has NOT burned in some 70 years .... I would prefer to see a post sooner than later, remember, you don't always get great updates, depending on the BC who handles the IC duties. Ed

This fire is now totally surrounded, although not under control, extensive mop up.

5995. Posting guidelines - moderator

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-11 04:41:29 UTC
From: Jake H
Topic: 5994 Message: 5995

Hi everybody. Not to stifle discussion on the list, but everybody posting their own "guidelines" tends to irk others on these lists. Instead of trying to follow a strict guideline or format, lets all use common sense in posting incidents. From reading all the posts over the past couple years on "posting incidents" here's the majority of the suggestions I've found that the majority likes.

As long as the post INCLUDES the following everybody should be happy. A strict format is not necessary here but you may feel free to use one for yourself.

SUBJECT should include "Type of incident" and "location". If you have an "incident name", include it here also.

BODY try to include:
time of post
primary agency involved
frequencies involved
location
description of incident and other "hot" info

If you can't get all of that, it's not the end of the world. Post it anyway! We all want to know what's happening ;)

Thanks everybody! It has been a very positive season on this list and we all appreciate it.

Jake
list owner

All air has been released, the 2 paradise engines were released back
to the town of paradise, one crew with an extended ETA was released,
but otherwise all ground units are still mopping up. Like all the
fires in that area of the county, its a mad fight to stop it from
burning up the hill into Paradise, its the game we play each fire
season... so far we are still winning.

Nick

6005. Al Qaeda burning down our forests?

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-12 18:48:29 UTC
From: northernazwildfire
Topic: 6005 Message: 6005

just saw on FOX news that US official have information from a senior Al Qaeda operative in custody that they were planning to send several operatives into the forests of AZ,NM,CA,MT and other states to set off timed incendiary devices to start several forest fires around the west--not to kill people however--but to cause widespread panic and damage around the west.

No indication that any of the current fires were caused by Al Qeada however!

From: Jake H
Topic: 6008 Message: 6008

Monday 23:13
Full wildland response to fire at Hwy 3 at Rush Creek Rd just north of Weaverville below Trinity Lake. This is an explosive area of extreme fire danger and remote access.

151.160 SHU CDF
171.575 ShastaTrinity USFS

Posting without the report due to the high potential. Also, it is on the west side of Shasta CDF on repeaters that aren't in the valley so valley receivers will have a hard time hearing dispatch. I only heard a portion of it when CDF switched to a valley repeater(tone) to announce the incident.

Jake

6010. 2 Fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-15 20:33:16 UTC
From: Ed
Topic: 6010 Message: 6010

Got a couple working , one on 580 / 205 in Tracy area .

AA140 says he can see a pretty good column of smoke in Marin
County , so things are picking up don't know which freqs but
would suggest
for Marin : 37.10 / 46.50

Tracy , CDF/SCU 151.445

6011. Re: [NorCalFire] Marin Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-15 21:06:41 UTC
From: caladded@aol.com
Topic: 6011 Message: 6011

Sounds like Marin has two fires. One is Big Rock IC (BC1513) and near Lucas Valley Road in the Marinwood area, fire is on a ridge between Marinwood and Novato. 4-5 acres, slow spread. CDF AA 110 and two tankers assigned. Other fire is close by, no acreage est.
Woodacre on 37.10 power lines down.

Topic: 6012 Message: 6012

Well, we can't say that all CDF Crews are Convicts
this summer.

The Butte Fire Center has received augmented funding
from the Governor to staff two paid, FF-1, Handcrews.

They are called Butte Crew 17-1 and Butte Crew 17-2.

So, if you see a CDF Crew that's not wearing Orange,
that's them.

Brush Fire Burns At Fort Ord
Blaze Burning In Area With Unexploded Ordnance

UPDATED: 9:00 p.m. PDT July 17, 2003

MARINA, Calif. -- A brush fire was sparked at Fort Ord near Marina Thursday.

The fire, which has now grown to more than 700 acres, is just off Barloy Canyon Road, north of Toro Park and Laguna Seca, south of Reservation Road.

It was burning in an area of dry brush where unexploded ordnance is on the ground, which prevented fire crews from getting close to the flames.

High winds were reported in the area, and the blaze sent a plume of smoke over the Salinas Valley. There is no word yet on a cause of the fire.

The Salt Fire on the El Dorado National Forest.

Air attack reports that the fire is about 35 acres
in brush and timber. Air Attack states that the
fire has burned thru the inversion and it is now
doing some torching, but minimal wind.

Difficult location in the north fork of the
Mokelumne River drainage near Salt Springs reservoir.
Will be a hand crew and air show. Having problems
getting helicopters, in that most are off on other
fires.

Command: 171.525 ElDorado NF
Tac: 151.160 CDF Tac 2
Air Attack: 151.280

Tankers on scene: T-82, T-83, T-88 plus one
unknown helo.

Thank you Tim! Air and ground were having huge problems this morning pinpointing location. Drift smoke from yesterday's Lake Tulloch fire laid down last night and crept up the canyons this morning, creating a pea soup over Amador and Calaveras. Didn't bring my scanner to work, so updates are very much appreciated.

Fire Burns Dry Brush At Fort Ord
Blaze 30 Percent Contained Friday Morning

UPDATED: 10:36 a.m. PDT July 18, 2003

FORT ORD, Calif. -- A brush fire that began Thursday afternoon at Ford Ord in Monterey County has blackened more than 700 acres and continued to burn Friday morning, according to the California Department of Forestry.

The fire began at about 2:45 p.m. at Eucalyptus and Barloy Canyon roads. High winds helped to quickly spread the flames into Barloy Canyon and onto land operated by the Bureau of Land Management.

The fire was about 50 percent contained early Friday, and full containment was expected later in the day.

Firefighters have avoided getting too close to the flames because of the fire's close proximity to unexploded Army shells and bullets in a former impact training area, CDF officials said.

Authorities said several explosions have occurred, but that most are minor and "would sound like a loud firecracker" to someone standing nearby.

No structures have been threatened by the fire.

Skies remained hazy over the Salinas Valley Friday.

The cause of the fire is under investigation.

From: jlq2
Topic: 6033 Message: 6033

About to update my Netflix requests. Anyone have any suggestions for good movies with fire fighting. I don't know many forest fire fighting movies, except for Always (not exactly hardcore FF, but fun).

Also, there was a recent documentary of forest fires, I think on CNN. Anyone remember the name and know if it will be repeated?

Thanks

Then the posting should have stated "Tanker 14" and not the commonly used "T" (as in Truck) 14.

And when did you leave the FCC and go to work at the cache?
Did John find the missing radio?

Common sense? Given the original post ("T-14 Mechanical") tell me how someone accustomed to the commonly used designator for Truck Companies as "T" would know it's a Tanker. Nothing mentioned about landing; only an ETA to a firm in a town. By the way, there are fire equipment companies in California located at or near airports.

In case you are wondering, more than one other experienced Fire Service professional on this list took the original posting as being a piece of ground-based aerial equipment.

Common sense? Given the original post ("T-14 Mechanical") tell me how
someone accustomed to the commonly used designator for Truck Companies
as "T" would know it's a Tanker. Nothing mentioned about landing;
only an ETA to a firm in a town. By the way, there are fire equipment
companies in California located at or near airports.

In case you are wondering, more than one other experienced Fire Service
professional on this list took the original posting as being a piece of
ground-based aerial equipment.

There are a couple old to "ancient" firefighting movies free for the
downloading at the (Prelinger) Internet Archive:
http://tinyurl.com/hepo

Stuff like "Your Fire Department" by/about LAFD, 1949
http://webdev.archive.org/movies/details-db.php?id=1249

"Fire! Patty Learns What to Do" about the Chatsworth fire of 1947
http://webdev.archive.org/movies/details-db.php?id=416

"Berkeley, California Fire, 1923"
http://webdev.archive.org/movies/details-db.php?id=173

1955? "Goodman Lumber Fire" at the SFO waterfront
http://webdev.archive.org/movies/details-db.php?id=836

Good stuff... you may need to create a log-in, but there's tons of
old, mostly public-domain stuff there.

Harry

Date: 2003-07-20 16:19:24 UTC
From: Kat
Topic: 6054 Message: 6054

Hi:
Just wanted to send a message to any potential fixed wing air attack folks out there. I was wondering if anyone contracts with DynCorps. What are their pilot hiring mins?

Last year I got an offer from Neptune (right seat),but now my husband and I moved out here to CA and I was attempting to get on with CDF.

Any help would be appreciated!

Blue Skies!
Kat

6055. Del Puerto Canyon Fire?

My apologies to Ben. I mistaken said he was wrong stating this fire was east of Mt.Hamilton. I had stated that fact a few months back , then " Incorrectly" changed it. Turns out, as I have looked a mapquest , that I was orginally correct , Ben was correct ...

Alum Rock ave in San Jose is County road 130 It becomes Mt.Hamilton road goes over the summit by the observatory and becomes Del Puerto Canyon road on the east side . The fire , according to one news channel , is about 40 miles due east of San Jose. Looks like its going to burn away folks.

anybody got more news on the fire in SLO ?
Ed

Aw come on now john.....The Towering Inferno, that thing drags on and on (I watched them film it at the Bank Of America WHQ for a couple days) 3 hours is a long movie ... spec effects weren't too bad.
Backdraft was a good improvement.

The "Real " videos from different cities are better. I have one, think its Cleveland? Where a videocamera is hooked on the front bumper of an Engine Company .....interesting shots, makes you feel like your sitting on the front bumper going to a working fire (unit arrives to find flames coming from the 2nd floor of an apt bldg.) . Got some good ones from Chicago too.

> anyone have any info on the fire at or near Chilcote Ca?,,Tim maybe?
>

This is from the Tahoe National Forest page:

Narrative:

July 21, 2003 19:20

Erratic winds from thunderstorm activity resulted in fire burning over the line on the Mart fire, one of the six fires burning on the Sierraville District. The fire burned in 3 directions at once and has reached 700 acres in size. The other five fires are smaller.

The fire is burning primarily in sagebrush and grassland and is moving rapidly. Air support is being provided with airtankers and helicopters to stop the spread of the fire. Additional engines, dozers, watertenders and crews are also reporting to this fire. Windy and smoky conditions are creating difficulty in suppression and visibility. Structure engines have been in place for protection; however there is no immediate threat to homes or ranches in the area. No evacuations have been called.

This afternoon, a firefighter was airlifted to Truckee Forest Hospital in Truckee, CA. The firefighter is being treated for heat exhaustion and recovering.

This is the Chilcoot Complex a 700 acre fire on the
Tahoe National Forest. It is a lightining fire that
started on the 20th. They are expecting containment on
the 24th at about 1500 acres if all goes well.

The town is Chilcoot, which is near the junction of
Hwy 70 and Hwy 49 on the Sierra/Plumas County line.

#1 is BACKDRAFT

I also came across this one.
Movie: FIRE
Filmed around Silverton,Oregon if I remember right!
Synopsis

The made-for-TV Fire! is graced with a made-for-TV cast, including Ernest Borgnine, Patty Duke Astin, Vera Miles, Alex Cord and Donna Mills. It all begins when a convict (Neville Brand) escapes from an Oregon road gang. To cover his trail, the fugitive starts a forest fire. Need you be told at this point that Fire! is an Irwin Allen production? Originally telecast in a two-hour slot on May 8, 1977, Fire! was later cut by 30 minutes and rerun in tandem with another Allen TV-movie disasterfest, Flood! (he stopped short of making a picture called Famine!) ~ Hal Erickson, All Movie Guide

I haven't been around too much last couple of days to keep
an ear on whats been happening. Tis morning I overheard
CHP units planning on road closures for Hwy 70 and possibly
Hwy 395 while fire units do a back burn trying to contain this
one...

If you've ever been to Frenchman Lake - than you've been right
through Chilcoot - very eastern part of Plumas county.

Much more information on www.firedispatch.com But thought I would post a brief announcement here.

On July 16, Capt Robert Walsh , 38 , died of a long illness, he leaves his wife and 2 children. Services were this morning. Capt Walsh was with the Redwood City Fire Dept.

On July 21 (yesterday) Capt Dan Nightingale of the Foster City Fire Dept. died of injuries in an MVA in the El Dorado Nat. Forest, his wife and 2 children received minor injuries and were released.

again, check out firedispatch.com for more and please keep these brave firefighters and their families in your thoughts

Respectfully,
Ed Sollars
Former Lieutenant
SFFD Reserve.

Sunnyvale is a DPS so the Cops are cross-trained so they too run 2 man Engines and Trucks. They depend on the patrol officers and off-duty to boost the manpower at fires. Now, the other night (actually, early morning) they had a SWAT incident where I counted 13 patrol cars at scene (didn't hear it on the scanner , just drove by em' on El Camino , turned scanner on quickly :-) .....anyway , What happens if they get a working fire ? I doubt they had more than 2 or 3 officers left in the City.
Sooner or later, Its going to blow up on them.

Yes, 2 person crews for most of them. 3 person crews on the 2 busy
stations (might be 3 stations now with 3 staff).

Redding is doing some big changes this and next fiscal year. Shutting
down 2 station buildings, combining their apparatus and companies to
a new "super" station west of town. Then building a new station
northeast part of town (currently under 8-12 minute response time)
and staffing it with hopefully the crew from the airport station. The
airport station would then be staffed by contracted company or other
means (this is up in the air right now how they'll staff it.) which
is cheaper then staffing it with city FF.

But that's the idea.

That's pretty amazing - or atrocious. Assuming one person attending to the pumps, they'd need three engine companies onscene to even enter a structure, eh? Assuming they adhere to the "2 in / 2 out" protocol.

I'm imagining a structure fire in northeast - or even northwest - Redding if the first-in engine (5 or 6) is on another run. If it's 8-12 minutes normal response time, how long to get the next three companies to the scene... 20 minutes? 30?

But they do have a $well new City Hall (even though they didn't get to site it along the very banks of the Sacto River, which a previous city council had determined was the ONLY place left in town to put it.)

Well, how about sending an engine down to help the next time we need to bring in 900 engines* to an urban area? But don't think the Bay Area is immune; get a 1991 Oakland Hills type fire going in a couple of places around the bay and look out.

Anybody know the "public safety" personnel numbers for Sunnyvale vs a comparable city? My guess would be that for a combined (police/fire) DPS to be effective, they would need a roughly comparable TOTAL number of on-duty people... which should normally mean more men and women out doing "police" work than the comparable city, with (obviously) a pre-plan for some of them to change hats in the event of a fire/EMS incident.

I remember the DPS model had some popularity in the late 60s - as did "soft uniforms" for the cops (slacks and blazers, with their hardware more-or-less out of view), but AFAIK neither idea stuck around for long in most places. Who else still has a combined DPS besides Sunnyvale?

6095. Live NorCalScan - Lighting Plan activated

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-24 11:52:11 UTC
From: Jake H
Topic: 6095 Message: 6095

Tehama and Shasta west side getting hammered (still) all night with lightning and very little rain (sounds like dry lightning to me). The cell is just now making its way into Red Bluff, travelling very slow.

I have the live scanner set to local stuff only for Thursday for what should be a good number of fires along the west side. USFS will be plugged back in on Friday.

50acres plus burning near Paskenta, multiple lightning fires through Red Bank, Reeds Crk, and Pettyjohn Rd areas. This side hasn't had fire action in years. Tehama staffing Eagle Pk lookout first thing Thursday morning.

http://live.norcalscan.org has the following for Thursday...

151.370 TGU CDF Dispatch
151.160 SHU CDF Dispatch
151.265 CDF Command 2
151.355 CDF Command 1
151.460 CDF Command 7 Tact 12
151.175 CDF Tact 3
151.190 CDF Tact 4
151.295 Air Tactics 5

Jake

P.S. Mike, too bad you're stuck in USFS land. I'll tell you all about what you missed ;)

Light rain in Chico. Its still hot as can be, but I got dripped on
while riding my bike around this morning.

Tehama has lightning plan activated. CDF engines head out to Red Bank station west of town and stage there. There's a helipad at the station for Copter 205. Tomhead Lookout staffed by SHF personnel keeps an eye out over that area of state land also. Copter 205 patrols all around the area for smokes and gives out latitude and longitude back to Tehama Command on Command 7 151.460. For on scene coordination they will use Tact 4 151.190.

Air Attack 210 will be overhead around 0800 for additional patrol.

You can load up topozone and enter in the coordinates as you hear them over the scanner to get an exact location on strikes and fires copter 205 spots. Try these, 40 09.255 by 122 47.333 and 40 11.872 by 122 51.624. Enter them in the DegMinSec section, and put the decimal number in Min. Put a 0 in seconds. Both of those strikes are right around Tomhead lookout.

6098. Chico, Frat Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-24 15:15:53 UTC
From: Nick, KG6NMP
Topic: 6098 Message: 6098

About 5am there was a structure fire, Chico Fire dispatched it as an apartment, but it is really a frat house. Fire started in the basement, spread all the way up to the attic and fire shot out the vent holes cut in the roof. Chico Fire had every engine (1-6) and both trucks (1, 5). They also got support from the county with Engine 41 & 44, Light / Air Support 42, Chico Company 1, and CDF company 42. It took quite a while to locate all the fire, and they are still moping up down in the basement, tracking down all the hotspots with thermal imagers.

There was some backstory to it all, but I am not sure what; there were a lot of PD up at the CP with the IC and they were doing a lot of cell phone work, kept a lot of the traffic off the radios. Some residents of the frat were fairly heated the whole time, and PD requested a few more units to help calm everyone down. It came at a bad time for CPD too, they had to do a shift change right in the middle of the whole thing, plus 8am court times to show up for.

From: crayxer2003
Topic: 6099 Message: 6099

As members of Strike Teams and Engine Crews we travel the State of California several times a fire season. How about starting a list of Best Places for a Strike Team to Eat in Northern California and Southern California.

Here are four areas to look at.

1. Best (biggest) Breakfast

2. Best Biscuits and Gravy

3. Best (biggest) Hamburger

4. Best (Biggest) Steak

5. Best Buffet

I will keep track and post a little travel guide to throw in our fire bags after everyone has voted for their favorite.

Jake and others,
I got up about three this morning (thur) and man what a show. Never seen anything like it. wish I could have been able to take pics.

the lighting was like every 5-30 seconds before another. one right after the other, amazing stuff mother nature is. just awesome.

im with you on this one Harry. makes me wonder too. I pay my utilities bill there and when we grab a number and it was called by there computer voice I asked the clerk " how much did we pay for this?" and she was a little pissed and said" you didn't, it was financed and funded from the general fund" well were do you think the generel fund comes from us of coarse.
yeah and thank god that guy lost a bid for the assembly too. next his office will be on the sac river too paid for by who else but the tax payers.....

Yeah, 3am was when I was awoken with the bedroom in a "strobe affect"
from the every 5 second burst of lightning. :)

Changing live scanner feed back to some surrounding USFS, and all the
air tactics. I'm getting rid of CHP for now. Who's bright idea was it
to put that in there anyway? This is FIRE season....

Hello:

IMHO--A couple of suggestions for posters that would make life easier for readers:

-- Always include the location you are describing in all messages--including your home location if that's where you are talking about. I have no idea where the great lightning storm took place because the message didn't tell me.

-- Please include enough quoted material that someone could read just your message and understand what's happening if you are responding to something else. That doesn't mean you need to include the entire thread, but readers shouldn't have to dig through their inboxes to find out what you're talking about.

Or so it seems to me.

Thanks!

Hello david,
sorry for the mistake and is understandable. just to let you know
though I always post my area under my name because there is another Ron
on here (i think he is still here, comp2000 or something like that).
Also I just started this webtv thing that im on until I get my computer
fixed (hate paying large bucks for something simple to fix like drivers
missing on my computer). so im learning how to copy and paste as webtv
is way different then computers. I have not found the instructions on
the network so when I do Ill start to copy and paste.

I wasn't trying to complain about any individual---I do these sorts of things myself with some regularity. I am on a bird list where the problem is tons worse---you saw that hawk at Ralston Rd. in what city/county?

I hope I didn't offend you and certainly did not mean to.

6112. California Fire "updates" group?

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-26 01:52:56 UTC
From: Harry Marnell
Topic: 6112 Message: 6112

Is there a single place where people can both request and post updates to the various fires throughout the state? There seems to be tons of crossposting on all three (four?) of the "calfire" yahoogroups, and half the time a question posted on two lists only gets answered on one of the others. Also, ember-by-ember and engine-by-engine updates tend to flood our inboxes and obscure the more newsworthy reports of new or seriously expanding incidents.

Nope, I'M not gonna start a CalFireUpdates group, but maybe someone would like to add to the plethora of Calif yahoogroups with one specifically designed for those who want play-by-play info.

Just my 2?. And I stole the idea from someone's post LAST summer.

Dave

FireLine is an e-mail sitrep for fires that you can subscribe to.

Go to http://www.cidi.org/

Click on Situation Reports at the left

Then Click on Wild Lands Forest Fires (USA)

Then Click on Subscribe to Fire Reports List - FireLine

From: caladded@aol.com
Topic: 6112 Message: 6117

While Harry has a point, I think the LAST thing we need is ANOTHER group.
Lets just suggest people check out websites with updates like CDFs etc. I really
don't mind the updates as long as they are NOT ember x ember as Harry puts
it. the delete button works fine. Lets just ask those, maybe by direct email,
to streamline their reporting of the incident.
Ed

From: Jeffrey
Topic: 6112 Message: 6118

I suggested a form for the perfect post.....it did not seem to
interest many
maybe we can re-explore this in chat room tonight 8pm cencalfire

the missing link here is we each can request those "updates all day long
but if you look at any group lets take mine as example there are 200+- in
group out of those folks how many post I would be willing to bet the number
doing regular postings is about 25

that is your weak link to this request

as for my group I say this often as I can post away the more updates the
better when it becomes a problem I will talk to the poster off group
.....

stop by say hi lets get to the bottom of this.....8PM

Didn't realize that we were being critiqued.

Just quoted the response of the first arriving equipment as they called a 2nd alarm. After quickly posting, it went to a 3rd alarm. Does that meet the obligations of fully involved?

I'll just go back to monitoring/reading and let you MORE "accurately" report the major fires.

Thanks Dan for the great updates. Heard this on the way home from
work and was stuck outside the office to monitor the live scanner
today. I figured it was near Elk Creek since I didn't see any smoke
on my drive home (can see pretty much all Tehama on drive home)

6143. CDF Maps

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-29 01:44:02 UTC
From: David Coursey
Topic: 6141 Message: 6143

If you haven't already, check out: frap.cdf.ca.gov for an interesting collection of CDF maps. These include threat maps and a map with all CDF locations and their names.

The problem with these is that you may have trouble printing them as they are designed for poster printers. Most of the maps are 34x48 inches in size. One option is to take the Acrobat files to Kinko's and pay $5-sq-ft for printing and $2-sq-ft for laminating. The map is 11.3 sq ft so this adds up.

Any other printing ideas?

From: steve_j80917
Topic: 6146 Message: 6146

I think it would be nice if CDF could start using CAD just like CHP and the forect service do in the southern region. It would add to what we can see as to what is going on in the Northern region and the whole state. What does every think. Could we lobby the CDF to do this or does anyone know if they are thinking about it.

Currently CDF is implementing MIRPS (Multi-Agency Incident Resource Processing System). It is an Oracle database system. I don't know if this system is utilized on every incident, only on major incidents. Don't know if it's effective for every incident. The ROSS system below seems to be good for all incidents.

I believe a competitor to MIRPS is ROSS (Resource Ordering and Status System). Don't think CDF is looking at this since MIRPS is too new and well, there's a money problem in the state ;)
http://ross.nwcg.gov/

All that would need to happen is have a public portal into the database on the Internet. However there is a goal accomplished by CHP putting their CAD online. It shows where the TRAFFIC problems are. I don't know what putting CDF resource status online would accomplish for the general public. I know everybody here would love it. :) But does that justify the money spent in implementing the public portal.

I would rather have North Ops intercom transmitted over VHF then CDF CAD online any day! ;)

Well since they are already public I don't really think it would cost them much if anything to make the portal public. But MIRPS sounds good and ROSS sounds even better. Sure all of us would love it, but those of us that are out of state would like it even better. tks for the information Jake.

So heres something for you to think about - CDF has been using CAD for over 20 years - They are in the process with PRC to do a major upgrade - Beta Testing is currently in process in two units. The other problem right now is with the new HCPPA (Health Care Providers Privacy Act) that addresses cannot be made public - even our in house run books cannt list the address so allowing a public access like CHP is not going to happen in the near future - Firedispatch.com has to play with the data they receive from the other dispatch centers before they post hence the 2-4 minute delay. As far as MIRPS or ROSS go in Calif MIRPS is what is used on the local level with ROSS being used in North and South OPS. MIRPS has more then just CDF and Forest Service on it. All the contract counties also use it as does OES. ROSS is more a USFS/BLM/NPS system but it takes the MIRPS data.

Some outfits comply the privacy/confidentiality issues, such as covered by HIPAA - online anyway - with CAD sites like Orange County's which gives only block numbers or intersections:

http://www.ocsd.org/occrimecalls/default.asp

Seattle Fire, OTOH, still posts exact addresses:
http://tinyurl.com/2hh6

Ventura CoFD seems inconsistent:
http://fire.countyofventura.org/OnlineIncidents/online.asp

The whole confidentially issue could conceivably lead to increased use of encryption and other non-publicly accessible call info for all emergency services, though I hope not. (Except when I beat my wife the next time, in which case I hope they encrypt the whole call).

Harry

Last summer I did an interview with a public safety dispatch organization in Arkansas, I think, who found implementing a CAD-to-Internet interface took only about two days because Oracle had tools and features that made it really easy.

6159. San Joaquin/Alameda Counties this morning

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-30 16:19:37 UTC
From: david_coursey
Topic: 6159 Message: 6159

CDF is working two lightning-caused fires in southern Alameda and San Joaquin counties. The blazes were reported shortly after 7am and we inititally considered to perhaps be a single fire.

The BIRD fire (not the be confused with a 6,000 ac fire of the same name on 6/1) described by the IC as more than 100 ac as of 8:30am with the potential for 500 acres. There are supposed to structures threatened. AA 140, H-106, East Bay Parks H-Eagle 6 O/S, tankera enroute. (Fixed wing are not normally available in the early morning).

This fire is located west of the intersection of I-5 and Highway 132, with a 13 mile drive down dirt roads to make access. State Thomas Bros. 175 A 3.

The second MINES ROAD fire is near the 17 mile marker on Mines Rd. in southern Alameda county. My guess is the two fires are about 5-10 air miles apart.

The Mines Road fire has proven the least accessible of the two. About 10-15 ac at 9am. Both these fires are in wooded areas. Now two mobile homes threatened.

4WD apparatus required to get into both areas.

Command 2 Tone 3, White 2, Victor, and SCU Local Net being shared between the two incidents.

NEW FIRE--Just reported by AA-140 Lat/Long 37.32.72 121.33.25 about 1/2 ac.

Morgan Hill is trying to get Stockton opened for reloading tankers.

H-106 is refuelling at Tracy Municipal Airport.

Priority may be changed to favor the Mines incident.

6164. Fw: [Calrailfans] UP Derailment on Cantara Loop

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-07-31 18:33:07 UTC
From: Harry Marnell
Topic: 6164 Message: 6164

Anything on the scanners about this? Just above Dunsmuir in the Sac River Canyon... where they had the big Hazmat derailment/spill in the early 90s. If it's a biggie I imagine Fish & Game, USFS, Bur of Reclamation, etc will be all over it. Plus the local SP... I mean UPRR frequencies. Siskiyou County if I'm not mistaken

Harry

Set your VCR's. There is a Program this Tuesday the 5th on PBS called "Fire Wars" on Nova at 8pm. Check your local listings for other times.

looks like a really good wildland fire program.

please pass this info on to your other list that I have not included here.

here is more info. on the program in case anyone is interested....

Program Information

Close Window
Nova
Tuesday, August 5, 8:00pm
Fire Wars
Every year, uncontrollable wildfires ravage the American West, and every year armies of firefighters mobilize to save threatened wilderness and communities. NOVA accompanied the men and women of the Arrowhead Hotshots during the summer of 2000, as they worked on the biggest fire of the season, the Clear Creek fire that burned for almost two months. The program also looks back at a century of fire policy.
In Stereo (CC) (DVS)
Ed. Taping Rights: 1 year
Visit the Nova Web site
Other Broadcast Times
Tuesday, August 5, 8:00pm
Fire Wars

Close Window
---

also Nova has a nice site on this at:

http://www.pbs.org/wgbh/nova/fire

which includes a simulator, fire terms, a producers story about "fire wars", etc....

Date: 2003-08-05 05:51:06 UTC
From: David Coursey
Topic: 6188 Message: 6189

This is burning in wilderness in Henry Coe State Park in an area called "Mississippi" which may become the fire name. The fire camp is at the forebay at San Luis Reservoir in Merced Co. on Hwy. 152.

Air Attack is supposed to be o/s at 8am with the rest of the airshow on the runway and ready to launch based on what conditions exist at that time.

IC warned that something needed to happen overnight to slow the fire. There is concern about dozier access and use in the wilderness area. State Parks is working with the IC.

6192. Hoover Fire Update

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-05 16:31:15 UTC
From: n6ckv
Topic: 6192 Message: 6192

I am mainly posting in the CENCALFIRE group

carl

From my wife who working as AIO in Morgan Hill ECC

information from 0302AM
Location

37 degree 12 min North
121 degree 24 min West

470 personal
10 Crews (CDF)
3 Chopers
4 Engine (CDF) 3 Engines (local)
10 Dozers (CDF) 2 Dozers (local)
2 Airtankers

290 acres (from last night)
0% contained

Limited access, 4 wheel drive only, steep terrain, no structures
threatened

Weather 85-88 degrees RH 30% winds 5-10 MPG W to SW

Base is at Christmas Hill Park (just getting set up)

6197. Chico - Park IC - Vegitation

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-06 22:10:19 UTC
From: Nick, KG6NMP
Topic: 6197 Message: 6197

Chico city is primary on a veg fire in upper Bidwell Park. There has
been several CDF mutual aid requests, including 2 type 3 strike teams.
Chico PD is trying to get people out of houses around the fire. Chico
Fire is always a little slow getting resource requests out to CDF, and
this time it may have let the fire run away from them.

Air attack guessed fire to be 150-200 acres moderate to rapid rate of spread, out of the park and into the county. Chico Fire will be releasing command to CDF soon. Air attack 210, 2 tankers, and copter 205 are over the fire. Air attack requested 2 additional tankers of any type, whatever is closest.

you all are welcome to join.

This group has been established specifically for tracking the current
location of USFS, BLM, CDF and MAFFS firefighting airtankers and the
fires to which they assigned. Information needed includes tanker
number, which base the tanker is currently located and/or working out
of, name of the fire tanker is assigned to, and location of fire, if
known. Also needed is information on any tanker known to be in ferry
to a new location? If so, where to?

From: Jeffrey
Topic: 6200 Message: 6200

A good friend of mine and My self were blessed to day with the opportunity to see a demonstration of

what has got to be the coolest fire fighting unit I've seen

it is a state of the art Cutlas Jaguar crash truck

this rig does 60 MPH and can put a stream of water or foam on a target up to 250 ft away

has flir capabilities (not on demo rig)

the rig has computer controlled suspension and brakes it can not be rolled it will do a controlled slide

first. unit has a pump capacity of 1000GMP and carries 1500 gallons of water/foam

My friend Eric got to ride in this for one of the runs during demo you will notice some in cockpit

photos. rig is made all of stainless steel and has four wheel drive six forward gears four reverse

huge engine if this baby had wings it would fly!!!!!!!!!!!!!!!!!!!!

I will be uploading pics of this cool rig in the photo section of cencalfire we got like 30 pics and they

upload slow so Ill be doing them over the next day or so Look in the Monterey folder

Anyone have a status report on the Bidwell fire?

6203. Re: [NorCalFire] chico fire update?

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-08 05:05:44 UTC
From: Nick, KG6NMP
Topic: 6202 Message: 6203

Sorry I didn't update yesterday, I got busy fast.

The fire was held to about 250 acres. Chico Fire was still doing mop up today with about 4 engines. About 75% of the fire was on city land, the rest on private land in the county. CDF tanker drops held the fire on the backside of the Rim Trail ridge, and the wind changed and blew the fire back into the burn, so it was stopped fairly easilly.

It was a little crazy at one point because all of the people that normally visit Bidwell Park had to run their @$$ out of there while eating veg smoke, meanwhile the fire engines and water tenders were on their way in, all on a 1.5 lane dirt road. IC was at the Rod & Gun Club, and Copter 205 took water right out of the little lake right there. I took a few pics before Dan and I got an assignment:

Wow Ben, that's 50% of the state. That's great. Think I'm gonna try to tune you in as BLM/CDF/FS & Cnty's are my favorite hobby for monitoring. Although to me because of the volume of medical aids for the larger Units/Cnty's I tend to not listen to dispatch. Instead I try to concentrate on Tac/Command/Air Ops and of course the Nops/Sops freq's. You'd be amazed @ just what you can learn listening to just those few freq's.. Especially when you have multiple incidents working all over the state. And the detail that comes across N/Sops is really very interesting & it gives you a heads up as to S/T's forming and enroute.

Wow Ben, that's 50% of the state. That's great. Think I'm gonna try to tune you in as BLM/CDF/FS & Cnty's are my favorite hobby for monitoring. Although to me because of the volume of medical aids for the larger Units/Cnty's I tend to not listen to dispatch. Instead I try to concentrate on Tac/Command/Air Ops and of course the Nops/Sops freq's. You'd be amazed @ just what you can learn listening to just those few freq's.. Especially when you have multiple incidents working all over the state. And the detail that comes across N/Sops is really very interesting & it gives you a heads up as to S/T's forming and enroute.

As of right now i'm able to listen to 11 cdf ranger units.. I'm interested if anyone out there has a live feed for what i can't hear, which is everything south of FKU and MEU north that would be willing to let me link your feed to my website.

TIA

Ben

6214. Re: [NorCalFire] socal and norcal cdf live feeds

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-10 02:44:06 UTC
From: David Coursey
Topic: 6207 Message: 6214

Until the neighborhood is finished and the homebuilder goes away I am stuck with verticals mounted in the attic. I am in a stucco house where the wire mesh that holds the stucco together also makes a decent Faraday cage. :> Being in the attic solves that and we created a run from down through a second floor closet and into the closet in my office. At some point I may pull some carpet and run a line to my radios next to the bed, which is where I do as much listening as anyplace. I am also thinking about using the internal cable TV wiring to feel scanner signals around.

In the attic right now is a discone and two x-50 dual-band ham antennas. I am planning to add two small beams, one to the west and the other not decided as yet. I could probably get a TV-type antenna and rotor outside the house without problems but may instead take my chances with a High Sierra motorized vertical for HF.

6217. Request Info on CA Fire Freqs

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-13 03:46:08 UTC
From: jlq2
Topic: 6217 Message: 6217

I am trying to establish a master California agency frequency list and have gathered freqs from the various files and postings on the california fire yahoo groups. I still have a few that I am trying to understand their role and if they are applicable to monitor. I will post the aggregated list as soon as I finish polishing it. The focus of the list is to effectively monitor California (primarily NorCal) units (ground/air) fighting wildland fires.

If you have any information as to the description/role and freq accuracy of the following, please share.

Thanks, Jim

Fire Info Net 36.670
Fire Info Net 36.370

OES 1 154.160
OES Fire 154.220

CDF Chiefs N 31.180
CDF Chiefs N 33.800

CA Travel Net (enroute strike teams) 169.125

6218. Plumas Nation Forest - Peterson Incident - veg

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-14 23:11:49 UTC
From: Nick, KG6NMP
Topic: 6218 Message: 6218

PNF913 - Peterson IC, near Bullards Bar Reservoir

Copter 205 was sent from Vina about an hour ago to this incident.

Butte CDF sending a strike team 2110C immediate need to this incident:
Bat 2116, E2176, E2169, E2168, E2165, E2167, Transport 2140.

Anyone have more details?

Nick

6221. Strike Team 9210C

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-15 22:57:26 UTC
From: Nick, KG6NMP
Topic: 6221 Message: 6221

Butte (BTU) sending 1 type 3 strike team, 2 dozers, and crew 17-1, immediate need to Nevada-Yuba (NEU), Contact: Rices Crossing (spelling?) on 151.160 if I heard correctly.

Bat 2116, E2169, E2168, E2182, E2165, E2180, Transport 2140 & 2142, Crew 17-1.

6222. Re: [NorCalFire] Strike Team 9210C

From: Nick, KG6NMP
Topic: 6221 Message: 6222

Second immedaite need strike team request:

Bat 2111, E71, E55, E65, E63, E72, E64 responding as either XBU3000B
or NEU3000B (dispatch said it both ways and I got lost) to same
location as 9210C.

Anyone have info on this fire, Rices Crossing off Marysville Road?

In 9210C, E2164 is replacing E2182, E2182 is downstaffed at Oroville
shop.

Chico Engine 1 just left the city, joining strike team XBU3001B headed
to the Ricen (?) Incident in NEU. How many engines are they going to
take from our county?

And no one knows what fire this is?

XBU3001B is a Task Force, not a strike team. I guess there is a
difference. Chico sending Chief 3, E1, E4, E5 and Paradise E1.

They are coordinating on CDF Travel Net.

6228. Rices Crossing Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-15 23:54:41 UTC
From: T Sharp
Topic: 6228 Message: 6228

Just hearing some information on the scanner but don't have the whole story.
Air attack reports two fires, one at 25 acres and one at 15 acres.
Releasing some air tankers and is using three helicopters on the incident.

Also just heard Strike Team 3300C responding. I don't have the list in
front of me but would that be Yuba County?

6229. Re: [NorCalFire] Re: Strike Team 9210C

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-16 00:12:21 UTC
From: George.Cusack@alldata.com
Topic: 6221 Message: 6229

XBU3001B is a Task Force, not a strike team. I guess there is a difference. Chico sending Chief 3, E1, E4, E5 and Paradise E1.

A little bit of a difference, Nick. Mainly, a strike team is a group of resources of the same size and type. A task force is just a combination of resources, not necessarily all the same. If they gave the chief the boot and stuck another engine in there, it would be a strike team (assuming all the engines are the same type).

CDS sent three engine strike teams to Montana yesterday
afternoon. I didn't catch where they all came from, but one of the
strike teams was made up of three engines from TCU and two
engines from AEU. NEU also sent some. TV channels 3 and 10
in Sacramento will carry the story on tonights news.

6232. Re: [NorCalFire] CDF to Montana

And if you haven't already ridden along (or even if you have), you can go down the wrong side of the road etc with a tillerman's-eye/ear-view at:

mms://audio.firedispatch.com/SCF012430004DSL.wmv (high-speed connection),
or
mms://audio.firedispatch.com/SCF012430004Modem.wmv (dial-up).

The verbal coordination between engineer and tillerman is interesting... have your sound on.

It's also linked on my page at
http://users.snowcrest.net/marnells/lafire.htm

Topic: 6236 Message: 6236

http://www.sonoma-county.org/eservice/fire.htm

This item mentions a volunteer fire company program in Sonoma County California. 4 Zones are also mentioned, including Fitch Mtn and Dry Creek. I can find no record of a Fitch Mtn VFC, nor a Dry Creek VFC in Sonoma County. But I did find a 2002 city council meeting in Healdsburg that talks about approving 3 year contracts with the 2 Zones.

I am guessing that neither Fitch Mtn Zone nor Dry Creek Zone have any fire trucks, but they are protected by the Healdsburg City FD. So apparently this is a situation where Sonoma County (via CSA 40) pays a city FD to protect 2 unincorporated areas.

Can anyone confirm that?

==========

If you look under Emergency Services on the Sonoma County website, there should be photos of their EOC.

There are also portions of various fire prevention codes shown on the website. In 2003, they began to require sprinklers in all structures.

Peter S

==========

Here are the minutes from Healdsburg City.

G. FITCH MOUNTAIN FIRE PROTECTION CONTRACT

By motion, approved agreement with the County of Sonoma for fire protection services to Zone FS-Fitch Mountain, County Services Area No. 40 for a period of three years to end June 30, 2005. (Ayes 5, Noes 0, Absent â□" None)

From: Harry Marnell
Topic: 6238 Message: 6238

To eliminate the ongoing (all the time) and recurrent (for the last several years) questions about unfamiliar abbreviations and mnemonics from professionals OR hobbyists who have only an occasional need for same, I suggest that before even ONE more fire report is posted, we should all immediately either (a) memorize all the designators on those 31 pages PLUS the six pages at http://tinyurl.com/kyq3 and/or (b) wallpaper our scanner-rooms with same.

Hey, it's only a couple hundred abbreviations, guys, and after October or so you can forget about them until NEXT summer. And isn't bringing up the correct list on your computer a lot quicker than having to read (or type) a huge ol' name like San Benito ("BEU" is that?)

- HM

Living within ARF, adjacent to ARC & FBR, and close enough to see smokes from EUR, BLU, and parts of HUM, HUU, SRF, HIA, HOO, TRN, FRT, FEN, RWP, NOD, and HBR
Now see how easy that is.

Contract Crew was traveling from Idaho to home in
Western Oregon. Driver of Contract Crew van crossed
double yellow 15 miles west of Vale, Oregon and was
hit head on by a Semi. All vehicles burned, truck
driver and passenger escaped with serious, but not
life threatening injuries. All 8 in the contract crew
van burned to death.

They were the third of a three vehicle convoy and were
several miles behind the other two vehicles. The other
two vehicles returned to the crash scene when they
lost radio contact an noticed the large plume of black
smoke behind them.

The entire incident is utterly stupid. Driving fast to
catch up+bad judgement to pass on double yellow= 8
dead firefighters all under 23 y/o

Well its been an intresting week so far and we now have lots to listen too

Im woundering if we all can figure out what we are hearing where??

any info please add to this maybe cut and paste 1thru 5 and add what you
got freqs locations so on......

the IC names I have heard for this "complex fire" are

#1 jump IC= near delporto and san antonio valley road back side of Mnt hamilton

#2 Del val IC= near livermoore "lake Del val

#3 complex IC=fire itself on the back side (east south east) side of mount
hamilton

bigest fire now at 2200 plus but

#4 sycamore IC= fiire 250 acres as of 4pm 0% containment

#5 annie IC +not sure where it is in this mess but I do know they are using
134.875 as a air tactical freq so

you all might want to add that one to the mix

BTW I took several pics of the four "headers" that can be seen wile driving
from Hollister to San Jose

I will post them in cencal photo section

Resources and Status Update:

AIR TACTICS - 151.295

Air tactics are being hindered by the amount of smoke these fires are putting up. Driving through the area north and east of Mt. Hamilton this morning reveals how really rugged the terrain is.

JUMP FIRE is the most troublesome of all of the elements in this complex. Drops are being concentrated on the left flank and heel of this fire. There is spotting and slop-over.

AIR ATTACK 241 (OV-10 N421DF Redding)

6260. Re: [NorCalFire] Photos of Santa Clara Complex fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-28 17:07:38 UTC
From: shawn mcevers
Topic: 6258 Message: 6260

Nice job thanks guys!

Bryce Wolfson <sar@...> wrote:The Mt. Hamilton webcam link made its way around yesterday; today they've
posted a series of stills (that don't appear to be from the webcam, just
taken from up on Mt. Hamilton) which illustrate the fires quite nicely.

<http://mthamilton.ucolick.org/hamcam/firePicsJG/>

The hamcam (currently pointed at the fire(s)):

<http://mthamilton.ucolick.org/hamcam/>

6262. complex fire update

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-29 21:11:11 UTC
From: Jeffrey
Topic: 6262 Message: 6262

Well its now 2pm and I hear "0" air craft the only thing Im hearing is
traffic on command 4 tone 4 anybody else hearing anything??

I heard a press confrence at noon they say fire is now at 19640 acres and
they backed up control date to september 3rd

BTW thaty is a total acrage of the several large fires and many smaller
ones some have burned together

starting to hear traffic now on white 3 but I think most stuff is to far
east now

Jeffrey,

Where is the fire located?

Nancy

SCC Fire just requested mutual aid for 2 fire line EMT's with 4x4 vehicles and BLS equipment.
Dispatch specified that this was a "physically arduous" assignment. Said it was OES Region 2.
Scene located at Christmas Hill Park in Gilroy. Radio contact is on SCC White 1. Santa Clara Fire and
SCC Fire-Milpitas unable to help.

I'm hearing traffic on the air ops channels, but other than that,
it's all on Command 4. This kind of kludges up Command 4 for us here
in MMU, since we use that as the Command channel for SRA fire
incidents.

well if you look at a map.....

and find LiverMoore and go south south east all the way to about the Gilroy...

Morgan hill boarder about due east of the southern end of Anderson reservoir there are many many many small and a few huge fires in that area back side of Mnt Hamilton is biggest but5 most active is the one south east of livermoore nearing I 5

think all that is right if not someone else will do better

6271. Sum Q's re: Smoke Jumpers

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-30 04:53:19 UTC
From: jplmac43
Topic: 6271 Message: 6271

While cleaning out a very old desk recently I came across the
following data re: Smoke Jumpers

They operate from 21 bases in 10 states w/18{?} aircraft. 10 of the
bases are BLM crews and 11 are Forest Serv.

I sure would like to put together a list as follows:

Base State Agency Aircraft #nCrew Crew# Notes

Is there anyone in the group that has any data that would be a good
start?

Thanks
Danny

6272. Command 4

From: raven
Topic: 6272 Message: 6272

If CDF would ever get their receiver tone plan implamented, you
probably wouldn't have a problem.

From: caladded@aol.com
Topic: 6273 Message: 6274

Lifeflight is out of Stanford Hospital in Palo Alto. Reach is in the northbay

Santa Rosa area. Calstar is more spread out, Concord is one location, I believe another is in Sacramento and they have at least 3 others. Someone on this list has detailed information I am sure. Eagle 5 and 6 are out of the East Bay Regional Parks system, Can't remember if they can do air ambulance work, they can do bucket drops for firefighting and have/are in use with the Santa Clara complex fire. the CHP helos can also transport, Golden Gate Division has two, H30 and H32, both based at Napa Airport, located between the cities of Napa and American Canyon just west of Highway 29.

The helicopters that respond in my area (Tracy, San Joaquin County)
include:

Medi-Flite (or Flight) from Modesto

Stanford Lifeflight

REACH (Sonoma County and other bases)

CALSTAR - Walnut Creek, Gilroy, Auburn and other places

UC Davis (Sacramento) had two helicopters but are supposed to be down to
one. They are called LifeFlight

Just off the top of my head those are what we see here.

Stanford Lifeflight

REACH (Sonoma County and other bases)

CALSTAR - Walnut Creek, Gilroy, Auburn and other places

UC Davis (Sacramento) had two helicopters but are supposed to be down to one. They are called LifeFlight

Just off the top of my head those are what we see here.

Subject: [NorCalFire] Rescue Helicopters

@ various times I have read about rescue helicopters in messages posted w/n the group. I think some of the names I've read are CalStar, Skylife{?}, Reach{?}, and Lifeflight. Has anyone posted a list of which company or public agency operates {how many} rescue helicopters in the Central part of Calif.? Where are there base{s} of ops?

Thank You
Danny

To: norcalfire@yahoogroups.com
Subject: Re: [NorCalFire] Rescue Helicopters

Lifeflight is out of Stanford Hospital in Palo Alto. Reach is in the northbay

Santa Rosa area. Calstar is more spread out, Concord is one location, I

believe another is in Sacramento and they have at least 3 others. Someone on this
list has detailed information I am sure. Eagle 5 and 6 are out of the East
Bay Regional Parks system, Can't remember if they can do air ambulance work,
they can do bucket drops for firefighting and have/are in use with the Santa
Clara complex fire. the CHP helos can also transport, Golden Gate Division has
two, H30 and H32, both based at Napa Airport, located between the cities of Napa
and American Canyon just west of Highway 29.

6284. Lightning Strikes NEU

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-31 17:11:33 UTC
From: Terry
Topic: 6284 Message: 6284

NEU (Nevada/Yuba/Placer had a series of lightning strikes this morning which has started numerous fires in the area. Biggest fire so far is 80 acres off of Garden Bar Rd south of Grass Valley. Potential on that fire is 200 acres. Placer County local government strike team XPL 4125C has been dispatched to fires in the I-80 corrider above Auburn.

Thank you Shawn. Looking @ some of the numbers @ that site, I think first off I would like to determine total number of Jumpers, then determine total numbers of Jump crews {how many jumpers make up one crew}. @ the link you provided, todays numbers are: BLM available 64 FS available 90 for a total of 154. BLM committed 18 FS committed 69 for a total of 87. Combined total available/committed are 241, yet somehow I feel there are many more than that.

AIrcraft. When a crew is flown to a mission does that aircraft land @ nearest agency airfield & wait to pick up crew for return to home base?

Danny

6286. NEW LIGHTNING FIRES

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-08-31 17:52:42 UTC
From: raven
Topic: 6286 Message: 6286

The El Dorado NF, Tahoe NF, AEU & NEU all got it pretty hard early this morning (0530) with lightning.

All agencies working numerous fires through out their areas. Have requested smoke jumpers, air attacks, air tankers, and several helos.

Danny,
The jumpers typically don't have a set crew size.
They take as many as they think they need. And ~250
seems like a pretty good number. Remember that some
have already gone back to college for the fall.

As luck would have it, I'm on a fire in West
Yellowstone, MT right by one of the jumper bases.
Stopped by to say hi.

See ya,
John

The smoke jumper books I've read refer to hiking out to be picked up by vehicle or rotorcraft. A jump plane is a one-way trip. I wonder how they deal with longer range travel? After the jumpers have been out for several days, how do they get home?

My memory is that there are only about 300 jumpers total.

Subject: Re: [NorCalFire] Sum Q's re: Smoke Jumpers

Here is a start for you:
http://www.nifc.gov/smokejumper/smjrpt.php

jplmac43 <d952@...> wrote:
While cleaning out a very old desk recently I came across the
following data re: Smoke Jumpers

They operate from 21 bases in 10 states w/18{?} aircraft. 10 of the
bases are BLM crews and 11 are Forest Serv.

I sure would like to put together a list as follows:

Base State Agency Aircraft #nCrew Crew# Notes

Is there anyone in the group that has any data that would be a good
start?

Thanks
Danny

Topic: 6286 Message: 6291

neu dispatching units to several fires in tahoe NF with no units
onscene. air tanker is doing recon around the fires at this time.
Dispatch attempting to scrounge up some units to respond. so far only
4 engines are being sent. Fires are in the "sugar Pine" area

Lifeflight is out of Stanford Hospital in Palo Alto. Reach is in the
northbay

Santa Rosa area. Calstar is more spread out, Concord is one location,
I

believe another is in Sacramento and they have at least 3 others.
Someone on this
list has detailed information I am sure. Eagle 5 and 6 are out of the
East
Bay Regional Parks system, Can't remember if they can do air ambulance
work,
they can do bucket drops for firefighting and have/are in use with the
Santa
Clara complex fire. the CHP helos can also transport, Golden Gate
Division has
two, H30 and H32, both based at Napa Airport, located between the
cities
of Napa
and American Canyon just west of Highway 29.

SCC = Santa Clara County

33.960

This is used for County Interagency Coordination

Useless tidbit of information:

Did you know that Santa Clara County Fire's tankers used to have receive
only radios that listened on 1674 kHz?

True!

SCC is the South Santa Clara Fire District (contracted to CDF) The Santa Clara Complex was looking for EMT's to be available for dispatch into the area where the fires were.

For the agency in the state of Californis three letter identifers check the FOG (ICS 420)

Subject: [NorCalFire] SCC Red Net activity (33.9600)

SCC Fire just requested mutual aid for 2 fire line EMT's with 4x4 vehicles and BLS equipment.
Dispatch specified that this was a "physically arduous" assignment. Said it was OES Region 2.
Scene located at Christmas Hill Park in Gilroy. Radio contact is on SCC White 1. Santa Clara Fire and
SCC Fire-Milpitas unable to help.

SCC Red Net- 33.9600 @1530

From: Tim Tribble
Topic: 6304 Message: 6305

This is the Cod Complex, it's 360 acres, 5% contained,

The Codfish Fire is burning in mixed conifer with
heavy dead and down fuels. It is in the East and West
Branches of El Dorado Canyon, in very steep and
inacessible terrain, it has the potential of going
over 13,000 acres. Other fires in this Complex
consists of approximately 20 lightning fires, all have
been staffed and contained, or been declared out.
Substantial resources have been assembled to construct
contingency lines for the 13,000 acre fallback
alternative and for structure protection.

6306. Valley Lightning fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-04 01:08:52 UTC
From: Mobile11@aol.com
Topic: 6306 Message: 6306

I was traveling today from Redding south along Highway 5. I left Redding around 11:30 AM. It was cloudy when I left and along the trip experienced Lightning strikes all around and scattered showers. Heard Lake Napa CDF Unit working a small 10-30 acre fire in the Morgan Valley area between Lake Berryessa and Clear Lake near the Homestead Mine .They were and still are on 151.340 as well as the following. Ground Tac 168.050 Air Tac 151.280 There was also a fire called the "Spring " fire which is 5 miles south of Highway 20 near Williams. They were on White 3 154.295 I just got home in San Francisco and the Morgan Valley Fire has been estimated at 1,000 acres + . I also heard them referring to the fire as "The Morgan Valley Complex." I also heard between Lake, Sonoma, and Mendocino Counties there was a estimate of 150-300 fires due to Lightning strikes. Not as big as the Morgan Valley though. From what I saw earlier I can believe it. Question: What makes a fire become a "Complex" ? is it the amount of acreage or man power or both?

http://live.norcalscan.org (server is up, regardless of what it says ;)

Live scanner is running all Tehama incidents, plus dispatch for
Lassen NF, Shasta-Trinity NF, Mendocino NF, Shasta and Butte CDF.

Tehama County working major lightning fires on the westside today. I
was busy keeping servers online at work today as lightning keep
blowing UPS's left and right. It was a good storm. Short downpour of
rain.

Tehama Command working on 151.265. All west side CDF stations are
super staffed with multiple crews and engines. We're hurting for
staffing. Tankers and copters are close to going home with sunset
fast approaching.

Tehama Local 151.370
Tehama Command 151.265
Tactical 151.175
all on live scanner

Date: 2003-09-04 02:00:04 UTC
From: Jake H
Topic: 6306 Message: 6309

Complex is when a series of small fires are in the same area and
might join/converge into one big fire. They fight all the small fires
as if it was one big fire, making it a "complex." Helps in
administrative purposes and paperwork for the incidents etc. Maybe
somebody else has a better description.

From: frank ealand
Topic: 6306 Message: 6310

A complex is multiple fires under one management organization, be it a incident management team or a smaller management organization, but there would be 1 IC for all of the fires within the complex. ----- Original Message ----- From: Mobile11@... 6311. Complex - Area Command from the FOG

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-04 03:48:17 UTC
From: n6ckv
Topic: 6311 Message: 6311

From the FOG ICS 420-1

Complex
A complex is two or more individual incidents located in the same general proximity which are assigned to a single Incident Commander or Unified Comand to facilitate management.

Area Command
Area Command is an expansion of the incident command function primarily designed to manage a very large incident that has multiple incident management teams assigned. However, an Area Command can be established at any time that incidents are close enough that oversight direction is required among incident management teams to insure conficts do not arise.

Note: ICS is for any incident, not limited to fires.

6312. Useful background

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-04 04:09:54 UTC
From: n6ckv
Topic: 6312 Message: 6312

There are several documents/manuals that provide the needed background to understand what you are hearing on your radios.

Start with the Firescope web page
http://firescope.oes.ca.gov

The FOG ICS-420 is the complete description of the ICS positions and their duties. And it has the three letter agency designators in the back

The ICS 209 is the main form for an incident.

Also go to

www.nwcg.gov

for all kinds of information about the various positions at a wildfire. All the positions have a four letter code. There are documents that describe the requirements for each position and there are task books for each position.

Jake's web site has a good list of frequencies

carl

6313. NorCal Live Scanner back up, lightning fires

Date: 2003-09-04 04:14:47 UTC
From: Jake H
Topic: 6313 Message: 6313

If you haven't noticed, live scanner is back up.

http://live.norcalscan.org/

The entire "westside" from Lake/Napa Unit, Mendocino USFS Stonyford area, Tehama/Glenn CDF west side, Shasta CDF westside got nailed with extreme lightning and little rain today. Good size fires are popping up all over the place.

Current hot spot they are worried about is in the Doe Peak area, Red Mtn (TGU Tone 3), just north and west of Elk Creek in western Glenn County. It was over 50acres in oak/timber/mazanita with some residence threatened.

Freq lineup (Lots of freqs, but it isn't too busy)

151.370 Tehama/Glenn CDF Dispatch "Red Bluff"
154.145 Red Bluff City Fire - city net
153.830 Red Bluff City Fire - tact 1 151.460 Command 7 and Tact 12
151.175 CDF Tact 3
151.190 CDF Tact 4
151.295 CDF Air Tactics 5 (bleed over from Tehama Sheriff Dispatch)
151.355 CDF Command 1
151.265 CDF Command 2
151.160 Shasta/Trinity CDF Dispatch "Redding"
151.400 Butte CDF Dispatch "Oroville"
166.675 Air Tactics
169.150 Air Tactics
169.200 Air Tactics is locked out - computer noise
151.280 Air Tactics
151.295 Air Tactics
151.310 Air Tactics
168.625 Air Guard
168.650 North Ops Flight Following
169.125 Travel Net (good chit chat and BSing)
171.575 Shasta Trinity Forest Net "Redding"
169.175 Mendocino Forest Net
172.225 Lassen Forest Net "Susanville"

From: Jake H
Topic: 6316 Message: 6316

A fun trick to map multiple lightning fires...

Have http://www.topozone.com/finddms.asp open, loaded on the
Deg/Min/Sec entry page.

As they report lightning fires and give lat/long coordinates, they
will give them in Deg/Min.decimal (GPS) format and can be entered
right into this page. Enter the decimal number in minutes and put 0
in seconds.

Example "40 degrees 155.2 by 122 degrees 23.76"

Enter 40 155.2 0
Enter -122 23.76 0 and you'll get a quick map where it's at.

Make sure you put a negative in front of the longitude - we aren't in
the eastern hemisphere :)

Jake

6317. SCU Strike Team to TGU

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-04 04:44:13 UTC
From: n6ckv
Topic: 6317 Message: 6317

Jake

You must be having fun the week! Last week we had the Santa Clara Complex 30,000+ acres, $10 Million, 53 shelters deployed. My wife worked 6 days on MIRPS, I did 2 days of comm work - helping to install the NIFC repeaters. Got my COMT signed off. We demobed yesterday, now sending strike teams north.

Just send a strike team of engines from SCU to TGU.

Stay safe

carl

Hallo, my name is Wolfgang Jendsch from Germany. I'm joining your group as a new member now. Its really interesting to read your informations - and if I can provide your with informations, too, I will do that. I am a PIO with the "International Lake Constance Fire Association" (BFB), a spezial adviser/PIO with the Radolfzell F.D. and spezialized in US wildland firefighting. I visited USA and CA several times (see: www.feuerwehrpresse.de/e-wildland.html).
Greetings from Germany
Wolfgang Jendsch

http://www.countychiefs.com/MutualAid/MutualAidPlanAppendix_2.htm

I believe this plan has been updated in 2 ways since the big San Jose fire - strike teams no longer need to meet up before responding - and mutual aid companies can go to cover (fill in) assignments in San Jose fire stations now.

Peter, interesting information, thanks for posting. But where is the information (i.e., date) that it has been updating? I have a copy of the Santana Row Fire and a lot of recommendations are made including what you mention but again, I don't see a confirmation that they is a plan where the individual Engines and BC would go directly to the incident or cover a San Jose Station as opposed to a rendezvous point?

From: frankealand
Topic: 6327 Message: 6337

There are no ch numbers for these. I am assigning then from North opps as requested. (I am the current COMC or communications cordinator for the GACC) When a incident request frequencies, we assign them from a pool that we work from. When our bucket goes dry, we request additional temporaries from the FAA or in the case of FMs, other agencies. Of the frequencies you list here, 122.425 and 122.575 are from our national pool and 125.550 is a temp that the FAA provided us for this set of incidents. Not worth keeping in your scanner after this bust is over as it may never be back in Northern Cal, but again you never know, it is all up to the FAA freq coordinators next time we request a temp victor.

I hope that explains it.

Frank

Excuse my spelling trying to work, answer phones and get this out for you information. Out of the Nationals listed a few are ok but many we call garbage channels as they are shared with UNICOMS and all helicopter operators be they news media or crop dusters and we have no protection on them, thus they are not poular with many pilots.

Victor is just a pilots term for VHF that has stuck with AM VHF aviation freqs.

Frank

9-08-03 PM Update

Note, CDF resources are coming home right and left. Most Southern Staffing Patterns released, except for crews. Warming and dryin starting Friday in SoCal. Baby East winds due.

California Southern Region
09/08/03 1600 hrs.

STATE/LOCAL INCIDENTS

NO SIGNIFICANT ACTIVITY

FEDERAL FIRES

BRIDGE (San Bernardino County, Highway 330 North of San Bernardino, 3.5 miles South of Lake Arrowhead in the City Creek Area)
☐ 1,352 acres
☐ 40% contained
☐ Fire started 9/05/03 @ 1504
☐ Cause is under investigation.
☐ 5 injuries
☐ Threatened communities include Smiley Park, Oak Knob, Running Springs, Arrowbear, Nob Hill, Enchanted Forest and Fredalba. There is a potential threat to the communities of Skyforest and Lake Arrowhead.
☐ 1,500 residences and 3,000 outbuildings / other threatened.
☐ Mandatory evacuations have been lifted with law enforcement officials estimating 90% of the evacuated returning to their residences.
☐ The evacuation center at the Rim of The World High School is closed. Schools are resuming normal operations today.
☐ Current threats also include a sewage facility, natural gas pipeline and the Mountain Yellow-legged Frog Habitat in the City Creek Drainage.
☐ Fire is burning in heavy brush (drought kill chaparral / scrub oak), with a timber component in the higher elevations. Additionally, there is a threat to the timber in a medium to high bug kill mortality area. Last recorded fire in the City Creek Drainage area was in 1956.
☐ Road closures continue for Highway 330 from the City of Highland to Live Oak however the road closure for Highway 18 has been lifted.
☐ Firefighting resources: 902 firefighters (287 CDF), 8 helicopters (2 CDF), 29 hand crews (10 CDF), 49 engines (11 CDF), 3 air tankers (0 CDF), 9 dozers (2 CDF), 112 overhead (22 CDF).
☐ A Federal Type 2 Incident Management Team (Domanski) transitioned into command on 9/6/03.
☐ Application for Fire Management Assistance Grant has been approved.
☐ Crews continue to make good progress toward containment goals this afternoon with minimal fire activity observed.

California Northern Region

9/8/2003 1600 hours

STATE AND LOCAL FIRES:

Sonoma- Lake- Napa Unit:

All fires are contained. Most fires are in mop-up and patrol status or have been declared out. More resources will be released today.

Middle Lake ☐ 150 acres; 100% contained; snags felled; mop-up continues. Demobilization and release of resources continues. Final report.

☐ 4,670 acres total all fires
☐ Containment % - All fires contained
☐ Estimated containment date ☐ 9/07/03
☐ Fires started 09/03/03 @ 0800
☐ Cause ☐ Lightning
☐ 5 injuries, heat related.
☐ Firefighting resources: 406 firefighters (366 CDF), 10 engines (6 CDF), 8 fire crews (6 CDF), 4 dozers (2 CDF), 0 helicopters (0 CDF),
0 Airtankers (0 CDF), 3 watertenders (1 CDF), 123 overhead (102 CDF).

Mendocino Unit:

All fires contained; mop-up continues. Some resources becoming available.

Mouse fire (near Anderson Valley)- 35 acres; heavy fuels; 100% contained. Mop-up is progressing. Final report.

☐ 255 acres burned total all fires
☐ Containment % - all fires contained
☐ Containment date ☐ 9/8/03
☐ Fires started 09/03/03 @ 0800 to 1300 hours
☐ Cause ☐ Lightning
☐ 0 injuries
☐ Firefighting resources: 406 firefighters (366 CDF), 62 engines (54 CDF), 7 fire crews (7 CDF), 0 dozers (0 CDF), 2 helicopters (1 CDF),
0 Airtankers (0 CDF), 6 watertenders (0 CDF), 83 overhead (75 CDF).
☐ Unit is concerned about the Covelo Complex of fires on the Mendocino National Forest; two fires of about 100 acres are near CDF Direct Protection Area.

Humboldt-Del Norte Unit:

☐ 21 fires are in mop-up, with heavy fuels requiring considerable resources.
☐ 3 fires are uncontained:

Honey Dew Creek ☐ (BLM King Range): 170 acres, steep terrain, dangerous for ground resources; using fire crews to develop access; much of fire perimeter is mid-slope; high potential for growth to 2,000 + acres; establishing incident base at Mattole Grange.

Ten - (BLM King Range): 180 acres. Direct line construction is proceeding with good progress made in heavy fuel and steep terrain; fire inactive due to fog.

Tectah ☐ Simpson Timberland, east of Orick: 93 acres, 100% contained; mop-up progressing well. Final report.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): 30 acres; have built 3.5 miles of trail access in 12☐ brush and huckleberry, 0.8 miles to go; will not need approval from DPR to reopen old road, big slide makes this impractical.

☐ 700 acres total for all fires
☐ Containment % - Various
☐ Estimated containment date ☐ N/A
☐ Fire started 09/03/03 @ 1000 to 1400
☐ Cause ☐ Lightning
☐ 3 injuries
☐ Firefighting resources: 1,064 firefighters (1,009 CDF), 53 engines (49 CDF), 22 fire crews (22 CDF), 2 dozers (2 CDF), 11 helicopters (3 CDF),
0 Airtankers (0 CDF), 8 watertenders (0 CDF), 153 overhead (144 CDF).

Lassen-Modoc Unit:
☐ All fires contained; 3 fires in the mop-up stage.
☐ New fire: Dianne (near Janesville): 200 acres; 100% contained; 50 structures were threatened, but none lost. Mop-up continues. Final report.

Federal Fires of Interest to CDF:

Region 5, U.S. Forest Service, is placing first priority on all new fires. The intent is to suppress all fires in all National Forests except the Mendocino. As federal resources become available from other forests, they will be re-assigned to the large fires on the Mendocino.

Modoc National Forest:
☐ Dome Complex: 16 fires in this complex; 755 acres; 50% contained. Largest are Yellow Fire (550 ac.) and Timber Fire (200 acres). CDF committed engines, crews and dozers on initial attack Saturday.

Mendocino National Forest:
Most fires were active. Significant potential for large fires if winds materialize as predicted later in the week.

☐ Grindstone Complex (West of Willows near Stoneyford): Type 1 Team (Vail); 8 fires, total 2,029 acres; no containment. Some fires unstaffed; many smaller fires have burned together. Good progress on line construction on three fires.
☐ Division Chief Herb Love is assigned as CDF Agency Representative.

☐ Smokehouse Complex (near Lake Pillsbury): Type 2 Team (Szczepanick); 1200 acres; 25% contained. Housing development threatened if predicted north winds arrive: some may be near state Direct Protection Area.
☐ Battalion Chief David Shew is CDF Agency Representative.

☐ Covelo Complex (east of Covelo): 140 + acres; no containment; inaccessible, steep terrain.

Shasta Trinity National Forest: Have reorganized into two complexes:
☐ Hayfork Complex: Type II Team assigned. Fires are Ray at 110 acres and China #1 at 13 acres.
☐ Shasta Complex: Fires include Clear at 6 acres; Hat at 5 acres; Briar at 20 acres; and Thimbleberry at 20 acres.
☐ Fires in complexes total 158 acres; 15% containment.
☐ CDF no longer has a significant commitment here. Final report.

6344. Monday Morning Update for State

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-08 17:49:31 UTC
From: Glenn Jenkins
Topic: 6344 Message: 6344

Note: Added NorCalFire to list. Sorry if double or triple post to some or all.

California Southern Region

09/08/03 0800 hrs.

STATE/LOCAL INCIDENTS

SAN TIMOTEO (Riverside County, City of Beaumont, San Timoteo Canyon Road 1 Mile West of Interstate 10)

☐ Train Derailment / Hazardous Materials Incident
☐ Incident occurred on 9/07/03 @ 21:43
☐ 3 Injuries (2 Minor Injuries to Union Pacific Railroad Employees and 1 Critical Injury to a Contract Employee of the Union Pacific Railroad).
☐ 2 Residences Evacuated (4 People), with the American Red Cross assisting.
☐ Threat of hazardous material contamination (Diesel Fuel) to waterways serving the Cities of Beaumont, Calimesa and the Norton Younglove Reserve.
☐ 14 Container Cars on a west bound Union Pacific Train were involved in the derailment.
☐ An east bound Union Pacific Train on a parallel track clipped the derailed train causing 2 minor injuries to Union Pacific Employees.
☐ During clean up operations a Union Pacific Contract Employee was critically injured when block and tackle rigging failed.
☐ Firefighting Resources: 5 Engines (1 CDF), 2 Hazardous Materials Response Teams, 1 Paramedic Unit, 1 Breathing / Lighting Support Unit, 6 Overhead (3 CDF).
☐ Closure to a major rail artery of the Union Pacific Rail Road for an unknown length of time.

FEDERAL FIRES

BRIDGE (San Bernardino County, Highway 330 North of San Bernardino, 3.5 miles South of Lake Arrowhead in the City Creek Area)
☐ 1,352 acres
☐ 40% contained
☐ Fire started 9/05/03 @ 1504
☐ Cause is under investigation.
☐ 5 injuries
☐ Threatened communities include Smiley Park, Oak Knob, Running Springs, Arrowbear, Nob Hill, Enchanted Forest and Fredalba. There is a potential threat to the communities of Skyforest and Lake Arrowhead.
☐ 1,500 residences and 3,000 outbuildings / other threatened.
☐ Mandatory evacuations have been lifted with law enforcement officials estimating 90% of the evacuated returning to their residences.
☐ The evacuation center at the Rim of The World High School is closed. Schools are resuming normal operations today.

Additionally, there is a threat to the timber in a medium to high bug kill mortality area. Last recorded fire in the City Creek Drainage area was in 1956.
☐ Road closures continue for Highway 330 from the City of Highland to Live Oak however the road closure for Highway 18 has been lifted.
☐ Firefighting resources: 902 firefighters (287 CDF), 8 helicopters (2 CDF), 29 hand crews (10 CDF), 49 engines (11 CDF), 3 air tankers (0 CDF), 9 dozers (2 CDF), 112 overhead (22 CDF).
☐ A Federal Type 2 Incident Management Team (Domanski) transitioned into command on 9/6/03.
☐ Application for Fire Management Assistance Grant has been approved.
☐ Structure protection responsibilities for Smiley Park are being covered by San Bernardino County Fire Department and Running Springs Fire District.
☐ Crews made good progress toward containment goals overnight with minimal fire activity observed.
☐ Minimal fire spread is anticipated for today however, a significant amount of open line still exists in critical areas.
☐ Overall, aircraft have been effective in checking any sustained fire spread and should continue under predicted burning conditions. Fuels and weather still remain capable of sustaining active fire spread and topography will push any unchecked fire activity towards the resort communities.

California Northern Region

9/8/2003 0800 hours

STATE AND LOCAL FIRES:

Sonoma- Lake- Napa Unit:

All fires are contained. Most fires are in mop-up and patrol status or have been declared out. More resources will be released today.

Middle Lake ☐ 150 acres; 100% contained; snags felled; mop-up today.

☐ 4,670 acres total all fires
☐ Containment % - All fires contained
☐ Estimated containment date ☐ 9/07/03
☐ Fires started 09/03/03 @ 0800
☐ Cause ☐ Lightning
☐ 5 injuries, heat related.
☐ Firefighting resources: 306 firefighters (229 CDF), 10 engines (6 CDF), 8 fire crews (6 CDF), 4 dozers (2 CDF), 0 helicopters (0 CDF),
0 Airtankers (0 CDF), 3 watertenders (1 CDF), 123 overhead (102 CDF).
☐ Comments: Unit is concerned about multiple large fires burning on the Mendocino National Forest. Some threaten and may burn onto State Responsibility Area.

Mendocino Unit:

Two new fires, both contained. Six fires are in mop-up stage, but due to heavy timber fuels will require continuing effort. Releasing resources today.

Jackson State Demonstration Forest ☐ all fires controlled; Final Report.
Mouse fire (near Anderson Valley)- 35 acres; heavy fuels; 100% contained.

☐ 255 acres burned total all fires
☐ Containment % - all fires contained
☐ Estimated containment date ☐ 9/8/03
☐ Fires started 09/03/03 @ 0800 to 1300 hours

☐ Cause ☐ Lightning
☐ 0 injuries
☐ Firefighting resources: 666 firefighters (615 CDF), 53 engines (48 CDF), 19 fire crews (19 CDF), 3 dozers (2 CDF), 4 helicopters (2 CDF),
0 Airtankers (0 CDF), 9 watertenders (2 CDF), 93 overhead (84 CDF).
☐ Comments: Resources assigned to MEU are engaged in mop-up and patrol.

☐ Unit is concerned about the Covelo Complex of fires on the Mendocino National Forest; two fires of about 100 acres are near CDF Direct Protection Area.

Humboldt-Del Norte Unit:

☐ 21 fires are in mop-up, with heavy fuels requiring considerable resources.
☐ 3 fires are uncontained:

Honey Dew Creek ☐ (BLM Kings Range): 170 acres, steep terrain, dangerous for ground resources; using fire crews to develop access; much of fire perimeter is mid-slope; high potential for growth to 2,000 + acres; establishing incident base at Mattole Grange.

Tin - (BLM Kings Range): 180 acres. Direct line construction is proceeding with good progress made in heavy fuel and steep terrain; fire inactive due to fog.

Tectah ☐ Simpson Timberland, east of Orick: 93 acres, 100% contained; very heavy fuels have a lot of residual heat; mopup will require 3 or 4 days;

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): 30 acres; have built 3.5 miles of trail access in 12☐ brush and huckleberry, 0.8 miles to go; will not need approval from DPR to reopen old road, big slide makes this impractical.

☐ 700 acres total for all fires
☐ Containment % - Various
☐ Estimated containment date ☐ N/A
☐ Fire started 09/03/03 @ 1000 to 1400
☐ Cause ☐ Lightning
☐ 3 injuries
☐ Firefighting resources: 1,203 firefighters (1,098 CDF), 54 engines (41 CDF), 41 fire crews (41 CDF), 2 dozers (2 CDF), 11 helicopters (2 CDF),
0 Airtankers (0 CDF), 8 watertenders (1 CDF), 135 overhead (119 CDF).

Shasta-Trinity Unit:

☐ All fires contained; two in Hayfork area require extensive mop-up work. Final report.

Lassen-Modoc Unit:
☐ 3 fires in the mop-up stage.
☐ Expecting additional holdover lightning fires to emerge: high winds predicted
☐ New fire: Dianne (near Janesville): 200 acres; 90% contained; 50 structures were threatened, but none lost.

Federal Fires of Interest to CDF:

Little new information available; will update this afternoon.

Region 5, U.S. Forest Service, is placing first priority on all new fires. The intent is to suppress all fires in all National Forests except the Mendocino. As federal resources become available from other forests, they will be re-assigned to the large fires on the Mendocino.

Modoc National Forest:
☐ Dome Complex: 16 fires in this complex. Largest are Yellow Fire (150 ac.) and Timber Fire (220 acres). CDF committed engines, crews and dozers on initial attack yesterday.

Mendocino National Forest:
Most fires were active. Significant potential for large fires if winds materialize as predicted later in the week.

☐ Grindstone Complex (West of Willows near Stoneyford): Type 1 Team (Vail); 8 fires from 100-500 acres, total 622 acres; some fires unstaffed; many smaller fires have burned together.
☐ Division Chief Herb Love is assigned to the Mendocino National Forest, Grindstone Complex, as Agency Representative.

☐ Smokehouse Complex (near Lake Pillsbury): Type 2 Team (Szczepanick); 634 acres; 15% contained. Housing development threatened if predicted north winds arrive: some may be near state Direct Protection Area.
☐ Battalion Chief David Shew is Agency Representative to the Mendocino National Forest, Smokehouse Complex.

☐ Covelo Complex (east of Covelo): 200 + acres; no containment; inaccessible, steep terrain.

Shasta Trinity National Forest:
Hayfork, Weaverville, Shasta Lake, Mt. Shasta and McCloud areas have fires; CDF has significant commitment of engines, crews and overhead. Fires in complex total 158 acres; 15% containment.

California Southern Region

09/09/03 0800 hrs.

STATE/LOCAL INCIDENTS

NO SIGNIFICANT ACTIVITY

FEDERAL FIRES

BRIDGE (San Bernardino County, Highway 330 North of San Bernardino, 3.5 miles South of Lake Arrowhead in the City Creek Area)
☐ 1,352 acres
☐ 80% contained
☐ Fire started 9/05/03 @ 1504
☐ Cause is under investigation.
☐ 6 injuries
☐ A reduced threat remains for the communities of Smiley Park, Oak Knob, Running Springs, Arrowbear, Nob Hill, Enchanted Forest and Fredalba.
☐ Current threats also include a sewage facility, natural gas pipeline and the Mountain Yellow-legged Frog Habitat in the City Creek Drainage.
☐ Fire is burning in heavy brush (drought kill chaparral / scrub oak), with a timber component in the higher elevations. Additionally, there is a threat to the timber in a medium to high bug kill mortality area. Last recorded fire in the City Creek Drainage area was in 1956.
☐ Road closures continue for Highway 330 from the City of Highland to Live Oak.
☐ Firefighting resources: 648 firefighters (136 CDF), 3 helicopters (1 CDF), 25 hand crews (5 CDF), 26 engines (6 CDF), 0 air tankers, 1 dozers (0 CDF), 95 overhead (8 CDF).
☐ A Federal Type 2 Incident Management Team (Domanski) transitioned into command on 9/6/03.
☐ Application for Fire Management Assistance Grant has been approved.
☐ Crews continue to make good progress toward containment goals overnight with minimal fire activity.
☐ All local government resources with the exception of overhead have been released.

California Northern Region

9/9/2003 0800 hours

STATE AND LOCAL FIRES:

Mendocino Unit:

☐ Six new lightning fires detected yesterday along the coast.

All other fires contained; mop-up continues. Some resources becoming available, but Mouse Fire burned into old cull log deck that will require sustained (weeks?) mop-up.

255 acres burned total all fires
☐ Containment % - all fires contained

☐ Containment date ☐ 9/12/03
☐ Fires started 09/03/03 @ 0800 to 1300 hours
☐ Cause ☐ Lightning
☐ 0 injuries
☐ Firefighting resources: 354 firefighters (312 CDF), 42 engines (35 CDF), 8 fire crews (8 CDF), 2 dozers (1 CDF), 2 helicopters (1 CDF),
0 Airtankers (0 CDF), 2 watertenders (2 CDF), 61 overhead (51 CDF).
☐ Unit is concerned about the Covelo Complex of fires on the Mendocino National Forest; two fires of about 100 acres are near CDF Direct Protection Area.

Humboldt-Del Norte Unit:

☐ New fire detected near Tectah Fire; 2 acres. Being handled by resources diverted from Tectah.
☐ 21 fires are in mop-up, with heavy fuels requiring considerable resources.
☐ 3 fires are uncontained:

Honey Dew Creek ☐ (BLM King Range): 170 acres, steep terrain, dangerous for ground resources; backing off to an old road and trail for indirect attack; much of fire perimeter is mid-slope; high potential for growth to 2,000 + acres; establishing incident base at Mattole Grange.

Ten - (BLM King Range): 180 acres. Containment line completed, making good progress.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): Unable to complete access trail due to excessively steep terrain and heavy cover. Will use old road to access point where helispot can be constructed near fire and crews will be ferried in by helicopter.

☐ 700 acres total for all fires
☐ Containment % - Various
☐ Estimated containment date ☐ N/A
☐ Fire started 09/03/03 @ 1000 to 1400
☐ Cause ☐ Lightning
☐ 3 injuries
☐ Firefighting resources: 1,099 firefighters (1,006 CDF), 53 engines (45 CDF), 39 fire crews (39 CDF), 3 dozers (3 CDF), 10 helicopters (3 CDF),
0 Airtankers (0 CDF), 8 watertenders (1 CDF), 173 overhead (145 CDF).

Federal Fires of Interest to CDF:

Region 5, U.S. Forest Service, is placing first priority on all new fires. The intent is to suppress all fires in all National Forests except the Mendocino. As federal resources become available from other forests, they will be re-assigned to the large fires on the Mendocino.

Modoc National Forest:
☐ Dome Complex: 16 fires in this complex; 755 acres; 50% contained. Largest are Yellow Fire (550 ac.) and Timber Fire (200 acres). CDF committed engines, crews and dozers on initial attack Saturday.

Mendocino National Forest:
Most fires were active. Significant potential for large fires if winds materialize as predicted later in the week.

☐ Grindstone Complex (West of Willows near Stoneyford): Type 1 Team (Vail); 13 fires, total 2,900 acres. Several fires contained; many smaller fires have burned together. Good progress on line construction on three larger fires.
☐ Division Chief Herb Love is assigned as CDF Agency Representative.

☐ Smokehouse Complex (near Lake Pillsbury): Type 2 Team (Szczepanick); 1200 acres; 25% contained. Housing development threatened if predicted north winds arrive: some may be near state Direct Protection Area.
☐ Battalion Chief David Shew is CDF Agency Representative.

☐ Covelo Complex (east of Covelo): 140 + acres; no containment; inaccessible, steep terrain.

6349. Mendocino Forest - fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-11 00:27:13 UTC
From: Jake H
Topic: 6349 Message: 6349

The Covelo and Smokehouse complexes are chugging away and the Forest service seems to have made the forest a second priority to all other lightning fires in the region temporarily. The Grindstone complex, which is on the west, valley side of the Forest should be contained tonight by 6pm.

Looking from the valley floor in Red Bluff you can see at least 3 new, good size smokes popping up on the eastern slopes of Mendocino and ShastaT forests. Very good 20mph north winds hitting those slopes at 5pm tonight.

All freqs worth monitoring on http://live.norcalscan.org

Sorry, on days off. Here is PM reports

California Southern Region

09/10/03 1600 hrs.

STATE/LOCAL INCIDENTS

INDIA (San Diego County, Camp Pendleton Marine Corps. Base West of Fallbrook)

* 100 Acres
* 0% Contained
* Fire Started 9/10/03 @ 13:00
* Caused by a military training exercise.
* 1 Injury (Minor Eye Injury)
* Fire is burning heavy fuels in a designated training area of the Camp Pendleton Marine Corps Base (Range 408 & 409).
* Firefighting Resources: 153 firefighters (73 CDF), 2 helicopters (2 CDF), 4 hand crews (3 CDF), 21 engines (5CDF), 5 air tankers (4 CDF), 1 dozer (0 CDF), 1 overhead (1 CDF).
* No threat to lands outside Camp Pendleton at this time with incident potential acreage estimated at 200 acres.

9/10

1645

India Fire... update at 85 ac. 50% contained

FEDERAL FIRES

BRIDGE (San Bernardino County, Highway 330 North of San Bernardino, 3.5 miles South of Lake Arrowhead in the City Creek Area)

* 1,352 acres
* 96% contained
* Fire started 9/05/03 @ 1504
* Cause is under investigation.
* 7 injuries
* No threats noted today.
* Fire burned heavy brush (drought kill chaparral / scrub oak), with a timber component in the higher elevations.
* Road closures continue for Highway 330 from the City of Highland to Live Oak. Repair of guard rails and replacement of road signs are underway with road closures expected throughout the weekend.
* Firefighting resources: 308 firefighters (58 CDF), 4 helicopters (0 CDF), 10 hand crews (1 CDF), 5 engines (0 CDF), 0 air tankers, 1 dozers (0

CDF), 95 overhead (8 CDF).
* A Federal Type 2 Incident Management Team (Domanski) transitioned into command on 9/6/03. Preparations are underway to transition command of the incident back to the San Bernardino National Forest. Transition date and time have not been announced at the time of this report.
* Application for Fire Management Assistance Grant has been approved.
* Crews continue to make good progress toward containment goals with complete containment estimated for later this evening.
* Mop up and patrol operations continue.
* Continued release of resources is being planned for today.

California Northern Region

9/10/2003 1600 hours

STATE AND LOCAL FIRES:

· North wind influence (sharply lower humidity and higher temperatures) is present across the region. Winds will increase into Thursday with speeds sustained at 23 to 28 miles per hour and gusts to 40 miles per hour starting in the north and spreading to the Bay Area by Friday night; winds end Sunday. Red Flag Warning: Hot, dry, and windy all parts of region through weekend.

Humboldt-Del Norte Unit:

· Large scale helicopter water-dropping operations effective today; plan to release National Guard Blackhawk helicopters tomorrow.

· 8 fires are in mop-up, with heavy fuels requiring considerable resources.

· 2 fires are uncontained:

Honeydew Creek ☐ (BLM King Range): 170 acres; indirect containment lines have been completed and are being improved. Hope to be able to burn out tomorrow. Incident base set up at Mattole Grange.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): 35 acres; no containment. Constructed helispot within ½ mile of the fire and crews being ferried in by helicopter. Dozer able to open old skid trail to top of fire for safer access.

· 750 acres total for all fires

· Containment % - 80%

· Estimated containment date ☐ 09/12/03 @ 1900 hrs.

· Fire started 09/03/03 @ 1000 to 1400

· Cause ☐ Lightning

· 9 injuries

· Firefighting resources: 1,451 firefighters (1,113 CDF), 43 engines (36 CDF), 60 fire crews (48 CDF), 3 dozers (3 CDF), 15 helicopters (0 CDF),

0 Airtankers (0 CDF), 10 water tenders (1 CDF), 192 overhead (162 CDF).

Federal Fires of Interest to CDF:

Mendocino National Forest:

· Grindstone Complex (West of Willows near Stoneyford): Type 1 Team (Vail); 13 fires, total 2,900 acres. Several fires contained; many smaller fires have burned together.

· Division Chief Herb Love is assigned as CDF Agency Representative.

· Smokehouse Complex (near Lake Pillsbury): Type 2 Team (Szczepanick); 1,200 acres; 97% contained. Making good progress, containment expected this evening.

· Battalion Chief David Shew is CDF Agency Representative.

· Covelo Complex (east of Covelo): 160 + acres; no containment; inaccessible, steep terrain. Type II Team took over fire last night. Resources may be made available from Smokehouse.

Ummm, nothing new up here except for a 3acre in the city. There were some columns seen way to the southwest, distant in the Mendocino National Forest - but no starts in the north valley all week long. We've been sweating AND dodging bullets with this dry dry north wind at 20+ mph consistent.

Thursday had a ridgeline fire in the middle of the city. They stomped on that so quick....

6357. Red Flag this weekend - NorCal

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-12 23:44:37 UTC
From: Jake H
Topic: 6357 Message: 6357

Heads up, Red Flag warning (and not just any Red Flag warning ;) for all of interior Northern California and surrounding forests until Sunday for extreme dry north winds, low humidity etc.

Expect massive initial attacks from CDF and USFS at the slightest smell of smoke.

Fire dangers are rating high, very high and extreme in the valley right now.

Live scanner chugging away with dispatches from NorCal.

That's a big big fire on the Mendocino Forest. It's actually well southwest of Tehama County. Not sure of the exact location of that plume, but there's a couple good size fires on the Forest.

That's a big big fire on the Mendocino Forest. It's actually well
southwest of Tehama County. Not sure of the exact location of that
plume, but there's a couple good size fires on the Forest.

It is either the Covelo or Smokehouse Complex. The Grindstone Complex isn't in that area, and is contained. Haven't had a fire in that area before that I remember seeing a plume and cross referencing it with area peaks and stuff. It seems right in line between Red Bluff and Anthony Pk in the Forest.

I just checked the boards and the only large fire going anywhere is the Gladstone Complex on the Mendocino. All others have very little resources left. Also no PM update posted, so can't send it out. We keep looking for it.

Potential future threat --------
No likely threat ---------- XX Residence 0 0
Commercial Property
Outbuilding/Other
26: Communities/Critical Infrastructure Threatened (in 12, 24, 48 and 72 hour time frames):

12 hours:
24 hours:
48 hours:
72 hours:
27: Critical Resource Needs (kind & amount, in priority order):
1.
2.
3.
28: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Red Flag Warning calling for high temperature, low humidity and high winds. Deafy fire at 1596 acres is only active fire in complex. Driving distances and steep mountain roads are causing travel delays. Planning contingency for Anderson II and Deafy burning together.
29: Resources threatened (kind(s) and value/significance):
Archeological sites, watershed, spotted owl nesting areas and other wildlife habitat.
30: Current Weather Conditions
Wind Speed: 4-7 mph Temperature: 89
Wind Direction: N Relative Humidity: 14 31: Resource benefits/objectives (for prescribed/wildland fire use only):

32: Fuels/Materials Involved: 4 Chaparral (6 Feet)
Mature chaparral and mixed conifer pine with heavy surface fuel loads.
33: Today's observed fire behavior (leave blank for non-fire events):
Deafy had active flanking spread, short range spotting and upslope runs.
34: Significant events today (closures, evacuations, significant progress made, etc.):
Deafy continues to burn actively down Anderson Canyon toward Eel River. Hand line completed on the East flank. Secured and improved lines on Happy Camp. Mop-up continued on Ice, Estell, Bowman and West Crockett.
Outlook
35: Estimated Control
Date and Time:
36: Projected Final Size:
37: Estimated Final Cost:
38: Tomorrow's Forecasted Weather
Wind Speed: 7-13 mph Temperature: 92
Wind Direction: NE Relative Humidity: 7-13
39: Actions planned for next operational period:
Continue constructing, burning out and holding dozer line on Deafy in Div Y, improve hand line in Div X; mop-up on Happy Camp and Estell.
40: Projected incident movement/spread during next operational period:
Red Flag conditions through Sunday morning could radically affect fire spread. Potential is for Deafy Fire to spread to the West in the Anderson Creek drainage.
41: For fire incidents, describe resistance to control in terms of:
1. Growth Potential - Extreme
2. Difficulty of Terrain - High
42: How likely is it that containment/control targets will be met, given the current resources and suppression/control strategy?
Unlikely due to Steep terrain and predicted Red Flag conditions.
43: Projected demobilization start date:

44: Remarks:
Red Flag conditions predicted for high temperature, low relative humidity and high winds. Spike camp will be moved Saturday from Alder Springs to Bowery Flat. 39 confirmed fires, 1 active, 22 controlled, 13 contained, and 3 have burned to together. Approximately 46 miles of fire perimeter exist. 7 miles of contingency line have been constructed. Happy Camp is contained at 1481 acres.

Hillsborough has NOW called a 6th alarm on this fire which originally came in as a grass fire with a response of 3 Engines and BC7. it quickly changed with multiple reports of an explosion and structure fire. 1st due Engine 32 called the 2nd alarm and it now has gone to 6 alarms plus CDF has sent 4 type 3 Engines, a dozer, hand crew with a request for a strike team of handcrews. The 6th alarm just called for a the fire spotting on Parrot drive across the canyon.

Crystal Springs Comm on 153.785 Control 12
Tac is on 156.015 with some CDF traffic on Feltons local 151.37
Mutual aid includes San Mateo City, County, Burlingame, Millbrae, Foster City, South County, South San Francisco and Daly City.

Task Force Steel Dragon deploys to Montana wildfires

By Spc. Matt Millham
September 3, 2003

Soldiers move tents in billeting areas after arriving at Nine Mile, Mont., fire camp Aug 24.
Spc. Matt Millham

MISSULA, Mont. (Army News Service, Sept. 3, 2003) -- Halfway around the world from the firefights of Iraq, soldiers from Fort Hood, Texas, deployed to engage in an entirely different kind of firefight Aug. 24.

Soldiers from the 1st Cavalry Division's 2nd Battalion, 82nd Field Artillery Regiment, deployed to Missoula, Mont., to fight one of the biggest, most complex wildfires so far this summer in the United States.

"We are professionals, but we are not professional firefighters," said Lt. Col. Gregory Schultz, task force commander. "We're not going into a fight against someone who wants to hurt us, but we're still dealing with an enemy. The enemy is fire."

Landing in a haze of smoke, the troops of Task Force Steel Dragon struck off by school bus to set up camp on a ranch west of Missoula where roughly 500 civilian firefighters had already established a base of operations.

Within hours the troops had set up scores of silver-domed tents in neat rows on a gentle hill as helicopters and sky cranes trailing pelicans, giant buckets of water, flew back and forth overhead toward the fire.

Sunday was the first clear day they'd seen in more than a week said many of the civilian firefighters. Rain the previous Friday night had suppressed much of the smoke and ash that had darkened the sky for almost two weeks prior.

The task force began training in the field Aug. 25, learning wildfire-fighting tools and techniques from professional wild land firefighters. They spent Saturday at their home base at Fort Hood, Texas, in classrooms learning the basics of fire terminology, safety and behavior.

Schultz told the task force before training, "Today (National Interagency Fire Center firefighters) are going to teach you in five hours what is usually taught in three days."

In fact, the classroom portion of the training lasted little more than three hours. The rest of the day was spent issuing gear for the mission.

Training continued through Wednesday, when the task force troops used their tools against the Fish Creek Complex fire for the first time.

The troops were organized into 25 teams of about 20 troops each, somewhat like the squads they are used to.

The Alaska Type 1 Incident Management Team, one of 16 incident management teams in the United States, has been brought in to take command of the Fish Creek Complex as the complexity of the fire has increased and the level of operations stepped up.

The cost of battling the blaze rose to nearly $1 million per day as the operation grew, said Joe Stam, the Alaska team commander who took over as incident commander for the Fish Creek Complex fire on Aug 16.

The fire has cost almost $4 million to date to combat. When the Army's fire training is complete and they join the firefighting operation Wednesday, the total crew strength will number about 1,200, said Stam.

Stam hinted there had been some tension in the past between professional firefighters and military members involved in firefighting operations, but, he said, "It's getting better every year."

"Just like you aren't in the military for the money, you're there for the experience, and to do something to help your country, that's what fire people are here for," said Stam.

The Fish Creek Complex blaze began Aug. 9 when lightning struck an area of the Lolo National Forest 35 miles west of Missoula. Since then, the fire has grown to roughly 28,000 acres and claimed the lives of two firefighters.

Jerry Tannhauser,
CW4 (Ret)
U.S.Army

6374. SAT Morning Update

Topic: 6374 Message: 6374

Tanker 09, P2V in now on base at SBD, on severity as long as they can keep it. Day off is Friday. That means there are 3 tankers at Fox and San Bernardino each.

Tanker 140, P2V, is now on base at SBA, on severity as long as they can keep it. Day off is Tuesday.

Bring on them damm bugs.....

Northern Region, Operations Morning Report
September 13, 2003
1000 Hours

STATE AND LOCAL FIRES:

☐ Strong north winds continue. The wind event is predicted to end Sunday.
☐ Red Flag warning: Hot, dry and windy all parts of the region through Sunday

Humboldt- Del Norte Unit:

Fire Name: HUU Lightning Series (CA HUU 4435)
Location: Various locations
County: Humboldt
Start Date and Time: 9/03/03 @ 1000 to 1400
Fire Cause: Lightning
Acres burned to date: 832
% Contained: 50
Structures Destroyed: 0
Structures Damaged: 0
Est. Containment Date: Unknown @ 0000
Est. Control Date: Unknown @ 0000
Declared Control Date: N/A
Resources Committed: Firefighting resources: 900 firefighters (725 CDF), 29 engines (25 CDF), 44 fire crews (39 CDF), 3 dozers (3 CDF), 9 helicopters (0 CDF), 0 Airtankers (0 CDF), 8 watertenders (0 CDF), 180 overhead (147 CDF).
Current Threats: None
Injuries: 10
Deaths: None
Costs to Date: $6,000,000
Fire Information Phone #: (707) 726-1280
Comments:
☐ Fire activity has increased due to the lowering humidity and increased winds.
☐ Actions planned include continuing mop-up and patrol on all fires as needed with the exception of the Honeydew and Canoe fires. All fires are in heavy fuels requiring considerable resources.
☐ Some demobilization efforts continue.
☐ The Honeydew and Canoe fires are uncontained and have no predicted containment dates:

Honeydew Creek- (BLM King Range) 170 acres, steep terrain, dangerous for ground resources. Indirect containment lines have been completed and are being improved. Crews will be flown in today to construct direct fireline where possible.

Canoe Creek- on Humboldt Redwoods State Park (west of Weott) ☐ 30 acres; no containment. The fire is burning on very steep ground in deep ground litter layer under 15☐ brush under 200☐+ old growth redwoods. It is not possible to construct line anywhere on or near the fire. The fire is being monitored for public safety.

Federal Fires

Mendocino National Forest ☐ High winds over peaks and ridges have surfaced on the fires.

Grindstone Complex (west of Willows near Stoneyford): Type 1 Team (Vail), 39 fires for 5,215+ acres: Most fires are contained; many smaller fires have burned together. The Deafy Fire is the only fire actively burning. It became active yesterday afternoon and continues to cause containment problems. CDF Agency Representative is Division Chief Herb Love (TGU).

Two fires currently burning pretty well, Cherokee IC is on Table Mountain, this started about noon with a few lookout shots, they reported it had grown 10 fold by the time the first engines arrived. This is the larger of the two, but is mainly controlled. Nick and I were at the Chico Air Attack base watching the tankers come and go, we counted no less than 12 from the Cherokee incident. They requested 3 more helos to the Cherokee fire. While we were at Chico AAB, they toned out for the Palermo fire, fully involved structure with spread to vegitation.

Palermo IC was heavilly into structure protection, but they lost several. Fire is 60-80 acres & growing. Resources diverted to get ahead of the fire now, requesting all incoming to respond to lower huncut highway.

Both fires are currently burning pretty well, taking a lot of resources from the county. Chico and Paradise engines & chiefs are going to support the southern fires, along with out of unit strike teams.

Well, Division Chief 2101 is the IC for the incident, I hope he knows what he is doing.

Update on conditions: 140 acres with threats to structures and improvements. More power lines down. Crews and companies still responding, some city mutual aid engines are being released as CDF backup gets in to staging.

I just heard Chico AAB diverting some tankers from their hold positions on the ground here to your fire, then once in the air they were re-diverted to one of the Complex fires.

Approx 5 acres in light orchard fuel. A tanker already in the area during dispatch dropped a well placed retardant line across the head and held the fire to that. About 100ft of open line left on the head and ground crews making good progress. Containment in 5 unless it spots.

Last update from me unless it spots and gets ugly. Gulch IC says a few spots of open line but otherwise picked up pretty fast.

Initial attack has been very heavy on incidents. Lookouts are staffed.

6385. Morning Briefing

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-14 19:55:09 UTC
From: Glenn Jenkins
Topic: 6385 Message: 6385

CALIFORNIA
WILDLAND INCIDENT
BRIEFING
September 14, 2003
1100 hrs

Weather Report - Northern Region
Red Flag Warning: Ended last night in the Eureka area and is predicted to end by noon for the Northern Sacramento Valley and Bay Area.

The easterly winds are ending and the flow is beginning to turn onshore with fog and low clouds moving back up the coast. The air mass will remain very dry especially on the mid and upper slopes. The high-pressure area that has dominated our weather will weaken as low-pressure troughs move through the Pacific Northwest. The first of these will move through Monday. This system will bring some mid and high clouds to the north along with increased afternoon southwest winds, especially along and east of the Sierra Cascade Crest. A stronger system will move through Tuesday. This system could bring a few light showers to the northwest corner of the state and will also cause gusty southwest to west winds over the higher elevations and east of the crest. Once this system moves through high-pressure returns for warming, drying, and more north winds.

Weather Report - Southern Region
A ridge of high pressure will over the west coast will maintain warm temperatures and low humidity over most of the region today. A pacific trough will bring some cooling and some increase in humidity Monday and Tuesday. A pacific ridge will bring warming and drying beginning Thursday.

STATE/LOCAL FIRE REPORTS

Humboldt- Del Norte Unit:
Fire Name: HUU Lightning Series (CA HUU 4435)
Location: Various locations
County: Humboldt
Start Date and Time: 9/03/03 @ 1000 to 1400 hours
Fire Cause: Lightning
Acres burned to date: 503
% Contained: 55
Structures Destroyed: 0
Structures Damaged: 0
Est. Containment Date: Unknown @ 0000
Est. Control Date: Unknown @ 0000
Declared Control Date: N/A
Resources Committed: Firefighting resources: 970 firefighters (815 CDF), 23 engines (19 CDF), 39 fire crews (35 CDF), 2 dozers (2 CDF), 10 helicopters (0 CDF), 0 air tankers (0 CDF), 9 water tenders (0 CDF), 177 overhead (147 CDF).
Current Threats: None

Injuries: 10
Deaths: None
Costs to Date: $6,400,000
Fire Information Phone #: (707) 726-1280
Comments:
Fires were more active yesterday due to decreased humidity, but no major sustained runs were reported.
Fire behavior was minimal overnight.
Actions planned include mop-up, and patrol on all fires as needed with the exception of the Honeydew and Canoe fires. All fires are in heavy fuels requiring considerable resources.
Demobilization efforts continue.
The Honeydew and Canoe fires are uncontained and have no predicted containment dates:

Honeydew Creek- (BLM King Range) 170 acres, steep terrain, dangerous for ground resources. Indirect containment lines have been completed and are being improved. Crews will continue to construct direct fireline where possible.

Canoe Creek- on Humboldt Redwoods State Park (west of Weott) - 30 acres; no containment. The fire is burning on very steep ground in deep ground litter layer under 15□ brush under 200□+ old growth redwoods. It is not possible to construct line anywhere on or near the fire. The fire is being monitored for public safety.

Other State and Local Fires

The Santa Clara, Lake-Napa-Sonoma, Tehama-Glenn, Shasta and Butte Units responded to several incidents yesterday. All were suppressed. Two significant incidents suppressed in the Butte Unit were:
Cherokee Incident, north of Oroville, 100 acres
Palermo Incident, south of Oroville, 140 acres

FEDERAL FIRE REPORTS

Mendocino National Forest - High winds over peaks and ridges have surfaced on the fires.

Grindstone Complex (west of Willows near Stoneyford): Type 1 Team (Vail), 39 fires for 6,021+ acres: Most fires are contained; many smaller fires have burned together. The 2,790-acre Deafy Fire is the only fire actively burning. It became active yesterday afternoon and continues to cause containment problems. Winds are predicted to subside this morning.

6386. Mendocino Fire Update

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-15 21:23:15 UTC
From: Tom Caves
Topic: 6386 Message: 6386

Mendocino NF Complex's WILDLAND FIRE UPDATE
1130 hours (11:30 a.m.)

Smokehouse Complex: Fires burned 1,300 acres.
Grindstone Complex: 39 fires, 1 active, 22 controlled, 13 contained, 3 have burned together. Fires have burned 6,021 acres.
Covelo Complex: Fires burned 240 acres.

TOTAL ACRES: 7,561 acres

PERCENT CONTAINED:

Smokehouse - 100%

Grindstone - 30%

Covelo - 100%

ESTIMATED CONTAINMENT DATE:

Smokehouse - Fires are 100% Contained as of 6pm

9/10/2003.

Grindstone - Unknown

Covelo - Fires are 100% Contained as of

7pm 9/12/2003.

NUMBER OF FIREFIGHTERS/SUPPORT PERSONNEL: 1,387 total

FIRE ENGINES: 74

AIR TANKERS: 0

HELICOPTERS: 12

LOCATION: Mendocino National

Forest, CA.

INJURIES TODAY: 0

STRUCTURES SAVED: N/A

STRUCTURES LOST: 0 residences and

0 outbuildings.

CAUSE OF FIRES: Lightning

FUELS/VEGETATION INVOLVED: Mixed conifer, grass and mature

chaparral.

PROJECTED FIRE ACTIVITY: The Deafy fire is the active fire

of the Grindstone Complex.

CURRENT WEATHER CONDITIONS: Today's temperature: High of 82

degrees in higher

elevations to 92 degrees in lower elevations.

Humidity: 9 to 15%

Winds: West winds 6 to 11 miles

per hour.

TOMORROW'S FORECAST Sunny with an

increase in humidity and winds 7 to 13 mph.

FIRE SUPPRESSION COSTS TO DATE (total for all complexes = $12,750,000):

Smokehouse - $3,400,000

Grindstone - $8,300,000

Covelo - $1,050,000

Gravelly Valley Air Strip IS OPEN.

Forest Highway 7 IS OPEN!

AREAS CLOSED TO THE PUBLIC: For public and fire fighter safety, the

following areas will be closed:

· Forest Road 20N01 (Ivory Mill Road) from the junction of County Road 308 to its intersection with Forest Road M3
· Forest Road 20N44 from the junction of Forest Road M3 to its intersection with Forest Road 20N59.
· Recer Ridge Road (Killdry Road) from Lone Star to Mendocino Pass.
· Forest Road M3 from Forest Highway 7 to the boundary of Upper Lake and east of Twin Springs.

COMMENTS: The weather forcast is for sunny conditions with low humidity

and the air becoming very unstable after 11am. It is possible that a large

plume will develop over the Deafy fire.

The Mendocino National Forest Fire Information Center will be open from

7:30 a.m. to 7 p.m. Fire information and details of the Forest closures

can be obtained by calling (530) 934-1258 or on the Internet at:

www.fs.fed.us/r5/mendocino or

www.fs.fed.us/r5/mendocino/incident/grindstone/ .

For additional fire information on the Grindstone Complex, please call
Chuck Dickson at (530)963-3595 or (661) 330-0152 (cell).

Yeah, friend called me with a smoke column behind Bollychoop, Shasta Bally area. This would put it in the same area. Very heavy smoke in the area in an otherwise clear sky. Have heard nothing on Shasta CDF but ShastaTrinity Forest Net has been a little busier than normal. This is a forest service incident

CHP CAD has it starting around 3:30pm. Incident Command is at Hwy299 at Big French Creek. This is just west of Big Bar, halfway between Weaverville and Willow Creek. At 5pm reported at 250acres moving north, northeast. Latest report on CAD says Hwy 299 will be closed till the morning at the earliest.

Hi this may be an older fire but was just curious as to what fire it is? that is burning west of hiway 5?? I noticed it going up on Sat Morn not seeming to be too bad, But on the way back from my trip to Redding today Sun it seemed to have come over the ridge and was looking pretty bad. Lots of smoke blowing east? towards 5. Just was wondering what i may have seen? It looked as if it may have been over the foothils west of 5 and towards the Clearlake area?? not sure..

That would be the complex in Mendocino NF that has been going for two
weeks. 30 some-odd fires, two of which have been controlled.

>
> Lots of local govt engines enroute. Ron, are you around for pics?
>
> Alexander IC on Tact 11 151.445. Alexander cross of East

Saw this one as it was wrapping up (I have two accounts off of Alexander so a detour was definately in order, as the road was completely blocked on both sides, which if you know Alexander, isn't too hard to do).

Lots of smoke for sure, unfortunately, didn't have the camera with me so no pictures (Don't know how that would look to the CHP that was blocking the road if I'd walked up in uniform asking to take pics so maybe I was better off) :)

Ed

6394. Monday Fire Info - HWY 299 IS CLOSED

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-15 15:14:49 UTC
From: Harry Marnell
Topic: 6394 Message: 6394

As of 08:10 Monday: SR 299 IS CLOSED FROM DEL LOMA /AT HAYDEN FLAT CAMPGROUND/ TO BIG BAR (TRINITY CO) - DUE TO A WILD FIRE - MOTORISTS ARE ADVISED TO USE AN ALTERNATE ROUTE

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, SEPTEMBER 15, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4

CURRENT SITUATION:

Initial attack activity was moderate in Northern California and light elsewhere. Nationally, 76 new fires were reported. Three new large fires
were reported, one each in the Northern California, Southern California, and Northern Rockies Areas.

NORTHERN CALIFORNIA AREA LARGE FIRES:

LOMA, Shasta-Trinity National Forest. A Type 2 Incident Management Team (Szczepanik) is ordered. This fire is in timber, 21 miles west of Weaverville, CA. Active fire behavior with spotting was observed. Highway
299 is closed.

HUMBOLDT LIGHTNING SERIES, Humboldt-Del Norte Unit, California Department
of Forestry & Fire Protection. This fire is in timber and logging slash, 16 miles north of Garberville, CA. Slow moving ground fire with rolling material was the primary cause of fire spread. The fire area is extremely
steep with slope angle greater than 100 percent in many areas.

GRINDSTONE COMPLEX, Mendocino National Forest. A Type 1 Incident Management Team (Vail) is assigned. This complex, comprised of 39 confirmed fires, is in chaparral and mixed conifer, 30 miles west of Willows, CA. The Deafy fire is currently the only active fire in the complex. Rapid fire spread, group torching and frequent spotting up to 1/4
mile were observed on the Deafy fire.

CHP RE Hwy 299:
Location: SR299W AT DEL LOMA - Info as of: 9/15/2003 8:12:14 AM

4:17AM - POSS ROAD WON T OPEN UNTIL NOON OR LATER
6:11AM - CDF WILL HAVE INFORMATION UPDATE READY AT 0800 - RDWY WILL REMAIN CLOSED UNTIL AFTER DECISION MADE IN THE REPORT
6:48AM - FIRE IS STILL BURNING ALONG THE HIGHWAY BY BIG FRENCH CREEK RD

& HAS JUMPED THE RIVER & IS BURNING ON THE OTHER SIDE OF THE RIVER AS WELL

http://cad.chp.ca.gov/ii.asp?Center=RDCC&LogNumber=0028D0915

6396. Morning Briefing for 9-15-03

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-15 18:30:50 UTC
From: Glenn Jenkins
Topic: 6396 Message: 6396

Weather Report ☐ Northern Region

The mid and high clouds over the area today are associated with a weak upper level low pressure trough. This system will bring increased southwest to west winds to many areas today. This will push marine air into the coastal valleys and the Sacramento Valley. However, areas above the marine layer and east of the Sierra Cascade Crest will be dry and windy. A slightly stronger trough will move through on Tuesday. This system could bring a few light showers to the northwest corner of the state. After this trough moves through high pressure will return for warming, drying, and more northeast winds.

Weather Report ☐ Southern Region

A pacific trough will bring some cooling and some increase in humidity today through Wednesday, with some increase in west winds today and Tuesday. A pacific ridge will bring warming and drying beginning Thursday.

STATE/LOCAL FIRE REPORTS

Humboldt- Del Norte Unit:

Fire Name: HUU Lightning Series (CA HUU 4435)

Location: Various locations

County: Humboldt

Start Date and Time: 9/03/03 @ 1000 to 1400 hours

Fire Cause: Lightning

Acres burned to date: 832

% Contained: 55

Structures Destroyed: 0

Structures Damaged: 0

Est. Containment Date: Unknown @ 0000

Est. Control Date: Unknown @ 0000

Declared Control Date: N/A

Resources Committed: Firefighting resources: 881 firefighters (813 CDF), 14 engines (11 CDF), 36 fire crews (35 CDF), 2 dozers (2 CDF), 8 helicopters (2 CDF), 0 air tankers (0 CDF), 7 water tenders (0 CDF), 170 overhead (153 CDF).

Current Threats: None

Injuries: 10

Deaths: None

Costs to Date: $6,600,000

Fire Information Phone #: (707) 726-1280

Comments:

· Actions planned include continued handline construction, mop-up, and patrol on all fires as needed with the exception of the Honeydew and Canoe fires. All fires are in heavy fuels requiring considerable resources.

· Demobilization of excess resources continues.

· Canoe and Honeydew fires continue to move slowly along the ground with rolling material being the primary cause of fire spread.

· The Honeydew and Canoe fires are uncontained and have no predicted containment dates:

Honeydew Creek- (BLM King Range) 435 acres, steep terrain, dangerous for ground resources. Indirect containment lines have been completed and are being improved. Crews will continue to construct direct fireline where possible. Burning operations on the firelines began last night.

Canoe Creek- on Humboldt Redwoods State Park (west of Weott) □ 70 acres; no containment. The fire is burning on very steep ground in deep ground litter layer under 15□ brush under 200□+ old growth redwoods. It is not possible to construct line anywhere on or near the fire. The fire is being monitored for public safety.

FEDERAL FIRE REPORTS

Mendocino National Forest

Grindstone Complex (west of Willows near Stoneyford): Type 1 Team (Vail), 39 fires for 7,262 acres 30% contained; many smaller fires have burned together. Deafy fire is actively burning and has potential to spread up the Anderson, Eel and Cold Creek Drainages. Developing contingency plan if Anderson II and Deafy fires burn together. CDF Agency Representative is Division Chief Herb Love (TGU).

Shasta-Trinity National Forest

Loma Fire (East of Del Loma) Type 2 Team assigned (Szczepanick). 325 acres on both sides of the Trinity River (10% contained). Fire is expected to move in a northerly direction, increasing to 600 acres in size. Highway 299 is closed in both directions. High public interest in fire. Five residences and one motel unit threatened within the community of Del Loma. Two vehicles have been destroyed. Evacuations in progress.

6402. FIRE WEATHER WATCH

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-16 22:48:25 UTC
From: cywildfire
Topic: 6402 Message: 6402

FIRE WEATHER FORECAST FOR CALIFORNIA
NATIONAL WEATHER SERVICE SACRAMENTO CA
330 PM PDT TUE SEP 16 2003

...FIRE WEATHER WATCH FOR INCREASING NORTH WIND AND LOWERING HUMIDITY
FOR THE SHASTA-TRINITY AND MENDOCINO FOREST AS WELL AS THE
CENTRAL AND NORTHERN SACRAMENTO VALLEY (ZONES 213/215/216/263/264)
FOR WEDNESDAY INTO EARLY THURSDAY...

DISCUSSION...AN UPPER LEVEL DISTURBANCE IS MOVING THROUGH THE
NORTHERN GREAT BASIN THIS AFTERNOON AND PRODUCING MODERATE
SOUTHWESTERLY WINDS AHEAD OF IT. HUMIDITIES ARE LOW OVER THE SIERRA
NEVADA. IT WILL BE REPLACED BY SURFACE HIGH PRESSURE AND THE PASSAGE
OF THIS SYSTEM WILL SHIFT THE WINDS TO A NORTHERLY DIRECTION
OVERNIGHT. LOWER HUMIDITY IS EXPECTED ON WEDNESDAY AND RH RECOVERY
WILL BE MUCH WORSE WEDNESDAY NIGHT DUE TO STRONGER DOWNSLOPING
WINDS...ESPECIALLY ACROSS THE MENDOCINO AND SHASTA-TRINITY FORESTS
AND THE NORTHERN SACRAMENTO VALLEY. THIS WILL RESULT IN A 8 TO 16
HOUR PERIOD OF MARGINAL RED FLAG CRITERIA CONDITIONS. THE WIND WILL
DECREASE BY THURSDAY AFTERNOON BUT RELATIVE HUMIDITY WILL REMAIN
LOW...WHILE TEMPERATURES WARM SEVERAL DEGREES. UPPER LEVEL HIGH
PRESSURE WILL DOMINATE FRIDAY INTO THE WEEKEND ALLOWING FOR WARM
TEMPERATURES...CONTINUED OFFSHORE NORTHWEST TO NORTHEAST FLOW AND
LOW HUMIDITY. NORTH TO NORTHEAST WINDS MAY INCREASE AGAIN SATURDAY
NIGHT
INTO SUNDAY.

Note: Micheals fire went from 750 acres to 388. And they still have a team on it. Must have "potential"

California Southern Region

09/16/03 1600 hrs.

STATE/LOCAL INCIDENTS

No Significant Activity

FEDERAL FIRES

MICHAELS (Tulare County, Scodies Meadow North of Chimney Peak, BLM Jurisdiction 6 Miles Southwest of Little Lake)
☐ 388 acres
☐ 5% contained
☐ Fire started 9/15/03 @ 1221
☐ Fire was caused by a military training exercise.
☐ 0 injuries
☐ Archeologists are monitoring the fire☐s progression for threats to potential archeological sites.
☐ Fire is burning light to medium fuels (sage, juniper and grass) in remote steep rocky terrain.
☐ Firefighting resources: 279 firefighters (38 CDF), 2 helicopters (0 CDF), 5 fire crews (1 CDF), 10 engines (5 CDF), 3 air tankers (1 CDF), 1 dozer (0 CDF), 44 overhead (3 CDF).
☐ A Federal Type 2 Incident Management Team (Rios) will assume command at 18:00 hrs.

California Northern Region

9/16/2003 1600 hours

STATE AND LOCAL FIRES:

Humboldt-Del Norte Unit:

☐ Mop-up continues on all contained fires.
☐ Demobilization of excess resources is continuing.
☐ Canoe and Honeydew fires continue to spread with containment unlikely in the immediate future.

Honeydew Creek ☐ (BLM King Range): 560 acres; steep terrain, dangerous for ground resources; indirect containment lines have been completed. Fire is projected to spread very slowly.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): 210 acres; no containment. Burning in a ground litter layer under 15-foot tall brush under 200☐+ old growth redwoods. Fire activity has slowed, but continues to spread. It is not possible to construct line anywhere on or near the fire. The fire is continuing to be monitored for public safety.

☐ 1,218 acres total for all fires
☐ Containment % - 78 except for Honeydew and Canoe Creek fires

☐ Estimated containment date ☐unknown.
☐ Fire started 09/03/03 @ 1000 to 1400
☐ Cause ☐ Lightning
☐ 12 injuries
☐ Firefighting resources: 739 firefighters (660 CDF), 4 engines (0 CDF), 30 fire crews (29 CDF), 3 dozers (3 CDF), 9 helicopters (2 CDF),
0 Airtankers (0 CDF), 6 watertenders (0 CDF), 161 overhead (138 CDF).

Federal Fires of Interest to CDF:

Mendocino National Forest:
☐ Grindstone Complex (West of Willows near Stoneyford): Type 1 Team assigned (Vail); 39 confirmed fires, totaling 7,772 acres. 22 fires are controlled, 13 contained, and 3 have burned together. Deafy (4,494 acres) is the only active fire in the complex and is 35% contained.
☐ Division Chief Herb Love is assigned as CDF Agency Representative.

Shasta-Trinity National Forest
☐ Loma Fire (East of Del Loma) Type 2 Team assigned (Szczepanick). 600 acres on both sides of the Trinity River (10% contained). Fire is projected to spread northeasterly and reach 1,400 acres in size. Highway 299 remains closed in both directions between Del Loma and Big Bar during daylight operations today. High public interest in fire. Eight residences and one motel unit threatened within the community of Del Loma. Two vehicles have been destroyed.
☐ SHU Division Chief Dave Ault is assigned as CDF Agency Representative.

6404. NorCal Fire update

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-17 19:35:04 UTC
From: Jake H
Topic: 6404 Message: 6404

I have on http://www.norcalscan.org the links to the latest info on Grindstone Complex in Mendocino National Forest and the Del Loma fire in Shasta Trinity National Forest. Both sites have intersting links to photo galleries and other information about the fire.

This looks like me 14 years ago intently studying the fire map and wishing it was on my wall....
http://www.fs.fed.us/r5/mendocino/incident/grindstone/gallery/images/9_12ElkCreekElem2/images/P9120051.jpg

Very heavy winds last night, knocked stuff down at 3am and woke me up. Others reported extreme gusts at that time around their house too. North winds are constant all day today.

Jake

6406. Good fire read from news columnist

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-19 19:03:55 UTC
From: Jake H
Topic: 6406 Message: 6406

Quoted from Doni Greenberg at the Redding Record Searchlight. Full story ca=
n be
read at http://www.redding.com/columnist/dgreenberg/stories/
20030912coldg013.shtml

This is a small fire that quickly threatened many homes in north Redding on=
Sept 11.

"That changed as I returned from lunch around 1 p.m., crossed the Market St=
reet
Bridge and was passed by a firetruck with sirens blaring and lights flashin=
g. Up
ahead, tall flames waved from the hill behind Casa Ramos Mexican Restaurant=
,
leaving a trail of charred and naked ground in its wake.

North Market Street car dealership employees and customers had ventured out=
side
for a look. People clustered in front of KIXE, Country Boy Meats and every =
little motel
and apartment along the stretch of road still referred to by locals as Mira=
cle Mile.

Everyone looked north toward towering flames building up speed and racing t=
o the
top for a life-and-death game of king of the hill.

Meanwhile, my car and every other vehicle along North Market Street had be=
come
part of a crazy, impromptu parade. Police and firetrucks were the only offi=
cial
entrants, zooming noisily by in the fast lane. Smoke filled my nostrils. He=
at radiated
on my left arm.

A handful of yellow-suited firefighters scrambled up the vertical terrain =
toward the
fire that easily dwarfed them and could quickly kill them. Some of the fire=
fighters
grabbed onto bushes for support as they heaved thick hoses behind them. Wha=
t kind
of training makes humans do that?

The fire hoses looked like puny weapons against the bright flames, which fl=
apped,
danced and crisscrossed with abandon, like red and orange sheets on invisib=
le

clotheslines. The fire's ravenous appetite grew bolder by the second. Weeds=
and
brush were mere appetizers. Obviously, the hillside homes were the flames' =
desired
main course.

High, high above the fire were people darting back and forth behind some h=
ouses.
The distance gave them the look of tiny actors in a silent, faraway movie. =

Later I would learn in the newsroom that that the fire stopped not far from=
those
homes.

Thank God for shifting winds. Thank God for defensible spaces. And on Sept.=
11, here
in Redding, thank God for our firefighters.

Sept. 11, 2003 ☐ A different day in Redding. That's for sure. At least that=
's the way it
looked from Miracle Mile."

We've had a couple stubborn and inaccessible fires burning down south of Eureka, one just west of 101 near Weott, and another in the lost coast area on BLM land. Maybe they decided to snuff em, since the rest of the state has quieted down. Had a little scare of a fire near Fieldbrook (5 miles or so from me) this afternoon, but they bombed it out. Other than that, haven't heard much radio chatter.

There's the fire along 299 in Trinity County, but I believe it's in Shasta-T NF and/or SHU.

From: Glenn Jenkins
Topic: 6413 Message: 6413

THEY JUST WON'T GO OUT!!!!!

CALIFORNIA WILDLAND INCIDENT BRIEFING
September 20, 2003 1100 hrs

Weather Report - Northern Region
WARM AND DRY NORTH TO EAST WINDS WITH POOR NIGHTTIME HUMIDITY RECOVERY SATURDAY THROUGH VERY EARLY MONDAY

A high-pressure ridge will continue to strengthen Northern California this weekend, and this will bring about another off shore wind event with low humidity. Many areas will see rather poor humidity recovery for the next few nights, and wind speeds will be light to moderately strong. By the middle of next week, a weak, dry low-pressure trough will take over the weather pattern and humidity recovery will be higher. Confidence in events past next Wednesday is very low. It appears that the dry trough may open the door for a stronger system for Thursday and Friday that could bring some rain across the entire Northern California however, it seems more likely that the rain would not be so widespread; rather it would happen mostly in the northwestern portion.

Weather Report - Southern Region
A ridge of high pressure off the California coast will maintain above normal temperatures and low humidity through early next week. A pacific trough will move into California bringing cooler temperatures and higher humidity the middle of next week. This trough will also increase westerly afternoon winds and cause the marine layer to deepen.

STATE/LOCAL FIRE REPORTS

Humboldt- Del Norte Unit:
Fire Name: HUU Lightning Series (CA HUU 4435)
Location: Various locations
County: Humboldt
Start Date and Time: 9/03/03 @ 1000 hours
Fire Cause: Lightning
Acres burned to date: 9,914
% Contained: 20 (Two remaining fires; all others controlled)
Structures Destroyed: 0
Structures Damaged: 0
Est. Containment Date: 09/28/03 @ 2000 hours
Est. Control Date: Unknown
Declared Control Date: N/A
Resources Committed: Firefighting resources: (combined for Honeydew and Canoe fires) 1,866 firefighters (1,541 CDF), 37 engines (33 CDF), 79 fire crews (67 CDF), 6 dozers (5 CDF), 16 helicopters (4 CDF), 0 air tankers (0 CDF), 5 water tenders (0 CDF), 258 overhead (219 CDF).
Current Threats: Potential threats to the Communities of Shelter Cove and Salmon Creek.
Injuries: 14

Deaths: None
Costs to Date: $9,200,000
Fire Information Phone #: (707) 726-1280
Comments: Incident Command Team 5 is assigned (Hawkins - BTU). Honeydew and Canoe fires will continue to spread under the influence of dry North and East winds.

Honeydew Creek - (BLM King Range): Thermal imaging flight mapped the fire at 9,047 acres as of 9/19/03 @ 0630 hours. Steep and inaccessible terrain is challenging ground resources. Fire is moving south and north at a moderate rate of spread on the west side of the King Range with the potential to threaten the community of Shelter Cove. Containment lines to limit lateral spread will be created by opening up old roads along north-south ridges. Dozer and hand lines will be used on east-west ridges at the north and south edges of the fire. BLM has approved dozer use along the Kings range to Fire Hill and on the north end near Spanish Ridge.

Canoe Creek - on Humboldt Redwoods State Park (west of Weott): Estimated to be 867 acres. Fire continues to spread slowly in ground litter under 15-foot tall brush beneath a closed canopy of old growth redwoods. A 60 acre spot fire one mile south of the main fire is uncontained and threatening the Salmon Creek residential area. Structure protection in the Salmon Creek drainage/residential area has been initiated. Will use dozers and crews to contain the south side (Priority 1) and contain the westerly spread (Priority 2).

FEDERAL FIRE REPORTS

Mendocino National Forest

Grindstone Complex (West of Willows near Stoneyford): 39 confirmed fires, totaling 7,926 acres. 23 fires are controlled, 15 contained. Deafy (4,696 acres) is the only active fire in the complex. The complex is 72% contained. Containment date for the Deafy Fire estimated to be 9/24/03 @ 1800 hours. Fire still has the potential to spread into the Anderson, Eel and Cold Creek drainages. Type 2 IMT Team (Dietrich) and suppression damage rehab team have been assigned. Mendocino National Forest assumed IA responsibility for the Grindstone District as of 0700 today. Due to the opening of hunting season, road closures have been put into effect and are being supported USFS and local law enforcement personnel. CDF Agency Representative is Division Chief Herb Love (TGU).

Shasta-Trinity National Forest

Loma Fire (East of Del Loma) Type 2 Team assigned (Szczepanick). 2,600 acres on both sides of the Trinity River (60% contained). Four ranches and isolated cabins threatened in the French Creek drainage. Highway 299 is open today with a pilot car escort required. Highway may be intermittently closed throughout the day due to hazards from rolling rocks and burning debris. Fire is projected to reach 5,000 acres in size. CDF Agency Representative is Division Chief Dave Ault (SHU).

From: Glenn Jenkins
Topic: 6416 Message: 6416

September 21, 2003
1000 Hours

STATE AND LOCAL FIRES:

Fire Weather Watch in effect through Monday due to extremely low humidity along the coastal area from Humboldt to Santa Clara.

Humboldt- Del Norte Unit:

Fire Name: HUU Lightning Series (CA HUU 4435)
Location: Various locations
County: Humboldt
Start Date and Time: 9/03/03 @ 1000
Fire Cause: Lightning
Acres burned to date: 11,533
% Contained: 25 (Honeydew and Canoe fires)
Structures Destroyed: 0
Structures Damaged: 2
Est. Containment Date: 09/28/03 @ 2000
Est. Control Date: 10/15/03 @ 1800
Declared Control Date: N/A
Resources Committed: Firefighting resources: (combined for Honeydew and Canoe fires) 2,111 firefighters (1,636 CDF), 75 engines (70 CDF), 81 fire crews (64 CDF), 9 dozers (8 CDF), 16 helicopters (3 CDF), 0 Airtankers (0 CDF), 10 watertenders (0 CDF), 290 overhead (212 CDF).
Current Threats: Potential threats to the Communities of Shelter Cove and Salmon Creek.
Injuries: 15
Deaths: None
Costs to Date: $10,246,000
Fire Information Phone #: (707) 726-1280
Comments: Incident Command Team 5 is assigned (Hawkins - BTU). Honeydew and Canoe fires will continue to spread under the influence of dry North and East winds.

Honeydew Creek ☐ (BLM King Range): 10,284 acres. Steep and inaccessible terrain is challenging ground resources. Fire is continuing to advance against the uncontained north and south sides on the west side of the King Range, potentially threatening the community of Shelter Cove. BLM has approved dozer use along the Kings Range to Fire Hill and on the north end near Spanish Ridge. Dozer and handlines are being constructed on the east-west ridges at the north and south edges. The ocean is the fire☐s western edge.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): Estimated to be 1,249 acres. Fire continues to spread slowly in ground litter under 15-foot tall brush beneath a closed canopy of old growth redwoods. A spot fire one mile south of the main fire is a potential threat to the Salmon Creek residential area. Structure protection in the Salmon Creek drainage/residential area has been initiated. Dozers and crews are being used to contain the south side (Priority 1) and contain the westerly spread (Priority 2). Control lines on the eastern side of the fire are holding. Approximately 15.5 miles of indirect line is being constructed around the fire.

Federal Fires

Mendocino National Forest

Grindstone Complex (West of Willows near Stoneyford): 39 Confirmed fires, totaling 7,926 acres. 32 fires are controlled, 6 contained. Deafy is the only active fire in the complex. The complex is 76% contained. Containment date for the Deafy Fire estimated to be 9/24/03 @ 1800 hours. Estimated control date is 10/15/03 @1800. Fire still has the potential to spread into the Anderson, Eel and Cold Creek drainages. Type 2 IMT Team (Dietrich) and suppression damage rehab team have been assigned. Mendocino National Forest assumed IA responsibility for the Grindstone District. Due to the opening of hunting season, road closures have been put into effect and are being supported USFS and local law enforcement personnel. CDF Agency Representative is Division Chief Herb Love (TGU).

Shasta-Trinity National Forest

Loma Fire (East of Del Loma) Type 2 Team assigned (Szczepanick). 3,000 acres on both sides of the Trinity River (70% contained). Relative humidity has increased and minimal fire behavior was observed after the burnout was completed. Fire is projected to reach 5,000 acres in size due to interior burning within the containment lines. Four ranches and isolated cabins potentially threatened in the French Creek drainage. Highway 299 is open to public traffic with a pilot car escort required. Highway may be intermittently closed throughout the day due to hazards from rolling rocks and burning debris. CDF Agency Representative is Division Chief Dave Ault (SHU).

Incident: 0003 Type: Report of Fire Location: SHINGLETOWN Map
Page: 143 9L Info as of: 9/23/2003 12:38:39 AM :source CHP, NFI

ADDITIONAL DETAILS
12:01AM - POSS A STRUCTURE FIRE

6419. more Eng. to Humbolt

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-23 20:18:46 UTC
From: Dan James
Topic: 6419 Message: 6419

Last eve, (approx 2400 hrs) TGU sent another Strike team of type 3 Engs to Humbolt.
Question, Does anyone have an update on the fire over there?
This leaves the TGU pretty short...

From: Harry Marnell
Topic: 6420 Message: 6420

Probably going to the Canoe/Honeydew Incident south of Eureka, with a number of homes threatened. Kim Cabrera has some great pics/video clips online at
http://www.humboldtredwoods.org/rangercam/ranger.htm

Canoe/Honeydew is located 16 miles north of Garberville, CA A CDF Type 1 Incident Management Team is assigned. Fires are burning in old growth redwoods, brush and logging slash. Hot, dry conditions continue to increase fire behavior. The south and west flanks on the Canoe fire were the most intense. Local erratic winds on the Honeydew fire increased activity on the northern perimeter. Inaccessibility is hampering containment efforts on both the Canoe and Honeydew fires. Structure protection is in place for 450 residences and 20 commercial properties.

As of this morning (Tues): 12,715 acres, 52% contained, 1648 personnel assigned, 57 crews, 65 engines, 15 helicopters, $12.3 Million cost to date.

Fire Weather:
SKY/WEATHER.....SUNNY.
MAX TEMPERATURE.....88-100.
24 HR TREND.....DOWN 1-3 DEG
MIN RH.....10% VALLEYS TO 24% RIDGES.
24 HR TREND.....LTL CHG

New Fire MEU- Mouse 2...See below.
That's were everyone is heading.

Weather Report ☐ Northern Region
A high pressure ridge will continue over California. Many areas will continue to have unseasonably warm and dry conditions, but for the coast, the marine layer will increase for cooler temperatures and higher humidity, there will also be a good push of marine air through the Delta into the central valleys. A large, weak low pressure system well off the coast will remain there until late in the coming weekend when a stronger weather system pushes it toward shore, to bring the chance of some precipitation with it.

Weather Report ☐ Southern Region
A ridge of high pressure over California will maintain above normal temperatures and low humidity today. A low pressure area will move to just off the central California coast bringing a little cooler temperatures and higher humidity Wednesday through this weekend. This low will also bring a chance of showers and thunderstorms at times as it may draw up some moisture from the southeast.

STATE/LOCAL FIRE REPORTS

Humboldt- Del Norte Unit:
Fire Name: HUU Lightning Series (CA HUU 4435)
Location: Various locations
County: Humboldt
Start Date and Time: 9/03/03 @ 1000 hours
Fire Cause: Lightning
Acres burned to date: 12,824
% Contained: 45 (Honeydew and Canoe fires)
Structures Destroyed: 0
Structures Damaged: 2
Est. Containment Date: 09/28/03 @ 2000 hours
Est. Control Date: 10/15/03 @ 1800 hours
Declared Control Date: N/A
Resources Committed: Firefighting resources: (combined for Honeydew and Canoe fires) 2,052 firefighters (1,639 CDF), 117 engines (100 CDF), 69 fire crews (58 CDF), 24 dozers (9 CDF), 18 helicopters (1 CDF), 0 air tankers (0 CDF), 17 water tenders (0 CDF), 319 overhead (261 CDF).
Current Threats: Potential threats to the communities of Shelter Cove (Honeydew Fire) and Salmon Creek (Canoe Fire).
Injuries: 18
Deaths: None
Costs to Date: $12,283,000
Fire Information Phone #: (707) 726-1280
Comments: Incident Command Team 5 is assigned (Hawkins - BTU). Honeydew and Canoe fires will continue to spread under the influence of dry North and East winds.

Honeydew Creek ☐ (BLM King Range): 10,831 acres. Steep and inaccessible terrain is challenging ground resources. Fire has burned south in to the Shipman Creek drainage. Fire crews, supported by helicopter water drops, will

construct direct handline in the drainage. If successful, the community of Shelter Cove should be protected. Dozer and handlines are being constructed on ridges at the north and south edges in either direct or contingency locations. Containment on the north line is nearly complete and firing operations are occurring to tie the line into the main fire. The ocean is the fire☐s western edge.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): Estimated to be 1,993 acres. Fire intensity increased in the late afternoon and evening on Monday. The fire crossed the southern containment line with numerous spots. Suppression and containment efforts in the Salmon Creek drainage/residential area should limit potential fire growth. The fire was also very active in the northeast portion. Due to current fire weather conditions, containment is a concern as the fire expands toward the indirect northern line. Control lines on the eastern side of the fire are holding.

Mendocino Unit:
Fire Name: Mouse Two (CA MEU 7887)
Location: 4 miles west of Navarro
County: Mendocino
Start Date and Time: 9/22/03 @ 1500 hours
Fire Cause: Under Investigation
Acres burned to date: 130
% Contained: 25
Structures Destroyed: 0
Structures Damaged: 0
Est. Containment Date: Unknown
Est. Control Date: Unknown
Declared Control Date: N/A
Resources Committed: Firefighting resources: 873 firefighters (532 CDF), 45 engines (32 CDF), 33 fire crews (20 CDF), 11 dozers (7 CDF), 5 helicopters (2 CDF), 0 air tankers (0 CDF), 13 water tenders (0 CDF), 47 overhead (45 CDF).
Current Threats: None
Injuries: 0
Deaths: None
Costs to Date: Unavailable
Fire Information Phone #: (707) 459-7403
Comments: The main fire of 80 acres plus two spot fires of about 40 acres and numerous other spot fires will be contained by one perimeter. These fires will burn together inside the containment line. Final acreage estimated at 230 acres.

FEDERAL FIRE REPORTS

Mendocino National Forest

☐ Grindstone Complex (West of Willows near Stoneyford): Total 8,019 acres. Deafy is the last fire to be contained in the complex of 39 fires. The complex is 93% contained. Containment date for the Deafy Fire estimated to be 9/24/03 @ 1800 hours. Estimated control date is 10/15/03 @1800 hours. Continue to hold and mop-up the Deafy Fire. Type 2 IMT Team (Dietrich) and suppression damage rehab team have been assigned.
☐ Due to the opening of hunting season, limited road closures have been put into effect and are being supported USFS and local law enforcement personnel.
☐ Division Chief Herb Love is assigned as CDF Agency Representative.

Final Report for this incident

The fire is in Placer County in the Applegate/Wiemar area just off of I-80 between Auburn and Colfax. Initial reports were 50 acres on both side of a steep roadway with structures immediately threatened. Local Government strike teams and additional CDF resources were being requested before anyone was even on the scene due to the area and the column. Haven't heard a recent update but did hear a Nevada County local government strike team being dispatched about 30 minutes ago. Fire started around 1500 hrs.

Fire is the Pine Incident. NEU-14448. Shows American river and Ponderosa Road

Committed are 6 AT, 3 HEL, 11 Hand Crews, 22 Engines and 27 overhead. Not that large an incident. Do note all the federal Air Tankers on incident. FS has flooded CA with them. Now even CDF can't go to their own fires.

AA-230 and 440

A/T 88, 89, 82, 84, 161, 137, 27

HEL 514, 516 and 205

10 of the 22 engines are local government S/T's

No 209 in system yet.

Did you know it is hopping in Hoopa, we cant' get out were stuck the road is closed, there is a big fire between willow creek and hoopa at sugar bowl, we are hoping our pg&e power lines won'nt get burnt down. We have helicopters flying into hoopa left and right cause there is no way the ambulance can get out of here except the back way and that is way to long an rough. anyone know the helicopter frequencies that flying into hoopa?

Fire is the Pine Incident. NEU-14448. Shows American river and Ponderosa
Road

Committed are 6 AT, 3 HEL, 11 Hand Crews, 22 Engines and 27 overhead. Not
that large an incident. Do note all the federal Air Tankers on incident.
FS
has flooded CA with them. Now even CDF can't go to their own fires.

AA-230 and 440

A/T 88, 89, 82, 84, 161, 137, 27

HEL 514, 516 and 205

10 of the 22 engines are local government S/T's

No 209 in system yet.

Subject: [RadioHum] Canoe Fire update from CDF

CANOE FIRE

Firefighters were able to halt the southward spread of the Canoe fire yesterday after a continuous battle with spot fires that had started outside of control lines. The proliferation of spot fires prompted a precautionary evacuation of residents in the upper reaches of Salmon Creek. No structures were destroyed in yesterday's advances, but 15 fire engines, 12 dozers and 22 hand crews remain on the lines today in an attempt to anchor and secure the southern edge of this fire. An additional 30 fire engines and 4 water-tenders have been assigned structure protection responsibilities in that community.

The weather moderated slightly last night but is predicted to continue to be hot and dry through the daylight hours. Firing operations may be used along many portions of the control lines to deprive the main fire of fuel as it advances towards the lines.

Smoky conditions will persist for several more days as the fire burns up to control lines. Drivers are cautioned to use extreme care when driving in smoky conditions. Keep your lights on and be visible. Please slow down when driving in areas where firefighting vehicles are operating.

Combined personnel and equipment recap for the Canoe and Honeydew Creek fires:

60 hand crews, 15 helicopters, 115 engines, 15 dozers, and 302 support staff. Total personnel: 1941

Total acres burned: Canoe Fire: 3,834 ac. Honeydew Creek: 10,284 ac.
Injuries to date: 26

Structures destroyed: 2 (outbuildings) Estimated 46%
contained
Cost: $ 13.7 million

The Sierra National Forest just activated their Incident Command Team for work on the fire that has just broken loose in the Yosemite National Park. Their report time and location are Groveland Ranger Station at 22:00 tonight.

I don't have many details on the YNP fire yet, but I expect to hear something in the next few hours. I can't get any of the YNP traffic from out of the park, so I have to rely on what I hear from other nets.

Might not have been that big, but they hopped on it big time. Huge potential for structure threats if the fire went west. Fortunately the intense aerial attack seems to have corralled it quickly.

Quite a sight from a couple of miles away, all the tankers making runs and in between the helos dumping as quickly as they could (I live a couple of miles away and hurried home as soon as I heard about it)

I've posted some pictures of this, and another fire earlier this summer near Auburn in the Photos section of the group (folder is "Fire Photos")

6442. Del Loma leftovers

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-09-29 04:12:23 UTC
From: Jake H
Topic: 6439 Message: 6442

Just came through Hwy299 from Eureka and Six Rivers forest crews are cleaning up what's left of Del Loma fire. It didn't burn hot in many areas which is nice - left some forest, but the underbrush was so thick that you still can't look up the side of the burned mountain from the road. It's a tangled mess of crap. This was what was falling into the roadside, closing the road. Warning signs are still up on 299, and there is still plenty of road debris under some steep slopes. One side of the mountain had a very hot run where it firestormed at the top and over the ridge. Started out green at the roadside where it burned only the undergrowth, then became a mosaic of green browned pine trees about 200ft up the hill, then completely brown 400ft up, and then a complete bald area with no visible stumps where pretty good sized pine trees once were.

Thanks Tom for the Spanish Fire info. I'll look for freqs and get them plugged into live scanner. That plume of smoke was in a narrow strip heading from the fire, over Hwy3 into Weaverville and out over Hoopa. Very scary looking up there as it looked like the north end of Del Loma had flared up - couldn't tell if smoke was travelling north or south.

Jake

Right now they're working on the Mendocino Forest Net. 169.175, and a couple tac's, I know 168.200 for sure, not sure of the rest.

Freq's will change when the team gets on and they get a radio cache.

Topic: 6445 Message: 6445

California Department of Forestry & Fire Protection
Northern Region, Operations
Intelligence Synopsis
September 29, 2003
1000 Hours

STATE AND LOCAL FIRES:

Humboldt- Del Norte Unit:

Fire Name: HUU Lightning Series (CA HUU 4435)
Location: King Range and Redwood State Park
County: Humboldt
Start Date and Time: 9/03/03 @ 1000
Fire Cause: Lightning
Acres burned to date: 21,243
% Contained: 90% on Honeydew; 80% on Canoe
Structures Destroyed: 0
Structures Damaged: 2
Est. Containment Date: 10/06/03 @ 2000 (Canoe Creek)
Est. Control Date: 10/20/03 @ 1800
Declared Control Date: N/A
Resources Committed: Firefighting resources: (combined for Honeydew and Canoe fires) 2,265 firefighters (1,950 CDF), 149 engines (139 CDF), 79 fire crews (65 CDF), 25 dozers (13 CDF), 18 helicopters (3 CDF), 1 Airtanker (1 CDF), 18 watertenders (0 CDF), 381 overhead (297 CDF).
Current Threats: Potential threat to Salmon Creek residents
Injuries: 59 (one major)
Deaths: None
Costs to Date: $21,999,000
Fire Information Phone #: (707) 726-1280
Comments: Incident Command Team 5 is assigned (Hawkins - BTU). Many resources are approaching or have exceeded their 14-day time limit. Although fog and an moist inversion layer are present in the valleys, relative humidity along the ridges and peaks remain very low. Fires continue to grow within containment lines under the influence of upslope/upvalley winds. Spotting is a major concern. Fog and the inversion layer will again reduce visibility in the morning, limiting air support on the fire until late morning.

Honeydew Creek ☐ (BLM King Range): 11,777 acres, 90% contained. The fire has been most active on the southeastern flank. There was good humidity recovery overnight, which greatly reduced fire intensity. Containment lines have been constructed around the slop-overs and have been fired out to create a direct line. Upslope and upcanyon winds will continue to test the eastern containment lines.

Canoe Creek ☐ on Humboldt Redwoods State Park (west of Weott): Estimated to be 9,466 acres. The north, west and south sides have been burned out and the fire is backing down to the Eel River, which is the eastern containment line. Slop-overs as large as 15 acres continue to be a problem in the north portion of the fire, however resources have been

successful with containment. The fire could threaten the residential area of Salmon Creek if it extends beyond the southern containment line. Fifty-two structures are within one mile of the fire. Voluntary evacuation continues. Significant work burning out to create direct firelines has been done, and will continue. Containment lines in the north and south have been completed to the Eel River. As the fire backs down toward the Eel River, the potential exists for the fire to spot across. Engines will be staged on Highway 101 to contain any spot fires. Resources will continue working to contain any slop-overs.

The north side of the Canoe Creek fire remains on the Humboldt Redwoods State Park in inaccessible terrain. There is a significant risk to firefighters from large trees falling due to their root systems having been weakened by fire. Heavy smoke has decreased visibility. It is anticipated that the greatest fire intensity will be on the north end of the fire due to predicted south winds. The water supply for the community of Weott is about 1 mile north of the current fire edge.

Federal Fires

Lassen National Forest

Cinder Fire (Approximately 36 miles west of Susanville) 100 acres in the southwest corner of the Caribou Wilderness Area. 90% contained. Demobilization began on 9/28/03 @ 0800.

Mendocino National Forest

Spanish Fire (Near Alder Springs Workcenter) 1,800 acres in steep terrain with limited access. Fire will continue to spread up-canyon to the north and northeast. Moderate rates of spread with crowning, torching and spotting has forced the closure of Forest Road Highway 7 and the evacuation of local forest visitors in the vicinity of Boardtree Campground. No containment figures available.

6446. Re: Spanish Fire?

Fire started at Boardtree Campground south of Plaskett Recreation Area and west of Alder Springs. It's expected to move north and northeast in the canyons according to the Mendocino Forest website. The Forest's website also has Forest topo maps online and this link will take you to the Plaskett Meadows quad.
http://www.fs.fed.us/r5/mendocino/maps/quad/block/plaskett_meadows.htm

You can see the Boardtree Campground at the north end of Spanish Ridge, north of the Spanish Creek canyon.

Fire actually started in the bottom of Spansih Creek, approx. 3 miles south
of Borad Tree Campgound. Looks to be around 2,000-2,200 at this time, but
will most likely grow as afternoon wears on. Suppression efforts hindered,
by steep terrain, and poor visibiliy due to smoke.

Thanks Tom for the corrections. Mendocino's website just updated with an incident map. Press release gives latest road closures and fire information as well. (not as "latest" as Tom has ;)

http://www.fs.fed.us/r5/mendocino/incident/spanish/

Smoke column/path has now swung from the northwest yesterday to the northeast today; putting it over the valley, Red Bluff, and on up past Mt. Lassen. Trinity County Sheriff yesterday reported over 300calls concerned about the smoke. Sunset last night was a spectacular purple with the smoke almost completely shutting out the sun, with "laser" beams of light making it through here and there.

They're still using MNF Forest Net 169.175 for command. That will change
to one of the NFCI Freqs. tomorrow, but not sure which one.

(PRAY)delete please!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

I'm sorry for bothering any of you that might be offended just please
delete and leave your comments to yourselves thanks and God bless you all
****
****
****
My wife(Pam) is having Major surgery on Thursday and I would like to ask
those fellow believers out here
to pray for Gods guidance protection and grace.

Pray that He would see my wife and myself and our daughter through this
trying time. That the time of surgery would be as brief as possible (they
say 3 hours) that there would be no long term effect of that . healing will
come quickly. He will guide the surgeons hands .
that our finance will not suffer and that recovery would be swift .

again I'm sorry for bothering any of you that might be offended just please
delete and leave your comments to yourselves thanks and God bless you all

Jeffrey

It means the winds are 20 feet above the surface. While surface winds are at the floor, you all have seen some flags blowing and others not. It depends where the winds are above the surface.

Topic: 6472 Message: 6472

The California Fire Stations Database at Freq Of Nature has been updated and a new feature added that allows you to drill down to a map of each fire station via MapQuest.

http://www.freqofnature.com/freqout/firestations.html

If you run across any errors or omissions in the database we would appreciate a courtesy e-mail notifying us about it.

Tracy

Tracy, a few comments. The Ord Bend FS is on SR45 but, The zip code is wrong. It should read 95943. Map quest places it approx. 13 mi NW of its correct location. Its location should be, SR 45 between Co/Rd 31 1/2 and Co/Rd 31. Map quest does show the roads.
Also, Hamilton/Bayliss Fire Dist is now 2 separate Dist. Hamilton City FPD station is located @ 1st & Broadway. Not 4th & Main. Bayliss FD is located on Co/Rd W so. of Co/Rd 39.Bayliss Zip code is 95943 and Hamilton City is 95926.
I will check a few more and send any corrections if needed.

6475. CDF DOWNSIZING

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-15 19:50:29 UTC
From: raven
Topic: 6475 Message: 6475

Starting this past Monday, the 13th, Northern Region of CDF has started
to downsize their seasonal staffing. All two engine B stations were reduced
to a single engine. And air attack and tankers go off contract today, the
15th.
However, they will continue to staff the aircraft on a weekly basis
depending
on the weather.

ASSOCIATED PRESS
10/15/2003 12:07 am
An agreement enabling the Nevada Highway Patrol and other agencies to quickly move ahead with about $11 million in equipment purchases to replace a flawed radio communications system was approved Tuesday by a state panel.

The state Board of Examiners, chaired by Gov. Kenny Guinn, approved the agreement with Massachusetts-based M/A-Com Inc., which will provide nearly 1,800 radios to the NHP and the other agencies. The exact amount of the deal still is being negotiated.

Besides the radios, radio towers and other equipment will bring the total to about $15 million to get rid of the old system and comply with a Federal Communications Commission order to stop using more than 140 unauthorized radio frequencies.

The NHP had spent $14 million on a contract with Motorola to build the existing computer radio system linking troopers with one another, dispatchers and other police agencies. That system was activated in 2000 - but nobody applied to the FCC for the frequency licenses.

By January, the state hopes to have the new system operating in the major population centers of Las Vegas and Reno. Outlying areas of Nevada should be linked to the new system by next fall.

The FCC has threatened to levy big fines unless Nevada quickly sets up the new system

Mike just a update for everyone. FS is NOT prepositioning aircraft for the great "what if fire.

What has happened is many airtankers came on late, due to wing inspections, so there ending date has been pushed back. So NIC has placed them in CA where they could be of use until their contract expires.

Up North the agreement between CDF and FS was for the feds to supply the tankers, and CDF to supply the air attacks. Saved money for everyone and we have plenty of aircraft availible.

Here is the updated list for FS/BLM tankers to go off contact. Sorry it is on SoCalFire list, but may be interesting to some.

T-65 TBM 10-26-03 FRESNO

T-48 MINDEN AIR 10-31-03
****

T-152 ARDCO 11-02-03 FOX

T-161 AERO UNION 11-03-03 PORTERVILLE

T-62 TBM 11-05-03 PORTERVILLE

T-55 MINDEN AIR 11-10-03 SAN BERNARDINO

T-140 HAWKINS & POW 11-20-03 SANTA BARBARA

T-139 HAWKINS & POW 11-23-03 NEVADA?

T-68 TBM 11-23-03 FRESNO
****

T-25 AERO UNION 12-02-03 MINDEN

T-16 AERO UNION 12-07-03 SAN BERNDINO

T-151 ARDCO 12-08-03 FOX

T-18 AERO UNION 12-15-03 CHICO

T-66 TBM 12-15-03 KLAMATH FALLS
****

T-162 AERO FLITE 01-15-04 RAMONA
****
As you can see there will be an tanker at Ramona until Jan 15, 2004.

Also for those of the southern CA folks who have been waiting for it, we won't mention no name, cy, here it is, fresh from the FS fire weather folks

Discussion for Southern California Coast and Valleys...

A ridge of high pressure over the southwestern states will maintain warm temperatures and light winds through Tuesday. Humidity will also continue to be very low through Tuesday, except over the coastal areas. A weak pacific trough will bring cooler temperatures and higher humidity Wednesday and Thursday. Another ridge of high pressure will build off the California coast Friday through the weekend bringing warm temperatures and low humidity. There will also be gusty northeast winds below the canyons and passes Thursday night through the weekend.

Lastly, new fire, near Mt Home state forest/, SQF/TUU joint command. Logging slash area. 3 air tankers, 3 helicopters, bunch of engines and crews assigned. Less than 10 acres

Glenn

6493. Re: Fire agency abbreviations - revisited (pointlessly, no doubt)

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-23 01:09:14 UTC
From: Harry Marnell
Topic: 6493 Message: 6493

Yes, for several years now, it's been requested over and over and over again that the subj lines or initial info in the posts contain the location/agencies at least once in plain English in early reports, rather than simply using the official fire-sevice mnemonic abbreviations used by the fire service professionals and those who follow them around (news photogs, semi-neurotic fire-engine chasers, etc).

Obviously most of them figure if THEY have them all memoroized, then the rest of us with less "professional interest" should either memorize the several hundred abbreviations or else download the lists and paper our radio-room walls with them.

Exactly the same high-and mighty, and "better than thou" attitude that old-fart hams have when they say "I had to learn Morse Code, so you young whipper-snappers should too."

Harry
"Living within ARF, adjacent to ARC & FBR, and close enough to see smokes from EUR, BLU, and parts of HUM, HUU, SRF, HIA, HOO, TRN, FRT, FEN, RWP, NOD, and HBR

Now see how easy that is.
And yes, I did have to learn morse code to get my ham ticket, but have never once used it.

6494. BUTTE: Vegetation, South Chico

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-23 21:41:20 UTC
From: Pamela Alley
Topic: 6494 Message: 6494

Just called out the whole alphabet soup, tankers, choppers and all for a vegetation fire off of Spanish Garden Drive in Chico (it's off the Skyway).

No great wonder; the wind started really kicking up about an hour ago or so...nasty and VERY gusty. If this is where I think it is, it's right on the canyon edge and the winds will be very unpredictable. Fires up in that area have in the past been very quick to spread in this type of weather.

Status report from Spanish IC: acre of grass...spread is stopped but continuing response for now....cancelling 2nd tanker (would be coming out of Sonoma) and holding the other.

PA

Topic: 6498 Message: 6498

Have a veggie on Olinda Rd west of Cottonwood/Anderson that is putting up some good smoke. I'm working just south of the incident and have had two heavies from Chico buzz me overhead enroute to the fire. Good gusty north winds on it. What little radio I have access to they requested immediate need structure protection strike teams.

2 copters at least on scene. 2 heavies from Chico just arrived, unknown if tankers from Redding onscene, heavy engine response. Smoke keeps going up and down with the wind.

Heavy tanker just returned to Chico, low and fast. Smoke is pretty much gone so it looks like they got a handle on it.

Thanks Mike. Cellphone report from the scene puts this in major urban-interface area. A lot of the fire is in the Tierra Oaks golf course area. Strong north wind on the fire. Redding City has called it a major event. All fire traffic going through CDF instead of the city.

Heavy engine response, and requesting any aircraft North Ops can give them.

Jake

Topic: 6503 Message: 6503

the redding record searchlight is conducting a opinion poll on if you would listen to a online police scanner.

if you would like to participate go to http://www.redding.com and scroll half way down the page and t will be on the left side.

as of 10-23-03 at 9:30 pm 42 people said yes and 21 said no. interesting.

wounder if they are considering it?

6507. BUTTE?: Falls IC

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-25 23:07:25 UTC
From: Pamela Alley
Topic: 6507 Message: 6507

Why am I always away from the scanner when something happens?

Falls IC just requested another heavy tanker and got a chopper instead; apparently the fire's pretty much under the canopy and a hand crew in there might help.

Now....

Anybody know WHERE this sucker is? :) It's gotta be up in the canyons somewhere 'cause I can pick up AirTac and Oroville but not the IC.
PA

151.400 and 154.295....

Now total 3CDF S2 tankers, and three choppers total I think....

Battalion 2109 is Falls IC on White 3.

2 S2 tankers coming for total of 3; if no containment in next 2-3 hours potential for major fire. Winds starting to seriously get on the fire. Could not catch an estimate on acreage.

Staging Station 51 in Feather Falls up on Lumpkin Road. Ah HA!! :) Go up Oro Quincy Hwy to Forbestown, then several miles and left on Lumpkin.

Ask and ye shall receive...ROFL!

Sawmill Lookout called the shot on this about 2pm if I recall, I was in the car and don't remember where it was. There are no ground units on scene yet and they cannot make access, everything is being fought from the air and all air resources have a no-divert on them at North Ops. IC says if they don't get a line around this in about an hour its going to get huge, but there are no more tankers available in the north state. All ground units are staging at Station 51.

I am hoping one of the air unit reads off a lat/long soon so I can find out exactly where this is.

6513. Update BUTTE: Park IC

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-25 23:50:14 UTC
From: Pamela Alley
Topic: 6513 Message: 6513

Sawmill lookout says smoke has about tripled since original report; Paradise Fire spotting from an observation point said it was on the edge of a canyon.

Paradise Engine 3 is IC on Tac 11 for now; they are looking for the fire and so far no luck but Engine 7 just reported a barbeque smoke...13510 West Park...putting up considerable amount of smoke. Uncertain at this point if this is the smoke seen by Sawmill....

Battalion 2105 now IC; Paradise Chief 2 has a visual but they still can't pinpoint; requesting some kind of air support to help locate. 1650

6514. BUTTE: comment on backyard BBQ...

Park fire is small once they found it. Should be no problem. Tanker 91 did a drop on it and Copter 510 is doing some bucket work now. Some engines released, pretty much every county/CDF unit is being diverted to the Falls fire.

Harry

Thank You for reminbing me why I dropped out of one group and no longer post to others. It is you and other "Post Police" that are trying to restrict the flow of information within these groups, by requiring the use of some magic format. If a post does not please you then you publicly go after the poster. Mayby it would be better if you you made a formal set of rules (including the acceptable terms) that are required. Who made you the GOD of all these groups. Have ou asked all te members of the group if they like your rules?

That is all for now - no real reason to belong to groups that restrict the flow of information

Yanno...it's really FRUSTRATING to hear you say that.

I'm NOT a fire/police/medical professional, but I have a scanner. I'd like to be able to actually glean useful information from posts, rather than just feel that I've been dumped in a bucket of alphabet soup!

The point, as I understand it, of utilizing a format that is a REASONABLE compromise between the two, is to make it easier for everyone to communicate clearly and concisely, whether they are a pro or not.

Using abbreviations only makes me delete the post, anymore...it's just wasting emails and mailbox space to have to repeatedly ask, "Ok, that's nice, but what did it SAY?"

So while I do know that TCU is Tehama (I think!), BTU is not a British Thermal Unit in this context, and that various types of strike teams are designated by the letter in their 'name'.....I don't have any kind of luck reading posts where BTU sent 4352M to SFU for 23D and IC54.

It really doesn't take any extra time to JUST ONCE in the FIRST email on a subject, TYPE IT OUT. "BUTTE: Vegetation, Feather Falls", and in the body of the email, instead of ASSUMING that we all know that four numbers and a letter mean a strike team, say Strike Team (ST) XXXXC.

Honest to Socrates, why is this so difficult? You'd scarcely argue if they made it standard radio protocol!

Sheesh.

From: Ed
Topic: 6525 Message: 6525

You Know Pam , by reading your post , it tells me that you ARE learning from being on this list. the longer your on it the more you learn. Same is true of simply being on a computer. Prior to my buying this thing I did not know what a PC was , or what a CD-ROM was , or any of the abbreviations that are connected with computers.....but I learned , over a period of time and I am still learning , if I don't know , I ask or look it up somewhere. I find scanners and police and fire calls a lot easier with codes and abbreviations. I would bet most (NOT ALL) have it easier. the reason is simply , there are only 10 digits in our system but 26 letters in the alphabet so you have less combinations using numbers , easier to understand , especially when given in rushed voices with sirens blaring in the background. You know what TCU is , CDF is S/Ts are , right , its simply a matter of time of learning the others , you don't have to learn them overnight. good luck and remember, at least not one is posting in spanish !!! lOL

Also sending a USAR team to the " old " fire ? not sure which that one is ?

at any rate , thats 10 Engines and 3 BCs for sure out of county
wonder how long until a North County team goes ?

anybody hear either an Alameda or San Francisco S/T dispatched yet ?

so far I have heard in addition to the above , Santa Clara ST 2303A and an ST from Contra Costa County ... going south

Ed

From: David Coursey
Topic: 6530 Message: 6530

Heard South County Dispatch (155.055 82.5) dispatching an apparently new Tracy Engine 98 that was responding on the south and east side of town. Engine 95 appears to still exist as well.

The plan has been to move 95 to 94 and assign it to responses in Mountain House pending the building of a station there.

I will check on this and report back.

6532. BUTTE: Oroville, Stump Field

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-26 07:06:58 UTC
From: Pamela Alley
Topic: 6532 Message: 6532

Ok, that's twice tonight....Stumps Field is such a very popular place (near Southside residences in town) for arson and 'accidental' fires, I'm beginning to think that it should be a mandated burn at the beginning of each fire season! :)

First fire was pretty enthusiastic but El Medio Fire nailed it down in pretty short order, as usual. This one is 1-2 acres, slow spread in light fuels.

Twice in one day is a little unusual, even for Stump Field!

No problem, Connie.

As large as the state is, 'Oak' something could be anywhere. The major fire activity is in Southern California, which is another list (http://groups.yahoo.com/group/SoCalFire/). The web site http://www.incidentcontrol.com/ will give you the overview of the two fires in the San Bernardino County area.

If you could offer a little more information (area code, zip code, etc.) maybe we can pin it down a little further.

Whewy. Just got back from a road trip up to Turner Mtn in eastern Tehama County. 6800ft condemned fire lookout and radio site. Just as we got to the top the Centerville fire was starting up. Platina had been cooking for a while. Excellent views of both fires. While Sawmill pk reported 180degree wind change we watched the plume literally explode into the new direction. Winds on Turner were always from the north about 20mph steady. Had the winds stayed current on the Centerville fire, they were saying potential for 4000 home evacs in lower Paradise. Very lucky.

Between the 4 of us on the hill (3 on this list) we had plenty of radios going with various fire traffic.

Both Platina and Centerville fires have optimistic outlooks from their incident commanders for the evening. Things are pretty quiet. Coming down the hill we couldn't even see a glow from the Platina (but we saw engines on the ridge).

All traffic on live scanner (with scratchy Butte Support 154.415) http://live.norcalscan.org

I should have been on the Honeyrun fire, however Jake, Nick and I left this morning for a 4x4 trip to Turner Mt. Lookout. We were able to see the smoke pretty well for being quite a distance away, and still listened to it on the scanner.
When Nick and I got back to Chico we drove to Lookout point, which was being used for field observations. We saw the flames in the canyon, and of course at night it looked insane, however IC stated that there was a line around 70% of the fire, and it was only burning in heavy fuels inside the line.
Lookout point on the Skyway is pretty ironic... sooo much happens there. Nick and I were there till 3am this morning with SAR for a vehicle that flew over the edge. And tonight, the same area the car landed was in flame.

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, OCTOBER 27, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2
CURRENT SITUATION:

Initial attack activity was heavy in the Southern California Area, moderate in the Northern California
Area and light elsewhere. Nationally, 49 new fires were reported. Five new large fires were
reported, two each in the Southern California and the Eastern Great Basin Areas, and one in the
Southwest Area. Very high to extreme fire indices were reported in Arizona, California and Idaho.
SOUTHERN CALIFORNIA AREA LARGE FIRES:

CEDAR, Cleveland National Forest. A Type 2 Incident Management Team (Carlton) is assigned.
A Unified Command between a CDF Type 1 Incident Command Team and Carlton 's Type 2
Incident Management Team has been requested. A CDF Incident Management Team has been
ordered. This fire is in chaparral, 10 miles east of Ramona, CA. High winds caused rapid rates of
spread.

OTAY, Monte Vista Unit, California Department of Forestry & Fire Protection (CDF). A CDF Type
1 Incident Command Team has been ordered. This fire is in chaparral, five miles south of Dulzura,
CA. This wind-driven fire made major runs with rapid rates of spread (10,000 acres in six hours).

GRAND PRIX, San Bernardino Unit, California Department of Forestry & Fire Protection (CDF). A
Type 1 Incident Management Team (Studebaker) is assigned. This fire is in heavy chaparral, two
miles west of Mira Loma, CA. Extreme fire behavior with torching, spotting, fire whirls and intense
runs was observed. The fire continued to burn in a westerly direction. Evacuations of Upland, San
Antonio, Mt Baldy Village and Lytle Creek are in effect.

SIMI INCIDENT, Ventura County. A Unified Command between a CDF Type 1 Incident Command

Team (Haines) and Ventura County Fire Department (Sanchez) is in place. This fire is in chaparral
and grass, five miles north of Simi Valley, CA. Rapid rates of spread and long range spotting due
to high winds continue to hamper control efforts. Evacuation centers have been opened and
structure protection is in place in the Simi Valley area. Road closures for State Routes 188, 126
and 23 are in effect.

VERDALE, Los Angeles County. A Type 2 Incident Management Team (Osby/Vandenbossche) is
assigned. This fire is in chaparral and oak grass, four miles west of Santa Clarita, CA. Minimal fire
behavior was observed.

ROBLAR 2, Camp Pendleton Marine Corps Base. A Type 2 Incident Management Team
(Domanski) is assigned. This fire is in chaparral, six miles west of Fallbrook, CA. Fire activity was
limited to the west flank.

OLD, San Bernardino National Forest. A transfer of command from Walker's Type 2 Incident
Management Team to Mortier's Type 1 Incident Management Team will occur today. This fire is in
chaparral on the north side of San Bernardino, CA. Structure protection is in place for numerous
residences and commercial properties. Extreme wind-driven fire behavior with spotting was
observed. Evacuation of the north end of San Bernardino continues.

PIRU, Los Padres National Forest. A Type 2 Incident Management Team (Dorn) is assigned. This
fire is in grass and brush, 14 miles northwest of Santa Clara, CA. High winds caused extreme fire
behavior with long range spotting and high rates of spread. Structure protection is in place for 300
residences and two commercial properties.

PARADISE, Monte Vista Unit, California Department of Forestry & Fire Protection (CDF). A CDF
Type 1 Incident Command Team (Snell) is assigned. This fire is in heavy chaparral, six miles
northeast of Escondido, CA. Extreme fire behavior due to Santa Ana winds was observed.
Evacuation of residences has occurred.

MOUNTAIN, Riverside Unit, California Department of Forestry & Fire Protection (CDF). This fire is
in heavy brush and hardwood slash, 13 miles northeast of Ternecula, CA. Winds have caused

aggressive fire behavior with rapid rates of spread. Evacuation of
residences has occurred.

PARADISE 2, Sequoia & Kings Canyon National Park. This wildland fire is
in mixed conifer and
chaparral, seven miles northeast of Three Rivers, CA. Unseasonably warm
and dry conditions
persist, causing fire behavior to increase significantly. Fire activity
continues in well developed
thermal belts, and roll-out spotting along ridge tops and in drainages
within containment lines
continues to occur.

Subject: Re: [NorCalFire] New to me terms...

I believe any CDF communications vehicle should have the mnemonic of
MCC for Mobile Communications Command. ECT, when related to a crew
bus sounds like something Crew Transport.

a fire broke out at approx. 02:00am in the whitmore area on/near tamerack-oak run-fern rd. this fire is near shingletown,ca. (shasta county).

started at 5 acres in a remote hard access area. spotting at ten acres and is now approx 300+ acres as of 6:30 am. I could see flames when I got off work from lake blvd.(6am)

staging at whitmore school.

they have a dozer line around fire at 7am. There has been no evacuations at this time.

sorry for the short report but im going to bed. Just got off work....

handing it off to someone who is awake in my area......

Air Attack is just starting up for the morning. Declaring to the tankers where the divisions are etc. You can hear dispatch, command, and air attack for Whitmore on the live scanner at http://live.norcalscan.org

Ground tacticals are plugged in but too far away. You'll hear air attack talking to battalion.

Heavy plume of smoke over the valley and sunshine is pretty diminished here in Red Bluff.

Pat, this is well north of you and no threat.

Whitmore fire as of 1pm is 1700 acres right now. Unknown containment or any other news. Shasta is breaking a fire right now (1:20pm) up at Wonderland Blvd near Hwy 5 at the Calavaras Cement Plant - just south of Bridge Bay Resort. That can be the traffic you're hearing regarding Shasta Lake.

All traffic can be heard at http://live.norcalscan.org

cool. I say we all write to "letter to the editor" and thank them for this.

not only is this a great service but could help prevent people from showing up on major scenes. Of course not all will go online and listen and may still cause problems but once they find out (majority) I think it could help.

I want to say thanks for adding to this Jake and others. I was so tired from working I went to bed.

I forgot to add some things as well so here they are.

I notice they are reporting the head on vehicle accident on the redding.com site.

"UNOFFICIALLY" the guy who caused this "MAYBE" a suspect in the whitmore fire. he was known to camp in the area and during the accident had alot of camping gear with him. The guy had major head,facial, lower extremities injuries.

also this guy is well know with law enforcement.

on another issue sorry for being way off on the approx. time the fire started. I can listen to my scanner at work but have to keep it low and so I picked up the communications around 12:00 am. and miss typed the time. This was also the same time the head-on occured.

I just wanted to give a heads-up on the stuff I missed. I hate not having internet access at work. this could help with me reporting things as I listen. I hear alot of good calls on noc/graveyard shift.

also sorry for the real short first report Jake but I was real tired. I know how you like the reports reported. tried to get the basics in though and most of you guys know how to look this stuff up with maps and all so I figured you would help out and did. thank you.

List have a great day.....

6595. Butte message to the unit

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-29 01:12:28 UTC
From: Nick, KG6NMP
Topic: 6595 Message: 6595

Butte (BTU) CDF at 1630ish did a message to the unit: all vacation is canceled starting immediately. They required all stations and Centerville IC to acknowledge the message. They formed up another strike team (9214C I believe) about noon today, but I don't know where they went.

A Chico paper said that many of our chiefs are down in San Diego:
"John Hawkins, George Morris and Bill Orthel, all with CDF, and Capt. John Simon from Paradise fire, are all in the south state. Hawkins [D2103], she [Janet Marshal, P2123] said, is working as incident commander on a fire in San Diego County that burned 100,000 acres in a 12-hour period over the weekend and has so far consumed over 150,000 acres."

Yep, the word is that they are running short of rest and of tactical supervisors to direct placements of firefighters.

Scary stuff.

Sending good thoughts to all!

ST 9214C went north to Tehama and Shasta county.
Shasta had two good fires going this afternoon, but
they are pretty much contained now. One more day of
hot weather then I think it is over for the north
state.

6598. Re: Listening to North State fire communications

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-10-29 01:47:14 UTC
From: Harry Marnell
Topic: 6598 Message: 6598

First off, there are hundreds of frequencies used by local, state and federal firefighting agencies, and it would take forver to list them all. Also, you're not going to get much coverage with a scanner beyond the immediate Bay Area, unless you have a super-duper antenna and a super-duper location. Even then, you'll only hear so much.

My suggestion would be to follow this list - norcalfire - as well as its cencalfire counterpart, http://groups.yahoo.com/group/CENCALFIRE/

There are several scanner "feeds" available over the internet, and most computers have all the necessary software on them, or it's freely available. You might check out these, but be aware that they may not always be online for any number of raesons:

Ben's Online Scanner site, covers a wide area of the central state from the South Bay, at
http://www.mattlogic.com/ - Click on the "Online Scanner" link there, and you'll see two separate "feeds," including which agencies he's scanning on each. A great resource.

Also try these:
http://www.norcalscan.org/live.html - Click on "Listen Live" - for the Northern Sacto Valley area, mainly for Butte, Tehama and Shasta Counties

Brand new, from Redding, at a feed apparently sponsored by the "Record Searchlight" newspaper. It requires RealPlayer, and its URL is
http://real.scripps.com:8480/ramgen/broadcast/Redding/scannersc.ra

San Mateo & Santa Cruz Counties and San Ramon Valley can be heard at
http://www.firedispatch.com/

I'm sure others will be able to chime in here... perhaps with some good frequencies for your scanner too

Hi Ron. No need to apologize. Especially at 1am in the morning we don't expect a full report on anything LOL> Just spit out there's a fire Whitmore area and those of us up or waking up will know to check it out. ;)

My friend living in Cottonwood was up at the time listening to sirens fly by when he heard a very loud crash. Thought it was a shootout and took off in his truck towards the sound (no, I don't drive towards "shootouts" myself). He arrived on a huge wreck on the freeway - what you had reported. Ugly.

Please say a prayer for Engineer Steve Rucker, his wife and 2 youug children. Steve was a wonderful man. Steve organized our annual Toys-for-Tots drive, he planned all of our firefighter family events. He was the nicest guy you could ever meet. He was pure of heart.

We still don't know anymore that what has probably already been posted. We appologize in advance for not returning all your emails and condolances.

Could you please consider a donation to the family relief fund that has been set up for his 2 young children. The address is:

The Steve Rucker Family Fund
Bank of Marin
1450 Grant Avenue
Novato, CA 94945

Thank you,

Per NPR at 0700 EST

Story 1 - $87B for iraq

Story 2 - UN looks at options in Baghdad

Story 3 - California fires - several hundred more homes were lost yesterday - cooler temps and more moisture today - 750,000 acres have burnt in So Cal so far - 20 have been killed - the Cedar Fire in San Diego County is now the largest in CA history at 270,000 acres - Linda Clark does report - several States are on the way with help - British Columbia and Alberta have offered help - their offers are being evaluated - San Diego County and San Bernardino County have extensive problems due to bug kills of trees - 6 months ago CA requested more Fed $$ to cut more trees - the $ was turned down last week - the US House just approved $290M for fed (wild)fire ops (for next year?) as part of a $20B DOI (or Dept of Ag) appropriation.

Story 4 - ?Congress approves funds to keep the Fed govt in business

---

Last night on the CBS News they showed Guv Arnold flying over some fires in a helo and pointing out the window - I also saw a homeowner who saved his home with $30K worth of his own firefighting gear (looked like pumps and baricade gel) - there was also a story about a San Diego cop who continued to talk to a suicidal person on the ?Coronado Bridge even though his wife had called him to report his house was burning

---

Please trim your posts.

Watch out for Trick or Treaters tonight.

As far as I know, most all of Plumas county now on 155.085,
with the exception of Almanor and maybe Chester area.
Don't know about Sierra county as I've never really checked to
monitor them from here in Portola. SO on low band, so would
assume that Fire there too...Somewhere around here I have
a couple of VHF Hi band freqs written down that I got off the
APCO website that Sierra county has had approved? Truckee
is Q5 up here too on 154.13 - dispatched out of Grass Valley...
PNF 170.550 covers alot up here too....Tahoe in the Sierra area?

Later,
Todd KH2TJ/6

6615. Resource Commitment to SoCal (nothing but the fact's Ma'am)

This is an excerpt from the OES Webpage. The full report is at www.oes.ca.gov and click on the Fire Season 2003 link.
This is a lot of equipment and does not include all the Federal assests ordered by the USFS nor does it include the 10 Strike Teams from Arizona and Nevada and the 5 from Oregon sent to the Whitmore fire in Shasta County. It also does not include the 2 Oregon National Guard helos, the 4 from Nevada National Guard and the 8 MAFF's units ordered through the Federal System.

Saturday, November 1, 2003, 10 a.m.

Joint Fire Information from
Governor's Office of Emergency Services and
California Department of Forestry and Fire Protection

Commitment of CDF firefighting resources:
No people assigned out of state.
5,400 people (4,772 and 628 overhead) are assigned to large incidents in California.
62% (13 of 21) of its air tankers and,
91% (306 of 336) of its fire engines and,
88% (189 of 214) of its fire crews committed to all incidents statewide at this time.

Commitment of Local Government and OES firefighting resources:
1010 local government engines.
101 OES engines and 5 OES water tenders.
2 OES Support Unit, 2 OASIS Communications Units, 1 Mobile Communications Van
Seven OES Assistant Chiefs, two Deputy Chiefs, the Branch Chief, and six support staff committed.
One National Guard Liaison assigned to OES FIRE EOC

6617. Re: [NorCalFire] Resource Commitment to SoCal (nothing but the fact's Ma'am)

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-11-02 20:05:59 UTC
From: Danny
Topic: 6615 Message: 6617

One of the more interesting statistics @ that link site is total # of HFE's {Fire Cats} @ the 6 major fire storms. 177 w/41 CDF. One doesn't think much about bulldozers, but they are out there & they are a very effective resource.

Danny

Subject: [NorCalFire] Resource Commitment to SoCal (nothing but the fact's Ma'am)

This is an excerpt from the OES Webpage. The full report is at www.oes.ca.gov and click on the Fire Season 2003 link.
This is a lot of equipment and does not include all the Federal assests ordered by the USFS nor does it include the 10 Strike Teams from Arizona and Nevada and the 5 from Oregon sent to the Whitmore fire in Shasta County. It also does not include the 2 Oregon National Guard helos, the 4 from Nevada National Guard and the 8 MAFF's units ordered through the Federal System.

Saturday, November 1, 2003, 10 a.m.

Joint Fire Information from
Governor's Office of Emergency Services and
California Department of Forestry and Fire Protection

Commitment of CDF firefighting resources:
No people assigned out of state.
5,400 people (4,772 and 628 overhead) are assigned to large incidents in California.
62% (13 of 21) of its air tankers and,
91% (306 of 336) of its fire engines and,
88% (189 of 214) of its fire crews committed to all incidents statewide at this time.

Commitment of Local Government and OES firefighting
resources:
1010 local government engines.
101 OES engines and 5 OES water tenders.
2 OES Support Unit, 2 OASIS Communications Units, 1
Mobile Communications Van
Seven OES Assistant Chiefs, two Deputy Chiefs, the
Branch Chief, and six support staff committed.
One National Guard Liaison assigned to OES FIRE EOC

In addition, LA County FD painted several of their
reserve rigs to match FDNY rigs. They rotate them
aroung the county.

CHP Investigating Officers' Deaths
Officers Found Dead In Weaverville, Crescent City

POSTED: 10:27 a.m. PST November 3, 2003
UPDATED: 10:40 a.m. PST November 3, 2003

SACRAMENTO, Calif. -- The California Highway Patrol is investigating the deaths of two of its officers.

One of the officers died in the town of Weaverville in Trinity County, about 50 miles west of Redding.

Authorities said the body of Rob Coulter was found about 9:30 a.m. Sunday in the parking lot outside the local CHP office, about 3 hours after he began his shift. A CHP spokesman said it's believed Coulter, a 14-year veteran, may have accidentally discharged his weapon.

A second investigation is under way in Crescent City, where a CHP sergeant was found dead in his home. Authorities said it's believed the officer may have taken his own life. The officer's name has not been released.

6622. Thanks for a great season!

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-11-09 00:22:11 UTC
From: Jake H
Topic: 6622 Message: 6622

Wanted to say thank you to all on this list for making it a great season, with minimal problems. Everybody here has wonderful things to contribute and we all appreciate them. Compared to other Califlornia lists I help co-moderate, this list I can just sit back and let all of you have fun. It's been this way for the 2+ years the list has been open. That's all your doing.

Now that fire season is getting drowned out of California, there won't be many posts on this list. I invite you to stay here during the off-season and ask any fire radio questions you may have to get ready for 2004. There might be a few structure fire calls posted etc, but the list usually semi-hibernates during the off-season.

See you around. And if you hibernate too during the off-season, we'll see you around April ;)

6623. Shasta Co. Disaster Drill

Yahoo group: norcalfire (2003 — 2004)
Date: 2003-11-12 15:17:17 UTC
From: hosgs1@webtv.net
Topic: 6623 Message: 6623

Shasta County near Redding ,CA is conducting a disaster drill at 8 am on wed the 12th of nov.

it will be mainly for law enforcement but will have all other public agencies invovled.

it will be about a school under hostage (west valley high in cottonwood) I believe but not certain. you may beable to listen via the www.redding.com feed.

again today at 8am. so locals dont be alarmed....

The trunkedradio site has been around a while and is pretty good...
depending, of course, on the quality of the info submitted ("gigo").

That live feeds BB is dreadful, IMHO. It was set up by the guy(s)
running the livescanneraudio yahoogroup, who have - as we all can
understand - gotten tired of the BS & spam, as well as Yay-hoo's
unresponsiveness to problems. The subscribers to his yahoogroup,
however, overwhelmingly said stick with yahoo... it's immeasurably
easier and faster than navigating thru a slew of separate topics on the
board.

Just my 18 cents.

Harry

From: Ed Tobiasz
Topic: 6636 Message: 6636

Hi all;

I've heard that a High Rise drill will be taking place
Saturday 12/06/03 in Mountain View. I don't have any
times or frequencies.

Anyone have any more details?

Regards

Ed

Looks like the shift that adopted me is on today. Let me give them a call
as soon as someone else gets in so I can spend a few minutes on the phone.

I would have to agree with Ben (and any others) I have two BC780s and they are terrific. Ben is right about digital, they still isn't much in bay area and since I have the 250with card and a 96 . I sure don't need another digital scanner. If I didn't a new base/mobile it would be the 780

I have three 780's and no problems with any of them they are probably
the best scanners I own and I have 16 different scanners.

From: caladded@aol.com
Topic: 6644 Message: 6645

Update at 1323 hours.
MSNBC and others are showing a major collapse in Paso Robles and just now several FFs digging at the A/B corner. A Yellow tarp is being held up in front of the digging. Don't want to jump to conclusions folks, but this is the type yellow tarp they usually cover bodies with. None of the news channels I have watched mentioned any firehouse damage in SLO, in fact the PIO for San Luis Obispo Fire was interview via phone and he did NOT mention it. Several reports that some workers in a Winery in Templeton injured when some barrels collapsed.

6648. STOLEN FIRE TRUCK

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-01-06 22:14:57 UTC
From: raven
Topic: 6648 Message: 6648

If you happen to spot a blue fire truck, call Reno police.

North Tree Fire International, a private company , is missing a four-wheel-drive brush rig, according to a police report filed Monday.

The Ford truck is painted blue with a white stripe, has North Tree Fire written on the side and California license plate NTFI 64. It's valued at about $100,000.

The truck was stolen between Dec. 24 and Monday from a parking lot next to the business at 14505 Mount Anderson St., the police report said.

"We don't have very many fire trucks stolen," Reno police Sgt. Kelly Dean said.

ScannerBuff Alert Network On-Line

http://scannerbuff.net

When the action is happening right now, let the ScannerBuff Network notify you. Each day brings televised and radio broadcast pursuits, armed robberies, major fires, natural disasters, and more. Best of all, it's completely free!

SBN is for scanning enthusiasts around the country. SBN features Incident Notifications via e-mail, text messaging, and pager gateways that allow you to stay on top of breaking action in your local or regional area. SBN is non-profit.

SBN is completely free to all members. The primary differences between SBN and pay sites are that 1) We are national; 2) An incident doesn't need to be televised, 3) Posts in the TalkGroups appear as soon as you post them, and 4) We notify you about specific incidents of interest to
you - not just televised pursuits!

A major feature of SBN is Incident Notification Groups where you specify
the type and severity of incidents that you would like to be notified of.
For example, if a pursuit is televised in your area and you select only
televised events you will be alerted. If you are interested in three alarm fires, but nothing less, SBN will alert you that an incident is occurring. The alert will contain relevant information, such as dispatch
radio frequency(s), TV channel(s), and an overview of details provided.
SBN also provides a User TalkGroup for discussion of in-progress events.
Users themselves issue alerts for the benefit of others.

Benefits of SBN
☐ Free
☐ Nationwide Incident Notifications
☐ Nationwide User TalkGroups (Forums)
☐ Fast & Powerful Searchable Databases
☐ User Created Searchable Databases
☐ Your Own Private Database On-Line
☐ Download Receiver Specific Data Files

SBN is perfect for radio and TV stations nationwide, independent ENG reporters,scanning enthusiasts, and TV viewers alike.

Stay tuned as SBN quickly grows into a community that helps one another
coast-to-coast!

6655. Hello group from Martis Peak Lookout

Date: 2004-01-17 17:53:09 UTC
From: Ric
Topic: 6655 Message: 6655

Hello everybody : Just joined the group today. I am the paid lookout at Martis Peak on the Tahoe N.F / CDF NEU-E. I just wanted to say Hi and invite any of you to come up this next season and visit a piece of history as well as experience one of the best scenic views in this part of the country. If any of you out there are interested in becoming a volunteer lookout , then please let me know . Id be happy to sign you up & I do all the training. We anticipate to open sometime in June - weather depending of course. I will update the group when I recieve confirmation on opening date. I hope some of you out there can get the opportunity to visit and celebrate the 90th year of our existence on the mountain. Sincerely - Ric Baender , Martis Peak Lookout TNF/ CDF NEU-E

From: Nick, KG6NMP
Topic: 6660 Message: 6660

Everyone down in RRU better get their ways in order, cause one of the best is on his way down. BTU and everyone involved will miss him...

Nick

<http://www.chicoer.com/Stories/0,1413,135~25088~1926931,00.html#>

After 30 years as a Butte County Fire/CDF firefighter, Division Chief John Hawkins is leaving for an assignment in Riverside County. On Friday, CDF Capt. Russ Fowler read a touching farewell to Hawkins during the department's 8 a.m. radio check: "Today is Chief John Hawkins' last day in the Butte unit. With mixed emotions, we wish Chief Hawkins success and happiness as he continues his unique brand of leadership in the Riverside unit. We all owe Chief Hawkins our gratitude. To get all of us home safe and sound has always been his motivation. Chief, as a true firefighter's firefighter, you've shown us the way ... What more can we say?" At left, Hawkins (center) gives some parting words of wisdom to firefighter Marcus Ekdahl (left) and engineer Frank Zarate at Station 44 on Fair Street Friday.

6661. Re: [spam] Re: SpamGuard? Directions on turning spamguard off....

Attention ALL list owners:

Please for the love of god.. Turn off spamguard on your groups. To do this:

Go to Management,

then
under Group Settings click "Messages". Scroll down to "Posting and Archives"

and

click "Edit".

The right column will be the SpamGuard settings.

You can change it to the "off"
position from there.

6662. Reno Fire TGs

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-02-09 00:42:30 UTC
From: Ed
Topic: 6662 Message: 6662

I just noticed on trunkedradio.net several new Talkgroups listed for Reno Fire. For those not already informed. Washoe changed to an EDACS system sometime ago and it now includes Sheriffs, Highway Patrol, Reno Fire and Police and Sparks Fire and Police.

Kicking back in my room up there , monitoring , sure beats losing anymore money than TOTALLY necessary :-)

Ed

6663. Fire Weather Watch for LA area

u n Urgent-NWS_LOX-A_FIRE_WE 02/08 215
A FIRE WEATHER WATCH HAS BEEN ISSUED FOR TUESDAY FOR LOW ...

NATIONAL WEATHER SERVICE LOS ANGELES/OXNARD CA
330 PM PST SUN FEB 8 2004

...A FIRE WEATHER WATCH HAS BEEN ISSUED FOR TUESDAY FOR LOW
HUMIDITIES AND HIGH WINDS THROUGH AND BELOW THE PASSES AND
CANYONS OF THE MOUNTAINS AND COASTAL VALLEYS OF LOS ANGELES
AND VENTURA COUNTIES...ZONES 244...245...246...247...253...254
AND 288.

.DISCUSSION...OFFSHORE WINDS ARE EXPECTED TO CONTINUE THROUGH THE
UPCOMING WEEK...BRINGING DRY AND UNSEASONABLY WARM TEMPERATURES TO
THE REGION. THESE WILL COMBINE TO SIGNIFICANTLY DRY OUT THE REGION
AFTER LAST WEEKS RAIN. ON TUESDAY...HIGH PRESSURE SHOULD PEAK OVER
NEVADA PRODUCING STRONG OFFSHORE WINDS OVER THE MOUNTAINS AND
COASTAL VALLEYS. THIS COMBINATION OF STRONG OFFSHORE WINDS WITH LOW
HUMIDITIES RAISES THE POTENTIAL FOR RED FLAG CONDITIONS DURING THE
DAY ON TUESDAY. THEREFORE...A FIRE WEATHER WATCH HAS BEEN ISSUED FOR
THE REGION FROM 6 AM TO 6 PM ON TUESDAY. CONDITIONS ARE EXPECTED TO
IMPROVE ON WEDNESDAY...BUT ADDITIONAL WATCHES OR WARNINGS MAY BE
REQUIRED FOR THURSDAY AND FRIDAY.

PLEASE ADVISE THE APPROPRIATE OFFICIALS OR FIRE CREWS IN THE FIELD
OF THIS FIRE WEATHER WATCH.

Jake ,

You make fun of it but here in San Benito county we got a new engine last July and it took till december for the door stickers to go on when I asked a firefighter whythey took so long he said .....they had to do a fund raiser to afford it!!!

The affectionate name for these on the Tower-Pro list is "monopine"
and "monopalm" from the typical "monopole" cell tower construction.

From: Jeffrey
Topic: 6678 Message: 6678

thought this wpould be of intrest to all

Scores Die in Iran Fuel Wagon Blast

TEHRAN (Reuters) - Runaway train wagons laden with a lethal cocktail of fuel and fertilizers blew up in northeast Iran Wednesday, killing scores of villagers and firefighters.

Estimates of the death toll ranged from 60 to more than 200, with hundreds injured. The most recent figure, from state television, put the dead at 182.

The state news agency IRNA said the 51 runaway wagons, filled with petrol, fertilizer and sulphur products had been set rolling by earth tremors in the saffron-growing province of Khorasan bordering Turkmenistan and Afghanistan (<http://us.rd.yahoo.com/DailyNews/manual/*http://search.news.yahoo.com/search/news?p=%22Afghanistan%22&c=&n=20&yn=c&c=news&cs=nw>news - <http://us.rd.yahoo.com/DailyNews/manual/*http://search.yahoo.com/bin/search?cs=nw&p=Afghanistan>web sites).

Other officials said the reported tremor could have been the jolt of the blast itself, leaving less clear why the wagons had crashed in a village beside the tracks.

Iranian television showed flames licking from mangled, charred train wagons, with thick black smoke billowing into the sky. Grinning youths scampered around the wreckage.

"The number of those killed in this disaster is now more than 200," Vahid Barkchi, an emergency official in the northeastern province of Khorasan, told IRNA. "The emergency team is transferring more than 350 injured to hospitals nearby."

The disaster comes amid political uncertainty in Iran, with disputed parliamentary elections to be held Friday.

IRNA said five villages were seriously damaged in the early morning blast which state radio said had killed at least 60 people. Ambulances and rescue helicopters rushed to the scene.

Television showed overturned carriages jumbled beside the tracks, with homes just yards away.

Mangled pickup trucks littered the area and dazed onlookers stood around in one village on a dusty plain with snow-capped mountains in the distance.

EARTH SHUDDERED Fire crews had rushed to the scene to combat a smaller initial blaze when the wagons blew up in a giant explosion 13 miles from the city of Nishapur, hometown of medieval poet Omar Khayyam.

Windows were shattered for more than 10 km around and the earth could be felt shuddering up to 70 km away.

Barkchi said the dead included villagers and some of the more than 200 firefighters who had been battling the blaze.

Iran is prone to tremors and earthquakes. More than 40,000 people died in an earthquake on Dec. 26 in the ancient citadel city of Bam, some 650 km further south.

IRNA said the governor general of Nishapur was killed in the blast along with the head of the city's electricity board and the fire chief.

Interior Ministry officials said they had no immediate figure for fatalities.

In the worst rail crash of the last quarter century, at least 575 people died on June 4, 1989, when two passenger trains in Russia's Ural mountains were engulfed in an explosion from a leaking gas pipeline.

Yeah, we got a 420 acre fire burning in the 40mph wind, with 2.5 inches of rain fueling it at the head of the fire. Massive containment problems. Tankers grounded due to wind.

Oh wait, this is February 25th, not April 1st.

Jake

P.S. Just incase someone is still panicking from my report above, read it again.

From: Jake H
Topic: 6690 Message: 6690

Redding area law enforcement (SWAT etc.) will practice tactics at the El Rancho hotel this weekend on South Market St (near RABA bus barn) before Redding Fire and Shasta CDF crews burn it down for their training. Should provide interesting scanner coverage for both law and fire.

With fleetmap E1P3 on the trunked system, law traffic might be on 400-4 (PD ch4)

Fire traffic will most likely be on the following...
RFD Dispatch 154.325
SHU CDF 151.160
RFD Tact 1 154.205, Tact 2 154.235
SHU CDF Tact 11 (151.445) or Tact 12 (151.460)

With training, fire crews sometimes pick an odd tactical to allow normal emergencies to utilize the common tacticals.

6691. Whitmores_Announcements] Credit Card Scam OT!

Yahoo group: norcalfire (2003 — 2004)

Topic: 6691 Message: 6691

Whitmores_Announcements] Credit Card Scam
Credit Card Scam

Okay, friends. Here's a very scary scam that you could easily fall into, even though you are careful and not gullible. I checked it out at the Snopes.com website and this is a legit warning. Be careful out there!
~~~~~~

I was recently made aware of the following credit card scam and wanted to ensure that you knew about it as well.

Please read the message below.

We all receive emails all the time regarding one scam or another; but last week I REALLY DID get scammed! Both VISA and MasterCard told me that this scam is currently being worked throughout the Midwest, with some variance as to the product or amount, and if you are called, just hang up.

My husband was called on Wednesday from "VISA" and I was called on Thursday from "MasterCard." It worked like this: Person calling says, "This is Carl Patterson and I'm calling from the Security and Fraud department at VISA. My Badge number is 12460. Your card has been flagged for an unusual purchase pattern, and I'm calling to verify. This would be on your VISA card issued by 5/3 bank. Did you purchase an Anti-Telemarketing Device for $497.99 from a marketing company based in Arizona?"

When you say "No". The caller continues with, "Then we will be issuing a credit to your account. This is a company we have been watching and the charges range from $297 to $497, just under the $500 purchase pattern that flags most cards. Before your next statement, the credit will be sent to (gives you your address), is that correct?"

You say, "Yes." The caller continues..."I will be starting a fraud investigation. If you have any questions, you should call the 800 number listed on your card (1-800-VISA) and ask for Security. You will need to refer to this Control #". Then he gives you a 6 digit number. "Do you need me to read it again?" Caller then says he "needs to verify you are in possession of your card. Turn the card over. There are 7 numbers; first 4 are 1234 (whatever), the next 3 are the security numbers that verify you are in possession of the card. These are the numbers you use to make Internet purchases to prove you have the card. Read me the 3 numbers." Then he says "That is correct. I just needed to verify that the card has not been lost or stolen, and that you still have your card. Do you have any other questions? Don't hesitate to call back if you do."
~~~~~~

You actually say very little, and they never ask for or tell you the card number. But after we were called on Wednesday, we called back within 20 minutes to ask a question. Are we glad we did! The REAL VISA security dept. told us it was a scam and in the last 15 minutes a new purchase of $497.99 WAS put on our card.

Long story made short...we made a real fraud report and closed the VISA card and they are reissuing us a new number. What the scammer wants is the 3 digit number and that once the charge goes through, they keep charging every few days. By the time you get your statement, you think the credit is coming, and then its harder to actually file a fraud report. The real VISA reinforced that they will never ask for anything on the card (they already know).

What makes this more remarkable is that on Thursday, I got a call from "Jason Richardson of MasterCard" with a word for word repeat of the VISA Scam. This time I didn't let him finish. I hung up.

We filed a police report (as instructed by VISA), and they said they are taking several of these reports daily and to tell friends, relatives and coworkers.

p.s. see http://www.snopes.com/crime/warnings/creditcard.asp for more information about this scam.

Chevron USA has been issued a license for their Richmond (CoCo County) Refinery FD, 153.445 Repeater and 158.325 MO/FX1. The 158.325 is licensed for use statewide in CA (as are a number of other non-fire industrial users.)

"Eligibility: 90.35 - Applicant has internal fire department for refinery, radios used to coordinate emergency response internally and with local fire dept."

I see that my 2001 Kelty has them listed also on a trunked fire system on 856-860.3375 and 857.3625.

6699. Redwood Empire Life Support goes belly-up

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-03-26 23:53:15 UTC
From: Harry Marnell
Topic: 6699 Message: 6699

http://www.pressdemocrat.com/local/news/26ambulance_b1.html
Lake County puts together emergency ambulance service

March 26, 2004

By GLENDA ANDERSON THE PRESS DEMOCRAT

Lake County fire departments have joined together to provide emergency ambulance service across the county, filling a hole created this week when a major ambulance company abruptly shut down.

"We've had a contingency plan for years. It took us 15 minutes to put it into working condition," said Jim McMurray, chief of the Lake County Fire Protection District.

Redwood Empire Life Support, a Santa Rosa company that provided ambulance service in Lake County since 2000, ceased operations Tuesday.

The company provided 911 ambulance service in Clearlake, Lakeport and Lower Lake, the most populated parts of the county and home to a third of its 58,300 residents. It also had backup responsibility in other areas.

Health and fire officials have reported no problems with ambulance service following the closure of Redwood Empire Life Support's 22-employee unit in Lake County.

"It's been pretty much seamless," said John Gorbenko, nursing director at Sutter Lakeside Hospital's emergency department.

Even before Redwood Empire Life Support shut down this week, local fire departments had responded to all emergency medical calls in Lake County. Now, they have the added responsibility of taking patients in Redwood Empire's former coverage area to the hospital.

"We've always been there, we'll always be there. It's our job," McMurray said.

The Lake County Fire Protection District, which covers the city of Clearlake and surrounding areas, typically responds to eight medical service calls a day. Calls could take longer, now that firefighters must also transport patients to the hospital, McMurray said.

To ensure there are enough paramedics and medical technicians to cover calls, area fire districts temporarily hired nine of Redwood Empire's 22 Lake County employees.

McMurray's district hired seven former Redwood Empire employees at an estimated cost of $15,000 a month. The district expects to recoup its costs by collecting fees for emergency and non-emergency medical transports.

The fees should be enough to offset additional costs of providing ambulance service, said Jim Robbins, chief of the North Shore Fire Authority.

"It shouldn't be a problem," he said.

Lake County's eight public fire agencies, which operate 19 ambulances, believe they have enough vehicles to serve the entire county. Redwood Empire owned three ambulances in Lake County, but removed its vehicles from the county this week.

Local fire departments had prepared contingency plans for ambulance service because Redwood Empire was rumored to be having financial problems. However, it gave no advance warning of its decision Tuesday to cease operations.

Redwood Empire also shut down service in Sonoma County, where it was primarily used by hospitals to transport patients to their homes or in between medical facilities.

Lake County Public Health Officer Dr. Craig McMillan expressed confidence the fire districts can keep up with the county's medical emergency needs.

While other ambulance companies have voiced interest in taking over Redwood Empire's contract, McMillan said it may not be necessary.

"It's very likely there's not going to be a need for another ambulance service," he said.

6700. Placer County Fire Command Frequency

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-03-27 01:33:17 UTC
From: Mike, Scancal.org
Topic: 6700 Message: 6700

Placer County is in the process of implementing a new command frequency. The frequency is 156.2400 MHz, previously the "Ruby Net." This frequency will be used as a command net by Placer County and CDF NEU for operations on the western slope of of Placer County. CDF NEU West (151.3250) and Placer County West Dispatch (154.3550) will remain the dispatch frequencies for the western part of the county.

For more information on Placer County radio plan see <http://www.scancal.org/placer/freq.html> www.scancal.org/placer/freq.html.

Happy Scanning,

Mike

6703. CDF air activity

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-04-06 23:30:25 UTC
From: Nick Caldwell
Topic: 6703 Message: 6703

Today I saw a large tanker, 4 engines, taking off from the Chico air base and a few hours later I heard Tanker 14 (a DC-4) asking for an FM radio check on the Guard (presumably 168.6250). I couldn't hear the other end of 'the guard' conversation, and the tanker I saw might not have been 14.

Later in the day Copter 205 was up working an incident in the Butte unit, I would guess it was a fire because they got an incident number from BTU ECC but SAR was not invovled, ruling out a technical rescue.

The air resources are starting to get warmed up... here comes the season.

Hamilton IC on 168.200 tact
Shasta Trinity Forest net 171.575
Tehama Glenn CDF Local Net 151.370

100+ acres as of 1800 Friday. Still burning, good smoke column. Air Attack has been flying overhead to monitor etc.

Traffic on live scanner at http://www.norcalscan.org/live.html
Don't bother reading the page, no time up update freqs on that page tonight. And you'll still get all the law traffic and such. I haven't switched the scanner into fire season mode yet. When that happens, you shouldn't hear a single traffic stop until November ;)

I just began picking up USFS A/G on 170.000. So far I have heard
Division Echo & Delta, talking about spotting and plans for tomorrow.
I would guess it is for this fire.

Yeah, pretty crazy since it's just below the snow line a little bit.
Can't imagine it being dry already after all the rain we've had.

Base Camp is at Saddle Camp Guard Station (T 27N, R 8W, S 29)
Staging is at Tomhead Saddle
Fire is in Hamilton Gulch south side of Tomhead mtn (6754ft) (T 26N, R 8W, S 6)

170.000 is air attack. I can't monitor it on live scanner, stupid
birdie from the computer.

This group has been established specifically for tracking the current location of USFS, BLM, CDF and MAFFS firefighting, Bureau of Indian Affairs and state contract Airtankers and the fires to which they are assigned during fire season. Also allowed for posting is information on support aircraft such as Air Attack, Lead Plane, Fire Mapping and Type 1 Helicopters. Some of the data passed on this list is Tanker or Aircraft number, which base the Tanker or Aircraft is currently located and/or working out of, name of fire the Tanker or Aircraft is assigned to, and location of fire. Also needed is information on any Tanker or Aircraft known to be in ferry to a new location and it's final destination.

Welcome to Join http://groups.yahoo.com/group/TankerLocations/

Fire got to 300 acres before the smoke pretty much disappeared from sight in the Valley. The newspaper says it's only 75% contained and NIFC says 50% containment. Saturday morning the smoke had a north wind on it. By the evening the smoke was shifting to a south wind. I didn't see any smoke on Sunday afternoon. At 6am Saturday morning very heavy flames could be seen with binocs and a large orange glow could be seen with the naked eye from the valley (Red Bluff). 6am in the morning at that elevation has got to be pretty cool this time of year. It's gotta be pretty dry for that fire behavior to occur.

Gearing up for fire season 2004.

6717. RECALL

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-04-13 13:15:25 UTC
From: Jeffrey
Topic: 6717 Message: 6717

FEDERAL FIREFIGHTING AGENCIES AND GSA RECALL

NEW GENERATION FIRE SHELTERS

Boise, Idaho The Federal firefighting agencies and the General Services Administration (GSA) are recalling 68,000 previously manufactured new generation fire shelters for a retrofit to strengthen a corner of the product. About 19,000 of the shelters are currently being carried by state, federal and contract firefighters.

Fire shelters are required equipment for firefighters, but are considered a tool of last resort and should never be needed if situational awareness, risk management and discipline are employed to make the right decisions in strategy and tactics on wildland fires.

In mid-March, an alert was submitted to the agencies☐ SAFENET program describing a tear that occurred during deployment practice. The SAFENET program is an anonymous reporting system firefighters use to alert managers to observed unsafe practices and allow managers to investigation or make corrections based on the report. According to the SAFENET, the tear was in the floor material near the shake handles used to quickly deploy the shelter.

Equipment specialists at the Forest Service☐s Missoula Technology and Development Center (MTDC) immediately researched the problem and confirmed that some shelters were tearing near the shake handles during deployment. All the tears were in the floor material with the floor coming away from the seam connecting the floor to the side of the shelter.

MTDC equipment specialists, in consultation with an outside engineering expert, believe the added risk associated with the potential tearing of the shelter is very small because the location of the weakness is in the floor. However, interagency fire management leadership, specialists at MTDC and GSA are taking immediate action to fix the problem in order to ensure that firefighters are provided the best quality product.

☐No rips occurred during the extensive testing we did before the design went to the manufacturers. But we do acknowledge the issue, and have developed a fix in the design to strengthen the area of the shake handles,☐ said fire shelter specialist Leslie Anderson of MTDC.

The design fix is being applied to all newly manufactured shelters, and the shelters recalled will be retrofitted with an improvement to the handle. The eleven national fire caches are no longer distributing the new generation fire shelter until the retrofit has been completed, or newly manufactured shelters with the design fix are received.

State and federal firefighters should return the newer shelters to the nearest federal cache. Firefighters will use the older style shelter until supplies of the newly manufactured or retrofitted shelters become available. The older style shelters have saved 300 lives since the 1970□s, and provide good protection against radiant and thermal heat when deployed properly.

Some firefighters may not be able to obtain an older style shelter immediately due to the limited number, but the newly manufactured shelters and the retrofitted shelters will be available widely within the next two months. According to the manufacturers, retrofitting should proceed quickly, at the rate of approximately 3,000 to 5,000 per week, plus production of about 5,000 per month of the newly manufactured shelters.

Drought Worsens Across West and Threat of Wildfires Grows
By THE ASSOCIATED PRESS

Published: April 12, 2004

RENO, Nev., April 11 (AP) - From the brittle hillsides of Southern California to the drying fields of Idaho, from Montana to New Mexico, a relentless drought is worsening across most of the West, with water supplies dwindling and the threat of wildfires rising.

"Most of the West is headed into six years of drought and some areas are looking at seven years," said Rick Ochoa, weather program manager at the National Interagency Fire Center in Boise, Idaho.

Arizona is facing its worst drought on record. Two enormous reservoirs on the Colorado River are only half full. Some farmers in southern Idaho might not get any irrigation water this summer, and irrigators in western Nevada are threatening war with a country club that wants green grass for a national golf tournament.

The mountain snowpack, a crucial reservoir that in a good year holds water until it is needed, was at half or less of the normal March level in many areas.

The mountains of Colorado and northern New Mexico got more than a foot of snow this weekend, and meteorologists said the Albuquerque area could be looking at record rainfall this month. But this is only a start toward recovery.

"It'll help," said Larry Palser, a farmer in Colorado's Washington County. "It'll buy us some time."

The United States Natural Resources Conservation Service says there could be water restrictions and widespread crop and pasture losses in central Nevada, southern Idaho, most of south-central Montana and eastern and southwestern Utah.

Most of southern Idaho and parts of southwest Montana are in "exceptional drought," the Department of Agriculture said. That's a step worse than "extreme drought," which the department said best described the situation in other parts of Montana and in Utah, Wyoming, Arizona, New Mexico, Nevada, Oregon and Colorado.

With dry trees raising the risk of wildfires, it is not just farmers who will be hurting. Already this year, 10,000 acres have burned in Arizona, along with 8,500 acres in Colorado.

"In terms of fire, I think everybody is real nervous," said Chris West, vice president of the American Forest Resource Council in Portland, Ore.

From: Scott
Topic: 6720 Message: 6720

Hey all, well i come to ask you all about air to ground frequencies. I know that USFS has there 170.0000 A/G frequency. Yet here in the Humboldt-Toiyabe NF which goes into parts of California from Neavada. The area which I monitor is the Sierra Front and we have two A/G frequencies. The frequencies we have are 170.2250 A/G Primary and 166.8750 A/G Secondary. Why do we not use the 170.0000. Its the same way for A/A comms we dont use the one you folks use in California we have our 120.9750 Sierra Front A/A. Why dont we use the "Air Tactics" the forest service uses in California.
Thanks
Chief Biddle

Firefighter standards bill backed by county supes
By MICHELLE MacEACHERN/MediaNews Group

The Butte County Board of Supervisors endorsed Senate Bill 1646 on Tuesday, but with the possibility of qualifications.

Authored by local Sen. Same Aanestad, the bill is intended "to preserve the practice" of using volunteer firefighters in rural California counties. The bill would change labor code definitions to exclude rural area volunteer firefighters from its definition of "employment."

But Fire Department Chief Henri Brachais said it could lower the training requirements and safety standards currently used by the department's volunteers.

If adopted as it is, the bill could "put the county firefighters and public lives at risk," by allowing people to go on calls they're not prepared for, Brachais warned.

North Chico Supervisor Mary Anne Houx said the county should then request amendments to the bill. She asked Brachais to come up with how it would have to be amended for the county to be able to support it.

Jobs

Class A Driver Needed
Confidential

Work At Home
Confidential

Business Office Manager
Confidential

Mechanical Tech. Needed
Confidential

One issue discussed at Tuesday's meeting was the trouble recruiting people to do the job. Currently, the county is authorized to have up to 430 volunteer firefighters, but has only 200 on its list. Brachais said new standards, such as a recent requirement that firefighters get rid of long hair and beards, hurt recruiting or cost volunteers for the

unpaid job. Others were lost when health checks turned up problems that would effect their ability to perform their duties.

Paradise Supervisor Kim Yamaguchi said he wanted to support the bill, because the area relies on volunteer firefighters, and he saw it as a recruiting tool.

Richvale Supervisor Curt Josiassen said rural areas lack the tax base to pay for full-time, professional firefighters at all fire stations. And requiring too much of a time commitment for training would cost volunteers who often have other jobs, or expect to spend weekends with their families.

But Brachais said the county hardly wanted to endanger its citizens, including volunteer firefighters, by having them as the first responders to emergencies for which they weren't adequately trained. That just ends up with more people in need of rescue, he added.

"It's a tough issue," Josiassen agreed.

County Administrative Officer Paul McIntosh suggested that an organization of rural counties be turned to for amendments to the bill that would require adequate training without hurting recruitment. Brachais also said Tuesday he would further explore the issue to see if an amendments would be helpful.

South Chico Supervisor Jane Dolan was the lone vote against endorsing the bill.

She said she was concerned the vote would send the wrong message that the volunteer firefighters are somehow less than others. Butte County's firefighters were all top notch professionals, whether volunteer or career.

"We have the best departments out there," she said. "Our firefighters are equal ... I don't want it out there that we've lowered our standards."

The bill is scheduled for a hearing before the Senate Labor and Industrial Relations Committee today.

Topic: 6723 Message: 6723

Hello all, recently I have received a few e-mails asking if I was promoted in the fire service, the answer to that question is yes I have. But lets start off at the basics. I'm 16 years old yes that's right 16 years old. No I'm not a "Paid Firefighter" yet. I'm a member of Warren Engine Co # 1/Carson City Fire Dept Explorer Post. I started off on 9-11-01 (the date doesn't have anything to due with me joining). I worked my way up through the ranks very quick, due to having the highest grades on the Firefighter-I testing, also due to some people doing stupid things while on duty. I have been Chief over my unit for a little over a year. So yes my e-mail still says captainbiddle@... but be advised by this summer I hope to have all files transferred over to the new e-mail address which will be Chief_Biddle@.... Also for those of you out there that think, "Gee a 16 year can't be that good of a chief or a very good Volunteer Firefighter". Please don't think that, I have passed all my tests (paper and physical) with flying colors. I may not be able to fight fire till I'm 18 but I can still pass the tests off. So if anyone has questions about me feel free to contact me and ask.
Sincerely
Chief Scott Biddle

6728. [tomanddarryl] POLICE SCANNERS IN THE DIGITAL AGE

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-04-29 23:19:16 UTC
From: Dan Fuller
Topic: 6728 Message: 6728

[tomanddarryl] POLICE SCANNERS IN THE DIGITAL AGE
From another list.

http://www.rtndf.org/foi/scanner.shtml

POLICE SCANNERS IN THE DIGITAL AGE

More and more municipalities are switching to digital communications, creating access problems for media.

By Kathleen Kirby for July/August 2001 Communicator

With increasing frequency, I've been hearing from RTNDA members about a problem we've monitored for the past several years: the move by police departments and emergency personnel across the country to convert to digital public safety radio.

For more than half a century, the media and the general public have been able to tune in to emergency communications by using relatively inexpensive scanners. Indeed, the squawking of one, or more typically several scanners, has been a staple in the newsroom for as long as most journalists can remember.

In many areas, however, police, fire and EMS units are moving to digital radio communications systems. Instead of sending analog signals over the airwaves, municipalities are sending digital signals over higher frequencies. The digital system converts the voice into tiny bits of data. All you'll hear when trying to pick up these transmissions with a normal scanner is a hiss. To listen to them, you need a digital scanner.

Digital scanners are expensive (while analog scanners run about $300, digital scanners cost more than 10 times that), and, from what I've heard, they're pretty much unavailable to reporters and scanner enthusiasts. The real rub, however, is that even if you get one, it's useless if the messages are encrypted. You need the police to give you the codes they use to program their radios before you can pick up their encrypted communications. Police and/or other emergency personnel may be willing to give you the code for some types of transmissions, but not for others, and they can "turn off" communications selectively.

What can we do? Many electronic journalists wrongly assume that FCC rules require police, fire and rescue transmissions to be open. That is simply not the case. There are no federal rules that provide a general right of the news media or others to monitor police and fire or other public safety radio communications. Your best bet is to protest the adoption of digital transmission/encryption on public policy grounds,

and to work out an agreement with local police or other public safety officials.

The likelihood of success in reaching a compact with local officials probably depends on your state and whether you can make the case that your FOI laws presume access to police records and communications. Where access laws contain many police record exemptions, for example, you may have limited ammunition in your fight against denial of access.

Still, the policy arguments against blocking police, fire and rescue dispatch communications are strong. While law enforcement officials argue that open radio communications put officers in danger and permit suspects to hear law enforcement tactics firsthand, few have offered concrete evidence to justify why these concerns would outweigh the long-established public interest in maintaining openness in government activities. Inevitably, there are some who will listen when you tell them that putting the system undercover conflicts with your jurisdiction's values and commitment to open government, so don't be afraid to broach the subject.

Make clear to decision-makers that closing off dispatch information will make police, fire and other emergency services (and the elected officials who oversee them) much less accountable to the taxpayers who employ them. This is not just a media issue. The secrecy that results from encrypted public safety information also impedes residents' right to know about matters of public interest. Monitoring public safety transmissions allows the media to respond to news stories and emergencies, and to provide information--often information of critical importance--to citizens quickly and efficiently. Using scanners, stations often obtain facts integral to protecting the public, whether about a toxic spill, a traffic accident, a gas leak, an at-large criminal or a weather emergency. In a disaster or other dangerous situation, the lack of, or delay in receiving, such information can create a public safety risk.

From all reports, law enforcement officials are very much in favor of the move to digital transmissions. Many argue that the transmissions are much clearer. And of course they stress that digital communications will facilitate secret operations when necessary, a point that resonates in this era of increasing concern with privacy. But government agencies are already adept at quietly conveying or hiding sensitive information. They don't need to rely on digital transmissions for that. The news media have an obligation to pass on what they learn to their listeners and viewers--in other words, to the taxpayers. This watchdog function helps to maintain public confidence in the professionalism of law enforcement and fire and rescue agencies. Relying on spokespersons paid by government agencies offers no substitute.

As a consequence--whether intended or unintended--of the move to digital communications, municipal officials will control the

information local television, radio and newspaper outlets may monitor, as well as which news operations will be granted access at all. The battle against newsrooms being "locked out" of public service dispatch and other communications will largely be fought at the grassroots level. It behooves all journalists to protest a blanket move by public safety agencies to communications that the public cannot hear, and to force police, fire and other emergency service personnel to justify keeping their transmissions secret. Urge agencies not to make a decision of this kind without fully and fairly discussing the ramifications. In many cases, the move will hamper the media's ability to report quickly and accurately, compromise public safety, and undermine the citizenry's trust that police and other public officials are behaving as they should.

--Kathleen Kirby is an attorney at Wiley, Rein & Fielding in Washington.

"I heard Butte and Plumas were fighting for resources."

I can believe that. The entire CDF Amador-El Dorado Unit is down to 4 engines and 3 crews as of yesterday. Everything else, including 8 overheads, has been sent South.

6740. Re: [NorCalFire] Bloomer - was NEW FIRE ON THE PLUMAS NF

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-05 20:20:04 UTC
From: Nick Caldwell
Topic: 6736 Message: 6740

The only major fire I heard about yesterday that worked into the night was the one reported on Bloomer Hill. Sections of the hill are PNF land, and a PNF engine was responding, along with several engines and water tenders from Butte County Fire/BTU CDF. They worked into the night, I could occasionaly pick up their comms on White 3 from my house, and they were going to finish mop-up on the fire today.

Topo of Bloomer Hill:
http://shorterlink.com/?W13QUN

But that may or may not be the one you are talking about...

It is the cottonwood fire 100+ acres on the Plumas southeast of
Susanville. Sounds like quite a few support service have been
ordered...

Listening to NIFC Cache freqs. and PNF freqs. and not hearing anything.

Later,
Rich Elliott

Topic: 6753 Message: 6753

Just caught tail end of call out on 154.130, Grass Valley, fire near Truckee area. BN IC requesting I-80 to closed down both directions, requesting air support, and 3 or 4 crews. Heavy flames with heavy winds....

Also requesting UPRR be notified to stop trains in the area....

Approx 3 -5 acres ATT...

CHP/NHP enroute to close I-80...

Switching to White Fire 3 (can't copy here in Portola)

Later,

Todd...

Jake,

I think its time to get all this PD stuff off your
scanner before the whole state burns down. With the
fire up in Plumas and now one up near Truckee (at this
time of the year) its going to be a long fire season.

Fire is I-80 fire.
Joint command with CDF(NEU) and Humbolt Toyiabe Forest.
Command is on 151.355
Tact is White 3 on 154.295

Still strong winds and pushing 100 acres.
Have ordered 5 crews and 4 stike teams of engines type III.
Tahoe Hot Shots and Black Mountain Hot shots on scene.
Ordered 5 water tenders. Two on Scene.
Two strike teams are coming out of the Tahoe Basin.
Unknown on aircraft.

Sorry but I have turned addicted to law traffic over the winter season and no longer enjoy fire radio traffic. I might program an odd dispatch freq in here and there though.

:)

The transition from law to fire is happening over this weekend. After that, you shouldn't hear a license plate check until November. There will be other changes happening throughout May, especially for upcoming Fire Center 2004.

Fire was only 2 acres but had structures threatened. E44 was invovled in the accident, it is out of service being towed to Oroville. No major injuries from what I can tell, but it got paged up to Division 2102. Someone has a lot of paperwork to do.

Problems persist for California firefighting agencies

- Southern California's wildfire season got off to a harrowing start this week that demonstrated all too clearly that the state still faces many of the same problems it did during last fall's catastrophic fires.
A half-million acres of bug-infested, tinder-dry trees have yet to be removed. Firefighting agencies are still understaffed and short on cash.

Inconsistent building codes in fire-prone areas continue to put homes at risk. Confusion persists about the rules for when to activate military aircraft. And incompatible communication networks prevent firefighters from talking to each other.

"To put firefighters on the ground and aircraft in the air means money, and there is no new money," said Charles Maner, chief of the California Department of Forestry and Fire Protection in San Diego.

This week's fires have blackened more than 29,000 acres and forced hundreds to flee their homes, mostly in Riverside County, east of Los Angeles. Those areas were largely unscathed by last year's blazes, which killed 24 people, destroyed 3,631 homes and charred nearly 750,000 acres.

Firefighters aided by milder weather had the upper hand on the fires Thursday, but officials are bracing for a long and dangerous summer, in part because of extremely hot and dry weather lately.

"I think we're sitting on a powder keg," said John Hawkins, a senior Forestry Department commander in San Diego during last year's fires who has since joined the Riverside County Fire Department.

Officials note several improvements this season, including better training for military pilots and new computerized systems to warn residents of fires. San Diego banned new homes with wood-shingled roofs, and federal officials Wednesday relaxed rules for sending millions of dollars to remove dead trees in three at-risk counties. The money has yet to be given out, however.

But many vulnerabilities - highlighted in a report last month by a commission formed after last year's fires - are only slowly being addressed.

The report recommended clearer rules on using federal military aircraft. Critics argued that last year's fires would have done less damage if the aircraft had been dispatched sooner. Rep. Duncan Hunter, who lost his home in the fires, waited 22 hours for two tankers that he requested, and then-Gov. Gray Davis' office met similar delays.

The report also urged reconsideration of California's rule against using firefighting aircraft after sunset. The deadliest of last year's fires was believed to have been started by a lone hunter in San Diego County who sent a distress signal about a half-hour before nightfall.

The Forestry Department is reviewing restrictions on night flying and expects to reach a decision soon, said Jim Wright, deputy director of operations.

The report also recommended better cooperation and communication among fire agencies and makes several big-ticket requests, including staffing of all engines with more firefighters and acquiring 150 more fire engines. Communication is a problem because the state's many fire agencies do not operate on the same radio frequency.

The dangers appear especially acute in San Diego County. The City Council shelved measures such as brush-clearance rules and replacement of existing wood-shingled roofs. The proposals, which were backed by the fire chief, were considered too expensive for homeowners.

San Diego County Supervisor Dianne Jacob has met resistance to her proposal for a regional firefighting authority. The county has about 60 firefighting agencies, some of them volunteer forces that rely on pancake breakfasts to pay the bills. Wright called it a "hodgepodge" arrangement.

"Lots of people don't want to give up their kingdom to go into coordinated entity," he said.

Dan Fierro, who saw flames Tuesday night from his hilltop home in Riverside County, said he has been thinking about clearing dry brush from around his house.

"But I really haven't done anything to prepare," he said. "But it's definitely in my mind as something we need to do."

6773. Re: [NorCalFire] ALPINE COUNTY FIRE QUESTION

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-09 01:56:17 UTC
From: scott biddle
Topic: 6768 Message: 6773

Nope ben there still on the same 153.8000, the reason your not hearing much is, well its the least populated county in california. The Sheriff's and Fire Protection Districts share the same frequency so you'll hear both SO and FD Traffic on the same channel. As far as EMS Traffic they usally only have one or so calls a month.
Scott Biddle

Is there another freq that alpine dispatches besides 153.800 pl 107.3?
There isn't much traffic on this channel, maybe couple times a day i'll
hear ems traffic. Did they go somewhere else?

thanks

Ben

As Scott said, Alpine is California's smallest county (the county population is 1,220). Alpine contracts with Douglas County, NV for PSAP and dispatch services. So it is a calm channel.

Don

6775. Upper NorCal Fire scanner online

6777. New poll for norcalfire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-09 07:13:11 UTC
From: norcalfire@yahoogroups.com
Topic: 7 Message: 6777

Enter your vote today! A new poll has been created for the
norcalfire group:

If Jakes online scanner is on fire all
season, what should Mikes scanner be
on?

o Fire also, since mike is north of jake?
o Law Enforcement?
o Both?
o Major Incident Only?

To vote, please visit the following web page:

http://groups.yahoo.com/group/norcalfire/surveys?id=1228378

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

None of the above (below). If Jake's scanner is on fire, I think Mike's should be tuned to Red Bluff/CDF so we can hear them responding to put it out.

that depends if Mike is 32 miles farther north that means he can pick up
the farther reaching units.. right?

I may be dumb but since the name of this group is norcalfire why would we want scanners tied to the group tuned in on police calls?

But seriously, at major fires there's often a significant amount of related radio traffic on law frequencies as well - evacuations, condition reports, etc. IMHO they kind of go hand-in-hand. The uproar over FDNY & NYPD not interop-ing on 9/11 comes to mind.

i agree. If its fire season lets listen to fire, to me pd is boring...
not into listening to warrant checks and barking dog reports

6786. Re: [NorCalFire] ALPINE COUNTY FIRE QUESTION

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-09 19:41:11 UTC
From: scott biddle
Topic: 6768 Message: 6786

I forgot to say that they are dispatched out of Minden which is in Douglas County. Also for Paramedic/ any medical or fire call, East Fork Fire Protection Dist sends one of its 4 ALS Rescues.

Don Root <k6cdo@...> wrote:Ben wrote:

> Is there another freq that alpine dispatches besides 153.800 pl 107.3?
> There isn't much traffic on this channel, maybe couple times a day i'll
> hear ems traffic. Did they go somewhere else?

As Scott said, Alpine is California's smallest county (the county population is 1,220). Alpine contracts with Douglas County, NV for PSAP and dispatch services. So it is a calm channel.

Don

6798. RE: [NorCalFire] Jones Incident

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-12 04:03:44 UTC
From: Jake H
Topic: 6795 Message: 6798

Redding Air Attack Base likes to play mock fire calls during the month of May prepping for fire season. Sometimes new air attack pilots are trained out of this base, or veterans fly to get flight time before fire season starts. They are "dispatched" on Command 1 and Command 2 and sometimes they direct aircraft on a victor net or sometimes 151.295. Later in the month, more and more aircraft are involved such as Copter 205 or jumper planes.

Typical names they've used in the past are very common names in Shasta County. Jones, Buckhorn, Weaver, Whitmore, Ridge, Placer, Mountain etc.

Tks Jake, that sounds like what was going on. Since
they were using those names and there was a variety of
aircraft involved including jumpers, but no engine
activity.

6802. CDF SHU & SKU question

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-15 00:37:34 UTC
From: Ben
Topic: 6802 Message: 6802

For those of you who know the abbreviations to these units.. I need some input.. What is the farthest point south you guys can still pick up these CDF units?

Thanks
Ben

From: Jake H
Topic: 6802 Message: 6803

No copy with external antenna from Red Bluff for Siskiyou unit.
Unless some magic weather condition exists, you won't hear these guys
from your location. Shasta Trinity Unit is on the north end of the
valley, with no mountains hiding anything so they can be heard just
north of Sacramento with a mobile antenna. (confirmed today)

Jake

From: Jake H
Topic: 6802 Message: 6805

If they had it on, PL would be Tone 4 yes. SHU doesn't use an output tone.

oh good.. i'll take it off my 780 then... i've been hearing static on
there without in on. sounds like fire traffic so i'll have to do some
tweaking

thanks

6809. Vegitation Fire Tahoe Basin

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-17 02:26:29 UTC
From: Scott
Topic: 6809 Message: 6809

19:19 hrs Placer County FPD (East Side) dispatched for a vegitation fire. Stations toned 51, 53 and 55 (north tahoe including tahoe city,and kings beach)station 71 (alpine meadows)
C-51 reports good size colum of smoke.
Location near Stoney Ridge and Burtion Creek
Frequencies
Placer County FPD
154.4000 Placer
153.7700 Placer
154.2950 White Fire-3
172.3750 LTBMU Primary
Chief Biddle

Sounds interesting wonder what the winds are doing up
in the mountains probably about 10 to 15 here in
sacramento

While those may be valid channels for the forests, the freqs I posted
were taken from the CDF-OES engine load list for the 2004 fire season,
and are narrow band.

With this I have updated my state-wide CDF 1 Page guide, which has grown to also include every county dispatch I could get reasonable info on, as well as USFS dispatch nets in CA. It is now to Rev. S, weighing in at 53kb, with several updates to USFS and county nets. Pass it around, enjoy it on your summer travels.
http://unix.csuchico.edu/~nc65/maps/CDF_1Page.pdf

Also, the less-updated CHP guide still hangs around, Rev. I:
http://unix.csuchico.edu/~nc65/maps/CHP_1Page.pdf

Los Padres NF (LPF)(170.55 forest net) uses a different tone for each transmitter site. In the Santa Barbara area it's 131.8 (La Cumbre Peak).

The discussion was regarding tone on the output, which should be common
across the forest.

Hi Don,
Los Padres doesn't seem to have a common output tone for all areas.
131.8 is what's heard on 170.55 here.

From http://www.aero-news.net
Firefighting Tankers Could Be Back

Interior Department: "Might Put The Air Tankers Back In Service"
The Interior Department's decision to ground 33 aging firefighting tankers may not be the last word after all. The department Monday said it would be willing to consider returning the tankers to the fireline if the FAA can certify their safety.

"There are things we can look at that might put the air tankers back in service," said Assistant Interior Secretary Rebecca Watson. "Short-term, we are looking at how we deal with this fire season. And I think we have a good plan."

As ANN reported last week, the Forest Service and the Department of Interior yanked the contracts from 33 aerial tankers over safety concerns.

The sudden decision stunned the contractors and left firefighters wondering how they were going to deal with a wildfire season that already seemed to be in full swing.

The decision to ground the older tankers came after two fatal crashes in 2002. Both aircraft belonged to Hawkins & Powers Aviation, based in Greybull (WY). Both lost wings in flight.

Other aerial firefighting contractors said they were being penalized for one company's poor record.

The decision leaves 491 firefighting aircraft on the front lines, as Watson predicts this may be one of the worst fire seasons on record.

"We are anticipating a year like 2000," Watson said. "We have very dry fuels out there. In fact, the large-diameter fuels are at their driest level in recorded history."

Watson said her department and the Forest Service just aren't capable of certifying firefighting aircraft. "The land management agencies are not in the business of aircraft safety," she said. "We don't have that capacity. But there is talk now on the (Capitol) Hill about how they might encourage the FAA to get involved."

So far, there's been no word from the FAA on whether the agency wants to become involved.

Apparently, some Conressmen and women from the Western states were equally shocked and are raising quite a stink on Capitol Hill.
The usually well-meaning Channel 3 in Sacramento ran a story on this last night with lots of footage. Unfortunately, it included a still-shot and drop footage of CDF S-2s, which have nothing to do with this mess.

Interior Department: "Might Put The Air Tankers Back In Service"
The Interior Department's decision to ground 33 aging firefighting tankers may not be the last word after all. The department Monday said it would be willing to consider returning the tankers to the fireline if the FAA can certify their safety.
The sudden decision stunned the contractors.....

This is a rare one, pre-announced as:
"North of Oroville - Commercial Train Emergency Standby. Stage at the private crossing south of the UP railroad yard."

Oroville Chief 1, CDF Bat 2116, Oroville T121, Oroville E111, Butte County E63, CDF E2169, Oroville Company 1 & CDF Company 64.

Burlington Northern Train ETA 0012 to staging location. No report as to what is burning.

BTU CDF Dispatch: 151.400
Oroville Fire Tac: 153.815

6843. Re: [NorCalFire] Butte: Train Fire - Railroad IC

Topic: 6842 Message: 6843

Might be rare, but not exciting.

Fire was set by someone catching a free ride in an empty box-car. E111
and Chief 1 to handle, everyone else released.

The audio, since I bothered to record it, is somewhat interesting
because of all the different agencies involved rather seamlessly.
Oroville Fire Dept. is dispatched by CDF, and Butte Fire is tied at the
hip with BTU CDF, most people can't tell them apart.

Multiple downstrikes, multiple fires currently working. Pike County Lookout is the only one staffed, they were discussing staffing at least Bloomer and possibly one other for the night.

The fuel isn't terribly dry yet, but access times are high and resources are low so one of these might turn crazy.

Butte County Fire/BTU CDF dispatch: 151.400

RECON is usually a plane. I know one time airattack ??? (cant recall the number) was used as a RECON after a lightning storm.

6855. Re: [NorCalFire] Lassen-Modoc Unit

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-24 01:23:27 UTC
From: Jake H
Topic: 6853 Message: 6855

CDF doesn't transmit from every repeater at the same time. Like the mobile units, dispatch (ECC) will pick and choose what tone (repeater) they should use to communicate the best with the responding units. Most Units have some high level repeaters that are favored, considered primary repeaters. There might be a few primary repeaters the Unit uses to cover the majority of the Unit.

Then there are "coverage" repeaters that are used only when ECC or mobile units wish to speak in a hole that is not covered by the primary repeaters. These are usually on the edge of the Unit, or can even be well outside the Unit in a different county.

Dyer Mtn is considered a primary repeater. It is located right in the middle of state responsibility area of LMU and has great high altitude coverage into the southern area of the Unit. ECC will probably hang out here for southern coverage and Likely Mtn for northern Unit coverage.

Beckwourth is a "coverage" repeater that is used only to fill a small hole not covered by the primary repeaters. Beckwourth isn't even in the unit, well south in Plumas County. Lassen County fingers south though along the Nevada Border covering Hwy 395. So if there is a response in that small area, you will hear Beckwourth, but the other 95% of calls you'll hear off of Dyer (or another primary repeater favored by ECC).

Disclaimer
"Primary" and "coverage" are not CDF terms. They're two words that best describe what I'm trying to get across. CDF Units also don't have "official" primary repeaters. Some units might have every repeater be a primary repeater, or 1 primary and 5 or 6 coverage.

This is also why you will hear the dispatch twice in some CDF Units, as the dispatcher will repeat the message on a different tone to ensure all of the units involved copied the dispatch.

Vegetation 2/3 up Sugarloaf Mountain, Butte Meadows area, North of Chico Creek. Lassen Engine reported the fire from a distance. Access possibly off K or J Line. CDF ECC trying to get aircraft in the area, sound like this one could be hard to find.

Besides the Butte units, LNF engine 13 responding, Copter 510 on scene, and one crew on order. Copter 510 requesting another dozer, "a couple more engines and a couple crews."

Some units are using Colby Mt. repeater, which barely gets out of Butte Meadows.

BTU Dispatch 151.400
Tac 9 - 151.385

Grrr, should be a Tehama incident. Sugarloaf in Tehama, due west of
Colby Mtn. Not sure who's taking the incident, CDF or USFS.

Just heard Copter 202 at scene.

It sounds to be in mop-up now, I haven't been monitoring for a few hours but they had it reported from the start as one acre but very hard access. They ended up getting a second copter up there to help out. I am hearing single resources being let go slowly, the crews are probably getting their work out now.

And Jake, as far is it should be a Tehama incident - Butte SAR does the remote area rescues up there on mutual aid to Tehama or Plumas because the access from the North is way too long, I would guess they made the same call for this fire too.

6864. Butte County Fire budget cuts

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-05-27 19:49:43 UTC
From: kg6nmp@norcalscan.org, KG6NMP
Topic: 6864 Message: 6864

Late last week CDF had a meeting that talked about budget and proposed or "likely" budget and resource cuts. It should be noted that things can change in the blink of an eye but right now the cuts that are likely to occur are:

Fire Station Closure November 1, 2004 through June 1, 2005:
Robinson Mill (Station 54) - serves Forbestown, Robinson Mill, Feather Falls, Clipper Mills and La Porte Road cooridor
Sterling City (Station 13) - serves Sterling City, Upper Ridge, Magalia, Paradise Pines and "Firhaven"(??)
Jarbo Gap (Station 36) - serves Yankee Hill, Concow, Butte Valley, Pulga and Hwy 70 cooridor

Personnel Cuts:
(3) Battalion Chiefs
(1) Fire Captain (Training & Safety)
(3) Fire Apparatus Engineers (one from north, one from south and one hazmat from Kelly Ridge)
(5) Fire Fighters
(1) Heavy Equipment Mechanic
(1) Telecommunications Systems anlyst
(1) half-time clerical (Fire Prevention Bureau)
(1) half-time clerical (Training Bureau)

Unspecified/Misc Fund Reduction:
$256,091 of career personnel funds
$280,000 of volunteer firefighter funds
$10,428 for the Training Bureau office lease

Misc Cost Reductions (mentioned in a separate meeting):
Reduction in number of trained CDF personnel for technical rescue (< 25 to maintain training)

This is public info and BTU CDF / Butte County Fire was actually pushing for political activism to stop any budget cuts from occuring.

The station closures are just for the winter, those places are too explosive to close for fire season. While I am not certain I think the staffing cuts are year round staffing, but I could be wrong. Some of the info wasn't quite correct that they passed out; their equipment list (not included in the email) showed a Communications Truck (Comm 43) as a resource, but it is now operated by the Sheriff and has been for a year. It could be those staffing cuts are all that have occurred this year and ones that are coming in order to make them look more severe.

Didn't Butte County do this same thing 6 - 7 years ago. County said they did not have enough money to fund their contract with the CDF. And a fire tax measure failed at the ballot box. The County was going to close a whole bunch of stations and lay off firefighters. And go back to a volunteer firefighting force.

Then the State came along and bailed the county out (when the State was flush).

Same kind of public scare tactics that they are doing now.

Oh Well!

Official start of fire season announced

Chico Enterprise-Record Staff Reports

Fire officials in Butte, Glenn, Tehama and Shasta counties announced the official start of fire season on Tuesday.

The early start is primarily due to record-high temperatures in April and vegetation that is unseasonably dry.

As a result, Butte County Fire/CDF, which staffs 17 stations year round, has additionally begun staffing stations in Cohasset, Feather Falls and Butte Meadows.

Additional seasonal personnel have been hired and will be available for the peak fire season.

On June 15 a CDF OV-10 Bronco Air Tactical plane and a CDF Grumman S-2 tanker capable of carrying 1,200 gallons, will also be staffed at the Chico Air Attack Base, the CDF announced.

A press release from the agency didn't mention the possible availability of federal air tankers, heli-tankers or single-engine aircraft to assist with aerial fire fighting.

July 1, five additional CDF engines will be staffed, as will fire lookouts at Bloomer and Bald mountains. Lookout staffing is funded by an agreement between CDF and PG&E.

Butte County Fire/CDF responds to about 15,000 fire and other emergencies each year and has a full-time staff of more than 150.

LAL 1-No thunderstorms

LAL 2- Isolated thunderstorms. Light rain will occasionally reach the ground. Lightning is very infrequent, 1-5 cloud-to-ground strikes in a 5 minute period.

LAL 3- Widely scattered thunderstorms. Light to moderate rain will reach the ground. Lightning is infrequent, 6-10 cloud-to-ground strikes in a 5 minute period.

LAL 4-Scattered thunderstorms. Moderate rain is commonly produced. Lightning is frequent, 11-15 cloud-to-ground strikes in a 5 minute period.

LAL 5- Numerous thunderstorms. Rainfall is moderate to heavy. Lightning is frequent and intense, greater than 15 cloud-to-ground strikes in a 5 minute period.

LAL 6- Same LAL 3 except thunderstorms are dry. This type of lightning has the potential for extreme fire activity and is normally highlighted in fire weather forecasts with a Red Flag Warning.

That's a repeater input for Mendo county / Howard Forest CDF.. but I'm not sure about those unit #s. Also a popular freq in San Luis Nabisco County, but no idea about their numbering system. And Kelty shows it at Agnews DDS fire, though that license seems to have evaporated.

hm
A lot of help, huh?

This is a Tac channel for Contra Costa fire, Might be picking up
Brentwood fire and east Contra Costa, they use it alot for fires in
the windmill farms by Liverless.

From: Jake H
Topic: 6883 Message: 6896

Tacticals are rarely ever supposed to be PL'd for safety reasons. CDF might start doing it but it looks like not this fire season.

154.385 is simplex only in Tehama, used as a medical tactical. The traffic Ben hears we also hear in Tehama, causes some good problems in the upper elevations.

I believe it is Brentwood Fire that we hear.

Do they still have that low-power "scanner" repeater on 453.8375 or 458.8375 that they used to have? The sheriff had it up on Bear Mtn I believe, for the Lake patrol deppities to monitor. In the summer it would scan/broadcast a bunch of local freqs - USFS, sheriff dispatch (in "priority'), CDF, CHP, CLEMARS, Bur Rec, etc. A kind of neat idea, although its location caused it to frequently pick up WAY distant agencies who would hog the air when Skip Ducting was in town. Stanislaus County's 158.73 used to tie it up on weekend evenings a lot, as did distant 42.44 & 42.28 stations from all over. It was a low power transmitter, though, and couldn't be heard much south of 299/Lake Blvd unless you had some elevation.

Harry
Did I say "deppities" again? Sheesh. I'm getting as bad as that socal guy's "Njines" My misbegotten NPR fame must've gone to my head.

Not that I have heard the past few times I've been up there. I've listened while driving through on 5, and while on boats and no luck. Just the 155.070 Boating Safety freq. I remember listening for this way back in the beginning of my scanning days and never heard it, years ago.

I saw that. ;-) There was a fireFIGHTERS muster (actually a "rodeo,"
the muster is later this summer) here in McKinleyville Thursday
evening... the Fortuna VFD ladies team won the bucket-brigade by
something like 25 seconds faster than the #2 team.. Eureka FD (paid).

If my house is ablaze, or if I need mouth-to-mouth, I'll accept a
"chick" any time. Competence is competence.

Happy Valley Rd at Andrea Way. Lots of open vegetation and homes spread all through the area.

2+ acres moderate rate of spread uphill, very heavy fuels.

Request 4 additional engines, crew and watertender. Copter 506 enroute with 9 firefighters on board. 2 dozers on scene (one private) with a 3rd on the way.

Requesting the sheriff deputies to respond for possible evacuations.

151.160 CDF Local
151.445 or 151.460 Tact

14:55

6907. Gaviota fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-05 22:50:54 UTC
From: Mark
Topic: 6907 Message: 6907

6/5 1545 Gaviota fire... CDF IMT 8 (Henson) has been assigned.
6/5 1530 Gaviota fire...500 acres... approx 250 people are being evacuated in the Hollister Ranch area... ... 100 structures are threatened, as well as the Gaviota State Park Campground and railroad tracks. The fire is burning in the vicinity of the Gaviota oil processing facility. Steep inaccessable terrain and heavy fuels. Highway 101 is closed in both directions at this time. Northbound at Winchester Canyon and Southbound at Hwy 1. Currently the fire is burning east.

6908. RE: [NorCalFire] Accident on Lake Shasta

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-06 18:46:11 UTC
From: Pam and Jason
Topic: 6898 Message: 6908

It was still in use toward the end of last year last time I picked it up
from the Bella Vista area east of Redding.
Jason in Cottonwood.

Subject: Re: [NorCalFire] Accident on Lake Shasta

Do they still have that low-power "scanner" repeater on 453.8375 or
458.8375 that they used to have? The sheriff had it up on Bear Mtn I
believe, for the Lake patrol deppities to monitor. In the summer it
would scan/broadcast a bunch of local freqs - USFS, sheriff dispatch (in
"priority'), CDF, CHP, CLEMARS, Bur Rec, etc. A kind of neat idea,
although its location caused it to frequently pick up WAY distant
agencies who would hog the air when Skip Ducting was in town.
Stanislaus County's 158.73 used to tie it up on weekend evenings a lot,
as did distant 42.44 & 42.28 stations from all over. It was a low
power transmitter, though, and couldn't be heard much south of 299/Lake
Blvd unless you had some elevation.

Harry
Did I say "deppities" again? Sheesh. I'm getting as bad as that socal
guy's "Njines" My misbegotten NPR fame must've gone to my head.

From: Pamela Alley
Topic: 6921 Message: 6921

Yay!! May they all go that well this year; Goleta area wasn't so lucky according to the article this AM--6000 acres and still going....

Ok, question for those experienced in both North and South CA fires...why is it that the southern CA fires get so far, so FAST? Is there a difference in initial attack, or water sources (hey, raid the swimming pools...), or in methodology...or is it just that it's hotter (ha!) and drier down thataway?

PA

it depends on where in socal you're talking about.. If you've ever been in the riverside, san bernardino county areas, lots of mountains and hills, everything is spread out, lots of fuel also and RAIN is much less of a commodaty year round so its warmer and drier. I think L.A. gets something like 3 inches a year of rainfall.

6924. Re: [NorCalFire] Question on North and South fires...

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-07 00:38:05 UTC
From: Jake H
Topic: 6921 Message: 6924

There is a lot of weather involved with SoCal fires. Onshore and offshore winds produce very heavy winds inland which the locals call the "Santa Ana winds." They're like mini-hurricanes blowing down or up a canyon. NorCal is pretty sheltered in the valleys, although we can get some strong north winds in the valley. The vegetation is also pretty different down there vs NorCal. We have a lot of timber with minimal chapperal. They have a lot of chapperal. That stuff burns faster than a match stick. Because the fires can grow so fast, it isn't safe for a direct attack, putting firefighters right on the fire line like they do so often up here (slower moving fires). They have to fight indirect, which means picking a favored spot well ahead of the fire and building line. Hopefully the fire will stop at the line. If it doesn't, start all over again. This is how some of those fires get pretty big. I think initial attack is very similar. Same amount of equipment etc.

There will probably be some really good responses to this question from professionals in the service.

Speaking as a native of San Diego...

Most of Southern CA gets about 10" of rain in a good year. They're in a
multi-year drought, so the fuel moistures now (early June) are what is
normally found at the end of what Northern CA considers 'fire season.'
And yes, the temps have been higher than normal.

It probably would help if they didn't get the majority in one dousing, either... :)....but we too have lots of hills, a good spread between here and there, etc...although we do tend, even in summer, to be a bit greener (kinda)....

6928. Statewide fire freqs map

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-07 02:02:38 UTC
From: Nick Caldwell
Topic: 6928 Message: 6928

Hopefully just in time for summer road-trips, the latest version of my CDF 1 Page guide is out (which now has way more than just CDF). I tried to add every county dispatch frequency that isn't trunked, if I missed some let me know. If the county isn't listed it is presumed CDF does the dispatching for that area. It also has the latest USFS dispatch nets.

Get your Rev 04C version here (54kb):
http://fire.norcalscan.org/cdf_1page.pdf

I don't announce every new version so check back occasionally to see if it has been updated (file name will remain the same). If you see something wrong or something that can be added let me know.

I want to thank all the people that helped with getting the correct info on this, it is way more than I could do on my own and I don't want to take credit for it all. I got it started, the community helped add more nets and keep them up to date, and Jake has offered to host it; so a big thanks goes out to everyone.

Nick

SoCal is really an irrigated desert, and the fuel load is high, and the fuel
moisture is usually low.

Also larger response areas.

Interesting. So Air Attack 14 is a copter? I thought only one copter was over the fire and that was 506. I don't know how locked up Redding Air Attack base is this season due to the terrorist stuff. I noticed they have a huge gate to get into the entire complex. Used to be just drive up to the air attack base and enjoy the shaded viewing area right on the loading ramps. You can stop by Redding Airport and look for the copter there.

If you get there, let us know on the list what you find.

It is probably the IR imaging ship that USFS has on contract at Redding AAB this year.

Don

6935. Re: [NorCalFire] air attack copter used on quartz hill fire

From: Bob
Topic: 6922 Message: 6935

What John saw is exactly what he thought he saw.

Yes, Air Attack is a Bell 209 Copter, a "Cobra".

It is my understanding that USFS has two of these in the country that they are using for Air Attack platforms.

One is stationed here in Redding.

Interesting. So Air Attack 14 is a copter? I thought only one copter was over the fire and that was 506. I don't know how locked up Redding Air Attack base is this season due to the terrorist stuff. I noticed they have a huge gate to get into the entire complex. Used to be just drive up to the air attack base and enjoy the shaded viewing area right on the loading ramps. You can stop by Redding Airport and look for the copter there.

If you get there, let us know on the list what you find.

And this year (July 1 2003-June 30 2004) San Diego (Measured at Lindbergh Field next to the bay) has received approximately 5.75 inches of rain, about half of normal. This is the pattern of the last few years, contributing to some of the lowest fuel moistures recorded in San Diego County at this time of year ever. During a Wildfire on Camp Pendleton during early May, a Chief Officer was heard reporting that fire behavior and fuel moisture is at the level that would be normally seen in August/September. Local agencies just finished a 3 day wildland fire training session. No live fire, but scenerios involving Strike Teams and Aircraft, to get a better idea of operations during a Firestorm.

I know they are active in Butte County in one of the battalion's vehicles, and the radio gear is installed in the vault at Red Bluff ECC, and Tuscan Buttes state vault. I think it's under the same status as last year, indefinite budget delay. The few units who have it - might play a little on it. It is very quiet however.

Chico Fire's battalion chief rig has a lowband antenna on it too, I would assume he has it in there. Ever heard it active? No me, but I don't have it in the scanner much, lowband doesn't come in very well on my antenna.

Before Sonoma County was part of LNU it was its own unit - SNU.

Dispatch was in Santa Rosa.

Wow - this must have rocked and rolled for a while. Ishi Crews 2 and 3 just arriving on scene at 21:35. Away from radio for the evening.

Considering Vina Helitack is 2-3 air miles from this incident, I'm sure they squeezed every bit of air time out of 205. I have seen 205 flying over the Unit well past dark back to Vina. I have also seen Vina lit up like nobody's business anticipating 205 to land shortly a few hours after sunset. You ever want a picture - hang out at the helitack for a night landing - it is sweet. Too bad it was before the days of me carrying my photo gear all the time.

Thanks for the post Mike from SHU. Payback for Quartz Hill eh. ;)

From: raven
Topic: 6962 Message: 6962

NEU has the Chiefs Net radios in all of the BC's vehicles, and in the Divison Chiefs units. There is a base unit installed at Grass Valley ECC and a repeater on Banner Mtn.

And nobody is using the system!

The only time I have heard anybody on it, is COM-23 talking to ECC when they are on an incident.

Oh Well!

NEU working a series of lightning fires in the vicinity of the old mining town of Iowa Hill. Which is east of Foresthill, and east of Auburn.

Having difficulty gaining access to some of the fires and are requesting an air attack and helicopter for first thing in the am.

Fires do not appear to be doing much.

From: Nick Caldwell
Topic: 6965 Message: 6966

There were multiple fires today that were quite suspicious, they even began announcing vegetation dispatches on the various law enforcement nets around the county to see if they could get any cars speeding away. Eventually a pair of the prevention officers found a car that they were very interested in, and everything then went off the radio.

CDF paged D2103 (didn't know they had already replaced Hawkins) to call the ECC priority for this fire, as well as investigators and another battalion chief. They still seem a bit jumpy... whoever is doing it better knock it off or the whole world will come down on them soon, they are getting serious.

Is there a list of CHP air resource #'s as well as location.. Thought I heard a water rescue in mono county where they were requesting H10 but didn't sound right...

6972. RE: [NorCalFire] CHP Plane designators

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-11 23:19:13 UTC
From: Bob
Topic: 6971 Message: 6972

For CHP aircraft designations, it used to be that the first numeric was the CHP Division:

1 - Northern Division (Redding)
2 - Valley Division (Sacramento)
3 - Golden Gate Division (SF Bay Area)
4 - Central Division (Fresno)
5 - Southern Division (Los Angeles)
6 - Border Division (san Diego)
7 - Coastal Division (San Luis Obispo)
8 - Inland Division (San Bernardino)

and the second number, even numbers were helicopters and odd numbers were fixed wings.

Although CHP may use H14 for a copter and Air 21 for a fixed wing, the FAA needed the distinction to know the type of aircraft because they were called by FAA as CHP 14 and CHP 21.

Don't know if this has all changed, this ID scheme was developed many years ago.

FYI.

From: cywildfire
Topic: 6977 Message: 6977

You all are welcome to join.

Hello, and welcome to Wildfire Discussion Group. This group is designed for all wildfire enthusiasts to discuss any type of subject as long as it's related to wildfire, i.e. Incidents, types of engines, crews, tanker, helicopters etc as long as it's on subject. It doesn't matter where you're located. This Fire Season will prove to be a busy one, with large scale drought and "Red Flag Warnings" in early June, we should be busy.
Have a great Fire Season 2004

Tanker 100 on 151.295 enroute to Keswick IC. I think this may be our first tanker over an incident in the area this season.

Keswick IC tactical 151.460

Not sure what Redding Record Searchlight's scanner has. My scanner has everything but ground tactical coverage. Also area USFS which is dumping all their aircraft and nearby engines to this incident.

No word on acreage. This is an urban-interface fire in very ugly
terrain. That means a 10 acre fire can do lots of damage.

Air tactics might have changed to 151.280 now. I';m back to work from
lunch break. Probably won't get any more updates in today. Ugly wind
and heat. 104 and 105 Tuesday and Wednesday forcast.

@1351
Redding CDF ECC can be heard on Command 1 (151.335) in Butte (at least
by me), they are keeping two helos (202 and 206 I think it was) but
releasing some of the Federal resources now.

6988. Butte: veg - 70 IC

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-15 00:42:30 UTC
From: Nick Caldwell
Topic: 6988 Message: 6988

Initial dispatch was augmented with 4 more engines, a dozer, and more water tenders after Bloomer Lookout reported major build on the smoke.

Quite a few resources going down there, IC requested 2 air tankers and 2 bucket helos any type. BCSO requested for immediate need evacuations on Lone Tree Road and Powerhouse Hill Road.

Highway 70 is closed, and ECC just got notified that there are disabled residents in a house on Powerhouse Hill Road with the fire 100 feet from the structure.

@1741

Nick

6989. BUTTE: 70 IC Update 1

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-15 00:42:32 UTC
From: Pamela Alley
Topic: 6989 Message: 6989

Calling 2 tankers, 2 copters with buckets.

Disabled resident structure priority for protection.

Fire moving VERY fast, uncertain of net direction. Lonetree and Powerhouse Hill Road are threatened.

Fire origin apparently near intersection of Hwy 70 and Ophir Road, south of Oroville proper, but lots of dry dry field grass out there and all the way down to the county line too.

Lonetree and Powerhouse Hill Road will be evacuated by sheriff deputies on immediate need basis.

17:42

Calling additional battalion chief to assist with IC; further resource requests probably forthcoming.

From: Nick Caldwell
Topic: 6988 Message: 6991

It appears we all forgot the frequencies...

BTU CDF Dispatch: 151.400
Butte Support (Command Net): 154.415
70 IC Tac: 154.310
BCSO: 154.725

Nearly all BCSO units are headed to south county code-3 for evacs. The Captains and Sheriff are beeing advised. I might not be able to update much more, if the SO needs to do many more evacs SAR will get called out to help.

Wow!! They've pretty much concluded that they have containment. DAMN you guys are good!!

AirTac says no visible hotspots or spot fires out in front and just a few inside the line, but will do a lap with the FLIR (I think but not certain..how does that work when the ground is as hot as it is?) to make sure.

Topic: 6988 Message: 6994

The ground may be hot but fire is much hotter, so it will show up very bright on their FLIR. It also helps them see hotspots through the smoke that otherwise would go unnoticed.

Also of interest on this fire, BCSO H-1, which is an OH-58 (military Jet Ranger), was sent up to do bucket drops with their 300 gal bucket. Not quite a CDF huey, but it can get there quite fast from Oroville Airport.

H-1 is the black larger helicopter:

6995. Chico AAB

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-15 00:03:12 UTC
From: Nick Caldwell
Topic: 6995 Message: 6995

Chico AAB's freq (123.975 AM) is active today, first time I have heard it this year. I am just under 5 miles away as the frequencies fly and can barely hear the base, but aircraft come in real well.

Also, Aero Union has all of their grounded P-3 Orion tankers on base the last time I went by, so if you want to see a whole bunch of tankers in one place, take a swing by fast before the gov't changes their mind and lets them fly.

From: Ric
Topic: 6998 Message: 6998

Hello group: Martis Peak Lookout will be back in service 7/01/04 for the season. Visitors are allways welcome and volunteers needed. We are located off Hwy 267 at the top of Brockway summit overlooking Lake Tahoe and the Donner Pass/Truckee areas at an elevation of 8656'. For directions , please drop me a note. This will be the 90th year anniversary of the lookout's existence(originally built in 1914). Hope everybody has a great season this year and some of you can drop by for a visit. WE HAVE A PAVED ROAD! Sincerely Ric Baender Martis Peak Lookout Tahoe N.F. / CDF NEU-E Truckee R.D.

Scanners Unlimited in San Carlos has or can get them, as can Ham Radio Outlet in Sunnyvale. They're called "Government Radio Systems," and most are available on disk or printed. I prefer the disk edition, as I can load them onto my computer and update them for myself as I need to.

At least the ones I bought a couple years ago from Scanners Unlimited
were .GRS format

I've seen .pdf scans around on the net, though.

From: Jake H
Topic: 7007 Message: 7008

2186 is covering Red Bluff HQ right now. It sounds like Shasta was working a large incident which makes sense for Tehama to respond immediate need on mutual aid. Then Butte can cover us. Don't know any details on Shasta - their local net had some traffic about releasing units and ECC wanted to use the cellphone instead of tying up local net. Fireline meals for 2 Sugarpine con crews arranged. Don't hear any command channels active right now.

Actually Shasta had three or four incidents starting
around 11 or 11:30 which stretched resources pretty
thin. Units were running from fire to fire. The latest
the Fuzzy incident (I think) was causing a lot of
concern until they had it contained.

I sent an email post this morning but it didn't stick.
Fire is East of Salt Springs Reservoir in the Mokelumne Wilderness,
so there is no mechanized ground attack. Hand crews and bucket drops.
Steep, rocky terrain.
El Dorado Hotshots on incident, and I heard Redding Hotshots calling
IC on Forest Net last night. 515 Helitack was on it this AM but was
getting pulled for a fire breaking in Nevada-Yuba-Placer.
Staging is at Lumberyard Station.
ENF is posting status on their web pages.
ENF Forest Net 171.525
Air Tac 1 166.675
USFS A/G 170.000
Tac 2 168.200
I heard reference to a command channel on Forest Net, but I haven't
been able to pick it up from my work location. Will try tonight.

From: George.Cusack@alldata.com
Topic: 7013 Message: 7013

Some spotty info:
This is the Moke Incident. I do not have good location info, but I presume it is up-country in the Mokelumne River drainage.
Rough terrain. Mostly a Hotshot, Helitack crew, and copter-drop show at this point. El Dorado Hotshots on incident. Heard Redding Hotshots call IC on Forest Net last night around 1800. C515 was on incident early this AM, but was being requested by Nevada-Yuba-Placer for a new, 10-acre timber fire up there. C516 and others inbound at the same time. Air Attack 14 on incident also.
Lots of related traffic on Forest Net. Tac is Tac 2, 168.200. Heard mention of a command net this morning, but didn't get frequency.
Anyone with info on location, command frequency, etc. please post.

Please respond to
SCANnorCAL

anyone up that way hearing of a Fire? I am getting some comms here in the east bay quite strong. Theres is talk about redding units coming in and groveland units anticipated to be there about 6:00 pm I can only hear one side but i hear this side talking to Air Attack. Sounds as if it might be a good size fire.

21 miles southwest of Markleeville would put this in the Carson-Iceberg Wilderness. Near the Ebbetts Pass and Monitor Pass areas. According to my mapping. This IS rough country. been camping up that way. The closer you get to Markleeville the rougher it seems to get. I saw also yesterday what seemed to be a plume from the Dublin-Pleasanton area, but I passed it off as Clouds, that "often" loom over that area and can be seen from this area is there a plume visible???

It is in the Mokelumne Wilderness, East of Salt Springs Reservoir and near Mokelumne Peak. You're dead right about rough country. More granite than veg. Even if it wasn't a wilderness area, I doubt you could do much with dozers up there.

Not too far. Northwest of the lake. Across the North fork of the
Mokelumne, between Highways 88 and 4.

Can't confirm the "primary" VFD frequencies, but CDF Dispatch is
151.325, and yesterday (Thursday) I was picking up "Yreka" talking with
"Medic 11" and several other units on the County Fire 154.25 "Command"
repeater. Very scratchy, but fairly busy. Very unusual to hear
anything from Siskiyou here on the Humboldt coast.

172.225 is used by Sierra NF. It is also used by Lassen NF. Neither forest has indicated that CTCSS is used on their outputs, and 85.4 is not one of the standard CTCSS tones.

Many of the Northern Cal Forests use 167.9 on the output. I would caution anyone from trying to tone lock your scanner on any forest freqs unless you know the system.

Some forest systems use non wildland standard tones on the repeater outputs to idetify the repeater on the dispatchers console. For example, the Sierra Forest uses this scheme and if you use the CTCSS you will only hear 1 of the 8 repeaters on the forest.

This would have been the Sierra with the 85.4 as the repeater identifer for the dispatcher console only. The system is not tone protected, only the repeater input is. All repeaters on this system tx a different ctcss that shows up on the dispatchers screen to make their life much easier. With a bunch of repeaters it is hard to guess which one to answer on without some kind of indicator. A poor mans ANI without the nasty bursts of tone .

Frank answered that. Sierra is using a discrete tone on each repeater
to allow the dispatcher to know which repeater was keyed by a field unit.

BTU (Butte) is forming a strike team (2103C if I recall, on request Echo 18) with orders to report to NEU somewhere south of said lake. This is in the hope that they will be able to put the fire out.

http://story.news.yahoo.com/news?tmpl=story&u=/nm/20040628/od_nm/odd_fire_dc&e=2&ncid=757

Firefighters Return to Find Station on Fire

DALLAS (Reuters) - Firefighters in a Dallas suburb returned to their station to find a fire started by potatoes they left cooking on a stove, officials said on Friday.

The fire caused about $125,000 in damages to the station in Lancaster, a southern suburb of Dallas, said Fire Marshal Ladis Barr.

The blaze was extinguished late Thursday night with the help of firefighters from other stations. It damaged the kitchen and living area.

Fire officials also wanted to remind the public to make sure not to leave food cooking before stepping out.

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-28 22:12:27 UTC
From: Bill Snyder
Topic: 7048 Message: 7052

Based upon scanner observations, when a national forest district implements its lightning plan, it temporarily modifies some of its fire management procedures.

Dispatch procedures and frequencies might change. Dispatch and prevention hours may be extended. Resources might be repositioned or beefed up. Observers are deployed to key observation sites to watch for strikes and smokes. Downstrikes are plotted, then checked by ground or aerial reconnaissance. Firefighting resources are moved into areas getting hit. Engines and hand crews are dispatched to visible downstrikes and smokes.

Some primary purposes of the lightning plan appear to be shortened response times (to keep fires small); discovery of latent, smoldering fires; tailored communications plans; and personnel safety (so aircraft don't water-drop ground personnel already fighting a fire!).

Perhaps someone could post a district lightning plan excerpt from a fire management plan. I've never seen one.

And it would be useful to know what frequency changes go into effect when the lightning plan is implemented.

And does CDF use lightning plans in their own jurisdictions?

BTU is the Butte/Plumas unit, 21## unit numbers. There is no real BTU representation in Plumas because nearly all of the county is covered by the Plumas National Forrest. So, while it may technically be the Butte/Plumas Unit, everyone calls it the Butte Unit and the strike teams are going to "assist the Plumas" as the dispatchers say (The Plumas NF).

7064. pl'ing NF freq's without loosing the integrity of what i'm listening to

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-29 00:20:55 UTC
From: Ben
Topic: 7064 Message: 7064

Ok I have a problem. I have several NF's that i listen to with the same freq, BUT i've been told that nf's are somewhat different from regular fire pub safety in they have several output repeater tones for one freq. So my question is, for instance tahoe NF you can't tone because it falls into the category, do the following NF's also do this or is there a output pl tone I can put in so listening to these freqs don't drive me crazy but won't lock out all the action

Sequoia NF 168.775
Stanislaus NF 168.750
Modoc NF 168.750
Lassen NF 172.225
Sierra NF 172.225
Plumas NF 170.550

thanks

Ben

Topic: 7074 Message: 7074

Hello all, as most know the colville fire complex is getting under control. But as soon as they feel they have it a new fire starts, yes a new one forcing the USMC barraks to be evaced and hwy 395 closed heres the info on the cole complex
New Start: New Start within the Cole Complex- Vittori Fire- driven in Piñon-Juniper mix. Approx. 900 acres. Fire was wind Correction: The Community of Coleville is no longer threatened and is NOT under the evacuation notice. Evacuations have been issued for the USMC Housing. U.S. HWY 395 has been closed for firefighter and public safety and is allowing local traffic only.

Fire Name: Cole Complex (Dana, Cole and Post Fires)

Location: Several lightning fires burning between Coleville, CA and Monitor Junction HWY 89 & HWY395

Fire Size: 3 Fires totaling approximately 3,088 acres.
· Vittori Fire- Approx-900 Acres, 30% Contained
· Dana Fire☐ 2,116 Acres, 45% Containment.
· Post Fire- 9 Acres, 100% Contained, in mop-up
· Cole Fire- 63 Acres, 100% Contained, in mop-up

Cause: Lightning

Fuels: Burning in Grass / Sagebrush and mixed Piñon-Juniper

Jurisdiction: Unified Command

Structures Threatened: Structures Listed are NO LONGER IMMEDIATELY THREATENED.

· U.S. Marine base housing north of Coleville, Ca.

· Power lines leading to the Topaz Lake area and Walker, Ca.

Resources Assigned:

· 4-Type I Helicopter

· 2-Type II Helicopters

· 2-Type III Helicopter

· 5-Single Engine Air Tankers (SEATS)

· 7-Fire Engines

· 1-Water Tenders

· 2-Bulldozers

· Type II Incident Management Team is on scene

· 7-Type I Hot Shot Crew

· 6-Type II Hand Crews

· 2-Camp Crews

Total Estimated Personnel: Approximately 400 personnel

Evacuations: No evacuation notices have been issued at
this time

Road Controls: HWY 395 and Slinkard Valley road is CLOSED at
the junction of HWY 89 and the Nevada / California Sate Line for
firefighter and public safety

Containment / Control: Specific to each fire. No estimate of
control at this time for any of the fires.

Remarks: Most of the crews will be constructing
fireline and tying into previous burns on the Dana fire. Their goal
is to prevent the fire from spreading across Slinkard Creek.
Engines will patrol along the creek, mopping up and securing and hot
spots.

The use of heavy helicopters and Single Engine Air Tankers (SEATS)
was very effective at controlling the fire to the ridgeline

Natural Resources Threatened: Slinkard Creek Watershed, habitat for
Lahontan Cutthroat Trout. Slinkard Valley is critical winter deer
range

From: Jake H
Topic: 7048 Message: 7075

Tehama/Glenn CDF has a lightning plan they activate. It moves a lot of resources into a particular area of the county, and depending on the area, sets up a certain command repeater for their own command net. From what it sounds like over the radio, each fire is assigned a sub-incident number under one larger lightning storm incident. Resources race from one smoke to the next. They are forward staged at the nearest large CDF station that can host multiple engines, dozers, and Incident Command Post.

You'll know the plan was activated overnight when sunrise breaks and all the engines are scrambled into one area of the county, copter 205, air attack, and logging patrol planes are up and checking into a command net established on Command 7.

So yes, some Units have lightning plans of their own. Not sure or haven't heard of Butte or Shasta doing a plan as elaborate as Tehama does. (We've had some extravagant lightning fires)

From: Nick Caldwell
Topic: 7048 Message: 7076

Butte just kinda thinks about staffing an extra lookout tower and then goes to bed before they decide yes or no. Almost anything that will burn from lightning is USFS (LNF or PNF) land, so they have to get their own resources out on spotting it I guess. Also, it seems the way the hills sit the storms get pushed just to the North of the county and into "the Plumas." I can't even recall them saying anything about a lightning plan, they just announce the LAL's and cross their fingers.

From: raven
Topic: 7079 Message: 7079

California Department of Forestry & Fire Protection

Northern Region, Operations

Intelligence Synopsis
June 29, 2004
1000 Hours

COMMENT: Lightning is predicted for today in the same areas as already impacted. Most thunder cells will be wet, due to increased moisture from the Pacific. Emerging fires and new starts are expected throughout the week.

STATE AND LOCAL FIRES:

Summary of Lightning Fires

Mendocino Unit

· 1 fire; 6 acres; contained

Lassen Modoc Unit

· 7 new fires; all under five acres

· Mop up and patrol will continue today

· New fires are expected to be found throughout the day due to numerous lightning strikes

Siskiyou Unit

· 14 new fires; all contained under five acres except for the Sheepy Incident. The Sheepy Incident, located in Butte Valley, is contained at 200 acres.

· CDF is combining with the Shasta Trinity NF at a Lightning Co-ordination Area (LCA) in the McCloud area

Shasta Unit

· 13 new fires; 12 contained; searching for one reported fire

· CDF is combining with the Shasta Trinity N.F. at a Lightning Co-ordination Area (LCA) in Trinity County.

Tehama Glenn Unit

· 2 fires; both are contained; the largest is 15 acres

Butte Unit

· No reported fires

· BTU is assisting the Plumas NF in the Quincy and Feather River areas.

Nevada Placer Unit

· NEU is assisting Tahoe NF

Federal Fires

Summary of Lightning Fires

Plumas National Forest

· 20 known fires; more holdover fires expected today

· All identified fires have been staffed; all are contained

Lassen National Forest

· 4 fires; all contained

Shasta-Trinity National Forest

· 21 fires; all contained

Tahoe Management Unit

· I fire; contained;

Tahoe National Forest

· 5 fires; all contained

Modoc National Forest

· 7 fires; 25 acres; all contained

Klamath National Forest

· 3 fires; contained

Mendocino National Forest

· 7 fires; contained

BLM - Susanville District

· 6 fires; all contained; largest was 366 acres

7085. Posting remote fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-06-29 23:14:47 UTC
From: Jake H
Topic: 7085 Message: 7085

Might I suggest we are familiar with the geography, bounderies of the Unit or Forest, etc. of where ever we are posting fires? Too many times there are posts about fires that are in the wrong Unit. This confuses many people on the list. I certainly wouldn't feel comfortable posting a new fire that is occurring 250 miles away where I have no idea what the local geography, stations, engines, operating procedures, etc. are.

Please make sure your info is correct before declaring a fire at some exact far away location.

Thanks!
Jake

Ben - I dont know if you got an answer to your question - but let me take a stab at it.

I think that you might have to do a little research, and determine the output PLs on all the different repeaters on all the different channels. Then you can pick and choose the ones that you want to listen to.

You might be able to make the assumption that the output PL is the same as the input PL. Maybe not. (I think that Kelty lists all the input PLs - right?)

7095. Engine accident at Kirker Pass fire--2 Hurt

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-02 00:56:16 UTC
From: David Coursey
Topic: 7095 Message: 7095

A medical helicopter is at the Kirker Pass incident outside of Concord in Contra Costa County. Engine 384 apparently rolled (think is a Type 3), with two moderate injuries, extrication required. The call came in as an auto accident with vegetation fire. This is happening right now on SCU local, Air Tactics 5, and I presume Calcord if you are close enough. Also Con fire, which I am not monitoring.

A quick scan of my CDF 1 Page guide (shameless plug) shows Susanville is the dispatch center for LMU (2200, Lassen Modoc Unit).
http://fire.norcalscan.org/cdf_1page.pdf

I have been hearing random Command 1 and Command 2 traffic for days with all the random fire burning from the lightning, all from several different incidents using different command repeater locations and tones.

7105. Humboldt: TC with extrication

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-03 21:39:20 UTC
From: Harry Marnell
Topic: 7105 Message: 7105

S/B 101 north of Crannell Rd, TC, one vict thrown from veh, one needs extrication.

Tac (Crannel IC) is White 2: 154.265
Command is Humboldt County Fire Net 154.07

Westhaven Fire 153.77
Arcata Fire/Rescue 154.13
CHP 42.54/42.24
Mad River Amb 155.175

http://cad.chp.ca.gov/ii.asp?Center=HMCC&LogNumber=0248D0703

7106. Re: [RadioHum] Humboldt: TC with extrication

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-03 21:54:28 UTC
From: Harry Marnell
Topic: 7106 Message: 7106

This is the same damn spot they have fatal or near-fatal TCs once or twice a year, normally in the rain. A fair downgrade, but nothing dramatic, four lanes divided, slight curve to right. Why people enjoy crashing there I can't figure out. Maybe because the ocean is just coming into view there if you're traveling southbound, and peeps don't pay attention.

It's at about the :50 second mark, just prior to the offramp that leads to the scales in:
http://video.dot.ca.gov/photolog/HUM/HUM_101S_100_95.MOV - however the construction shown is long since completed and it's 2 lanes each direction.

hm

Ben, this frequency is not in use yet. Placer County Fire Chiefs decided
to delay its implementation until after fire season.

7111. FIRE WEATHER PLANNING FORECAST

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-04 19:32:12 UTC
From: mikeheight
Topic: 7111 Message: 7111

FIRE WEATHER PLANNING FORECAST FOR INTERIOR NORTHERN CALIFORNIA
NATIONAL WEATHER SERVICE SACRAMENTO CA
730 AM PDT SUN JUL 4 2004

.DISCUSSION...
HIGH PRESSURE WILL BUILD OVER THE AREA TODAY AND EARLY THIS WEEK
RESULTING IN ABOVE NORMAL TEMPERATURES AND GRADUALLY LOWERING
HUMIDITIES. A LOW PRESSURE SYSTEM MOVING ACROSS THE PACIFIC
NORTHWEST IS EXPECTED TO BRING SOME COOLING AND GRADUALLY INCREASING
HUMIDITY BY WEDNESDAY OR THURSDAY AS ONSHORE FLOW INCREASES. THE
ONLY THUNDERSTORMS EXPECTED WILL BE SOME ISOLATED STORMS THIS
AFTERNOON NEAR YOSEMITE.

BTU going to 2 frequency dispatching: Pre announce and dispatch on Butte Local 151.400, and response check back and incident traffic on Butte Support, 154.415.

Lake IC, which was using Butte Support for command, is now moved to CDF command 1.

-Dan

From: Jake H
Topic: 7112 Message: 7122

I was doing fire patrol for CDF yesterday (VIP-4 patrolling battalion 4 area) and had my hand on the mic to report this one when the dispatch started. These roads were not on any map we had, and the road names were spray painted on the pavement of the nearest cross street. Fun. We got a car wash from Copter 205, and the battalion's white pickup turned pink from a tanker drop. No structures, lots of potential but the roads held it. Aircraft were bouncing between lots of calls in Butte also. Too busy to monitor Shasta so not sure if they had anything going.

A 2nd fire started 2 minutes after we drove by the location. We stopped to eat dinner and the dispatch goes out. We looked at each other thinking "weren't we just there 2 minutes ago?" :)

Lots of fun, lots of fireworks, lots of radio traffic.

Zone 1 (northeast)- Highway 36E from Red Bluff to Mineral, Manton, Lassen Lodge, Paynes Creek, Hwy 32

Zone 2 (central-south) - Bend, Red Bluff, down 99 and 5 to Tehama/Glenn border covering Gerber, Dairyville, El Camino, Los Molinos, Vina, I think Red Bank is in this zone.

Zone 3 (northwest) - Hwy5 north of Red Bluff to Tehama/Shasta border, Bowman Rd, Lake California, Baker CDF, Hwy36W

Zone 4 (southwest)- Paskenta, Elk Creek, and all CDF protected land in Glenn county, which is all land west of the transmission lines until reaching Mendocino USFS. Transmission lines run parallel with Hwy5 approx 4-5 miles to the west.

I believe zones and battalions are the same in Tehama/Glenn Unit.

Let me rephrase that. Battalions 1 through 4 are what I just
described. I believe the "zones" match the battalions.

Fw: A GOOD WARNING TO US ALL

A GOOD WARNING TO US ALL.. My brother and his wife learned a hard lesson this last week. Their house burned down...nothing left but ashes. They have good insurance, so the home will be replaced and mostof the contents. That is the good news. However, they were sick when they found out the cause of the fire.
The insurance investigator sifted through the ashes for several hours. He had the cause of the fire traced to the master bathroom. He asked my sister-in-law what she had plugged in in the bathroom. She listed the normal things....! curling iron, blowdryer. He kept saying to her, "No,this would be something that would disintegrate at high temperatures." Then,my sister-in-law remembered she had a Glade Plug-in in the bathroom.
The investigator had one of those "Aha" moments. He said that was the cause of the fire. He said he has seen more home fires started with the plug in type room fresheners than anything else. He said the plastic they are made from is a THIN plastic. He said in every case there was nothing left to prove that it even existed. When the investigator looked in the wall plug, thetwo prongs left from the plug-in werestill in there.
My sister-in-law had one of the plug-ins that had a small night light built in it. She said she had noticed that the light would dim....and then finally go out. She would walk in a few hours later, and the light would be back on again. The investigator said that the unit was getting too! hot, and would dim and go out rather than just blow the light bulb. Once it cooled down, it would come back on. That is a warning sign. The investigator said he personally wouldn't have any type of plug in fragrance device anywhere in his house. He has seen too many burned down homes. Thought I would warn you all.

Pass this on.....

From: David Coursey
Topic: 7140 Message: 7141

My understanding is CDF helos are equipped to do short-haul rescues, often attaching a basket stretcher to a line from the copter and hauling the patient a short distance to a better location for transport. CDF helos are not equipped for patient transport, as far as I know. I am not sure, but suppose it is possible that the Hueys *may* be able to grab patients from higher-altitude locations than the med helos can but this is a wild guess. I know some of the med helos are limited in high altitude carrying capacity.

My question: How many patients and what happened to injure them?

Short haul is right , I just read CDFs' webpage the other day about the exact thing. Wouldn't be surprized if 205 is in Butte , not that far from Tehama

The rescue in Placer County outside of Foresthill was down in the American River Canyon and required a short haul to get the patient out. Copter 205 was the closest copter available today with short haul capabilities.

Copter 205 is based TGU at Vina, which is right on the other side of the Butte/Tehama county line. They are a technical rescue ship but not an Air Ambulance or Air Rescue (no ALS capabilities). In most cases rescue ships cannot transport patients greater than it is required to get them to ALS care (Air or Ground Ambulance). This was definitely not in Butte County because my pager never went off for a technical rescue and/or remote area rescue (which anything with a short-haul would definitely be one or the other). After an all-night search last night (see ScanNorCal) I am kinda glad, I was asleep most the day ;)

When Copter 205 isn't fighting fires they can be requested for technical rescue missions, but during fire season they try to stay as available for fires as they can.

Thanks for all the previous answers. Remember to find out where a CDF copter is from, take the first and last number, and that's the Unit's number. 205 is in Unit 25, which is Tehama/Glenn. Copter 104 is Unit 14, Lake/Napa.

Air Attack is first 2 digits, Air Attack 240 in Unit 24, Shasta/Trinity.

Alcohol, drugs suspected in crash that injures six teens

By GREG WELTER /MediaNews Group

Six people were hurt Thursday night when a young driver lost control of a vehicle at the intersection of Highway 70 and Pentz Road, causing it to plunge about 200 feet down an embankment. One of the passengers was riding in the trunk.
According to the California Highway Patrol, Matt Siameng was driving west on Highway 70 when he suddenly tried to turn right onto Pentz Road at a speed estimated to be in excess of 45 mph.
The car, an older Honda Civic, was overloaded with five people inside, plus another male passenger in the trunk. Witnesses said it skidded across the intersection, then slammed nearly head-on with a metal guard rail.
The crash occurred at 6:20 p.m.
CHP investigators said the car appeared to go airborne for several feet after it broke through the barrier, then rolled numerous times before coming to rest upside down.

FINANCIAL SERVICES
Tri Counties Bank

There was evidence that Siameng tried to brake as the vehicle careened through the intersection, but it still hit the rail with tremendous impact.
CHP Sgt. Bruce Carpenter said there were strong indications that the victims, all judged to be teen-agers, had been drinking alcohol and possibly smoking marijuana.
Siameng, a student at Pleasant Valley High School in Chico, received only minor injuries. He was checked over by emergency medical personnel then transported a short distance from the chaotic accident scene and given a roadside sobriety test.
Authorities didn't immediately disclose the results of the test.
The names and hometowns of the other victims weren't available at press time, but it was confirmed that three of them were taken by helicopter to

local hospitals with critical injuries.
Erin Johnson, an emergency room nurse, was returning from an outing near Lake Oroville and happened on the scene of the crash seconds after it occurred.
She borrowed some ill-fitting tennis shoes from a family member and scrambled down the embankment to render aid.
"There are some pretty serious head injuries down there, and maybe some paralysis," Johnson said.
She and a passing bicyclist reached the crash before emergency responders and helped get the less injured out of the vehicle.
Some of them, however, had to be extricated by rescue crews who partially ripped the roof off the vehicle.
The male in the trunk was reportedly a hitchhiker whose car had broken down nearby. Johnson said he suffered severe injuries, but perhaps not the worst.
One person in the car was believed to have suffered a broken back.
Including CHP officers from Chico and Oroville, Butte County Fire/CDF rescue units and emergency medical responders, 20 ground vehicles responded to the incident. Enloe FlightCare made two trips to transport patients and a CalStar helicopter picked up a third.
The third helicopter, from CDF, brought in a six member crew to assist firefighters already at the scene.
Two other victims were transported by ground ambulance.
It was 7:30 p.m. before the last of the victims was readied for transport.
The CHP said an investigation into the crash, and the task of hauling the crushed vehicle up the 200-foot embankment, could take several hours.
Pentz Road was closed to vehicles in both directions for at least two hours Thursday. Vehicles trying to take Pentz Road were diverted back to Highway 99.
The crash is still under investigation. The Mercury-Register will report tomorrow on the names and conditions of the victims and any further findings from the CHP.

Good place to see what the winds are doing to any smokes. Sometimes
fires from a long ways away can smoke out a town.

7163. Corral hollow fire near Tracy, Ca 400 to 500 acres

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-11 20:03:07 UTC
From: Bob
Topic: 7163 Message: 7163

Hi All,
I have been lurking around since the start of the fire season and love the up to date discussions and e-mails and find the the site very informative.
I am a private water tender operator and completed my hired equipment safety class in Weed, Ca in April We have two tenders 2000 Gal and 4000 gal Fire ready (CDF Radio's etc)I am also a retired public servent, Ground Zero vet and a scanner enthusiast and live in the outskrits of Tracy, Ca. Unfortunatley our water tenders were in the Bay area on construction jobs when this fire started less than a mile from my home so we could not volunteer or respond if called out. Enough about me. now my questions...

First how come there was no info on the fire last night near and in Tracy on this group last night?

Also can anybody tell me how to get the deployed equipment list for a paticular fire?

and the size-up spread and final acreage?

Finally a comperhensive up to date scanner list for CDF I have conflicting list such as my Radio use agreement with CDF states that Tac 1 is 151.145 and other list's state that it is 151.355 and the list on this site list it as command? is the list on this site up to date? these conflicts are numerous also what PL tones go with each freq? and does that change with area? My Radios are PL tone enabled by selector switch and I would like to be able to use repeaters in tough situations.

Thanks I am pleased to be a member of this group and hope to be more active and less of a lurker.
Robert O'Connor

There are several groups about scanning in the area , probably too many and
that is what happens. The fire was on norcalonlinescanning group
it does have an big advantage to be on that group , it has a link to on
line scanners. there were several posts about the fire last night

From: Jake H
Topic: 7163 Message: 7166

As you can see at the bottom of every message on NorCalFire, is a link to Fire Center 2004, http://fire.norcalscan.org with complete CDF radio information and hints/tips how to monitor them, and what you might be hearing. For local public safety freqs, try http://www.scancal.org and I couldn't begin to tell you what e-mail list had your fire on. There are so many lists out there. The 3 major fire lists are Norcalfire, Cencalfire, and Socalfire. Among those groups, there are several offshoots covering limited or specific areas.

Your CDF radio info will be correct. Tact 1 is 151.145 and Command 1 is 151.355.

Also, we try not to directly help/advertise with 3rd party businesses related to fires such as contract firefighters, insurance companies, salvage companies, etc. We can help you in your scanning hobby, which in turn may help you in your contracting business with watertending, but we wouldn't directly aid you in getting a contract on a particular incident.

There are some on this list who live in Tracy. They will be reprimanded for not posting a 400acre fire here :)

Glad to have you aboard Robert and hope you enjoy.
Jake

7167. Posting incidents

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-12 00:46:35 UTC
From: caladded@aol.com
Topic: 7167 Message: 7167

Ok, I have decided , for incidents they may belong on more than one list , I am posting to 2,3 or even 4 On my INTIAL post ONLY , I will then direct the reader to get UPDATES on just ONE of them , as to not load up everyones' computer with quadruple posts. for instance , for a fire in livermore , this may belong to bayscan, norcalfire, norcalonlinescanning and even cencalfire..........First Post to all , 2nd and additional post to JUST one ....If others want to do this , lets make sure we advise WHICH list the follow-ups
are posted on and others to NOT flame the poster if they disagee with which one they choose

thoughts?????????

Thanks for the info Jake as for advertising there is no way I know of
that
anybody could assist in getting a contract because its based on a two
tier
rotational list and we are a first tier company when we get a call-
out we go
to the bottom whether we accept the job or not and work our way back
up to
the top very fair and do not think anybody could change it per se.....
Well second thought on that maybe if an IC knew we were down the
street
from a fire because of my participation on this list he could request
us but
that would be unlikely. This year we have had so many fires out here
not
much left to burn anyhow but when the trucks are here we always keep
one
full of water and would volunteer its use free of charge because it is
frowned upon to respond to an incident looking for work with out
being first
requested but if we are not looking for money and it is in the
neighborhood
we willl help. It would be hard not too considering it has more
capabilities
than most professional fire trucks (2000 and 4000 gals).
Here is a link to the official CDF hired equipment information page
http://www.fire.ca.gov/php/fire_er_hiredequip.php which also has a
link to
the Hired equipment policy booklet(.pdf) This book is the bible for
vendors
and CDF hired equipment managers it is very interesting and probably
a good
resource for the whole group.
Thanks again
Bob

I really like this idea. Good idea Ed. This season so far has been
pretty light on fire posts and more on how-to and other fire season
questions. It will get ugly fast though as the season progresses.

From: Jake H
Topic: 7163 Message: 7171

You are right on contracted equipment. There are policies and such in place that would make it hard to cheat the system using this list. The hired equipment handbook is nice to read through for the diehard fire scanners out there. It explains exactly what type of watertender is what, dozers, etc. It also gives hourly rates and $$ amounts that make even me think twice about buying a water truck ;)

I was more concerned with insurance/salvage companies that like to listen to the scanners or use these lists as clues to where there will be lots of damage etc. from an incident. Then they respond to the incident physically and get to the victims when they're the most emotional and susceptible to make wrong decisions. Turkey vultures in my opinion. We've had multiple solicitations on these lists from these companies. We don't support them.

Again - welcome to the lists! Look forward to some good front-line stories you might have later in the season.

I've created (well, it's been created, just not published) a list for this..

incidents - to subscribe send an e-mail to listserver@... .
use subscribe incidents in the body of the message. No long yahoo delays.
<grin>

Date: 2004-07-12 01:38:22 UTC
From: Bob
Topic: 7163 Message: 7175

Just a note as of now they are still working this fire 6:32pm I first noticed around 10:00 pm last night I was wondering if someone can tell me how to get the full incident report and equipment list and yes I am curious about private dozer and tender vendors etc. and curious if some of the local ranchers and land owners used ther equipment such as dozers and tractors with diskers I live at the corner of I580 and SR132 very close to the fire. Also would the group like me to post some pics?
Thanks, Bob

This is not uncommon. Under the right conditions, signals will travel a couple of hundred miles. Based on my experience, I suspect you are hearing Laughlin Ridge (above Ukiah).

would be out of Howard Forest , Ukiah ? Ben remember , helos , take out the middle 0 making it 11 and add 00 making it 1100 and that is the series of which unit it comes from

i.e. Santa Clara are the 1600 units , copter 106 = 16 = 1600

Heavy smoke in Reno, NV. They are saying it is from the Fresno fires. We can not see from one end of the cty to the other. I also thought maybe it was Tahoe on fire. SoCal or Cencal groups are not saying anything on these fires. It must be bad though!

Thanks. For some reason the relay server at my host decides to just not listen to me for a while. It is usually back up within an hour or two. Usually late at night once a week I restart my end to refresh Win98 and stuff. Throughout the day and evenings, I glance at the router lights to make sure my PC is streaming traffic. If it's not, I know the relay server isn't listening to me.

Thanks for the update. If you wish, you can send them to me directly at jake@...
Thanks!

Sounds like 30 acres , 75% containment , may not need all strike teams.

S/Ts from MMU , TUU , AEU

From: jjcooke@yahoo.com
Topic: 7203 Message: 7203

Waterfall Fire started at 0300 this morning and really took off at about 1100 hours. Fire started in King's Canyon and is spreading north towards Ash Canyon and south past C Hill. There have been three fire vehicles destroyed by the fire and at least four firefighters hurt. The fire is up to 1000 acres and is just to the west of Carson City. Ther have been an unknown number of structures destroyed but at least five homes with hundreds more threatened. The wind is blowing at 25 to 35 mph from the west. The fire is completely out of control and only being fought from the air because the fire behavior is so unpredictable that all the hand crews have been pulled off. I just spoke to my brother in CC at 1645 and he said that visibility in CC is about 1/8 of a mile due to the heavy smoke.

Nevada is calling for strike teams from California. I'm in Sonoma County so I can't hear what's happening in the mountains but I imagine that Placer and El Dorado will be headed there soon if they're not already enroute. This is going to be an historically bad fire for Carson City.

Regards, Jim

I heard ablurb on KGO 810 AM today on the noon hour that there was
a fire (was a controlled burn) now out of control In Yosemite. They
were talking about evacs in the valley. Anyone else hearing anyhting?
ios it still burnin?

Just saw some footage from KPIX 5 on this Fire looked pretty bad. Hope all goes well for all involved. But according to the weather report on tonights news, it looks as if the weather will just get hotter and push towards red flag warning style weather.

I have been in meetings all day long and was told by NEU (Nevada-Yuba-Placer) Ops chief that they had requested 5 strike teams from California. This was about 1:45 this afternoon. 15 minutes later Placer County dispatched local government Type III strike team (XPL 4126C) to this fire. I am not sure who else has sent resources but did hear an OES engine staging on I-80 waiting for the rest of his strike team.

This was same time as the Placerville incident was heating up.

Terry

Things have gotten much worse in CC. The fire has made a run into the west side of the city and is cresting the mountain and heading down into the Tahoe NF at the same time. For those of you familiar with CC, the fire made it down to Curry street and burned several commercial structures. The firefighters made a stand at the railroad museum and saved it after the fire burned right up to the tracks. There have been 1000 homes evacuated, everything west of Ormsby Street. The fire continues to burn north as well towards Lakeview. The campgrounds in Tahoe are being evacuated also. It's still only being fought from the air and every engine they have is now being used for structure protection in the west side of Carson City. The temperature at 1900 is still 90 degrees with a humidity of 17% and west winds of 17 mph gusting to 32 mph.

My brother is monitoring in CC and says that almost every engine company in western Nevada is on scene along with NDF and USFS. Because of the heavy smoke, they can only use helos and agtrucks for air resources - it's too rough and smokey for the P-3's to do much but dump slurry ahead of the fire fronts. The chinooks and hueys are doing bucket pickups from Washoe Lake because Carson is starting to run low on water.

The IC was asking the ETA for California strike teams because his crews are exhausted after 14 hours of fighting this fire. I have no idea what we do for resources if a big fire breaks on this side of the state line.

Regards, Jim

Hello all, scott here in Carson City. Man this fire was huge. I woke up around 09:00hrs (late night) and saw a large plum and then heard 75 acres. I thought ahhhh they'll have it by 1 pm. But the wind hit and created a firestorm which ripped through the King and Ash Canyon areas and also timberline. When the firestorm hit engines were right in its path. We've lost 3-5 Type-III's multiple POV's, 9 homes and 1 industrial. 500 homes thratened and 50 bussness. its rapped around C-Hill and down basicly to 395. To say the least it was massive.

Me too, 900 personel onscene Type-I IC team, Sheriff now calling for voluntery evacs in Voltaire Canyon, so looks like its going to be a busy night. Also just for note this is the same area a Firefighter died durning the Kings Canyon fire back in the late 70's early 80's.

> Hello all, scott here in Carson City. Man this fire was huge. I woke up around 09:00hrs (late night) and saw a large plum and then heard 75 acres. I thought ahhhh they'll have it by 1 pm. But the wind hit and created a firestorm which ripped through the King and Ash Canyon areas and also timberline. When the firestorm hit engines were right in its path. We've lost 3-5 Type-III's multiple POV's, 9 homes and 1 industrial. 500 homes thratened and 50 bussness. its rapped around C-Hill and down basiclly to 395. To say the least it was massive.

thats alright Scott , I know what you mean. Friend of mine who is now a Battalion Chief in SF was telling me when he was the Lt. on Engine 14 out in the Richmond dist , they rolled on the 4th alarm at a fire in the haight/ashbury and as they drove thru Golden Gate Park it looked quite beautiful thru the trees.

Did you see Gary' pic of the Oakland Hills fire after dark , same thing

until you "think" about what is burning , then it takes away from the thought

7225. Live feed for the Waterfall Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-15 17:12:07 UTC
From: Scott
Topic: 7225 Message: 7225

Hey Folks I'm planning on running on a live feed for as long as I can in the North Nevada Norcal Fire Radio Center Chat Room. This fire is being taken over by a Type-1 Incident Team today and I thought everyone might like to listen to this major incident. I have very, very good reception, since the fire is 2 miles from me and I have line of sight with the command repeater. Follow the following link and once you join, just click chat on the main menu and you'll be there.
http://groups.yahoo.com/group/north_nevada_norcal_fire_radio_center/

7227. Carson City Fire Update (1330)

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-15 20:54:18 UTC
From: jjcooke@yahoo.com
Topic: 7227 Message: 7227

The fire is still 0% contained but is now burning upslope away from the city. The winds haven't been a problem this morning and they have 29 firefighting aircraft hitting the fire hard before the winds pick up. They have two P-3's, one out of Battle Mountain and the other all the way from Grand Junction CO. Another one was supposed to be coming from Cedar City, Utah, but it looks like he's being diverted to Yosemite.

The preliminary figures are 9 homes and one business destroyed and an an unknown number of structures damaged. There were three fire department vehicles lost including Carson FD's big rescue rig. Four FF's injured, one with a broken leg and the others with burns, unknown how bad. The fire fighters made a heroic stand last evening as the fire was moving right into the south end of the city and saved the railroad museum and the vast majority of structures that could have easily burned.

My brother is able to see all white smoke now so they may be starting to get a handle on this. Winds are predicted to gust again to 25 to 35 mph this afternoon so things could change fast.

A community meeting was held this morning and a lot of residents are unhappy with the fire department's response. I can understand their anger but I don't think there was much CCFD could do, especially given the fact that the nearest tanker was in Battle Mountain. If anything, the fire weather forecast was more to blame than the fire fighting efforts since it wasn't until after the wind had already blown up that the forecasters put out a wind warning. It would have taken a big set of cahones to call for tankers from so far away for what looked like a fire that could be controlled by local resources. If the normal tanker base at Minden had been manned, things might have been different. If nothing else, the Air National Guard Chinooks are getting a lot of dump practice today.

Regards, Jim

Ed,

Yep, 29 aircraft including helo's and the agtrucks they've converted for bombing. There are 13 ANG Chinnoks alone. They also have 39 hand crews, which is supposedly a record for a single fire. Latest update on acerage is 9300, expected to reach at least 10,000 before the day is over.

Just talk to my brother (1530) and the fire is taking off again. It's starting to burn homes in the Timberline subdivision, which is on the north end of Carson City. It looks like the fire is getting ready to jump into Comb Canyon. There's nothing to stop it from burning the homes in the Lakeview subdivision next. They are staging engines in Lakeview for structure protection but I can't imagine how they'll be able to stay if the fire crowns over the ridge. If they can't get the fire stopped at Lakeview, Washoe Valley is next and I have no idea how they'll stop it there.

It looks like the main part of Carson City is out of danger but everything on the north end is real trouble. This is one bad fire.

Regards, Jim

Carson High School is being used as an evacuation and command center. You should call the school or the Carson City Sheriff's Department at 775-867-2500 to see if the event is still a go or if it has been moved. Right now, all of Carson City is completely filled with smoke and falling ash. The school itself is in no danger but I imagine any outside event won't be very pleasant. Who knows where the fire will be by tomorrow but it won't be out, that's for sure.

Regards, Jim

29 Aircraft isn't unheard of. I know at the Bouquet Fire in LA County in '02 we had 33. It might be a little unusual given that the fire isn't in CA and there's minimal Fed tanker resources available.

Also, 39 hand crews is well short of a record. It might be for a Western Great Basin fire, but it's not too unusual for a CA fire.

Pamela:and those who are in Northern calif. There is a Fire In San Jose,ca SCU is the CDF unit santa clara. Last I heard it was at 15+ acres and someone on bayscan estimated it could go to 200(doubt it). Tier 2 is San Jose Fire's Level of Fire indicator if I am right, not real familiar with thier ops. Some HOmes threatened on this fire. 154.115 is San Jose Fire Command 3 and also CDF 151.160 Tac 2. This is what i believe he was getting at. Sometimes some people forget we are all spread out across the state and may never have heard or been to other areas.Not all of us are frequent in Firespeak. I have seen the Pics live from the local news here. It looks like a decent Fire. Could get ugly but looks like they have the upper hand.

From: radiophanatic_71
Topic: 7248 Message: 7248

No problem. Its easy to forget that not everyone is an expert I guess. I live about 15 or so miles north east of san jose and I have no idea of how thier Fire dept runs, because I do not live in that city and do not monitor it daily. I can get it but do not monitor it enough to know thier Tier level explanation but I beleive its a way of defining the level of wildland fire or any Fire for that matter.

Currently 200 acres in mixed fuel
Structures still threatened. (Urban Interface area)
Two Local Govt Type 1 strike teams on scene
Three CDF Type 3 strike teams enroute
3 Helos
4 Air Tankers

Countywide Mutual Aid Plan in effect for Santa Clara County

Many road closures

Ben,

Correct. It is the housing subdivision that's at the top of the
Lakeview summit at the CC/Washoe county line.

John,

I think you're right about the hand crews being a record for the Western Great Basin. They weren't clear about this in the afternoon report but I know they've had LA area fires with upwards of 50 hand crews.

300 acres mod spread, structures still threatened, most likely will run
into interstate 101 in San jose. road closures in effect

Air resources
4 tankers
3 copters
2 AA's
2 crews
4 dozers
(5) strike teams, mostly type III's
4 overhead las count

OK, so those of you who DON'T know San Jose , let me explain

Instead of alarms , San Jose dispatches TIER responses to brush/wildland fires , they usually consist of the following

Tier 1 / 3 Engines , usually wildland Engines if possible. A Wildland Engine has a brush patrol rig that reponse in tandem with the Engine
1 Battalion Chief and possible a Watertender which carrys anywhere from 1500-2000 gallons of water (estimate only).

You may (if you can hear them) hear them send RESERVE Brush Patrols these are at Stations 1,3 and 5 presently and they consist of 2 brush patrols each (I..E. BP1A BP1B) and are mannned by fire fighters assigned to the Truck company OR USAR (Urban Search and Rescue) Company Stations 1 and 3 have Trucks and Station 5 has a USAR

The Truck or USAR is then placed out of service.

any other questions ?

ED

Being we are talking about record responses , does anyone know of a source that shows the response to the Oakland Hills Fire in 91' ?

I have heard between 85 and 88 strike teams rolled, seems like that may be a record.

Each TIER (Tactically Intergrated Emergency Response) gets about the same
with each level although they can't always send wildland Engines.
3 Engines + brush Patrols and a BC

Wildland Engines are in the following stations
2 11 18 19 21 24 27 28

Watertenders are in Stations 2 13 and 18

Battalion Chiefs are in stations 1 2 10 13 and 29

check www.sjfd.org for a map of stations

Take a look at this report on the 1993 Old Topanga (Malibu) fire
http://www.lafire.com/famous_fires/931102_OldTopangaFire/110293_official_report_old_topanga_inci.htm
... this report claims that this fire was "the largest mobilization of emergency resources in the history of the State of California." Haven't heard if any of the 2003 fires eclipsed that claim ......

The media was a good 30 minutes behind all day , at one point fox.nbc,cbs and abc all we breaking in with reports . KNTV seemed the best , being they are a San Jose station that obviously made the most sense. when they were reporting 50 acres , the IC had reported 150

btw , for DON ON the CDF radios today (151.445/ 151.16 / 151.295 and 151.265 four of the frequencies I heard The Air Attack unit (460) was refering to itself as SILVER AIR TAC

OK ?

makes it easy to shorten words.....or abbeviate them , some stuff takes to long to say , especially over the radio i.e.

everyone in the bay area knows " the main drag" thru San Mateo and Santa Clara cities is El Camino Real , but almost always refered to as ECR.

The Carson City Nevada Appeal web site has had the best information on this fire since the start and it's being updated almost hourly. You can find it at http://www.nevadaappeal.com/apps/pbcs.dll/article?AID=/20040715/BREAKING/107150038 .

Also note that the IC themselves may not have a good
idea of what the size is. We often joke about the
difference between night acres and day acres. I went
to a fire just outside of Yosemite once that was
supposed to be 400+ acres and running. When mapped by
day is was a little under 90 acres. Also there seems
to be a significant difference between "city" acres
and "forest service" acres. A 20 acre city fire is
about 4 forest service acres.

John <thefishmail@...> wrote:
29 Aircraft isn't unheard of. I know at the Bouquet
Fire in LA County in '02 we had 33. It might be a
little unusual given that the fire isn't in CA and
there's minimal Fed tanker resources available.

Also, 39 hand crews is well short of a record. It
might be for a Western Great Basin fire, but it's not
too unusual for a CA fire.

Date: 2004-07-16 18:50:30 UTC
From: Bill Snyder
Topic: 7271 Message: 7279

Pamela Alley wrote:

> It's common to hear 'air tac' as 'air attack'...it took me months to
> figure it out (blush) that it was short for AIR TACTICAL rather than
> AIR ATTACK.

Actually, both are valid wildland fire "air show" terms.

"Air Attack" ("Air Tactical" in ICS) refers to the deployment of aircraft (helos, fixed wing) on a wildland fire incident for the purposes of retardant drops, aerial reconnaissance, shuttling of personnel and supplies, etc.

"Air Tac" (shorthand for "Air Tactics"), as we would normally hear it used in wildland fire communications, refers to the Air Attack tactical radio frequency.

Example: "Air Attack" might utilize "AIR TAC 2 - 169.150 MHz".

And, just to keep us really confused, in ICS terminology, "air attack" commonly refers to the "Air Tactical Group", part of the incident Operations Section.

Oh, and then there's the lead planes, conveniently referred to as "Air Attack", as in "AA-330" or "AA-07". These are the smaller, fixed wing aircraft, like the Commander or the OV-10A.

No wonder it confuses and perplexes.

Additions or corrections most welcomed!

--
Bill Snyder

My friend, I seem to grow more and more bewildered. Your observations are wholly incomprehensible to me. Cannot you simplify them in some way? At first I thought perhaps I understood you, but I grope now. Would it not expedite matters if you restricted yourself to categorical statements of fact unencumbered with obstructing accumulations of metaphor and allegory?

7292. Waterfall Fire Update 1400

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-17 21:12:42 UTC
From: jjcooke@yahoo.com
Topic: 7292 Message: 7292

You can get the latest at
http://www.nevadaappeal.com/apps/pbcs.dll/frontpage . They've done a superb job updating the fire. For some reason, the acreage keeps fluctuating between 7000 and 9000 acres. The south end of the fire is completely burned out but the fire is still on top of the ridge and in Ash Canyon. Things could get tricky again this afternoon with a temperature of 93 and the winds out of the west at 14 mph gusting to 23 mph. They spent all night cutting lines around Lakeview and at the top of the ridge to keep the fire out of the Tahoe State Park. Hopefully the lines will hold today.

WATERFALL FIRE
July 17, 2004 @ 10:00 p.m.

New Waterfall Fire Information phone numbers: 775-841-2975 and 775-841-2649

Evacuees are being allowed to return home in all areas to obtain belongings and are encouraged to leave afterwards.

Crews are completing a 30-50-acre burnout on the southwest edge of the fireline, at the south end of Ash Canyon, to further secure its edge. Burnouts are intentionally set fires that remove unburned vegetation inside the fireline.

Size: 7,566 acres, 85% contained. Estimated containment date is July 20.

Today's Highlights: Firefighters continued to make excellent progress, and build remaining fireline. The skies were remarkably clear, except for a few flare ups in Kings Canyon. Crews are also working around the Timberline and Lakeview subdivisions, mopping up hot spots. Residents will continue to see smoke from flare ups in islands of unburned trees or brush within the fire for the next few weeks.

Started: July 14, 2004

Origin/Location: The fire began in Kings Canyon, west of Carson City, NV. The fire is about 20 miles south of Reno.

Cause: Human caused. Remains under investigation.

Resources:
Firefighters: 1,346
Hand crews: 37
Helicopters: 5
Heavy Air Tankers: 1
Single Engine Air Tankers: 4
Dozers: 2
Water Tenders: 2
Engines: 26

Firefighter injuries: 5 minor injuries
Burned Structures: 15 houses, 1 commercial property, and 25 outbuildings

Cost : $4,100,000

Sunday's Forecast: Temperatures around 85, winds variable from 15-20 mph, and relative humidities around 18.

Agencies Assisting: CA Dept. of Forestry, Reno Fire, BLM, Storey County Fire, Carson City Fire, Carson City Sheriff's Dept., Douglas County, Lyon County, Lake Tahoe Fire Districts, Nevada Office of Emergency Management, Sierra Pacific Power, Nevada Air National Guard, Carson City Utilities Department, Red Cross, Carson City School District, Fallon Naval Air Station, and the Nevada Highway Patrol.

***Lake Tahoe State Park in Nevada, specifically the area from Spooner Lake north through Little Valley in the backcountry, has been evacuated as a precaution since Wednesday. This backcountry evacuation order will not be lifted until the fire threat is significantly reduced.

Incident Management: Kim Martin's Type 1 Team took charge of the fire on Friday morning.

The Incident Command Post is located at the Carson High School.

From: Jake H
Topic: 7303 Message: 7304

(laptops aside... they are probably to keep track of service records or flight times/observations so they can be easily entered back into a master database somewhere. That's what it sounded like with the few words I was hearing. Like they're due to get the laptops soon, but they're lucky to get laptops because the original idea was to be hardwired back at the base. Speculation - no fact here.)

Static...
If it's aircraft, they are constantly moving and simplex. They will fade in and out as they fly around. A tree can block the view, or if the aircraft is turning and the belly is facing you/antenna, there can be a small dead area where there is zero reception.

If a vehicle or handheld is talking simplex, same concept, only worse because they are on the ground and buildings and trees can get in the way real fast.

If it's a repeater signal and you're hearing rising static before they're lost, check the earthquake page to make sure the mountain didn't relocate. :)

If it's a gradual loss, then it's just the fact the transmission is moving in and out of the range of your antenna. Solution - get a better antenna. If it's a sudden loss from perfect to nothing, then you might have a nearby transmitter or interference source overloading your scanner.

Jake

Eastern Great Basin Incident Management Team
Contacts: 775-841-2975; 775-841-2649

**Reward Offered: Investigators would like to talk to anyone in the Kings Canyon vicinity up to a week prior to the fire being reported. (The fire was reported in the early hours of July 14). Secret Witness, 775-322-4900, is offering a cash reward.

Acres Burned: 7,600

Percent Contained: 95%, expected containment on Tuesday, July 20 at 6:00 p.m.

Evacuations: Homeowners are being allowed to return home in all previously evacuated areas.

Burned Structures: 15 residences, 1 commercial building, and 25 outbuildings

Cost: $4,800,000

Present Plan: Firefighters will patrol fire lines and continue burnout operations on the west side of the fire. On the remaining portions of the fire perimeter, crews will be conducting mop-up operations and with be rehabilitating fire suppression lines.

Resources:
30 crews 2 Type 1 helicopters
26 engines 1 Type 2 helicopter
14 water tenders 2 Type 3 helicopters
28 dozers
Total personnel: 1, 022
Military helicopters were released at 1 p.m. today.

Reopened Trails: The Flume Trail and the portion of the Tahoe Rim Trail that goes through Lake Tahoe State Park opened at 5 p.m.

Burned Area Rehabilitation: Post-suppression rehabilitation include stabilizing the burned area's watershed. The Forest Service, Nevada Division of Forestry, Nevada State Parks, Carson City, and Bureau of Indian Affairs are focused on preventing sediment from getting into stream channels, restoring drainage patterns, and minimizing surface and gully erosion on burned lands.

Private landowners can obtain information on controlling soil erosion and helping plants recover on their property from Carson

City Urban Forester, Molly Sinnot, at 884-1883.

Humboldt-Toiyabe National Forest prohibits riding off-highway vehicles on the firelines and in the burned area.

Burned Area Safety Concerns: The Fire Management Team asks people to stay out of the fire area for safety reasons. Walking into a smoldering stump hole can cause serious burns. Burned standing trees can fall and rocks can roll down hillsides without warning, causing serious injuries. The fire has displaced wildlife; motorists should use caution in the southern end of Washoe Valley as some displaced wildlife may cross Hwy. 395 to find a new home.

Monday's Forecast - Temperatures in the 80s, winds 10-20 mph, and 25% relative humidity.

Carson City has relaxed its water restrictions to normal summer levels, but reminds residents that drought conditions continue.

Thaks for the update, Scott. Hats off to all the firefighters that saved so many homes and commercial buildings. Given the size and rate of spread of this fire last Wednesday, I was really expecting hundreds of homes to burn. To only lose 15 is absolutley amazing.

Regards, Jim

I assume they're getting mobile data computers. Our helo already has one and you can't log on to the the radio system without it. It's useful for things like GPS coordinates instead of having the dispatcher read them five times until they get it right. :) Don't know about straight fire fighting helos though. We always have the pilot and an observer so he's the one working the computer. It would be different with just the pilot.

Regards, Jim

True enough Mike, but from where I sit, too, I cannot BELIEVE the job firefighters are able to do when a nasty fire hits. It's absolutely incredible to see what they can salvage from what seems a total loss--even if the walls are scorched!

EVERY SAVE COUNTS. I know, every loss SUCKS...but concentrate on the positive on this one, 'cause you did a GOOD JOB.

Mike,
Yeah, I know, but compared to what might have been, it's amazing we
didn't lose any firefighters in addition to homes. I run out of
burning buildings, not into them, so I have the greatest respect for
all of you that risk your lives for the rest of us.

WATERFALL FIRE
Monday, July 19, 2004, 6:00 p.m.
Kim Martin, Great Basin Incident Commander
Contacts: 775-841-2975; 775-841-2649

Fire cause: Sunday evening, fire investigators released some of their findings. The Waterfall Fire started from an illegal campfire along an unmaintained, primitive trail in Kings Canyon west of Carson City. See full text of press release from Fire Team below.

Reward Offered: Investigators would like to talk to anyone in the Kings Canyon vicinity up to a week prior to the fire being reported. (The fire was reported in the early hours of July 14). Secret Witness, 775-322-4900, is offering a cash reward.

Burned area rehabilitation: Post-suppression rehabilitation include stabilizing the burned area's watershed. The Forest Service, Nevada Division of Forestry, Nevada State Parks, Carson City, and Bureau of Indian Affairs are focused on preventing sediment from getting into stream channels, restoring drainage patterns, and minimizing surface and gully erosion on burned lands. The Humboldt-Toiyabe National Forest prohibits riding off-highway vehicles on the firelines and in the burned area. The Forest asks the public not to hamper the efforts of the Burn Area Emergency Rehabilitation (BAER) Team, and refrain from entering the area.

Private landowners can obtain information on controlling soil erosion and helping plants recover on their property from Carson City Urban Forester, Molly Sinnot, at 884-1883.

Burned area safety concerns: The Fire Management Team asks people to stay out of the fire area for safety reasons. Walking into a smoldering stump hole can cause serious burns. Burned standing trees can fall and rocks can roll down hillsides without warning, causing serious injuries. The fire has displaced wildlife; motorists should use caution in the southern end of Washoe Valley as some displaced wildlife may cross Hwy. 395 to find a new home.

Acres Burned: 7,680

Percent Contained: 97%, expected full containment tomorrow, July 20 at 6:00 p.m.

Resources:
20 crews 2 Type 1 helicopters
25 engines 1 Type 2 helicopter
12 water tenders 3 Type 3 helicopters

4 dozers
Total personnel: 802

Cost: $5,200,000

Well thanks but more could have and should have been done within the first 12 hours of the fire. For instance, the neighboredhood where the three fire vehicles got burned, fire crews should have burned out the fuel from that area. Easier said than done-I know, but I saw the area and which way the wind was blowing at that time. They could have back fired or burned out. Also, I heard that resources where not ordered fast enough but the fire did move very fast. That was evident by the damaged caused. Live and learn. This really shows how having a deffensible space around your home can make a difference. M

Mind you, this is all Monday morning (Ok, Tuesday!) quarterbacking, but the way I heard it, the wind was so unpredicatble that there was no telling where it would head next--and thus, an awful amount of risk in such an operation.

Ah, ,well. They got the upper hand, and may it continue to be so!

Well the wind changes direction in the afternoon there
and blows directly towards the homes. In other words,
it turns 180 degrees and if done right, a burnout out
might have worked but having the aircraft back in
service and painting the hillside with retardant
helped alot. It is Tuesday morning quarterbacking of
sorts. M

The Center for International Disaster Information offers a free service that delivers the daily NICC Incident Management Report right to your mailbox. Here's what today's report said about Southern California fires:

SOUTHERN CALIFORNIA AREA LARGE FIRES:

FOOTHILL, Los Angeles County Fire Department. A unified command has been established between a Type 1 Incident Management Team (Cable) and the Los Angeles County Fire Department (Bryant). This fire is three miles south of Newhall, CA in chaparral and grass. High temperatures, low relative humidity, low fuel moisture and steep terrain continue to hamper control efforts. Mandatory evacuations remain in effect for the Placerita Canyon and Sand Canyon subdivisions.

PINE, Los Angeles County Fire Department. A unified command has been established between a Type 1 Incident Management Team (Gelobter) and the Los Angeles County Fire Department (Hokanson). This fire is 14 miles southeast of Lebec, CA in heavy brush. Interior smoldering was reported with some active burning within containment lines.

MELTON, Riverside Unit, California Department of Forestry and Fire Protection. This fire is five miles south of Hemet, CA in chaparral.

Significant progress was made on all divisions and fireline rehabilitation efforts have begun. All road closures have been lifted.

MEADOW, Yosemite National Park. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located seven miles southeast of Yosemite Village, CA in timber, is being managed to accomplish resource objectives. Low intensity surface fire with occasional torching and short range spotting was reported. Trail closures remain in effect.

INCIDENT |ST|UNIT| SIZE | % | EST |TOTAL|CRW|ENG|HELI|STRC| $$$

NAME | | | |CTN| CTN |PERS | | | |LOSS|C-T-D

Mike,

If the Minden tanker base had been operating then I think you're right. Unfortunately, the closest P-3 tanker was in Battle Mountain and the next one had to come from Grand Junction, Colorado. The fire went from what looked like it could be easily controlled with local resources at 0900 to out of control by 1100. If I was the IC, I'm not sure I would have requested tankers from so far away for what looked like a controllable fire. If there's any Monday (Tuesday?) quarterbacking to be done, I'd be looking at USFS and the FAA and why they are so far behind schedule in recertifying tankers.

Regards, Jim

7326. Waterfall Fire Update (7-20-04 18:00 hrs)

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-21 05:47:13 UTC
From: Scott
Topic: 7326 Message: 7326

WATERFALL FIRE
Tuesday, July 20, 2004, 6 p.m.
Great Basin Incident Command Management Team
Kim Martin, Incident Commander
Contacts: 775-841-2975; 775-841-2649

Last webpage update

This will be the last Waterfall Fire update on this webpage. This page will continue to serve as a source of information for initial attack activity on the Sierra Front. Fire information officers will remain on the Waterfall Fire, and the numbers above should be good through at least July 24. You can receive additional information at the Carson Ranger Station, 882-2766, or at the Humboldt-Toiyabe's Supervisor's Office, 331-6444.

Burned Area Emergency Response (BAER) Team: Genny Wilson, Humboldt-Toiyabe NF Wildlife Staff, is leading a forty-person team. Their first assignment is to assess risks to human safety, lives, and property. Secondly, they determine how best to protect the watershed and stabilize the soils. The team will design a plan to accomplish such goals as slowing soil erosion and reducing spread of noxious weeds. The Humboldt-Toiyabe National Forest prohibits riding off-highway vehicles on the firelines and in the burned area. The Forest asks the public not to hamper the efforts of the Burn Area Emergency Rehabilitation Team, and refrain from entering the area.

The BAER Team's task is focused on city, state, federal, and tribal lands. On private lands, homeowners can call JoAnne Skelly, Extension Educator at 887-2252 to get rehabilitation evaluations. Or call Carson City Urban Forester, Molly Sinnot, at 884-1883.

New team arrived: Monday evening a new fire team arrived. Greg Marfil's Type 3 Team will work with Martin's Team, and Marfil's Team will take over the fire Thursday morning. About 120 people will remain on the Waterfall Fire after Martin's Team departs.

Fire cause: Sunday evening, fire investigators released some of their findings. The Waterfall Fire started from an illegal campfire along an unmaintained, primitive trail in Kings Canyon west of Carson City. Investigators would like to talk to anyone in the Kings Canyon vicinity up to a week prior to the fire being reported. (The fire was reported in the early hours of July 14). Secret Witness, 775-322-4900, is offering a cash reward.

Acres Burned: 8,723 (increase is due to corrected measurements, not increase in fire activity)

Containment: 100% contained

Resources:
17crews 1 Type 1 helicopters
21 engines 1 Type 2 helicopter
9 water tenders 4 dozers
Total personnel: 709

Cost: $5,600,000

On a personal not and my 2 cents, i beleave this fire was handled extremly well, they thought that they had a good handle on it but all hell broke lose. It all started with a firefighter that broke his leg and had to be walked out, which inturn stopped the air drops in that area, then the wind hit and blew the fire up. As for burnuing out that area it was way to risky for burn out ops, due to the interface. And for resource ordering the fire started in the wee hours of the morning, its hard to get a good size and indication of burning, and basiclly all Federal and State resources were off duty when it started so it was a local agency show. In my eyes i think they did a supurb job, with all the stuctures that were threatened only 15 homes 1 bussniess and 25 outbuildings, i dont want to sound mean but thats a hell of a lot better than the 500+ that could have been lost.

Topic: 7302 Message: 7328

I was listening to a fire last week (can't remember which one) but Air Attack 240 was chating with AA100 ? about the "new program". Kinda sounded like they were doing a hand off but they didn't ank AA100 hung out and watched for awhile before heading back to Ukiah.

Subject: [NorCalFire] Air Attack to get laptops?

Just heard Air Attack 240 up here on 151.295 chatting with some tankers (or copter 205) over a cold fire asking "have you guys heard anything about your new portable computers?" and then it went to static. Some words came in and out afterwards about "hardwired" and "laptops." Gotta love it. Just enough to start the rumor mill. :)

From: Dan James
Topic: 7339 Message: 7339

0800 hrs, Keep your ears open today gang. Days off in the Butte unit (BTU) and the Tehama/Glenn unit (TGU) have been canceled. At approx. 0300 hrs the cover strike team covering BTU (from the coast I believe) was assigned for a planed need to the fire in Lassen/Modoc (LMU) and a Division Chief (2503) also headed to the Straylor fire. As someone reported last eve. it is approx. 20 mi. SW of Fall River Mills. Lots of traffic this morning between Chief officers in both units. No other update on the fire. I already put in my 12 hrs. today so I'm going to get some sleep. Any info would be helpful.

Fri - 18:00
Massive cumulous buildup over the Lassen/Modoc unit the past couple days. I came in too late yesterday and heard many Shasta engines covering Tehama stations and had no clue where everybody went. No smoke column seen while mobile from Redding to Red Bluff. Nobody in Lassen/Modoc on the list to give us local coverage. Maybe Ben can swing the beam around and try to pick out 151.250. I'm scanning all the command nets in the area and nothing there either.

Lassen Forest 172.225 has a *little* fire related traffic, not sure for what though. Advising Chester AAB that "AA240 is over the fire"

Im just new to this group but a member of all the SoCal groups.
Seeing evacuations for a fire near the fish hatchery in Irongate on
the CHP CAD? I know it must be in Siskiyou since the CHP units are
from Yreka, but Curious as to where this is?

Thanks.

Irongate is up out of Hornbrook, northeast of Yreka, as I recall...

Irongate Estates is a new development area just south of the fish hatchery
below Irongate Reservoir. 1 acre homesites.

Closest town of any note is Hornbrook where the Agriculture inspection station
is located. About 7 miles south of the Orgon border and
probably 20 miles north of Yreka on the East side of I-5.

Also a LOT Of rv parks in that area which should be full this time of year.

http://maps.yahoo.com/maps_result?ed=M7tNO.p_0TqT&csz=Hornbrook%2C+CA&country=us&new=1&name=&qty=

The trickly blue thing in the upper R corner is Irongate.....not the greatest map but it will work...

If you are socal, you probably have a Thomas Bros map set; Page 4, lower left corner of B-3.

I believe the dispatch center is ready but the agencies aren't and the Chiefs don't want to change procedures in middle of fire season. Could it be possible that dispatch selected the wrong frequency when dispatching the call?

Actually, it's very relevant to the list, since it's the best way I've found to find/view fires throughout the state. :)

Tonight it does seem to have constipation or something; usually (of course) it behaves pretty well. This fire may not be on it yet; most fires don't get on there unless they're pretty durable.

Excellent for SoCal and urban interface fires; shows roads, MODIS thermal imaging, fire perimeters, hydrology...funstuff!

Keep trying..

From: Dave
Topic: 7380 Message: 7380

NEU just sent out an "Immediate Need" strike team to SKU. NEU has three strike team of engines out of the unit. That doesn't leave them with much left. I guess they will get local government to back fill.

Wow. Tehama and Shasta Units both are sending immediate need strike teams up to Siskiyou Unit. 21:22 Saturday night.

Jake

Regarding the Stream...I hear all the Strike Teams being formed, but
dont seem to be hearing traffic from the fire itself? Too far away?

Sounds like the command channel is scratchy and wouldn't pick up the tac
unless you were almost ontop of the fire area and no air resources so
wouldn't hear that...

This is a pretty scary area for evacuations. The road to Irongate Reservoir is a windy 2lane road and is the only road in and out of the reservoir. It pretty much stops at the reservoir and then turns into dirt roads. So any fire in the canyon between Hornbrook and Irongate will hinder evacs to Hornbrook. Everybody at Irongate will want to evac down that only road into Hornbrook.

A lot of population at the end of a remote road. It'll be a mess.

Not to mention that even at the end of the paved road, there just isn't much space for people to BE. They'll likely kick as many as they can on down to the Yreka Fairgrounds or Armory for shelter.

There ARE dirt roads that go around and across to Copco and points south; I bet they'll be using those as well....and to keep the lookylous from coming IN on them.

Irongate Reservoir and Copco Lake.

About 7 miles south of the Oregon Border on the
East side of I-5. Near the town of Hornbrook.

About 20 miles north of Yreka.

This place is in the middle of it www.r-ranch.org

Gives a map and some pictures of the terrain type.

Unknown acerage as nobody south can hear tacs.

Wondering if they will request Oregon resources ??

Ed; it's NE of Yreka; go N on I-5 about oh, 10, 15 miles to Henley-Hornbrook and go east out Copco Road until you hit Irongate Reservoir. That's the lake, I would assume. My map is older than I'd like, can't find Mtn Road per the CHP website--it's now jumped that road.

Sounds like a fire that is just NO darned fun, especially with strong and changeable winds.

The Straylor Incident in LMU is 3,114 acres and 95% contained with full containment expected on 7/26 at 1800

Last night SKU had 20 new starts from lightning, the largest fire is approximately 2,000 acres near the Oregon Border. CDF Incident Command Team 5 has been assigned with a report time of 1200 hours today. SHU has committed 2 Strike Teams of Engines.

Presently in the unit we have:

4 SHU Engines at Shingletown, Hayfork, Weaverville and Whitmore
1 Strike Team of Engines from LNU covering stations
1 Strike Team of Engines from the Academy, status to be determined later this morning
2 Fire Ready Dozers
1 Dozer from MEU
Station 17 Hard Covered
Station 70 Hard Covered
Station 50 Hard Covered
2 Engines from RDN
1 SHU Crew at Sugar Pine
1 Strike Team of Crews from Alder Camp at Sugar Pine, to be moved to Trinity River this morning

Large orange Sikorsky skycrane flew over Red Bluff to the north at 13:45. This one had the twin rotors that spin in opposite directions so it doesn't need a tail rotor. The sound it created as it flew over was something I've never heard before. No thump-thump-thump. Anybody know the designation? Chester is Helitanker 790 and has the typical single rotor and tail rotor.

7409. Shasta: fire Cottonwood 18:00

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-07-26 01:00:30 UTC
From: Jake H
Topic: 7409 Message: 7409

2-3 acres rapid rate of spread to the north, Locust Rd at Trefoil Ln just north of Cottonwood. Lots of homes on top of a hill there. Ugly structure protection spot.

I love the response of various resources from around the state since Shasta is pretty much emptied to Siskiyou, along with Tehama. Between Straylor and Irongate fires, we don't have much left to share.

Hm...that puts it right into the same area, or close, plus over the Siskiyous area. Been some real scorchers in there over the years; slopes are 2-3:1 and steeper in some places and love to slide, as I recall....

Where's that lightning strike map again?

PA

ps...'trike' teams...for that extra-maneuverability!! :) Little hard on the knees, though...

Guardsmen fighting California fires

7/23/2004 - CHANNEL ISLANDS AIR NATIONAL GUARD STATION, Calif. (AFPN) -- Air National Guard crews from the 146th Airlift Wing here are helping battle wildfires raging on the West Coast.

Crews have been fighting fires in California during July, most recently against the Crown Fire near Santa Clarita. Forty-five ANG people and two specially equipped C-130 Hercules aircraft are involved in the operation.

The C-130s carry a special firefighting system that crews use to release liquid fire retardant. So far this year, 54 missions have been flown against three separate fires dropping nearly 130,000 gallons of fire retardant.

“It’s part of our dual mission -- serving in the defense of our country and serving the people of California,” said Lt. Col. Scott Adams, mission commander. “It’s a dangerous mission; one that requires a great deal of skill, but also one that is very rewarding when the crews know they are helping not only the citizens of California, but in many cases, their very own neighbors.”

In aerial firefighting, the crew flies the C-130 about 150 feet above the terrain, barely faster than stall speed. At the designated drop zone, the crew releases the orange slurry fire retardant which disperses in a fine mist and coats the foliage below. The slurry can cover an area 1,500 feet long by 100 feet wide.

This concept assists ground crews by providing a line of containment preventing the fire from spreading. The retardant breaks down within days and becomes a growth-promoting fertilizer.

The 146th AW is one of four Guard and Air Force Reserve units nationwide that are equipped with the firefighting system. Since its inception in 1974, these units have flown more than 5,000 missions against wildfires.

300 flee Iron Gate fire

Updated: Monday, July 26, 2004 1:19 PM PDT

Fire equipment lined Copco Road Sunday morning as fire fighters and hand crews worked on back fires throughout the day. Photo by Pat Arnold.
IRON GATE DAM - Back-to-back lightning storms struck northern Siskiyou County over the weekend, causing a number of wildland fires in the area, including a major fire near a residential area surrounding Iron Gate Reservoir.

"Most of them were taken care of that night," Kevin Colburn of the California Department of Forestry (CDF) said of Saturday evening's fires. However, when strong winds whipped through a lightning fire in an area west of Iron Gate Lake near the town of Hornbrook, hundreds of residents were forced to evacuate their homes.

According to CDF officials, a lightning strike at Mirror Cove on the west side of Iron Gate Lake started a vegetation fire at about 5:30 p.m. Saturday. When the fire reached about 25 acres in size, firefighters felt the fire was nearly contained, but then strong winds whipped through the area and "the fire took off on us," one fire fighter said.

Manpower and equipment from all over the state was called to help, with strike teams and hand crews coming from as far away as Yuba and Placer counties. By Sunday morning, the fire had grown to an area estimated between 2,500 and 3,000 acres, with 60 percent containment. CDF officials are predicting total containment by 6 p.m. today.

"Our first concentration was saving structures in Iron Gate Estates, which we did, and then perimeter control," said CDF Operations Section Chief Jim Sweet. "Our goal was to keep the fire west of Iron Gate Lake," which CDF crews were also able to do with the help of bulldozers making a perimeter line around the fire.

No structures were damaged, but a few outbuildings were lost in the fire.

"There is still a lot of vegetation that has not burned and if the winds come back up this afternoon, it could create some havoc for us," Sweet said Sunday morning.

Windy conditions and a thunderstorm blew into Siskiyou County again late Sunday afternoon, but no lightning strikes were noted in the Iron Gate area.

Copco Road leading from Hornbrook to Iron Gate Dam was closed to all traffic at the Klamathon Bridge Saturday night. Copco Road remained closed Sunday morning, but the roadblock was moved about five miles closer to Iron Gate Dam at the Fish Hook Restaurant.

As of this morning, traffic is still being stopped at the Fish Hook on Copco Road as fire suppression efforts are still ongoing in the area.

The Siskiyou County Sheriff's Office announced this morning that restrictions are being lifted for Iron Gate residents. All residents may return to their home by showing proof of address. Campers that were evacuated will also be allowed to return for their belongings

with an escort.

Evacuation centers were set up in Yreka and Hornbrook by the American Red Cross to help the estimated 300 to 400 people forced to evacuate their homes. According to Lt. Jim Betts of the Siskiyou County Sheriff's Department, very few people chose to take advantage of those centers and sought shelter either at local motels or elsewhere. Most of the people forced from their homes were either residents of Iron Gate Estates or campers vacationing along the lake for the weekend.

Betts said some campers left their campsites in such a hurry that all of their equipment is still at the lakeside where they left it.

Donald Clark, a resident in the Iron Gate area, watched the fire as it progressed closer and closer to his home. Clark described the intensity of the fire on Saturday night as looking "like there was a volcano on the other side of the ridge." He watched the destruction through a telescope as the fire came less than two miles from his home, but to his amazement, "by morning, the fire was out," Clark said.

Clark posted photos of the fire on his Web site, www.gemsociety.org/fire.htm.

CDF officials say eight new fires were caused by a lightning storm that returned to the area Sunday evening, all limited to 25 acres or less with the largest occurring off of Highway A-12 in the area of Mount Shasta Vista. Fire crews were still working that fire this morning and expect total containment by the end of the day.

Lightning strikes hit a number of other locations throughout the Shasta Valley over the weekend including Hilt, Greenhorn and Humbug Ridge near Yreka, Gregory Mountain near Montague and the Iron Gate area. Firefighters responded to 15 fires Saturday night and eight new fires on Sunday, all as a result of lightning.

This fire is near Sims Mountain. It started this morning and is burning on 80-90% slopes in timber. A type two team has been ordered. I was looking on the NOAA weather site for the satellite views, but I could have mistaken it also. Thats all I know for now!

Lots and lots of drift smoke floated into the north Sac Valley overnight. Woke up to very dark eastern sky and orange sunrise. Stretches to the north above Redding and then everything looks the same so I can't tell if it's Siskiyou related or Six Rivers direction.

It's heading south so no panic.
Jake

California should be 2 states . Cedar Grove isn't the only one.

A bit East of Camino, Ed. Eight Mile is just South of 50.
Pony Express Trail is just North of 50 in the same area.

yeah, I see pony express on the map.....not cedar grove , but I will take your word for it.

btw , sounds like they are getting a handle , cancelled all aircraft except for 2 air tanker and 2 helos.

SCU just dispatched 3 Engines to AEU for coverage

Bens feed 2 has it , but you should get Command 1 with any scanner , i am hearing Mile IC on it (indoor antenna)

The Mile Incident in El Dorado County was caused by a landowner using a weedeater after 10:00 AM in mid-summer. He has been cited. The fire would have been worse, but it burned into areas that had fires in 1985 and 1998, so it ran low on fuel, although it did burn right up to an Amerigas facility. Late yesterday it was 42 acres at 90% containment.

7453. Cave Jct. Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-05 15:06:45 UTC
From: Ron M.
Topic: 7453 Message: 7453

Not a lot of info on the Cave Jct,OR fire in Josephine Co but you can check out the list ;
http://groups.yahoo.com/group/AttackORFire/

Sounds like it's close to containment, thanks to numerous air tanker drops.

7454. fire in TCU

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-06 22:55:36 UTC
From: Ed
Topic: 7454 Message: 7454

Apparently a pretty large fire working in " sheepranch" area in TCU area. (Tuolumne-Calveras) . Now, just heard its 2 large fires in the Coppernieus (SIC) area .

S.Clara (SCU) sending Strike Team 9160C and a dozer and CZU (S.Cruz/S.Mateo) sending Strike team 9170C . NEU (Nevada-Yuba-Placer) sending a dozer S/T

Now hearing it as Copper Fire near highway 4

TCU 151.175
White 3/ 154.295
Air Tac 4 / 151.28 requesting a 2nd air tac freq as well.

listening to Bens' feed , anybody hearing this , sounds pretty big

Thanks Mike , yeah , CDF website showed 4 , but I am hearing 2
also. They also have a fire in Merced County , not as big , and ANOTHER in AEU .
Just heard a Strike Team for immediate need going to AEU , have no idea where
it is.

more on the TCU fire. Sounds like its Armstrong and Sheepranch road near
Copperopolis off Highway 4 by the Steveno Winery. Heard 50 acres BUT they may not
have been that fire since I have no control over the freqs since its an online
scanner (doing the best I can) . I really think the 50 acre fire may be the
one in Merced not the TCU fire.

Topic: 7462 Message: 7467

For Crews there are 4 elements

The Strike Team number, the Strike Team Leader, and the 2 crews

Dozers have 5 elements

The Strike Team number, the Strike Team Leader, 2 dozers (can be mixed of any agency, including private) and the dozer tender. The strike team leader is usually in the dozer tender.

Engines have 7 elements

The Strike team number, the Strike Team Leader, and the five same kind engines.

There is no NWCG standard for water tenders strike teams, nor is there one from FIRE SCOPE, so they are considered a task force. You will see a lot more of task forces as resources become scarce and they form a Task force leader, a crew, a water tender, a dozer and a couple of engines, or any mixture there of.

Grass Valley just toned and said all days off cancelled and all on duty personnel are to remain on duty. Any excess manning in the morning should be relayed to Grass Valley!!
Also, I am confused on strike teams of dozers and crews in CA. I know what a strike team is(5 of a like resource), but is this what they send on a strike team of dozers, crew or water tenders? Thanks!!

Yolo County is assembling an ST as well. Apparently for one of the two fires, if not both fires. Unless there is another fire we don't know about... yet?!

From: Ed
Topic: 7471 Message: 7475

I am hearing Air Tac frequency on Bens' feed # 2 / probably 151.28
has his list doesn't show 169.15

I am guessing , maybe they are using 169.15 for one fire and CDF
Air Tactics 4 (151.28) for the other)

going to be long hot/ dry day up there , bay area temps in the mid
80s and 90s , Can assume same or warmer up there in the Gold Country.

Ed

7476. Copper and Armstrong Fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-07 18:10:36 UTC
From: Ed
Topic: 7476 Message: 7476

Ok , little confusion on which fires are which. here is the information from CDF webpage @ 0900 hours

Armstrong Fire / Sheep ranch area

1000 acres / 10% contained / evacuated 210 people to Avery Middle School.

150 residences and 40 outbuildings threatened.

Fire Fighters = 532 Crews= 12 Engines = 57
Air Tankers = 5 Helicopters= 8 (1 CDF) 8 Dozers
2 Watertenders 3 Dozers

staging at Calaveras Fairgrounds on Highway 49 (frog jumping contest location)

//

- COPPER FIRE

2,500 acres 10% contained
40 structures and 12 outbuildings threatened

Fire fighters= 256 Crews= 5 Engines= 40

Air Tankers= 2 Helicopters = 2 Dozers = 3

there are several fires in the county , CDF is refering to them as the Calaveras Complex.

Fire is in the Iowa Hills area below Colfax in the American River Canyon. This is some pretty remote area with steep canyons and heavy fuels. Local Government strike team XPL 4126C was dispatched and they also took XPL 4125A which was in the Sacramento/Roseville area returning from Calvaras County.

Haven't heard any acreage yet.

Hayward Hills, 96f and 20 percent humidity.

Heavy fuel, many structures involved due to shake roofs

Requesting air resources, type 3 and type 1 immediate need strike teams

live feed on www.mattlogic.com
Feed 5 I believe for Alameda County

Well, I too was monitoring the Trinity Fire near Anza. Great listening, it was.

The sketchy news I have for the Hayward area is this (unverified):

Major brush fire, vicinity Kincaid Rd & Mt Hamilton Rd (also given as 15520 Kincaid Rd), east side of Mount Hamilton.

Wind-driven, upslope fire, rapid rate of spread. Over 100 acres.

Fire has crowned into eucalyptus trees, many homes involved, more threatened.

Can someone post the ICS name for this fire? Additional frequencies?

151.445
151.160
460.600

Caveat: Unverified details. Updates, please.

Ok,,,,,,,,,, the best way to get updates on these TWO fires is join either BAYSCAN or NORCALONLINESCANNING

the Mt. Hamilton fire is due east of San Jose , past the observatory its over 100 acres with mostly CDF units and 3 Engs. 2 brush rigs. 1 watertender and 2 BCs from San Jose its KINCAID IC ......
Freqs 151.445/ 151.265/151.295/ 151.16

The Hayward fire is at Machado and D street , fire in Eucalyptus trees with several houses involved. Mutual Aid from all over Alameda County and a Strike Team from San Mateo County /
freqs.....460.600 Hayward IC / White 1 for mutual aid responding units 154.28 / TAC is White 2 - 154.265 Alameda County units using Talkgroup 17744 . Red tac also now at 154.070

hope this helps

well,,,,,,,, IMHO Bayscan is for the stuff in the 9 bay area counties and Norcal is everything north of them. Of course , some consider Solano and Napa County as North too. kind of a Vanilla / Chocolate question . No one is really right or wrong. But for the bay area stuff, you are better off getting on bayscan.

just to give you an idea of how some people " think" I once read in a motorcycle mag that everything south of the Golden Gate Bridge is in " Southern California !!!! " EXCUSE ME !! LOL

7492. Stevens fire Colfax

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-09 01:02:58 UTC
From: Steve Jackson
Topic: 7492 Message: 7492

I can see the head on this fire. It was reported by a hicker as a little bit of smoke and then grew from there. First units on the scene said only a couple of acres but going uphill and that they would not be able to catch due to conditions of access. This fire is up on I-80 near Colfax and it looks like it will be a while before they control it. Anyone else have anything on it?

7494. RE: [NorCalFire] Hayward Fire?

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-09 00:15:11 UTC
From: Brad Paulus
Topic: 7483 Message: 7494

Incorrect.

Two incidents. Trinity on eastern side of Mt. Hamilton, east of San Jose.
Machado IC eastern side of Hayward.

Trininity 100+ acres.
Machado 10+ acres, structures possibly involved due to shake roofs near
ecalyptus trees in 5-Canyon subdivision.

Regards, Brad

Well, I too was monitoring the Trinity Fire near Anza. Great
listening, it was.

The sketchy news I have for the Hayward area is this (unverified):

Major brush fire, vicinity Kincaid Rd & Mt Hamilton Rd (also given as
15520 Kincaid Rd), east side of Mount Hamilton.

Wind-driven, upslope fire, rapid rate of spread. Over 100 acres.

Fire has crowned into eucalyptus trees, many homes involved, more
threatened.

Can someone post the ICS name for this fire? Additional frequencies?

151.445
151.160
460.600

Caveat: Unverified details. Updates, please.

Back in November I quit bayscan -- the only list I ever quit on
principle. It's not that I don't want to see the posts; it's that I
will not in any way support what was going on there. Period.

Will consider norcalonlinescanning (the name could be abbreviated,
however). ;-)

Thanks for the update and corrections.

7501. NorCalFire vs. other lists

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-09 05:06:35 UTC
From: Jake H
Topic: 7492 Message: 7501

Quick note on what this list is for. I started NorCalFire as an offshoot 3-4 years ago from ScanNorCal since a lot of people didn't like the fire play-by-play on that list. NorCalFire probably took 200+ people in the first few days from the migration over and since then we've been having lots of fun over here. ScanNorCal is an excellent list, but geared more for how-to-scan Northern California. Freq requests etc.

This list is all about play by play for fires. Post away! Granted, we don't want to hear play by play on a 2 acre fire surrounded by water and roads.

And my biased opinion separates NorCal from the bayarea, but maybe that's because I've been on Bayscan too long and enjoy that 200mile padding. :) The majority say NorCal is north of Bakersfield so north of Bakersfield it is.

Thanks to all for a wonderful list.

Jake

I agree for the most part with Jake , but if you ask 100 people where Northern and Southern California split , I bet you get at least 25 different answers. As far as separating NorCalFire and Bayscan I certainly agree although there is no reason you can't post a fire in , say , Solano county on either. But for the three fires today, it seems common sense that bayscan is better suited for the Mt.Hamilton and Hayward Fire and the Fire up off I - 80 by Colfax is cleared better served by NorcalFire.

I just perfer those who Ask on the "other " list consider joining both (or more) as to not be left out. I don't want to leave out Norcalonlinescanning , it seems to cover both areas and Ben is the one responsible for all the good monitoring your scanner can't get because you are too far away from a large incident.

today, the Mt.Hamilton and Hayward fires came up on this list while bayscan and norcalonlinescanning were already buzzing with infor. I think its a good example.

I believe I have seen what they are talking about at the Roseville rail yard. Three seperate tank cars each holding 21k of water. They have installed deck guns at each end. They are pale blue (ugly) in color. I would bet these are used for other purposes and not just for fire. I will try and uplaod a pic. later.

pics would be cool and more information

7515. Info on "Fire Train"

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-10 03:27:16 UTC
From: Carl First
Topic: 7515 Message: 7515

This information is from a friend of mine who has seen the fire train in operation.

The tank cars are just part of a train that is used to grind the rails (re-shape them). In operation the car doing the grinding throughs lots of sparks and the "fire train" follows spraying water (lots) to keep fires from starting.

So it is used for fire fighting along the road bed

carl

Add White 2, 154.265 as another Tac.
Limited ground resources. Fascinating traffic on Command 1 as chief officers diiscuss whether to utilize strike teams and contractors tonight or put them in camp and use tomorrow. Dozer show tonight.
Air order for tomorrow, 0800:
1 AA
2 Tankers (AA specified S2Ts)
1 Type 1 copter
2 Type 2
1 Type 3
Housing subdivision OK so far.
Baseline is helibase 163.100

7522. Shasta: Major veg fire, Bear Mtn Rd

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-11 21:07:17 UTC
From: Jake H
Topic: 7522 Message: 7522

14:00
Northeast of Redding, Bear Mtn Road at Dry Creek Road. Major vegetation, countless structures threatened. Very large head on the smoke seen from Cottonwood 20 miles south. This is right below Shasta Bear Lookout, unknown about her status.

151.160 SHU Local net
151.445 Bear IC I think
151.295 Bear Airattack
151.355 Bear Command (tone 2)

SHU local net, command, and possible Air Attack can be heard on live scanner at http://www.norcalscan.org/live.html

If Mike gets online, he would be able to hear the tactical and stream it over Matt's server.

Shasta pretty muched emptied their valley's fire stations and everything on the eastside. Talk of it starting by a logging operating but that may be a seperate incident. It sounds like a couple differerent fire incidents working on local net.
Jake

7523. Butte working some fires?

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-11 21:26:12 UTC
From: Jake H
Topic: 7523 Message: 7523

14:25 Sounds like Butte is working multiple incidents. One on skyway that they're releasing some engines on. Air Attack 230 is confused where to go. Air Attack 120 is responding to a fire there. I'm stuck at work in Cottonwood and just getting bits and peices of Butte info as I go through my Shasta freqs.

151.400 BTU Local

Bear Air Attack 151.295
Command 1 151.355

[Non-text portions of this message have been removed]

7525. Shasta: Bear IC update 14:35

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-11 21:35:37 UTC
From: Jake H
Topic: 7525 Message: 7525

Definitely was a second fire that had some air attack and copter work on it. "Thatcher IC" or something like that. Ground crews have a line around it and air resources are moving to the Bear incident.

Bear IC is growing - very large amount of smoke, definitely the first major incident for this area this season. Anything going available is sent to the Bear fire. Multiple medical enroute for heatstroke victim and a cardiac victim. They are at Hidden Valley Market. Evacuations around that area, not sure of those locations. Ravine Rd was one of them. Can't find that on my map.

CHP working
http://cad.chp.ca.gov/ii.asp?Center=RDCC&LogNumber=0167D
0811

Bear IC ground is Tact 12, 151.460 - not tact 11 as I thought earlier.

Bear Air might be on 151.220 due to that second fire but 151.295 might be released for the Bear.

I'm real busy at work so this is probably last update until later this afternoon.
Jake

Currently 50 acres, and "making a hell of a run on the east side to the lake shore" per air attack.

Column has changed to black smoke - would indicate structures burning. 7 type twos responding to Dry Creek Boat Storage.

From: Jake H
Topic: 7531 Message: 7542

If you want the actual incident traffic, do Mike's scanner which is local. If you want general overhead/admin traffic, along with other norcalfire dispatch traffic (i.e. not *quite* as intense), you can do my online scanner at www.norcalscan.org/live.html which is 38 miles from the incident, and scanning local and command nets. You will probably be hearing a 36-IC on my live scanner, a 100+ acre fire working northeast of Red Bluff, Hwy 36 at Sheep Gulch. No structures threatened, just pure wildland fun up there.

Drew, still working in Cottonwood, then down to Red Bluff till 6pm. No page out for ARES, CDF-VIP, or OES-ACS as far as I know. You know the freqs to listen to for those :)

Jake 16:30

7543. Tehama: Veg, Hwy 36E Sheep Gulch

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-11 23:36:01 UTC
From: Jake H
Topic: 7543 Message: 7543

Brother called me on this one, he drove up 36 and checked it out.
Hwy 36E at Sheep Gulch (the pipeline). Good size 100+ acres
started on the north side and now burning on the south side of
36 going towards Tuscan Buttes. Couple of dozers working on it
and a copter and tanker working. Shouldn't be any structures
threatened but the terrain is very rocky. Mobile attack is very slow
in this area due to large lava rock boulders. It's a dozer, crew,
and airshow. It's on the east side of the pipeline so no luck with
that stopping the fire.

151.370 TGU Local
151.175 should be tactical, should be 36 IC.
unknown air tactical due to Bear IC up north.

This should be within tactical range of my online scanner.

Jake 16:35

Forgot to mention, this should be getting into the Nature Conservancy land area. They have a huge fire plan that designates how fire is fought in this area. They should be doing dozer lines on pre-determined areas and just letting the fire burn to those lines. i don't think they do direct ground attack in this area. I'll readup a little on the plan.

Jake

7550. BUTTE: Oregon Incident, Cherokee area (E. Oroville)

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-11 23:53:34 UTC
From: Pamela Alley
Topic: 7550 Message: 7550

Been a heckuva day.

Not quite sure what the current stats are but additional task forces staging at 70 and Cherokee Road.

When I left earlier, they were still getting moving on a 5-15 acre fast spread fire in the Potter Ravine/Oregon Gulch area and staging there. If they are evac'ing and staging at 70/Cherokee, that sucker is moving right along.

They had two tankers working earlier and were throwing everything but the plumber at it (the kitchen sink went early).

Just heard a spot call from Bald Mountain for the Jarbo Gap area, top smoke only, can't see the base, S side of 70. Bloomer is confirming now....under powerlines that run across Cherokee maybe. NOT the current incident, but will group with it.

Oh, what a fun day we are having....

Anyone catch acreage, updates?

I know there was a headon on 70 south of Palermo Honcut Road as well...they just updated with committment time, waiting on mortuary services. :(

Been a busy day!!

PA

Per CHP CAD there is some mandatory evacuations going on near Condor Ln? They also confirm 400-600 acres right now..earlier all air resources were on the Bear fire. Not sure if that is still the case..?

The Redding R-S feed is working fine... since it opens in RealPlayer I'm able to listen to both at once. In fact.. listening to Jake's as well, his on yahooplayer... no trouble at all with 3 simul feeds. Plus LAPD on TeamSpeak (on cable). Cox has just upped their speed for cable, they say, BTW, to 4Mbps as of yesterday... had been 3Mbps. 5 Mbps available for an extra couple bucks a month.

From: Pamela Alley
Topic: 7562 Message: 7562

Go to the GeoMAC site for CA (http://wildfire.cr.usgs.gov/ca_geomac/viewer.htm) , and zoom in on the Oroville Lake area (Stevens is on I-80, so go N a bit..it's the notchi n the eastern foothills north of the Buttes--ya know, the pimple in the middle, LOL).

Zoom until the intersection of Hwy 70 and 149 is at the left center of your screen, then adjust til you can read the roads.

The spot fire was up off of TippyTop road; the main fire began at Oregon Gulch and Potters Ravine.

If you find and follow Cherokee Road, you'll have a pretty good idea of where and how big this fire is.

Winds aloft appear to be changing to the evening north wind. The top of the column has changed direction, now heading towards me changing potential for spotting to Backbone Ridge.

Crews are attempting to fire out around some residences and complete a dozer line back to Dry Creek Rd.

New picture of column added to web page:

From Sacramento 1833hrs
Our Channel 10 (ABC) has Air-10 on scene at the Bear Incident. Looks bad. Channel 3 (NBC) has Chopper-3 on scene in Oroville. Looks worse. Looking at both fires within 15min of each other, looks like Oroville is priority due to the wind and fuel. Bear is burning homes but not at the velocity that the Oroville Incident is doing. When I left HQ an hour ago our F&R folks were still working resource ordering....probably all night.

KGO 7 / San Francisco- showed a couple structures burning at the Bear incident , probably a feed from Reddings 7 . But at least they covered it. Kinda getting tired of the Scott Peterson trial , EVERY channel :-(

hopefully they (or another station) will have some of the Oregon Incident later.

From Sacramento 1833hrs
Our Channel 10 (ABC) has Air-10 on scene at the Bear Incident. Looks bad. Channel 3 (NBC) has Chopper-3 on scene in Oroville. Looks worse. Looking at both fires within 15min of each other, looks like Oroville is priority due to the wind and fuel. Bear is burning homes but not at the velocity that the Oroville Incident is doing. When I left HQ an hour ago our F&R folks were still working resource ordering....probably all night.

I presume you are doing this just for the night, I would hope you would keep the air-ops freqs on during the day.
Do you receive any of the Oroville (I believe it is being called the Oregon IC) fire incident freqs?
Don't know if that would be too confusing or not, since they are so close to each other.

From: Jake H
Topic: 7594 Message: 7594

We just grew 14 members today! You've come to the right place for the latest local updates for the Bear Fire in Shasta County and hopefully the Oregon Fire in Butte County.

For all the archived messages of today, you can check out NorCalFire online at http://groups.yahoo.com/group/norcalfire/messages

Quick recap of what's where...

You can listen with a 56K modem or better the live scanner feed for the Bear Fire at http://68.189.63.174:8080/ try loading that link in Windows Media Player or iTunes.

You can listen with a 56k modem or better the live scanner feed for command traffic of both the Bear Fire and the Oregon Fire (Butte County) at www.norcalscan.org/live.html
That scanner also has area CDF dispatches, command nets, travel net (for all the strike teams coming in), and if something starts burning locally around Red Bluff, local tacticals for that.

Redding Record Searchlight has online RealAudio scanners that are covering Bear Fire law enforcement as well as fire at http://www.redding.com/redd/scanners/

Caltrans Lake Blvd Camera (click previous pics to see growing column)
http://www.dot.ca.gov/dist2/cctv/lake.shtml

Local resident smoke column pics
http://www.montgomerycreek.us/bear_fire.htm
http://www.ssmyers.net/butte_fire2.jpg

Local fire frequencies
Shasta - http://www.norcalscan.org/shasta/
Butte - http://www.norcalscan.org/butte/
Fire Radio - http://fire.norcalscan.org/

7595. Shasta: Bear IC 22:41 "extreme behavior"

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 05:42:53 UTC
From: Jake H
Topic: 7595 Message: 7595

Fire spotter on backbone ridge observing the fire has extreme behavior, spotting, and dropping down into the dry creek drainage off of Elk Trail East. Those winds have definitely shifted to blow to the south now, a whole new game with this fire.

Command traffic on 151.355 on www.norcalfire.org/live.html Also can hear travel net on that link - fun listening to the strike teams see the first glow of the fire heading north on I5. Flames can be seen from Red Bluff.

They are not happy on the radio.
Jake 22:41

7596. Oregon IC update (kinda sorry)

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 05:49:03 UTC
From: Pamela Alley
Topic: 7596 Message: 7596

I bet not!!

Could see some flames from downtown Oroville on Oregon IC about 9pm....impressive and not at all fun.

The winds on Oregon IC have not changed to the 'jarbos' that come down the canyons---yet. Weather forecast says gentle to medium breeze (3-10mph) downcanyon as temps change.

Tree fell on a non-fire vehicle on Cherokee Road; driver uninjured and brute arborism is being practiced.

PA
22:40

7597. Re: [NorCalFire] Shasta: Bear IC 01:23

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 08:26:20 UTC
From: Ed Nowlin
Topic: 7597 Message: 7597

Montioring this fire, Operations just put in and had dispatched a request for 20 additional structure protection engines for Elk Trail East, where at approximately 00:00, they reported Mandatory Evacuations in progress. When this team leader called into Operations, his comment was akin to that he was wanting everything he could get as the fire was beginning to make a run south and he did not want this turning into another Jones Incident.

7598. Re: [NorCalFire] Shasta: Bear IC 04:00

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 11:03:46 UTC
From: Ed Nowlin
Topic: 7598 Message: 7598

Bear IC Operations requesting resources, fire has blown past Elk Trail East on 2 fronts heading south. Evacuations being ordered for areas East of Dry Creek, West of Blue Sky and North of Highway 299 East.

Also, City of Redding Fire had about 3 fires in the Lake Blvd/Masonic Road area, Lost Lane Canyon area (Below Masonic) and the Boulder Creek Area near the Twin View Mobile Home Park since 03:00, about 20 minutes apart. Firebugs are definately having a bunker night.

RFD Dispatch: 154.325
RFD Tac 1: 154.205

7599. Re: [NorCalFire] Shasta: Bear IC 0700

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 14:07:45 UTC
From: Jake H
Topic: 7598 Message: 7599

As of 0700 report, Bear IC is at 3,000 acres and 40% contained. 350 residences threatened with some destroyed also. Mandatory evacuations still in progress. It looks like the same game plan as yesterday, direct attack and structure protection all day long. Critical need resources are dozers, type 2, and type 3 engines.

Coworker lives next to Intermountain Rd. So far it's to the north and now to the east. Looks like it's going around him hopefully. A neighbor's dozer saved his house during the Jones Fire. He was putting flames out at his foundation.

Thank goodness we don't have the wind event like the Jones Fire had.
Jake 0706

7600. Re: [NorCalFire] Butte: Oregon IC 0700

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 14:13:12 UTC
From: Jake H
Topic: 7598 Message: 7600

Oregon looks much more optimistic. 700 acres with 45% containment.
Minimal structures threatened but residences still evacuated. They
expect little fire growth and containment today. That's promising!
Off to another full day of work.

Thanks PA for your great updates!
Jake

7603. Shasta: Bear IC update 1pm

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 20:23:30 UTC
From: Jake H
Topic: 7603 Message: 7603

I've updated http://www.norcalscan.org with the latest info, as well as links to other good sources of info.

Sounds like the tankers have been grounded all day due to the smoke and inversion layer. I'm 20 miles to the south and it's half-mile visability here, and for most of the north valley.

Just a bit ago heard Air Ops and Operations talking about getting 2 heavy tankers to bombard some stubburn flames between Blue Sky and Aloha. The smoke has cleared just enough in this area for the "heavies to get in there and do some damage" as heard on command net :)

Also, www.redding.com (Record Searchlight) has posted over 60 homes destroyed. Obviously nothing is confirmed more than 40 but various news sources are reporting varying statistics of injuries, structure loss, and acreage. Be careful where you get your news from. While CDF usually has only 2 updates a day, 0700 and 1700, they are usually the most accurate on all accounts.
Jake

7604. Understanding Fire Radio

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 20:39:26 UTC
From: Jake H
Topic: 7604 Message: 7604

For those of you new to fire radio, or not understanding all the crazy terms of "Air Ops, Division Yankee, Structure Group, Strike team" etc, then check out http://fire.norcalscan.org/monitor/ and study the resources there, especially Incident Command System.

The Incident Command System is what everybody uses on the fire as an organizational structure to everything related to putting that fire out. A lot of the terms/names you hear on the radio come from the ICS. You will be interested in the Command Function and the Operations Function as a scanner listener.

Understanding how air attack works and how tankers and copters play a role in firefighting can be found at http://www.norcalscan.org/fire/air/

If you have any questions about what you're hearing on the live scanners, feel free to ask!

Jake

7608. Shasta: Bear IC update 16:30

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-12 23:36:05 UTC
From: Jake H
Topic: 7608 Message: 7608

Wow, from a half-mile visibility all day to within 30 minutes having all the smoke cleared from the northern valley floor, the winds have definitely changed directions, especially upper level winds aloft.

The column can be seen again from all the way to Red Bluff south. Only this time the entire top of the column has exploded into cumulous clouds, from dark brown to pure white. I've watched it in the past 10 minutes just explode into huge cumulous.

Talking with coworker who lives half a mile from mandatory evacuations said winds are light, but erratic directions. It hasn't made it's mind where it wants to go. It's been light
under 7mph for the life of the fire, but forecasts say 10+ mph tomorrow. That will be ugly. We're still at 100-104 degrees. The fire is still charging to the east and south along backbone ridge. Also have a direct cellphone report from Hwy 299E east of Dry Creek and he says flames are about 1000yards from 299E, topping the last ridge before the valley that 299E goes through. He also says about 25 engines were parked along 299E at that location and huge swarms of engines were moving around near Bella Vista and Dry Crk Roads. I should have pictures of this location soon online.

The smoke inversion layer has really cleared up and air attack is in full force with Redding
and Chico pounding away.

I guess the fire has picked upsome according to the scanner. I have heard some interesting chatter. on 151.355 and 151.220

in the last half hour 2 medic calls and a tanker/copter request.

fighting near backbone ridge they have large amount of fire/heat going over some firefighters. call for a medic for heat exhaustion and medics now trying to make there way up to another firefighter heat call at 16:34.

also with this same group they requested copters immediately to help with this large flairup they got caught in.

> Julie Quick, USDA, 202-720-4623
>
>
> FEDERAL FIREFIGHTING AGENCIES WILL RETURN TWO ADDITIONAL LARGE AIRTANKERS TO SERVICE
>
> Will Monitor Plane Stress in Fire Environment
>
> WASHINGTON, Aug. 12, 2004 - The Departments of the Interior and Agriculture today announced they will return two P-2V aircraft to firefighting service on a limited basis. Both aircraft would be outfitted with structural health monitoring devices to gather information on the stresses that occur to airtankers in the fire environment, which will help determine vital safety information for the remaining P-2V fleet.
>
> "This is another step in developing a clearer picture of the airworthiness of these aging aircraft," said Rebecca Watson, Assistant Secretary for Land and Minerals Management at the Department of the Interior. "We are going to ensure the safety of these aircraft while redoubling our ongoing efforts to protect communities from wildfire."
>
> "Safety is a top priority and a core value of our firefighting program," said Mark Rey, Under Secretary for Natural Resources and Environment at the Department of Agriculture. "With our current fleet of aircraft, including single engine tankers, helicopters and other resources, fire managers continue our success rate of stopping over 99 percent of fires upon initial attack."
>
> The current fleet consists of 800 firefighting aircraft, including a mix of both large and small airplanes as well as helicopters. In June, USDA and DOI contracted with private companies for more than 100 aircraft to ensure

firefighting effectiveness this season.
>
> Minden Air Corporation of Minden, Nev. owns one of the P-2V and Neptune Aviation of Missoula, Mont., owns the other aircraft. Minden's airtanker is already outfitted with the monitoring device; Neptune's would need to be installed. The aircraft would only be used in unpopulated areas and be subject to more frequent inspections. This technique is similar to the Federal Aviation Authority's experimental use certification, which is used by FAA to reconcile uncertainties in airplanes.
>
> The two airtankers join seven P-3 Orion aircraft that were returned to service following a thorough safety analysis. The remaining 10 aircraft in the P-2V fleet will not be returned to service at this time because unlike the P-3 aircraft, the operational service life, which is expressed in how many hours an aircraft can be safely flown according to the original equipment manufacturer, has not yet been established. However, USDA recently contracted with Lockheed-Martin, the original manufacturer of the P-2Vs, to obtain historical data on the aircraft to help make that determination. That process will likely cost approximately $500,000 (to be paid by the federal government) and will take three to four months to complete.
>
> -more-
> -2-
>
> On June 9, USDA contracted with DynCorp Technical Services, a Texas-based aviation engineering firm, to provide the expertise in analyzing the airworthiness documentation provided by contractors for the large airtankers. USDA and DOI relied upon DynCorp's analysis of that documentation to make the decision to return the two P-2Vs with monitoring devices to service.
>
> Sandia National Laboratories Aging Aircraft Program will collect and transmit the data from the monitoring devices to Lockheed-Martin engineers who will use the data in helping to determine an operational service life. Data from a DC-7 owned by TBM Butler Aviation and used by the State of Oregon in firefighting operations will also be collected from its monitoring device and studied.
>
> The P-2V operated as a land-based patrol bomber in the 1940s by the U.S. Navy and was the predecessor to the P3. The P-2V is known for its versatility and long flight range of up to 2,000 miles. It began to be used as an airtanker by private companies in the 1970s. Because the P-2Vs were decommissioned for military service before the U.S. Navy developed structural analysis and fatigue life limit programs, a service life limit was never established.
>
> USDA and DOI in May terminated the contracts for 33 large airtankers to be used in firefighting missions due to concerns over the airworthiness of the aircraft, and firefighter and public safety. The decision was based on

safety recommendations from the National Transportation Safety Board (NTSB) issued in April after its investigation into three fatal airtanker crashes related to in-flight structural failures.

From: Mike
Topic: 7614 Message: 7614

Hey everyone sorry I haven;t been on all day with updates, I was called out to the fire for evacuations, road closures, etc. Fire was moving East, Southeast toward Holiday Rd and Woodson ct. Air crews are still on the fire trying to cool things down. Sounds like 50% contained now, but most is because of natural barriers. Sound sliek the wind is now helping the fire get bushed to where it has already burned.

Live feed still going at www.mattlogic.com/scanner5.html

Here is a semi updated freq list:

151.355 CDF Command 1 (Bear Command)
151.295 Air Tactics 5 (Bear Air Attack)
128.250 Helicopter Coordination (Bear Heli-Base)
151.220 Air To Ground (Seems to be very active with traffic between IC and air attack)
151.445 \
151.385 - Ground Tac Channels Not sure on divisions.
151.460 /

154.920 Law Enforcement Operations (Rescue Teams, Security Teams, SCSO, RPD, etc)

Mike

Rescue teams are now evacuating the Holiday Rd area. The road is a one lane road that if clogged with people leaving will leave no room for engines. They expect evacuations to take an hour or so, however they expect the fire to be in the area within the hour. Lets see what happens!

7617. Re: [NorCalFire] Re: Update BUTTE: Oregon Incident, Cherokee area (E. Oroville)

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-13 04:37:44 UTC
From: Nick Caldwell
Topic: 7551 Message: 7617

This fire isn't huge but it is in some terrain that is quite impossible to work with. I was doing fire evacuations all last night and today so I was unable to post, but I took a few pictures along the way. The worry last night was the fire would spot over the water and start burning up Bloomer Hill. There are some pictures of the fire burning up to the waters edge I took while doing notifications on Bloomer Hill. The next day the wind shifted and we got paged out at something around 5 am to do evac notifications (not mandatory) on the west side of the water where the structure groups were feeling like they were not going to be able to hold on. I was in the ICP all today helping with the operations side of the evacs so all my pictures from today are just in the ICP, no active fire. The most excitement was when a helicopter came in to pick up lunches and water to take to crews out on the line, we loaded it up and it went off to make the delivery...

http://pages.sbcglobal.net/scanchico/OregonFire/

Honestly, I don't really know the progress of the fire, I have been quite unable to monitor it because of how busy it has been with our jobs, but from what I overheard from Operations in the ICP they were protecting the structures pretty well considering the terrain and surroundings. There is also a large PG&E transmission line right through the fire that they were able to save. Power was shut off to the local area for safety which also made it hard on all the remaining citizens to get updates on when they should leave. They were going to burn out some areas today and the PIO estimated the fire would be over 1000 acres once those were done. This morning they requested 4 type-1 helicopters. I wish I would have seen them at work, but they were all on the other end of the fire, and I never even got a glimpse. Should be on the news tonight, a Sacramento live crew showed up at the ICP right about the time I was leaving, and NCN (Nor. Cal News) was there constantly. At least it is cooling off a little bit, running around in 100 degree weather is not fun when there isn't even a fire involved. Also, sitting at the ICP it was amazing to watch all the different types of engines going from staging to the fire and back... there is stuff here from all over the state, quite a turn out. OES Fire is all over it too, I heard several OES strike teams entering the unit as well as some OES water tenders and so forth. Hopefully we don't have to do any more evacs and I can actually listen to some of the fire traffic. The latest radio lineup that I can remember is:

BTU Dispatch - 151.400
Butte Support - Command net - 154.415
Air Tac 5 - air to air - 151.250

CDF Air to Ground - A/G - 151.220
CDF Tac 9 - tac net - 151.385
Oroville Fire Tac - tac net - 153.815
White 2 - tac net - 154.265
White 3 - tac net - 154.295

They were already setting up plans and requesting resources for tomorrow, as well as setting up a huge briefing area at the local Junior College for tomorrow morning, so it seems they think it will continue to burn well for at least another full night and day.

7618. Shasta: Bear IC - Friday 0700 report

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-13 16:14:48 UTC
From: Jake H
Topic: 7618 Message: 7618

Right now they're just over 8000 acres with 60% containment, expected to be fully contained Sunday evening. Anticipated winds never showed up last night so the fire layed down pretty good. Around 7:30 last night they did precautionary mandatory evacuations of Holiday Rd and Woodman Ln neighborhoods. The fire was only 3/4mile away burning away from them but if the winds shifted as anticipated, it would be right into that neighborhood. They decided to evac because it would take the sheriff more than an hour to get them all out, and in the meantime, engines are trying to get up the same roads to protect the houses.

They had countless engines sitting at those houses prepping them for clearance all night long.

They anticipate the fire to reach 16000 acres but a lot of that size will be firing operations along backbone ridge. They've created a lot of indirect line ahead of the fire and will be firing inside the line to strengthen the line.

Air Attack was working spots on the opposite side of the lake from this fire around 1800 last night. 20x20 spots etc. but pounded on relentlessly by copters. They were looking at how to get a crew in there to mop it up.

Copter 506 went back to RDD with mechanical problems around 1900 last night, I watched him flying back with an air attack or lead plane following very close behind until he was safe on the ground.

I drove up hwy299E just past woodman lane where a large information/observation area was setup just off the road. Lots of locals watching, plus news media and fire PIO. It is definitely along backbone ridge, and the aloha, blue sky roads area. Property owners along 299E were using dozers to scrape fireline along the fences. Every 2000ft along 299E you could see a huge plume of dust as a dozer was spinning brodies and scraping a path.

Around 1930 Night Ops took a helicopter tour of the fire and gave an update from the air to all the division leaders of what's happening in their particular division etc.

This morning coming up to work I couldn't see any defined plume, just a lot of haze in the valley. They are preparing Dry Creek rd evacuees to be able to return to their residences later this afternoon. Day shift today will evaluate that and probably

make it happen.

While there's plenty more to burn, it sounds like they are a lot more optimistic.
Jake

7619. Butte: Oregon fire contained

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-13 16:25:47 UTC
From: Jake H
Topic: 7619 Message: 7619

5am this morning contained at 2030acres. 2 residences and 15 other buildings were destroyed. Excellent structure protection it sounds like according to Nick. With the potential to lose many more, they did an outstanding job.They were competing for resources with the Bear fire up north, both started within hours of each other. I was heading north and I passed dozer strike teams from Siskiyou who passed within 5 miles of the Bear fire enroute to the Oregon fire earlier this week.

From: Nick Caldwell
Topic: 7619 Message: 7620

From the looks of the terrain and the access they had in the area I think it was excellent structure protection.

This afternoon North Ops moved the command channel from Butte Support to CDF Command 2 for this fire. They are still working on the fire, at noon they did another round of burn outs. There was also a cabin down by the water threatened and the IC worked very hard to get some more dozers to cut a road down to it and get engines surrounding it. Until the ground crews got there they had a few Type-1 helitankers dropping water right on the cabin. Thankfully it sounded like they were successful in their efforts. It is also starting to cool down and resources are being released back to their homes, which is good for everyone.

Command CDF 1 and CDF 2 are both on norcalscan live
scanner at http://www.norcalscan.org/live.html

Pretty good plume from cottonwood. Shasta/Trinity is now
supporting two major incidents for the state. Expect a good
Incident Camp at Anderson Fairgrounds to support these two.

Well, it is very dry, very hot, and the first day this entire week that the wind has picked up
significantly - 10-15mph out of the south. If it's a bug, they picked the right day. Which means the French Fire is moving into timber. Unknown what's in the path of that, but it seriously has a larger column than what the Bear Fire ever had. We practically have half the
state up here at the Anderson Fairgrounds. Everybody coming off of Oregon should be able to come up here, plus those coming off of Bear.

All that's burning on the Bear fire is up near an arm of Shasta Lake called Dark Canyon. They are ferrying in crews on the lake to get there. Looks like everything else is surrounded by line, and burning inside the lines.
80% contained at 7am this morning.

Jake

7660. Shasta: Fire Updates 18:07

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 01:13:36 UTC
From: Mike
Topic: 7660 Message: 7660

Hey All, just got home from taking some pictures of the fires. So far the Lake Incident is 100+ acres with homes threatened. The Cascade Incident is 10+ acres with homes threatened. Live feed of French incident @ www.mattlogic.com/scanner5.html

Freq run down:

Lake Incident:
151.160 SHU Local (Command)
154.010 County F2 (Lake IC)
151.280 Air Tactics 4 (Lake Air Attack)

French Incident:
151.265 Command 2 (French Command)
169.150 French Airtactics
170.000 French AIr To Ground
118.950 French Air Attack

Cascade Incident:
151.160 SHU Local (Command)
153.950 County F3 (Cascade IC Ground Tac)

Date: 2004-08-15 01:21:00 UTC
From: caladded@aol.com
Topic: 7661 Message: 7661

Can someone - Jake or Mike or ?? confirm the number of fires in Shasta and Trinity County at this time. ? do you have names ?

1) Bear Fire is at least 10K - don't need more on this one , thanks.

2) is the fire on Trinity rd north of 299 called " trinity fire " or something else and any idea of A) acreage B) structures burning ?

how many others ,,,,,,,,,,with all the posts, it gets a bit confusing , thanks in advance

ED

7662. Re: [NorCalFire] questions

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 01:24:29 UTC
From: Mike
Topic: 7661 Message: 7662

I am not suprised theres questions ;)

The fire burning in trinity county is called the French Incident. The french incident is 2000 acres+

The Lake incident is Lake and Pine Gorve. 100+ acres.

The Cacade Incident is Cascade Blvd and Grand Cooley area. 10+ acres.

A new incident is being dispatched at Pine Grove and Farm Hill.

[Non-text portions of this message have been removed]

7663. Good job everybody!

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 01:24:45 UTC
From: Jake H
Topic: 7663 Message: 7663

Just finished an 8 hour overtime day at work. Awesome job everybody in posting. Thanks Mike Daly for pushing another live stream out. Mike Hallagan and my feed are both filling up quick so that relieves us.

Keep up the good work. In this chaos with multiple new starts, be sure to make the subject reflect what fire you're talking about. That's 3 fires in the same area near Lake, Cascade, and Deer, Shasta Dam Blvd etc. All within short time.

Jake

7664. Re: [NorCalFire] Shasta: Fire Updates 18:07

Yahoo group: norcalfire (2003 — 2004)

Topic: 7660 Message: 7664

Mike...where the heck is the Cascades one?

I agree with the other post...let's list em?

Hyampom
French Gulch (Trinity I think)
Lake IC

Other than that, I'm lost.

Help!

PA

7667. Re: questions

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 01:27:25 UTC
From: Jake H
Topic: 7661 Message: 7667

Including those below, sounds like another in Trinity County out near Hyampom, which just burned in mid July? That is remote area, far west side. That would be both USFS/CDF.

Check out CHP CAD for the French Gulch fire, they might have good info on town of French Gulch status.
Jake

7668. BUTTE: Stump Field, Oroville (AGAIN)

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 01:33:14 UTC
From: Pamela Alley
Topic: 7668 Message: 7668

3 separate smokes in relatively close proximity; they're asking for more engines there as well.

Place is notorious for burning; I"m beginning to think it would be easier and less expensive overall to just burn it early in the season!

Stump Field is on the south edge of Oroville and is surrounded by elderly houses that aren't kept exactly tidy more often than not (Southside).

18:33

PA

From: Mike
Topic: 7669 Message: 7669

The Cascade incident is slowly getting in the mop up stage.

The Lake fire is continuing to burn and has been given County F3 as another TAC channel.

Lake IC Freqs:
151.160 SHU local (Lake IC)
154.010 County F2 Lake Tac
153.950 County F3 Lake Tac
151.280 Air Tactics 4 Lake Air Attack

French IC Freqs:
151.265 Command 2 (French Command)
170.000 French Air To Ground
169.150 French Air Attack
118.950 Victor Net Copter Coordination

7672. French Fire update 18:44

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 02:46:48 UTC
From: cywildfire
Topic: 7672 Message: 7672

2,500 acres

Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
FIRE IS BURNING UP CANYON WITH SW WIND

Resources threatened (kind(s) and value/significance):
WATERSHED, COMMUNITY OF FRENCH GULCH, CRYSTAL CREEK, TIMBER

Fuels/Materials Involved:
OLD GROWTH MANZANITA, TIMBER

Today's observed fire behavior (leave blank for non-fire events):
FIRE MAKING RAPID RUNS UP HILL AND SPOTTING UP TO ONE MILE AHEAD

Actions planned for next operational period:
CONTINUE INITIAL ATTACK

Projected incident movement/spread during next operational period:
FIRE HAS POTENTIAL TO REACH 5000 ACRES BY MORNING

Growth Potential - Extreme
Difficulty of Terrain - Extreme

hey guys. Does it look like this French fire is going to active for a few days. I have no idea what kind of fuel it s in or how much fuel is in front of

7677. [NorCalFire] Shasta: Fire Updates

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-15 13:52:14 UTC
From: Brian Verhalen
Topic: 7669 Message: 7677

Just checking as to what feeds were coming today.
Am getting Mattlogic#5 clear, is this still French IC, or is there more on
it also?
Have not been able to get Windows Media to connect, is it up & what will it be?

Thanks
Brian

Here are some updates for the Bear and the French Incident:

French Incident:
This fire is 10% contained. 7,600 + Acres have burned so far. 20 homes have burned.

Bear Incident:
This fire is 95% contained. 10,500 Acres have burned. 80 Homes, and 30 out buildings have burned.

Had the same problem last night with feed 5. WMP connection
said streaming, but the audio kept going away.

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 02:04:21 UTC
From: Richard Tidd
Topic: 7679 Message: 7690

Thanks to Matlogic, I have been listening to the
French fire via: www.mattlogic.com/scanner5.html.

It was working fine till a short time ago. Hering all
the action well, then it stopped.

I get the MWA player in my browser but the play button
is no longer black, is seams to be grayed out. I have
the Java running as before. Re bootting does not good.

7693. Re: [NorCalFire] Shasta: Live Scanners

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 04:24:57 UTC
From: Mike Daly
Topic: 7679 Message: 7693

Well PacBell cut the fiber line today in Shasta lake city. they were tiring to fix there telehone stuff from the lake fire yesterday. Charter had to resplice the line. the whole city was out til 9:21pm. Sorry guys

http://68.189.45.220:8080

thats still the ip.

any questions just let me know.

mike

7694. Re: [NorCalFire] Shasta: Live Scanners

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 03:50:48 UTC
From: Ben
Topic: 7679 Message: 7694

it should stay grey means its playing. if it was black it would be
stopped.. try refreshing to page

7695. Re: [NorCalFire] Shasta: Live Scanners

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 04:55:24 UTC
From: Mike Meadows
Topic: 7679 Message: 7695

Just a whole lot of posts on live feeds. Any news on the fire itself?

7696. New Member

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 08:20:10 UTC
From: Daniel
Topic: 6331 Message: 7696

Hi All,
My name is Daniel, but everyone calls me Gadget (like Inspector).
I am an avid fan of all things electronic and was lead to this site
while searching for scanner frequencies. I have a certain interest
in the information this site may provide and that I may even be able
to contribute to...I work for Paradise Springs durning the summers.
Paradise Springs is a relatively small business out of Paradise, CA
(east of Chico off Hwy 99) that provides portable showers and sinks,
potable water transport and gray water hauling for the forest fire
base camps. I often don't get much of a heads-up when it comes time
to get on the road...if a call comes in, I gotta jump. My job
entails putting a 45 ft. semi trailer "together" into functionality
along with the 1500 galllon bladders that hold gray and fresh water
and the sink unit. Sinks number 4 per side of a double sided trailer
(8 total) and the showers number 8 individual showers and a group
change room for same sex showerers and 8 individual stalls in the
same room for a total of 16 showers. Anyway, I only get work when
there is a fire lasting long enough to necessitate showers being on
site for a few days. So, when I can get any sort of information
about fires that are up and running I can get a better feel for the
possibility of going to work.

I may also, while on fire line, be able to give a little bit of info
from the "front" line. Quite possibily, not much, as I'm only at
base camp and my job consists of mostly maintaining showers, but if I
could share a picture or two or some piece of info with the group,
I'd love to.

So, here I am, looking to join up. ;)

Daniel (Gadget)

7697. Shasta: French Fire - update 0700 Monday

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 16:55:46 UTC
From: Jake H
Topic: 7697 Message: 7697

French Command 151.265, heard 24/7 on www.norcalscan.org/live.html

French Fire is just over 9000 acres at 10% containment. No estimated time of containment. 22 residences, 2 commercial structures lost (French Gulch). Isolated residences threatened. Listening on command they were out ahead of the fire finding the residents, GPS them to get them on the map, and assessing whether they can get engines in there or not. Some driveways are too narrow and no turn around until right next to the house. Unfortunately for safety reasons, they will not put engines in those situations during active fire. The best they could do was dozer lines around the house and if aircraft are up, keep things cool.

The terrain is very steep and inaccessible. Roads either follow a creekbottom or try to make it along ridgelines. They can't get dozer transport vehicles up a lot of the roads so the dozers get off at Hwy 299, then drive for a while to get where they need to cut line. I think they call this "high track". Dozer fuel is a must.

Weather and fuel is extremely hot and dry, with temps expected on Wednesday around 103. Humidity 10%.

I saw Ventura County engines driving through Red Bluff. Tried to get a number and pic Tracy but no luck.
Jake

7698. Shasta: Bear Fire - contained

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 17:02:58 UTC
From: Jake H
Topic: 7698 Message: 7698

As of 0800 this morning, Bear Fire is contained at 10484 acres.
Resources from this incident have been initial attacking on some
Shasta CDF dispatches. Mopup stages now.

Whew.
Jake

7699. Messages - off the list

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-16 17:10:58 UTC
From: Jake H
Topic: 7699 Message: 7699

Remember, e-mails to this list go to 358 (and growing) different people. If you have an e-mail to a particular person, please e-mail their direct e-mail address instead of "cheating" and using the list. Especially in the thick of fire season with multiple major incidents working in areas this list covers, it is important to keep everything on topic, the messages flowing smoothly, and the subject lines related to the body of the message.

For specific online-scanner problems or questions, please take the discussion to http://groups.yahoo.com/group/norcalonlinescanning/

Thanks for your cooperation!

Jake

7700. New Fire - Willits, CA?

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-17 19:23:48 UTC
From: sh9730
Topic: 7700 Message: 7700

Just per CHP CAD. Hwy 20. Says good working fire but thats it.
Listening to the norcalscan feed not hearing anything but the French
incident traffic...but being new to the NorCal board not sure if the
Mendocino stuff ever comes in well anyway?

7701. Re: [NorCalFire] New Fire - Willits, CA?

Topic: 7700 Message: 7701

The best I get in that direction is Mendocino National Forest on
169.175 and it's on the live scanner. Not sure of many people on this
list in that local area.

7702. Re: New Fire - Clearlake

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-17 19:56:29 UTC
From: sh9730
Topic: 7700 Message: 7702

Actually I guess I was way off on location for this. Its apparently out near the Wilbur Springs CDF Station east of CLEARLAKE per another board I am on. Asking for an additional Strike Team of engines (type 2 or 3 I assume), and another helicopter. Doesnt sound like it is gonna do toooo much at this point.

Hey everyone not exactly sure whats been going on with my feed but it seems to be working fine now on bens site. So try these links to listen to it. www.mattlogic.com/scanner5.html or to put in ur windows media player http://68.189.63.174:8080 . Right now it is broadcasting CDF and USFS freqs for northern California.

From: Jake H
Topic: 7711 Message: 7711

French Fire is at 10,215 acres at 35% contained. They have completed the indirect dozer lines around the fire (lines that are well ahead of the fire) and letting fire burn to the lines.
They are also backfiring a lot when the winds are favorable which will starve the main fire of fuel, and put it out. There is still a lot of brush, timber along the lines burning that are a
threat to containment. Winds can push embers over the lines creating spot fires.
Continued patrols of the burned areas.

For a map of where the divisions are on the fire etc., check out http://www.fire.ca.gov/cdf/incidents/French%20Fire_157/incident_maps.html

That is an older map, but it will give you an idea of where the current divisions are. Just expanded out a ways with the fire and line growth.

From: Jake H
Topic: 7714 Message: 7715

Air Tactics was confirmed on 169.150 late yesterday afternoon. Kind of surprised me that I could hear it down here but I have all the air tactic freqs (except for victor) in my live scanner so it if can hear it, it's online then.

What I heard was more air logistics/command type traffic. I didn't hear any tactical traffic
between AA and Tankers. They could be on a different freq, or just quiet at the time I heard them.

Also, tankers don't work the entire day due to smoke conditions. When the inversion lifts and the smoke gets off the ground and into a nice plume, they'll bring the tankers and helicopters in then.

Jake, I am getting some air tac stuff on feed 5 , he doesn't list it , but I get a feeling there are more freqs on the feed than he lists ? any ideas , hearing both Air Attack and an air tanker now. Not sure which Command I am hearing ,but its clear as a bell.

2) he also list Redding Fire as 154.325 , do they multicast ? I know they are trunked

> are trunked

Actually, to my knowledge, 154.325 is NOT trunked. RFD only has 3
frequencies on the City Trunk, thats Command, Prevention and Batallion.
154.325 is their primary dispatch frequency.

From: caladded@aol.com
Topic: 7714 Message: 7719

No I know its not trunked. my question is the trunked stuff repeated on a VHF freq? City of Santa Clara is trunked , but they are repeated on 153.965 / 153.44 and a couple other freqs . So for those who don't monitor police , you don't need a trunked scanner for Silicon Valley.

Date: 2004-08-19 01:37:36 UTC
From: sh9730
Topic: 7721 Message: 7721

I know there is some debate over where the line is drawn here for posting, but bayscan posting are talking about a fire on the Napa/Solano county line that has gone 6 alarms now. Numerous homes threatened. Only acreage I ve heard was 25-30. I tried to find this on one of the Matt feeds but no luck?

From: T Sharp
Topic: 7721 Message: 7733

Channel 10 Sacramento reported there are two fires in Mix Canyon in the Vacaville area. One fire is 130 acres with the other fire 75 acres. Also there is a homicide investigation going on in the same area and they don't know if it is connected or not.

7738. Shasta: French Fire - Update Fri 0700

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-20 18:49:49 UTC
From: Jake H
Topic: 7738 Message: 7738

As of Friday at 7am the French Fire was 12,900 acres at 90% contained. A lot of the action is inside the control lines the dozers dug well ahead of the fire. They are waiting for the fire to burn inside the control lines, up to the control lines. Once it reachs the lines, there
will be heavy patrol to make sure nothing slops over spots. Humidity recovery at night makes the fire lay low through the evening.

Lots of historic sites and mines are scattered through the area. Dozers have to be careful not to fall into a mineshaft. Good article in Redding Record Searchlight.

Trinity Mtn Road is open to all traffic now. There was a fire intentionally set yesterday on
the south side of 299 just west of French Gulch turnoff. Real smart with hundreds of firefighters and engines pulling in and out of there daily. It was knocked down quickly.

Jake

From another source...

The Sierra Front has a new fire in the Pleasant Valley (Washoe County) area just south of Reno (NV). Started at 1300 hrs. Currently between 300 to 400 acres. Area is under a RED FLAG conditions. Have requested a Type 1 ST from Eastern Placer county (CA). Having heavy spotting conditions with structures threatened. Air tankers out of Grass Valley have been committed and NEU is requesting cover AT's.

Just got this from KLAS TV8 out of Las Vegas

Wildfire Burning South of Reno
==========

The Andrew fire broke out in the Pleasant Valley area. It has burned more than 200 acres so far and is burning out of control.

The wildfire is threatening homes and quickly growing in size. Residents living south of the Mount Rose Highway are being urged to evacuate their homes.

Several roads in the area have been closed. The fire is being fueled by winds gusting up to 25 miles per hour.

Updated 08/25/2004 @ 1600 PDT

Andrew Fire

The Andrew Fire is burning east of US395 in the Pleasant Valley area of Washoe County. This wind-driven fire has consumed approximately 2,000 acres and is moving to the east. Firefighters are on the scene.

US 395 Thru Pleasant Valley - Washoe City is Closed
US 395 is closed -- both north and south bound -- due to wildfire in the Pleasant Valley Area. North bound traffic is detoured at the SR 429 junction (Bowers Mansion Road). South bound traffic is detoured at the SR 431 junction (Mt. Rose Hwy). Affected Area residents with suitable identification are being allowed access to their homes.

SR 341 (Virginia City Hwy) is Closed Due to Wild Fire
SR 341 (Virginia City Hwy) is closed -- both north and south bound -- due to the threat of wildfire and reduced visibility from smoke. North bound traffic is detoured at the US 50 junction. South bound traffic is detoured at the SR 431 junction (Mt. Rose Hwy). Affected Area residents with suitable identification are being allowed access to their homes.

There are mandatory evacuations in the area of Kibbets Lane and the Scorpion Springs Subdivision off Pinon Lane - Galena High School is the evacuation center.

RED FLAG conditions are in effect. Winds are gusting to 45 mph.

Ten airtankers and seven helicopters are working the blaze or are in route. Ground forces include numerous fire engines and hand crews on scene or in route.

A Type I Incident Management Team has been ordered.

The fire is human caused and under investigation.

Outgoing mail is certified Virus Free.
Checked by AVG anti-virus system (http://www.grisoft.com).

Latest info, fire is 2000 acres plus and running, extreme fire behavior with the current wind situation. 6 homes confirmed lost and another 350 threatened. Mandatory evacuations for the Virginia Highlands. Fire is now pushing uphill in a Northeasterly direction. 395 S bound lanes have been reopened. This fire is highest priority in the nation, type 1 team on order. Fire is now pushing from sagebrush into thick and heavy PJ fuels on 70%+ slopes. Winds have calmed a bit, but still gusting up to 35 mph and RH's are extremely low.

151.160 Shasta CDF
151.445 Silver IC

Quick moving fire in good wind at Silverbridge Rd and Hwy 44 in the Palo Cedro area. Already crested over the hill when first engine went on scene. Lots of resources can attack this quick, but with the wind, it can be a scary area for fire. Should prove some good listening for an hour.

22:24 Wed night. My only post on this fire. Going to bed. Live scanner has dispatch at norcalscan.org

also old oregon trail @ misty lane and old alturas.
all this within approx 5 miles or less in the area.
2 fires going. one is contained. other 1 1/2 acres with strong winds up here.

have whitnesses that it was arson. Sheriffs office was just in pursuit with possible suspect vehicle but end up being a duece (drunk). not the vehicle they are looking for.

looking for a raised red 4x4 with two occupants is all I got.

From: Mobile11@aol.com
Topic: 7756 Message: 7756

Nevada Blaze Forces Evacuations
Wednesday, August 25, 2004

RENO, Nev. — A wind-whipped wildfire (_search_ (http://search.foxnews.com/info.foxnws/redirs_all.htm?pgtarg=wbsdogpile&qcat=web&qkw=wildfire)) sparked by
a target shooter erupted Wednesday near Reno and quickly spread to at least 2,500 acres, threatening homes, forcing evacuations and closing a major highway.
At least seven structures burned in the Pleasant Valley area (_search_ (http://search.foxnews.com/info.foxnws/redirs_all.htm?pgtarg=wbsdogpile&qcat=web&qkw=Pleasant%20Valley%20area)), about seven miles from Reno, according to fire officials. Because of dense smoke, it was not immediately known if the burning structures were homes or outbuildings.
"When we left, the flames were coming right down the canyon," resident Joseph Martin said. "They were just saying, 'You might have to evacuate,' and 10 minutes later, they said, 'You got to get the hell out of there.'"
At least 350 homes were threatened by the fire, which was being whipped by winds gusting to 35 mph.
Firefighting crews on the ground were being assisted by helicopters and air tankers, officials said.
"They're doing a great job, but it's kicking our butt right now," Reno Fire Marshal Larry Farr said.
Farr said the fire was sparked by a man who was target shooting and fired a bullet that ricocheted off a rock.

Residents were urged to evacuate. Crews cut electricity to the area to help decrease the possibility of power lines snapping and sparking more fires.
A section of U.S. 395 (_search_ (http://search.foxnews.com/info.foxnws/redirs_all.htm?pgtarg=wbsdogpile&qcat=web&qkw=U.S.%20395)), which links Reno with
Carson City, was closed for several hours before reopening at nightfall.

Well, considering my post was about a fire yesterday (Saturday)???!! But on this one, I did catch the size up also. 8-10 acres, west of hwy 49. Little bit of spotting east of the hwy, but they caught all that and IC said they d be releasing equipment soon so I dont think this one in Nashville today is gonna turn out to be much.

7788. Post request: Fire updates in the "subject" line

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-08-29 21:17:02 UTC
From: portofinor
Topic: 7788 Message: 7788

To members,

I have my NorcalFire posts routed to my cell phone via Yahoo alerts. The message only captures the subject line and 4 words of the message. When giving FIRE UPDATES could you please put in the SUBJECT line the 1.)"location", 2.)"number of acres" and 3.)"rate of spread". This way we all can see the updates as they change in the "Subject" line of the post on our cell phone or pager. Any thoughts on this idea would be great. Doug

7789. Re: [NorCalFire] Post request: NO PROBLEM

John , ya gotta understand not everyone knows off the top of their head where 140 is. they also may have never heard of guadalupe grade , I never have although I knew about where 140 was. Your most recent post mentions Mariposa County. That helps out loads to those unfamiliar with an area you may know well.

This is near Camino in El Dorado County.

Air Tact 4 in use. 2 AA, 2 tanker 89 and 100. H516 on scene with one more about 8 miles out-unable to contact Cable AA.

so far about 1/4 to 1/2 acre, ground clutter, not in tree tops yet.

both tankers been released 17:28 and the inbound helicopter as well. H516 will remain.

Ryan - near placerville

7816. New Fire - Sonora - Hwy 108

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-01 20:29:11 UTC
From: sh9730
Topic: 7816 Message: 7816

Havent had too much time to see if this is too much, (actually had to work a little today!!), but appears there is a working fire just outside of Sonora near Hwy 49 and 108. Chp shutting down roads for extended closure.. Probably someone has more info than I...

Also, if it jumps the freeway, I ll TRY to remember its the FIRE, not the FREEWAY! LOL.

John

7828. Helitanker 742 at Orland

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-02 20:01:46 UTC
From: Jake H
Topic: 7827 Message: 7828

Helitanker 742 is stationed at Orland right now. "Dan from Ord" could probably get some good pics. :)

They are staged at Orland primarily for Mendocino USFS it sounds like with the fire danger. They responded right over Red Bluff today for the Rhonda incident. Confused me since I didn't know any helitankers were staged south of us. (people at work always wonder why I stare at the sky :) It sounds like they are monitoring BTU, TGU, and MNF for dispatches. Most likely a phone link to NorthOps also.

Jake

7833. RED FLAG WARNING all bay area countyes

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-02 21:45:34 UTC
From: mikeheight
Topic: 7833 Message: 7833

300 PM PDT THU SEP 2 2004

...RED FLAG WARNING TONIGHT THROUGH SATURDAY FOR ALL AREAS EXCEPT
NEAR THE IMMEDIATE COAST AND DELTA FOR STRONG OFFSHORE WINDS AND LOW
RELATIVE HUMIDITIES...

.DISCUSSION...EXPECT LITTLE OR NO RH RECOVERY TONIGHT AS THE
OFFSHORE WINDS BEGIN TO INCREASE...ESPECIALLY AFTER MIDNIGHT.
THE STRONGEST WINDS WILL BE IN THE NORTH AND EAST BAY HILLS WITH
SUSTAINED WINDS 15-30 MPH AND GUSTS TO 50 MPH...HOWEVER RELATIVELY
STRONG WINDS ARE EXPECTED INTO THE HILLS ON THE PENINSULA AS WELL
AS SOUTHERN PORTIONS OF THE FIRE DISTRICT. THE LATEST GUIDANCE IS
STILL INDICATING THAT WINDS WILL BE STRONGER AND MORE WIDESPREAD
WITH THIS OFFSHORE EVENT AND RH VALUES ARE STARTING OUT LOWER THAN
USUAL. WARM...DRY AND BREEZY ON FRIDAY WITH ANOTHER ROUND OF
OFFSHORE WINDS FRIDAY NIGHT INTO SATURDAY. RELIEF WILL BEGIN AT
THE COAST BY SATURDAY BUT INLAND AREAS WILL CONTINUE WITH HOT AND
DRY CONDITIONS ALL WEEKEND ALTHOUGH WINDS WILL SWITCH TO ONSHORE BY
SATURDAY NIGHT AND SUNDAY.

From: Pamela Alley
Topic: 7840 Message: 7840

Two starts and containments (I think, reception is poor) in Butte County; one at Wildwood and Manzanita (near Upper Bidwell Park I believe), Wildwood IC, put up a heckuva smoke for a bit there.

Second was Skyway IC, 1/2 mile down from the Tuscan Golf Course on the Skyway. Can't believe how fast things were under control....if you're on the list, GOOD WORK, GUYS!!

Winds are erratic but strong whichever direction they are headed at the moment.

Good thing this wasn't yesterday; they had over ten small spot fires in the Gridley area that were quickly out...all along the road.

Keep the cool thoughts coming and fer cryin out loud, don't play with matches! :)

PA

7841. Re: RED FLAG NO JOKE!!! - Butte Fires

From: Nick
Topic: 7840 Message: 7841

The Wildwood fire was fairly exciting in the early stages; it was in the City of Chico so they had all the initial attack, it was blowing West to East right through Upper Bidwell Park at 5 mile rec area, and eventually right at the houses that line the park. 2 strike teams of any type were requested from County ECC for structure protection and it sounds like they did a fine job.

Butte County Sheriff H1 did water drops on the fire as CDF seemed to want the air resources they had for the Skyway fire. I wasn't monitoring the Skyway fire so I can't really comment on how it all went over there.

Weather report from the Wildwood fire about an hour ago was 90 degrees with 8% humidity and winds at 5-15 from the N-NW.

I took a few pictures of BCSO H1 with the bucket using my good SLR camera and telephoto lens, I will have the prints tomorrow and hopefully I can find a place to scan them to digital copies. It is quite a thing to see, as H1 is only an OH-58 (Kiowa-style) helicopter and not a huge Huey.

Pictures of BSCO H-1 (the black ship):
http://www.buttesar.org/Pics-Helo.html

OH-58 general info:
http://en.wikipedia.org/wiki/OH-58_Kiowa

Wildwood Fire:
Dispatch Net - Chico City Blue: 453.750
Command Net - Chico City Yellow: 453.550
Tac - White 2: 154.265

Skyway Fire:
Tac - White 3: 154.295

Ok Jake, I get the hint... 742 is on contract to the Mendocino Nat. Forrest. It was originally based at the airport in Willows but because of concerns over the landing area (too much dust) they moved to Orland. It is a brand new shipr, I believe built this spring. I will see if I can get you some shots this week end. My son has a H.S. photo class and this may be a good subject. It will depend on the fire situation. It may not be there this weekend.

Jake H <yahoo@...> wrote:
Helitanker 742 is stationed at Orland right now. "Dan from Ord" could probably get some good pics. :)

They are staged at Orland primarily for Mendocino USFS it sounds like with the fire danger. They responded right over Red Bluff today for the Rhonda incident. Confused me since I didn't know any helitankers were staged south of us. (people at work always wonder why I stare at the sky :) It sounds like they are monitoring BTU, TGU, and MNF for dispatches. Most likely a phone link to NorthOps also.

Jake

Do you happen to know where exactly on the airport it is sitting?
There are the row of hangars on the NE side that is fairly close to
the road and the entrace gate to the airport, and then there is the
set on the far south end that isn't really near anything, hopefully it
isn't over there.

I might be able to venture out and get some pictures also...

From: Smokey Behr
Topic: 7845 Message: 7845

Tanker 82 is enroute to McClellan with nosegear problems. He currently has it in the down and locked position and will be flying it there to have it fixed.

Meant to post earlier,

Strike Team 9160C has been sent for Unit coverage in the MMU. E1667 E1661 E1671 E1662 E1675 and Dozer 1642 went on that call for 10 additional dozers.

Dozer 4645 (Hollister) also filled the call to MMU, to the Coulterville Station. (Coulterville is at the end of Hwy 132 at Hwy 49.

On a side note: has SLU (San Luis Opispo Unit CDF) been sending units to this fire? I noticed that BEU (Monterey San Benito Unit CDF) has about 6 engines covering SLU stations. Or is there another incident we haven't heard of?

Nick <kg6nmp@...> wrote:The Wildwood fire was fairly exciting in the early stages; it was in
the City of Chico so they had all the initial attack, it was blowing
West to East right through Upper Bidwell Park at 5 mile rec area, and
eventually right at the houses that line the park. 2 strike teams of
any type were requested from County ECC for structure protection and
it sounds like they did a fine job.

Butte County Sheriff H1 did water drops on the fire as CDF seemed to
want the air resources they had for the Skyway fire. I wasn't
monitoring the Skyway fire so I can't really comment on how it all
went over there.

Weather report from the Wildwood fire about an hour ago was 90 degrees
with 8% humidity and winds at 5-15 from the N-NW.

I took a few pictures of BCSO H1 with the bucket using my good SLR
camera and telephoto lens, I will have the prints tomorrow and
hopefully I can find a place to scan them to digital copies. It is
quite a thing to see, as H1 is only an OH-58 (Kiowa-style) helicopter
and not a huge Huey.

That's what the PIO said at the pre-1800 briefing. It's getting quiet now, as the fire is laying down for the night. The dozers and handcrews will be working through the night to get as good a line around it as possible. The wx condx for tomorrow are 82-92 for the area with very low (<15%) humidities.

update on fire in MARIPOSA PLEASE

darran salisbury <dastrp10@...> wrote:exp lower hum in moring with winds still from 340 at airport temps also going up hum down write me at dastrp10@...

darran salisbury <dastrp10@...> wrote:
sorry all got to go this wat computer not right here winds as 21.30 from the airport 20 with g to 35 dew point 2
40 hum. 37 exp. to go lower on hum over night

Smokey Behr <smokeybehr@...> wrote:
That's what the PIO said at the pre-1800 briefing. It's getting quiet
now, as the fire is laying down for the night. The dozers and
handcrews will be working through the night to get as good a line
around it as possible. The wx condx for tomorrow are 82-92 for the
area with very low (<15%) humidities.

Well, Im sure that depends ENTIRELY on the wind...they are starting to run out of resources up there...I think there about 15- 20 fires of various size/potential working....If I had to guess whether you d get there before its over??? They just asked for 2 more tankers for a total of 6 on the Pattison fire...the Wells is also hopping up in Placer...

Mike,

IF it helps you...I count 5 extended attack fires working up in the area...I cant even keep up with all the traffic...I just keep hearing "rapid spread" from all of em!!

Winds are about sustained 15 MPH and gusting to 30 MPH....

Up to you!

John

John,

Any streams for this area. Need to make decision on making the trip out of
the Bay Area to shoot some of these.

Thanks for the great updates!

Craig

Santa Clara unit (SCU) sending S/T 9161C (with one LNU Engine) code 3 immediate need to TCU . for the fire near Angels Camp

San Mateo/Cruz (CZU) sending S/T 9171C meeting on 580 to respond to the same incident.

has to be bad .

ED

Ok...Im back...by the way Mike..Im in Socal too....

Couple general questions....

#1 - Where did Angels Camp come from? Unless there is a fire Im not aware of (distinct possiblility), the Calavares fire is nowhere near Angels Camp...well its in the same county but....

#2 - Im not hearing or seeing much activity about the fire up in Placer....did they pick that one up?

#3 - So CAL CDF units just got special staffing instructions. To staff reserve engines and such....

7901. Placer County Fires Update 1639 hrs.

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-03 23:39:51 UTC
From: T Sharp
Topic: 7901 Message: 7901

There were three fires in the southern Placer County area all at the same time. The Wells Incident, a fire in Rocklin, and a fire in Roseville. The Wells incident required numerous resources and had potential for a lot of structure loss. They have a handle on it now if they don't get any spots with the winds still blowing steady 26 MPH and gusts to 35. One resident lost and one barn lost, not sure of any others. Roseville handled their own fire small but could not provide resources to the Wells Incident. I believe Rocklin did the same.

Yeah, thats what I was thinking of . Guess they would frown on me
having the red lights.

back on topic. I " believe" when we are talking about the Angels
camp and Valley springs fire, we mean the same incident ...

any acreage update yet .....what about aircraft , think someone said 6 air
tankers. hoping to catch in on news ,but with Frances approaching Florida,
the massacre in Russia , Pres Clinton in hospital and the Pres. Race , takes up
lot of news time.

I missed the initial dispatch (had the scanner on the wrong back... I
am professional)

Bloomer lookout reports smoke at 275 degrees. Batt. 2116 reports small
fire at this time but hard to access, 800-1000 foot hose lay required,
continuing resources in case it blows up before they can get to it.
Strike Team 9256G being held in the Oroville area until they get this
under control. Unknown tac net.

151.400 dispatch

Nick

think your right ED...it doesn't sound as though this fire is in the
heavy stuff. Sounds like fast moving grass......that area is pretty far
away from the timber.

7909. Re: [NorCalFire] Fire Wx

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 00:01:15 UTC
From: Craig Rose
Topic: 7906 Message: 7909

Thanks for that info.

Right now we are starting to get some decent gusts here in Santa Clara County (nothing to write home about). Just had a large tree toppled, taking power lines down about three miles from my home.

Latest weather down here is temp of 87 F, humidity at 17%, with winds at 17 mph out of the NNW and gusts to 25 MPH.

Looks like I am going to stay put for now unless I get a call to do some photo work on this one.

You know as well as me....maybe the person who saw the KCRA thing
can offer more info? Stockton airport..(closest reporting station)
20 miles away says 27 mph winds with gusts to 35. The new fire is
result of power line down....so still pretty windy....if it doesnt
die after dark there could be reeeaaallll problems with no air
support. Kinda like the nightime Santa Ana fires we get!

> can offer more info?

This fire is a wind driven fire running in light to medium fuels in the foothills areas. I don't know what lies ahead of it but Live Copter 3 is showing more and more homes burning and also showed the new fire about two miles away from the main fire. Winds are still suppose to be breezy tonight and then start to die around noon tomorrow.

Physcial location is off of Hwy 12 between the communities of Burson and Valley Springs in Calaveras County east of Stockton.

7933. TCU Fire - Drift Smoke Into SCU

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 02:22:27 UTC
From: Craig Rose
Topic: 7913 Message: 7933

Just heard CDF BATTALION 1614 (SCU) advising Morgan Hill that drift smoke from the fire(s) in TCU has crossed into Santa Clara County across Mt. Hamilton. Took a look to the east from my place in Santa Clara - and sure enough there is quite a bit of smoke.

This report comes on the heels of a wildland dispatch into the area around Lick Observatory on Mt. Hamilton for two reports of black smoke seen.

This info from the CDF website....last post for me tonight....hope I wasnt too annoying all day...but it was a busy fire afternoon and I was slow at work!

John

Last updated: September 3, 2004 at 8 p.m.

Start Date/Time: September 3, 2004 at 1:39 p.m.

Administrative Unit: CDF Tuolumne-Calaveras Unit

Location: Pattison Road, 2 miles north of Burson.

Acres Burned: *See Conditions

Containment: No Containment

Control: No Control

Structures Destroyed: 10 residences, 1 home under construction, numerous outbuildings and vehicles.

Threatened: Approximately 1,400 homes threatened in the Burson, Rancho Calaveras and East Valley Springs area.

Evacuations: 3,000 persons have been evacuated.

Injuries: 1 civilian

Cause: Human-caused

Cooperating Agencies: CDF, local government agencies

Total Fire Personnel: 655+

Major Incident Command Team: #6 has been ordered
Conditions: There are two fires - the Pattison Fire is 1400 acres, the second fire is 150+ acres. Both fires are burning in heavy fuels and are wind driven. Fire behavior is extreme and is constantly changing. Contact the Fire Information number sfor most current details - 209-754-5527 or 209-754-4692.
Evacuation centers are at Valley Springs Elementary School and will also be set up at the San Andreas High School.

Try http://tinyurl.com/4hhzc

I've got links to a number of CDF, USFS, NPS, NIFC and other agencies
"Incidents" and "updates" pages, as well as news media searches and
some generic (mostly California) fire-service stuff at:

http://harrymarnell.com/lafire.htm

Harry

Does anyone know where the ICP for the Pattison Complex is set up?
Also what % contained today? Total # of resources?
Thanks,
B.West

Dont know where the current CP is, but CHP website says 20%
contained this morning with full containment by tomorrow morning.
Winds are also much more calm this morning.

John

7950. Any Update on the Geysers Fire in Sonoma county???

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 17:48:39 UTC
From: radiophanatic_71
Topic: 7950 Message: 7950

I am getting some "geyser IC" comms on 151.355 cmmd 1 and was wonder what the stats on this one were??? Where exactly is this fire again???

7951. Info on Geysers Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 18:08:04 UTC
From: radiophanatic_71
Topic: 7951 Message: 7951

CHP closing Pine flat rd to everyone. 151.355 has alot of really good clear info. Sounds as if this fire may be still going strong. At one point dispatch broadcasted about someone trapped in thier car on a road surrounded by fire...Yikes

7952. Satellite view of Geysers fire....090404 11:31Hrs

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 18:32:32 UTC
From: Mobile11@aol.com
Topic: 7952 Message: 7952

You can actually see the smoke from the Geysers Fire on this Satellite view from GOES-9 above California. Without the fog or clouds it is very visible. Just North of the Bay Area on the the Sonoma - Napa border. There isn't any fog to speak off either. The only clouds are way offshore down near the channel islands.

http://www.wrh.noaa.gov/satellite/2km/Hanford/VIS2HNX.GIF
(http://www.wrh.noaa.gov/satellite/2km/Hanford/VIS2HNX.GIF)

ps. if the link is doubled I have no idea why. I've looked at all the settings I could find and nothing tells me how or why the links are doubled.

From: Mobile11@aol.com
Topic: 7962 Message: 7962

Correct...about 2 miles NW of Travis AFB.

Seem to have 2 fires going. Peabody Rd and Cement Hill Rd. They went to White 2. Can't hear them from San Fran just on Primary 156.000.

CDF sending a strike team. Just heard a update of 50-60 acres

Vacaville State Prison is close but not in danger of the fire

[Non-text portions of this message have been removed]

wow,,,,,,,,,,that is surprizing, if its really up to 14000 it is a HUGE jump, that is larger than the fires in Shasta County a few weeks ago.

should be hearing more units going , other than all the dozers mentioned. btw , just hearing an ALCO BC saying large column of smoke showing , asking if CDF is rolling.....sounds like we got one close to home craig.

I am suspicious, too. Press Demo article is saying 6,000 acres, but I am always a bit cautious with these accounts.

http://www1.pressdemocrat.com/apps/pbcs.dll/article?AID=/20040904/NEWS/40904002/1033/NEWS01

I'll make some calls and see what I can find out.

Whoops - Copter 106 diverted to new incident - more as it's available on that one.

7988. Marin County Fire - Kent Woodlands

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 22:35:12 UTC
From: Eric Nickel
Topic: 7988 Message: 7988

The fire has just gone to a 3rd alarm. I believe it started as a structure fire that moved into the wildland. Marin County Fire has command of the incident -- Kent IC. Kent Woodlands is on Mt. Tamalpais, the fire has an east wind on it which could cause some problems for Mill Valley and Southern Marin.

7990. GEYSERS FIRE - NEWS ITEM

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-04 22:46:39 UTC
From: Craig Rose
Topic: 7964 Message: 7990

From KCBS - (2:45 PM local)

Geysers Fire Burns Out of Control, More Than 14,000 Acres Scorched

Sue McGuire for KCBS-740 AM

(KCBS)--The huge wildland fire burning out of control near the Geysers Geothermal Plant in Sonoma/Lake counties is so large the California Department of Forestry is not even sure exactly how many acres have burned.

The CDF has ordered evacuations in Lake County along Pine Flat Road in Lake County as thousands of acres of dry timber and brush continue to burn.

KCBS reporter Henry Mulak on the scene near Healdsburg says Pine Flat Road near Highway 128 is closed and fire crews can be seen climbing up the narrow twisting single lane road to get to the fire.

A CDF spokesperson tells KCBS the fire near the Geysers fire had burned more than 1,200 acres on the border between Sonoma and Lake counties by Saturday morning but it exploded in size throughout Saturday with the containment at just 10-percent.

Fire officials say the smoke is so thick that it is difficult to determine the exact amount of acreage of the blaze.

Residents in the nearby communities of Windsor, Healdsburg and Graton report seeing clouds of ash raining down with one resident saying "it almost looks like it's snowing."

Many residents of the area have taken to staying inside with their doors and windows closed to keep away from the smoke.

Residents along Pine Flat Road in Lake County were told to leave their homes Saturday afternoon as the fire continued to burn.

The fire began around 5:15 p.m. Friday in heavy brush and timber in a steep rugged area. For a time the flames threatened some geothermal plants that are part of the Calpine Geysers Geothermal area, but the fire has so far avoided the complex.

A huge plume of smoke, visible for miles, can be seen.

7999. South Butte, multiple fires - Hwy 70

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-05 00:34:09 UTC
From: Nick Caldwell
Topic: 7999 Message: 7999

4 starts all at once along Highway 70 south of Oroville, two are small and two are large with direct threat to structures near Power House Hill Road. Sunset, Bloomer, and Bald lookouts all called shots. 10 engines requested for structure protection in addition to the full assignment for each fire. Reports from occupants of houses unable to leave on their own with direct threat to their structure. One structure already lost, multiple residential and commercial directly threatened. BCSO Helicopter requested for water drops.

Shaky containment about 30 ago, except for one active structure fire.
Sounds like two stuctures lost and one out building, but thats not an
official count.

From: Jake H
Topic: 8001 Message: 8005

It sounds like it is on the north side of the road and backing
down the canyon away from the cabin. Pine Ridge Rd is in
between the fire and the cabin I think. That small section of road
is very ugly undergrowth because a windstorm a few years ago
produced some wind shear and snapped almost every tree on
the ridgline like they were matchsticks. Forest hasn't been able
to clean it up yet.

Copter 506 from Weaverville enroute, wondering where JetA fuel
can be found. Now inbound to Red Bluff with an oil leak into the
cabin.
Can't find the air attack freq yet. Anybody know that one?

Jake

8009. LIST MESSAGES - READ PLEASE

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-05 02:37:21 UTC
From: Jake H
Topic: 8009 Message: 8009

I hate to be the grump right now but there have been a lot of messages on this list over the past few days that have absolutely no fire-related content, or could be e-mailed directly to a particular person, instead of to the entire 364 member list.

I know the excitement level is pretty high for some people. :) This list serves an entire range of people, firefighters, their families, scanner hobbyists, fire photographers, others. Lets try to keep the noise level down.

Thanks for your cooperation everybody! It's bound to be a busy weekend with people intermingling with wilderness.

8010. Geyserville Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-05 10:27:51 UTC
From: Ed
Topic: 8010 Message: 8010

As I mentioned yesterday , 14,000 acres didn't sound right. This fire was at 175 acres Friday night and I hear 14,000 at Noon on Saturday . These can spread fast but not THAT Fast.

CDF page shows the following update

Acres 7,500
Firefighters 1110
Engine 121
Helos 13
Watertenders 11
Dozers 26

Ed

they also mentioned using GIS Infra-red technology to map fire !

8011. Geyserville Fire Frequencies

Date: 2004-09-05 16:57:05 UTC
From: J Pott
Topic: 8011 Message: 8011

Hi All,

Sorry I haven't posted this earlier (did anyone beat me to this?) but I did not have the opportunity to monitor the fire very much yesterday. This is what I have for the fire.

151.355 Command
151.325 CDF Tac 6 Tactical
154.265 White 2, Opps
154.295 White 3, Tactical
123.975 Sonoma Air Base

I was listening to air ops on Friday evening on 151.310 but have not heard anything since then on this freq. Anyone know were air opps went.

John

8012. Geyserville fire air attach

Yahoo group: norcalfire (2003 — 2004)

From: J Pott
Topic: 8012 Message: 8012

Hi All,

I think I found air attack on 122.975. Funny that they are using this freq for actual attack. Don't they normally use this for air-air coordination.

Hellitack base for type 2 and 3 copters appears to be at Cloverdale and type 1 copters is at Sonoma Airport.

John

Command 1 / 151.355 had constant chatter now about this fire , good freqs. Sounds like helos have been grounded but about to start flying them at this time.

CDF website shows over 9000 acres now . Chatting about numerous strike teams coming in overnight. Looking them up now. will post in a minute
1213 hours

Hey,

This fire wasnt much same fire we have about every
year when we get a north wind, stopped it before it
did any major damage or caused a threat, large order
of resources was an over reaction by the local fire
agency...

Request two more heavy tankers for total of 6 and to "open up Stockton"? Is this a normally closed Helibase or Tanker base at this time of year? Never heard that before.

Also, it is unlikely So Cal is going to want to give up too much equipment...we are having our 1st offshore event down here also....temps in 90's and 100's with single digit humidities and east winds...

Mike, i have the town of Pioneer about 35 miles North east (as the crow flies) of Commanche Reservior. Pioneer is a small community 15 miles east Jackson, CA on Hwy 88. Depending on the size of this I might make a run for this fire, we have family up there.

This fire is also 37.2 (on highway) north east of the Pattison Complex.

From: Craig Tomasello
Topic: 8016 Message: 8028

Ben's feeds are coming in very broken up to me, but I'm hearing Tiger Creek Rd. and 88 for the location of this fire.

No word of acerage yet.

From: caladded@aol.com
Topic: 8039 Message: 8039

I will keep this on bayscan to not clutter norcalfire ..BUT Half Moon bay with a well involved structure fire with spread to wildland . 2700 Purrisma creek road , also report of another structure at 3600 .

two separate city/county responses plus CDF also sending full response with air show enroute

153.89
white 2 and 3

Southern Cal may HAVE to send us some help if this keeps up !

8040. Geyser IC - Update 1400 Hrs

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-05 21:19:51 UTC
From: sh9730
Topic: 8040 Message: 8040

Well, thought we were quieting down on this one..but...from another board....

The wind has shifted and therefore the fire is going in a new direction. It burning to the northeast now, I think. Still hot with low humidity. The I.C. just ordered 8 more tankers and 4 more helicopters. The acreage was down sized this morning to 9,200 hundred acres. I haven't heard how big the fire is now.

Have a view of thise fire from the Mt. Zion lookout
website it doesnt appear to be doing much although can
not view the whole column.. here is the url...
http://www.amadorfiresafe.org/index.html

this lookout is probably 10 air miles from the fire,
worked a fire in the same area last year very steep,
although very developed...

Date: 2004-09-05 21:21:24 UTC
From: Ryan Villa
Topic: 8044 Message: 8044

New Start near Rowlins Lake, E of Marysville. Tanker 100 being diverted from Amador fire off Hwy 88.

2 Strike teams from Nevada County/Placer County.

20-30 structures threatened. Will be using Air Tac 1.

39 deg, 11.2'
120 deg, 58.4'

Ryan

Topic: 8016 Message: 8045

Stockton is a reload base, thus not normally open. They open it when needed to cut down on turnaround times or as a MAFFs operation.

Subject: Re: [NorCalFire] Powehouse IC - Additional Tankers

On the helicopter lists i have, Copter 901 is out of Stockton.

sh9730 <jmcguire32@...> wrote:Request two more heavy tankers for total of 6 and to "open up Stockton"? Is this a normally closed Helibase or Tanker base at
this time of year? Never heard that before.

Also, it is unlikely So Cal is going to want to give up too much
equipment...we are having our 1st offshore event down here
also....temps in 90's and 100's with single digit humidities and
east winds...

This fire is on the north side (Nevada County side) of Rollins Lake in the Colfax area. It is on the portion of Hwy 174 that runs from Colfax in Placer County to Grass Valley in Nevada County. Rollins Lake parallels I-80 just east of Colfax.

Topic: 8011 Message: 8059

Thanks a lot for the information. Seems like 122.975 is for the helos and 167.95 is for air tankers. I also think I heard some tactical traffic on 154.010.

Hazen Rd is right in the middle of the town of Manton, which is in Tehama County just south of Shingletown (Hwy44). Very large plume of smoke can be seen from Butte, Tehama and Shasta counties. Can't miss it.

Hazen IC 151.175
Hazen Command 151.460 (Tehama Expanded)
Hazen Air Attack 151.295
Hazen Victor Net 128.250

Unknown acreage but large enough to be be lots of trouble for Manton. Lots of timber etc. CDF is still attacking direct attack on this thing. They don't give up. I won't switch the online scanner over to just this incident unless it blows up bigger.

From: Jake H
Topic: 8064 Message: 8067

I went up to the vista point on Hwy 36 and the column was long gone, just smoke from some good hot spots. Air Attack had 142 acres inside retardant line but Copter 205 did a more accurate fire map before they left for home. Unknown what they had. They were very lucky there was no wind on this. That allowed for a very impressive column, but very little spread in what could have been an ugly fire. Great job on CDF initial attack. They went head on with crowning timber. Only CDF would do that :) It was pretty much out around 1945 tonight.

I was at the fire yesterday and there were two heavy tankers and I saw only one light fixed wing. They were working the very top edge of the ridge and burnouts continued just north of the Briggs Canyon area. Look for my pics on Firephoto.org soon.

Geysers Fire burns 4 homes; containment still days away

100 structures still threatened by 10,100-acre wildfire; two firefighters injured
Monday, September 6, 2004

By SHADI RAHIMI
and KATY HILLENMEYER

(http://ads.pressdemo.com/RealMedia/ads/click_lx.cgi/www.pressdemocrat.com/local/31018/Middle/default/empty.gif/554e4b4e4f574e)

THE LATEST
The Geysers Fire has burned 10,100 acres since Friday. As of Sunday night, the blaze was 15 percent contained, and firefighters estimated full containment by 8 a.m. Wednesday. It's the largest fire burning in the state, with 1,875 firefighters battling the blaze. The cause is under investigation.
There was little to salvage from the ashes Sunday as brothers Bruce and Gary Young returned to their remote, hillside weekend home northeast of Healdsburg, where a 10,100-acre wildfire had destroyed their house and at least three others.

"It really is devastating," said San Mateo resident Bruce Young, surveying the soot-covered ruins at the Pine Flat Road property that his great-grandfather passed down. "I've cried several times today."

Hampered by shifting winds and steep terrain, 1,875 firefighters battled The Geysers Fire for a third night in the Mayacmas Mountains straddling Sonoma and Lake counties.

I believe this was one that was over before it began. I heard the tone out awhile ago, and about 15-20 minutes later almost everyone was cancelled. About 10 acres fully contained, few engines staying for mop up.

Must not have been very heavy fuel, because a few engines had it under very quick control.

Was located S shingle rd and latrobe rd.

I looked out back towards whee the fire should be and no smoke (about 10 miles line o sight)

Ryan
El Dorado county

8082. Looking for more info on Geysers Fire

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-07 01:04:43 UTC
From: Daniel
Topic: 8082 Message: 8082

Hi all, This is Gadget. I'm currently in the base camp at Cloverdale Fairgrounds working with Paradise Springs portable sinks & showers trying to keep the sun off my head and the dirt off the firefighters (and plethora of other staff here at the camp. While I'm working, I'm monitoring my scanner with the local frequencies, but it's not like they give "updates" on the radio. News is tough to come by while working 12-18 hr days and surfing the net even slower using my cell phone at a 14.4 modem speed. So, if anyone happens to know more about the status of this "constantly changing" fire, particularly in regards to its movement towards Middletown, I'm curious. I have in-laws living off Hildebrand Road (3 miles south of Middletown on Hwy 128) approx. Lat/Lon= N 38 42.5, W 122 36.25 and would love to know anything about the approach or regression of this fire in that direction. I'll check in here in the evenings as time permits. Hope someone w/DSL or a TV can find out more than I can on the front lines. If you want to know anything about the camp here, post to Gadget and I'll try to answer. Thanks.

DMGadget/Daniel

8083. Re: [NorCalFire] Looking for more info on Geysers Fire

12,193 acres and 35% contained

Communities/Critical Infrastructure Threatened (in 12, 24, 48 and 72 hour time frames):
12 hours: Geothermal facilities, Units 13, 16 (Cooling Towers), high pressure steam pipes and electrical transmission facilities. Residences in the Dry Creek Drainage are evacuated, potential threat to Middletown.
24 hours:
48 hours:
72 hours:

Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Heavy fuels, steep terrain, difficult access. Near critical fuel moistures. Low relative humidity with minimal night time recovery.

Resources threatened (kind(s) and value/significance):
Communities to the East and South of fire threatened.

Fuels/Materials Involved: 5 Brush (2 Feet)
Brush and timber.

Today's observed fire behavior (leave blank for non-fire events):
Moderate fire behavior. Fuels and topography influencing fire spread.

Significant events today (closures, evacuations, significant progress made, etc.):
Resources deployed to protect communities West of Middletown. Significant progress in line construction.

Actions planned for next operational period:
Work to contain fire spread and hold existing constructed line. Structure protection in threatened areas.

Projected incident movement/spread during next operational period:
Fire spread to the East toward Middletown and South toward Mt. St. Helena.

Growth Potential - High
Difficulty of Terrain - High

How likely is it that containment/control targets will be met, given the current resources and suppression/control strategy?
Allocation of assigned resources have improved containment outlook.

AM broadcast radio (it really does still exist) is rather hot
tonight, too.

--
Bill

I am often asked how radio works. Well, you see, telegraphy is like
a very long cat. You yank his tail in New York and he meows in Los
Angeles. Do you understand this? Now, radio is exactly the same,
except that there is no cat.

8102. crash on old Ft.Bragg road

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-11 16:55:15 UTC
From: Ed
Topic: 8102 Message: 8102

Check out CHP webpage (hotspots)

seems to be a bad crash somewhere in the area of Ft.Bragg , but no one seems to able to find it. Someone called in via a CB radio etc and know they lost contact. using helos etc to look for crash. One possible DOA involved

My understanding is there is some information on the incident. I cannot confirm or deny any details. Awaiting official informataion at the appropriate time. Also I just finally found this fire.. Its in a VERY remote area near Cherry Lake . If you have state Thomas Bros its page 42 B4.

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-13 01:15:40 UTC
From: George.Cusack@alldata.com
Topic: 8105 Message: 8118

3 Type 1 STs requested for structure protection.
ICP at Union Mine landfill.
AEU is stretched. They broke another fire in Mosquito less than 5 minutes prior.

8123. Re: [NorCalFire] Re: Mariposa County - Old Hwy IC

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-13 01:50:15 UTC
From: Frank and Nancy Ealand
Topic: 8105 Message: 8123

I would not stay behind this time Mike. Both are still ripping and the Stanislaus has ordered a type 1 team. I would suggest starting early and then decide which one to go to have to almost drive by one to get to the other----- Original Message -----

8125. "New" update: please CHANGE THE "SUBJECT" LINE

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-13 01:59:55 UTC
From: Doug Kunst
Topic: 8105 Message: 8125

When fires are growing: please change the "subject" line each time with new info like: size, location, rate of spread, structures threatened, wind, temp, column size scene, chp update ect. It will help us all.
Most cell phones only receive the "subject" line and 3 words. My phone alerts with the same message time after time not allowing any new info to be scene. I am sure that I am speaking for many who use this feature. Thanks for all the timely updates. This is the best Yahoo group for timely info. Any thoughts??

Hi Ben,
IC just told Camino he is predicting containment in 45 minutes.
I am monitoring, but unless something changes, I won't post anymore.
Probably not worth a feed.

>>Latest update about 35 acres. Looking good. --Don<<

Yipee...
can see it from the top of the ridge... very dense area, and sand ridge is
not far.
Lot of livestock and ranches in that area.
Carolyn

From another board

Burnover on the STF
Comments
Sacramento ☐ Seven firefighters with the California Department of Forestry and Fire Protection (CDF) were overrun by fire this afternoon in the Tuolomne River Canyon on the Stanislaus National Forest. One firefighter was killed, one suffered moderate injuries, five sustained minor injuries. The firefighters are not being identified at this time pending notification of their families. The six injured firefighters are all receiving medical attention. A joint CDF-US Forest Service Major Accident Investigation Team has been activated and will conduct a complete investigation of this incident. A CDF liaison has been assigned to assist each family. No further information will be released this evening. A media briefing is planned for tomorrow, Monday, September 13, 2004 at 10 a.m. at CDF Headquarters, 1416 9th St., Sacramento.

In my backyard - the end of Patterson Dr. south of the towns of Diamond Springs and El Dorado on Hwy 49. Lots of structure protection engines. So far so good. Luckily winds are light. Air tanker support will help make the difference. Smoke column is steady but not black (good sign).

2 helicopters in roue, tanker 89 and 100 already dropped, dark smoke visible from Shingle Springs, Tanker 84 also en route ordered 1 more.

3 more strike teams for structure protection,

All traffic monitored on http://24/7/137/81:8100/listen.pls

Hearing a S/T being formed at Casa De Fruita on 152 in Santa Clara County including one Eng. from CZU. didn't hear destination, would assume this is the fire.

8136. Old Highway Fire - Mariposa County

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-09-13 03:40:58 UTC
From: Smokey Behr
Topic: 8136 Message: 8136

Old Highway IC

Command 151.400 (CMD 4)
Branch 1 151.340 (Tac 7)
Branch 2 151.370 (Tac 8)
Air-Air 151.310 (Air Tac 6)
Air-Ground 151.220 (CDF A/G)

This fire is burning in the area of Slaughterhouse Road near SR140 and Old Highway. This is the same are that has been hit on a regular basis by an arsonist. There was a fire last month in the same general area that burned around 250-300 acres.

The fire is currently about 350-400 acres, and has been burning since about 1400. Current rough equipment count is as follows:

Engines: 25 on scene, 25 more ordered
Crews: 6 on scene, 10 more ordered
Dozers: 8 agency, 5(?) CWN on scene, unknown on order
Helos: 5 assigned to the incident
Air Tankers: 4 assigned to the incident

Frank, do you live in the area...I'm planning on getting out of here
around 9am. Is there a number I can call you at before I leave. Just
want to make sure this thing is still going to be burning when I get up
there around noon......

On the local radio news at 0530, they are reporting 1700 acres, 500 personnel at scene and 500 more enroute (most likely rough numbers). There also has been an arrest in this probably arson-caused fire.

I didn't know 'Head Guy' was an ICS position...

This was in a real terrible area for fires, very steep terrain and
extra engines are an hour away code-3, but they threw everything they
had at it in the initial dispatch and held it quite well. These fires
never make the news big time, but it was quite a job by CDF/Butte
County Fire.

8164. Re: [NorCalFire] TMU WildCad System?

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-02 21:50:26 UTC
From: Mark
Topic: 8161 Message: 8164

does the cdf have a cad system much like the CHP?

I work for the media, and we were wondering if there was a better way
of picking up incidents in our listening area other than listening to
the scanner and bugging the local dispach office media rep.

Yes and no. CDF uses a CAD system, however it is internal only an has no public web presence. All other CDF and Forest Service units have access to it via an intranet, however it is not available to the public.

8167. Re: [NorCalFire] TMU WildCad System?

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-03 04:33:04 UTC
From: Frank and Nancy Ealand
Topic: 8161 Message: 8167

I do not have the full answer, however I would suspect that one reason might be medical aids and the information on the CAD would have to be screened so that all information entered is not made public do to the restrictictions and privacy issues. That would be a real pain for them to filter that. But again, just guessing.

There are a lot of issues that come to play with what is put on the web. I know that the flight following system on the web to flight follow airtankers, copters and other aircraft govt owned and on contract is also restricted. Even a contractor having aircraft is only allowed to see their aircraft and not allowed to see the aircraft of other contractors. Not sure the reason, but they must have one.

They even have concerns with posting frequencies in use. That comes from DHS and the top of the agency frequency managers, however this group and others always find them and post them, but we had better not ever do that unless it is the TFR frequency.

While there are a number of public safety personnel on this list, none of us are qualified to address issues of state ageny policy. I suggest you contact CDF public affairs to ask them about their policies.

Wouldn't that be nice...a CAD so that WE don't have to guess at what we hear! LOL!

Good luck...due to the medical calls, I seriously doubt we'll see it anytime soon.

CHP includes medical information about incidents on it's cad website.
there are no legal issues involved with it.

Talked to someone part of the bear valley hellitack crew over the
weekend. Apparently cdf is revamping their cad system and their will be
a wildcad version online for cdf for the public by next season.

SCORE!

thats the rumor i heard from my news director, but he said that he said
that the geeks over at cdf have been wanting to do that for awhile and
that they've been saying it'll come soon, but they've never given an
actual time when it'll be online. so that's good news!

8173. Re: [NorCalFire] TMU WildCad System?

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-03 21:08:31 UTC
From: John
Topic: 8161 Message: 8173

Does the CHP CAD include home addresses? I'd think it typically involves folks on the roads, where revealing someone's condition likely won't identify that person. HIPPA or HIPAA or however it's spelled forbids patients medical information from being releases. I'm a bit suprised at what is released during CHP news conferences, etc.

From: Glenn Jenkins
Topic: 8174 Message: 8174

Ref CDF's CAD. CDF developed its own CAD in the early 80?s. Called CAL-CAD. It was not inter-connected to the other 21 CDF ECC?s. The new CAD, Alturas (PRC) is state of the art, with unlimited potential. It cost CDF 20+ million and will go live in early 2005. Most units are undergoing training now as well as working on transferring their current data and map information to the new CAD. It does have the ability to be networked, but no decision has been made on how that will occur. It will not, for a long time, be put on the web, until CDF management decides if this is something they want to do and can do.

As most of you know, Traffic accidents/floods/fires are a little different than the variety of calls we can go to and someone has to decide what information can go out. And the other big part is CHP has dedicated PSD (public safety dispatchers) whose job is to update their CAD by the minute. CDF has no money for that type of dedication. So I would not hold your breath. . I know some information can be automatically transferred to the web, such as location, and comments, and units involved, but that will take some time for CDF to agree to do that.

MIRPS is interconnected between all CDF and Federal wildland agencies, but that is done over a local network and you will never see that information, money and time being the big reasons here. Now we are moving to ROSS, the national system, and it is internet based, but it is controlled by the Feds and due to security concerns over their servers, I don?t see that coming out for the general public for a while either.

Guess these groups will just have to be your source of info.

8175. Amber Alerts

If there's an Amber Alert out for this area, does anyone (fire, medical, search & rescue) do anything different than normal? do they have an amber alert plan or something?

Mark

8176. Lassen USFS - Lightning fires

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-05 00:33:33 UTC
From: Jake H
Topic: 8176 Message: 8176

Numerous lightning fires getting attention in Lassen USFS right now.
They've been sleeping on "sleepers" from previous storms from over
the weekend etc. but now it sounds like things are building.
Helitanker 780 working a couple fires. Copter 510, helitack crews and
smokejumpers are on other fires. Unknown details, getting all the
action coming home from work.

Helitack crews have to repel on some fires. Good traffic.

172.225 Lassen Forest Net
168.200 Crew Net
Unknown air - I am scanning them all and not hearing anything

One fire near Childs Meadows just heard Copter 510 over.
Lat 40 17.969
Lon 121 26.526
1/10 acre active flame, downed log
20% slope, road access 1/4 mile down slope. You can see road on
topozone.com at that lat/lon.

For groundpounders do don't like lat/lon, you can do the legal system
(Lassen just dispatched an engine using this)

8178. Hotshot Fatality

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-05 16:04:59 UTC
From: George.Cusack@alldata.com
Topic: 8178 Message: 8178

Wildland firefighter Daniel Holmes, age 26, of Bellingham, Washington was killed yesterday
when he was hit by a falling dead tree on the Grant West Prescribed Fire in Kings Canyon
National Park. Daniel’s family has been notified.
The accident occurred shortly after operations began at 11:00 a.m. on Saturday, October 2. With
four acres ignited, the top of a 100-foot white fir tree unexpectedly fell where firefighters were
working, striking Holmes. Approximately 20 firefighters witnessed the accident and provided
immediate medical assistance. Holmes was carried to a waiting ambulance by his fellow
crewmembers, but passed away while being transported to a Lifeflight helicopter landing zone
in the park. Daniel never regained consciousness after the accident and was pronounced dead
by the Lifeflight medical crew.
Holmes was a crewmember on the Arrowhead Hotshots, an elite firefighting crew that responds
to large fires across the country. The National Park Service has two such crews: Arrowhead
Hotshots at Kings Canyon and Alpine Hotshots at Rocky Mountain National Park.

Late last night I heard 2 of them were contained and controlled. Needed to be checked this morning sometime. Unknown on others. Lots of thunderstorm buildup so expect this activity all week probably.
Jake

8180. Power IC - Amador County ENF - 50 acres crowning

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-06 21:55:13 UTC
From: sh9730
Topic: 8180 Message: 8180

New fire...50 acres and crowning out. 2 tankers on scene now, and 2 tankers enroute from Fresno and Sequioa, opening stockton. Salt Springs area of Amador county. This was kinda unexpected up there this time of year!

John

Sorry...shoulda put the freq in the original post...its a Fed fire from what I understand....171?? I forget the ENF freq...

tThe following is relayed from another source with better info than me:

Just talked to the folks at Columbia Air Attack Base in TCU - both CDF tankers from Columbia, two from Grass Valley plus at least a couple of heavies (which explains the opening of the Stockton re-load base)are flying the fire. Last info heard at Columbia around 1545hrs +/- indicated 150+ acres in the Salt Springs Resevoir area, on the El Dorado Nat. Forest - that would be North Fork of the Mokelumne River dividing Calaveras from Amador Counties. Top of the header visible from the tower at Columbia and from east Sonora and the Ponderosa Hills subdivision south west of Twian Hart - it's a big'n.

Yes it is Fed.
Believe it is now called Powerhouse Incident.
Tac 2: 168.200
Air Tac 1: 166.675
A-G today was CDF 151.220
Related logistics and mobilization orders on 171.575 and 172.325.
Air show shut down at 1855. AA, S2s, and copters back at 0800. Heavies at 0900.
Air attack reported active fire and spotting on the head as he headed home.

Lots of Federal units inbound at 2030.Travel frequencies in use:
R5 Project Net: 164.150
R5 Tac 9: 163.100
Some units also using Forest Net: 171.525.
IC-ENF HQ: Admin 172.325
Staging is at Lumberyard Station on Hwy 88.
State and Federal dozers on order.
One lookout (Leek Springs?) staffed tonight.
Haven't heard acreage.

From: Steve Jackson
Topic: 8192 Message: 8193

In a way this makes sense. But we have to find a way
to deny terrorists a full blown sign saying blow me up
I can kill people, at the same time first responders
need to know what is in those cars to protect life.

8194. NorCalScan live scanner offline Sat.

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-09 05:46:33 UTC
From: Jake H
Topic: 8194 Message: 8194

The NorCalScan live scanner will be offline Saturday since the 895 will be enjoying some sunshine at the Redding Airshow, happily tuning in some Milair stuff.

Should be back on late that night or Sunday sometime. Alternate scanners to listen to would be the www.redding.com Record Searchlight online scanners. They have a lot of law stuff programmed also so all you fire-nuts beware. No 10-27s allowed on my live scanner until Fire Season is over. ;)

Jake

From: Doug Kunst
Topic: 8196 Message: 8196

Lots of units heading to Sonoma County in the town of Geyserville. This is near the Geyser's Fire. Looks like high winds and low humidity in the area.

154.19 is a simulcast freqs for Sac Counties TRS system (Sac Metro Fire) so , technically yes , you would hear their dispatch. but you really need to monitor the TRS to hear any significant communications for them.

8201. Geysers Fire: 500 Acres

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-11 06:11:49 UTC
From: Doug Kunst
Topic: 8199 Message: 8201

I heard a BC say 400 to 500 acres. Dozers are having trouble with rough terrain.

Not sure if this is the Geysers in Sonoma or the Rumsey fire in Yolo County.

From: Nick Caldwell
Topic: 8199 Message: 8209

Tankers are going in and out of Chico AAB buzzing right over my place
and headed south, both CDF and the bigger Federal jobs (that were
grounded earlier in the year). I can hear Rumsey fire traffic on CDF
Command 2 - 151.265.

Just heard Rumsey AA on White 3 as well. Sounded like he was either briefing a relief AA or maybe "giving a tour" of the fire to a "head honcho" flying in trail.

Elk Grove and Galt are as they are dispatched by Sacramento County TRS , yes , it is repeated on 154.19 .

8220. SHEET IRON MT. FIRE M.N.F.

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-12 18:33:00 UTC
From: kg6aeb
Topic: 8220 Message: 8220

FYI: There was also a forest fire on Sheet Iron Mt. in the Mendicino National Forest Sunday morning that was started by an illegal camp fire. (The fire boss stated the camp fire was in the middle of pine needles.) I reported the fire via ham radio appox. 5;45 am and CDF responded swiftly with multiple ground units, 3 air tankers and 3 helicopters and 2 dozers.

This fire started about a tenth of a mile from where my brother and I were camped. It was a rude awakening to be woken up by heavy smoke and a front row seat to flames in the trees. We were lucky the wind shifted down slope and we were able to grab a few things and get the hell out of there and get a couple of miles up wind of the fire. We were able to return later and retrive out tents and other gear that we left behind.

For those interested in Monitoring Sac County (Sacramento Metro Fire + the other cities dispatched by them) and/or Sacramento City Fire ... the two VHF frequencies only repeat the dispatch. For monitoring those agencies , you really need a trunked scanner. 154.19 and 153.89 do not give you any fireground traffic.

With yesterdays wind Salt springs in Amador/El Dorado co. kicked up in an unexpected area today...
We were up at Bear River and the fire caught and started to take off. Luckily the crews were still there.
It took a while, but finally in the afternoon they got a heli and a plane on it...
Moved everything over to the Bear River resort (lake) fire looked to try and crest the south side of the lake...

I'm at a loss for frequencies. My live scanner is designed to be unattended, catching major fires in the area with the common command and tactical freqs but I'm not hearing anything. Not even Command repeater traffic so they're well out of my range. With the topography I think the bay area has a much better chance at hearing the traffic.

This is what I was given...

167.950 BLM Air Attack
151.265 CDF 2
151.340 CDF LNU East

The following are Yolo County freqs and is unknown to what extent
these freq are being used, if at all. However the most obvious ones
are used for normal dispatching...

White Fire: 154.280, 154.265, & 154.295 (unknown if all three are
being used)
Yolo Green Fire: 154.445
Yolo Black: 153.830
Yolo Brown: 158.835 (or 153.830)
Yolo Gray Fire: 151.085
Yolo Sheriff Primary: 154.800

There is a possibility that, if they are involved, Rumsey Rancheria
Fire Department is using their own radio channels to talk to their
station house at the casino. Unfortunately they are UHF Trunked so I
am not able to get those freqs at this time.

Maybe someone can share other frequencies from neighboring counties
since I don't have them readily available.

Yea... I agree with you. I am not sure of a station 30 either. I will have to check with my wife when she gets home about how Davis is laid out. (She is a 9-1-1 dispatcher with Yolo County)

I knew that UC Fire was the University, but I am thinking that is what they call themselves from within the city limits. Again... wife will know...

8244. RE: [NorCalFire] Re: Davis fire what is the freq

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-13 03:12:02 UTC
From: geffcurtis@yahoo.com
Topic: 8213 Message: 8244

No they were separate agencies when I lived there

-----Original Message-----
From: Todd [mailto:ke6gcv@...]
Sent: Tuesday, October 12, 2004 7:53 PM
To: norcalfire@yahoogroups.com
Subject: [NorCalFire] Re: Davis fire what is the freq

Yea... I agree with you. I am not sure of a station 30 either. I
will have to check with my wife when she gets home about how Davis is
laid out. (She is a 9-1-1 dispatcher with Yolo County)

I knew that UC Fire was the University, but I am thinking that is
what they call themselves from within the city limits. Again... wife
will know...

Todd

8245. Re: Davis fire what is the freq

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-13 03:34:32 UTC
From: Todd
Topic: 8213 Message: 8245

I know that the entire city and University are dispatched
under one freq. That is 154.370 (Blue Fire). But I will have to get
with my wife when she gets home to know how the stations are laid out.

8246. [NorCalFire] Re: Rumsey Fire - radio sites

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-13 04:49:41 UTC
From: Jake H
Topic: 8227 Message: 8246

For a good, recent picture of the Berryessa Peak Radio Site try
http://www.bark2m.com/

This gives you an idea of what was destroyed, although not sure how much of the radio side was destroyed. Ham repeater isn't coming up 146.970 at that site. The lookout is gone.

This also gives you an idea of the vegetation this fire is burning in. Ugly stuff this time of year.

In the picture above the lookout is to the left, with standard state repeaters, then the smaller microwave tower is for the Western Area Power Authority, which is now called Northern Transmission. They have sites all throughout NorCal. The large tower is the old ATT Backhaul Microwave system - what carried your long distance before fiber optics. Berryessa was a significant switching point for the microwave system, with paths going off in various directions. The tower now probably holds cellular and 900MHz stuff in between the old horns etc. The smaller shack to the right has the amateur radio gear and possibly some commercial/business stuff too.

The entire ridge that Berryessa Peak is on has multiple radio sites, including to the south the large complex of sites many people group together as Mt. Vaca.
Jake

From: Todd
Topic: 8227 Message: 8247

This may very well be the same repeater site that can be seen from Cache Creek Casino. Since I work there, I will grab my handheld and see if I can trip the repeater when I go on a break (I work the graveyard shift as an IT Tech).

*** OR *** The site I am referring to may be one of several sites with the name of "Bald Mtn."... since we all know there are several Bald Mtn. locations within Northern California. At least in my radio installer days. ;þ

8248. BARK repeater

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-13 10:43:48 UTC
From: Todd
Topic: 8248 Message: 8248

I was able to trip the repeater earlier in my shift from the casino. I think it should have been full quieting into my portable, however, it was extremely scratchy. When the sun rises I will be able to tell what is left standing on the peak across from the casino.

From: Pamela Alley
Topic: 8251 Message: 8251

154.280...sounds like they are using the lookout area as a staging spot, but my reception is spotty and interrupted by local traffic, so who knows. :) :)

WHY do I get the Napa area clearer than I do my own?????

Whee...so much fun listening to them discuss parking and getting the heck out of the way of everyone else. :)

8252. Power Incident, El Dorado National Forest

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-13 18:48:47 UTC
From: George.Cusack@alldata.com
Topic: 8252 Message: 8252

As reported by Carolyn late yesterday, the Power Fire, which started back on the 6th, blew up in gusty winds after breaking through containment Monday night. Containment is down to 10%. The Bear River Reservoir area, including the homes on the South side and the Campground/Resort on the North, have been evacuated. Structure protection groups are in position, and PG&E has de-energized lines in the area. Highway 88 has been closed between Omo Ranch Road on the West and Iron Mountain on the East. The ICP and base camp are packing up and moving from Lumberyard Station to Iron Mountain. CDF Camino dispatched all available county and local water tenders to the incident early this morning.
I was at Amador SO this morning, and the flow of information from the Forest Service to the county is not very good. One result is that there are all kinds of false evacuation rumors floating around. An up-country patrol deputy coming off shift this morning reported seeing extreme fire behavior during the night. County OES was receiving reports of ash falling as far away as Plymouth. As I left the SO in Jackson, a Shasta-Trinity engine strike team was rolling up the grade on Highway 88. As you drive Northwest out of the county, the Power drift smoke starts to blend with the massive amount of drift smoke coming from Rumsey. Outside my office in Elk Grove, it looks like winter.
The Forest Service is posting updates at:
http://www.fs.fed.us/r5/eldorado/incident/power/index.html
http://www.fs.fed.us/r5/eldorado/incident/power/summary.html

Current incident frequencies are:
Command: 172.325 156.7 (normally ENF Admin)
Tac 1: 168.050
Tac 2: 168.200
Air Tac 1: 166.675
Air/Gnd: 170.000
Forest Net: 171.525 156.7

I have also heard the following in use at various times since 10/6:
163.100: USFS travel and talk-in
164.150: USFS travel and talk in
169.125: Travel net
168.350: ?
153.755: Pine Grove CYA, Chief Officer to Crew Captains (yes, same frequency as the OES CESRS system).

Anyone with victor frequencies, please post.

Yeah, the CDF 209 on this says 3000 acres now and not expecting full containment until the 30th??? It must be really rugged terrain to take that long to get a line around....

Also, just heard South Ops down here sending a tanker or two...probably replacements due to time restrictions rather than additional requests but I dont know that for sure...

Also, latest on the Rumsey is over 34000 acres..

Hey John,
Yea, the 30th. Nothing like optimism. I'll see what I can pick up from work on Command and Air Tac. I do know that as of 1000 hours, the Stockton tanker base was not yet open, and tankers were flying back to Fresno and Porterville to reload.

Traffic on Command after I left the SO indicated conditions were "very favorable" this morning. I think they also said conditions would continue to be favorable for the next couple of mornings with some deterioration in the afternoons and evenings. I believe when they say "favorable" they mean light and from a direction that inhibits up-canyon runs.

8259. Holy SMOKES!!!

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-13 19:17:17 UTC
From: Ryan Villa
Topic: 8259 Message: 8259

Hey folks,

I woke up this morning in El Dorado County, and thought there was a major storm movin' in. I soon realized that the reason the ENTIRE western sky including overheard was obscured was due to smoke from the Rumsey fire.

Lately, the smoke has moved a little more to the south, but now smoke from the Salt Springs fire in S el dorado/Amador county is blowing this way.

There aren't any satellite passes scheduled until late this afternoon, but I'll try and post some good sat pics of the smoke.

BREAK

Does anyone have any more recent freqs for the SALT SPRINGS fire?? I tried listening to all of George's frequencies (in terms of Air TAC) and come up empty. I am only about 25 miles away and using a very good antenna (also am LOS) and can't find them anywhere!! Rumsey AA is booming in here.

I heard from Rumsey AA that at least 4 tankers were en route to Salt Springs, but from there, I have no clue what freq they are on.

Just now heard they are using Amador Command 153.935 for an additional command freq for this fire.

TIA,

Ryan - El Dorado County

166.675 has been in use all day, but traffic has been sporadic. Around the time you weren't picking anything up, I don't think there was an AA on the fire. AA06 checked in at 1340 but nobody checked out.
4165 Lake View is a couple of hundred yards from my house. Sure hope 6100 got there in a hurry.

Not sure what incident (it's on either White 2 or 3), but air tac just reported areas of 200 foot flames....mentioned the risk of it heading toward Lake Davis, which might make it Rumsey, right?

Who brought the hotdogs and marshmallows, eh?

Sending good cool and damp thoughts at both incidents, heck, it can't hurt!

This is what I know as far as staging...

Helo staging is on County Road 78 at State Route 16 (Directly across from CDF 1455s station). Can see several different styles of helo's.

Apparatus staging, unless recently moved, is at the Yolo County Fairgrounds in the City of Woodland (East Street & East Gibson Road). There is a good chance they are using White Fire for their local communication if they are staging here. If you are located close to Woodland, then this is what you may be hearing... if not... I haven't a clue...

Lately I have been out-of-date on things so anything is possible at this point. I do know that from looking at the ridges last night from where I work... although it is sad that this fire was started to begin with... seeing the flames shoot above the ridge line in several spots was breath taking.

Todd

Could very well be the power fire , I see on the webpage it
mentions highway 88 and emigrant trail etc . that is on the webpage
for the power fire which is 3000+ acres.

Ed

Date: 2004-10-14 00:58:57 UTC
From: sh9730
Topic: 8275 Message: 8278

Naa...its different...those mentions are there because CHP didnt know what to do with all the WB traffic from US 50 since 88 had been closed DUE TO the power fire earlier. 88 is now open with escorts, but what a mess since all the US 50 traffic will be going through there too from this new fire...I looked at the ENF map of the power fire as of 1400 (on the incident website..) and it was an awful long ways from US 50 at that point....I think two fires..

Two huge columns now coming up over South shore Tahoe. This new one is 5 minutes old. These are two of the biggest smoke colunns I have seen in a long time.

They are fairly close to each other but clearly two different fires.

Any idea what the fires are?

I haven't a clue...

Lately I have been out-of-date on things so anything is possible at this point. I do know that from looking at the ridges last night from where I work... although it is sad that this fire was started to begin with... seeing the flames shoot above the ridge line in several spots was breath taking.

Topic: 8251 Message: 8282

North Lake Tahoe Fire forming up a type 1 strike team to Hwy 50 at Kyberz.

Column is growing rapidly.

Todd <ke6gcv@...> wrote:

This is what I know as far as staging...

Helo staging is on County Road 78 at State Route 16 (Directly across from CDF 1455s station). Can see several different styles of helo's.

Apparatus staging, unless recently moved, is at the Yolo County Fairgrounds in the City of Woodland (East Street & East Gibson Road). There is a good chance they are using White Fire for their local communication if they are staging here. If you are located close to Woodland, then this is what you may be hearing... if not... I haven't a clue...

Lately I have been out-of-date on things so anything is possible at this point. I do know that from looking at the ridges last night from where I work... although it is sad that this fire was started to begin with... seeing the flames shoot above the ridge line in several spots was breath taking.

Yes, as the recent post here have indicated it appears there are now TWO major fires working on the El Dorado Forest...the Power fire on the south side of US 50 near State why 88....this is the fire that started a week or so ago but blew up again yesterday, and a NEW fire near Kyburz along US 50...I dont have fire name or freqs for this one at all...it is possible they will manage these as a complex of fires under the same management team but I do not know this for sure...the new fire appears to have started about 2 hours ago, but the column is probably just coming into your view in tahoe now...

I heard on the radio that the fire on Hwy 50 in Kyburz area was on Wrights Lake Road, initial arrival reports were 5-7 acres with rapid rate of spread. This report was about three hours ago and have been away from radios since then.

I can see the glow coming from the Wrights lake fire. It is glowing over the Mtns. The flame length must be incredible to be able to see the glow coming and going. The Column keeps growing and is HUGE.

The other column to the South is diminishing.

Doug Kunst <portofinor@...> wrote:

They are fairly close to each other but clearly two different fires.

Any idea what the fires are?

looking at the map , I would estimate a differance of maybe 30 miles between the two , depending on how close the kyburz fire is to 50 and how far north of 88 the power fire is. not a place to be .

Here is a RAWS station in the area at Hell Hole.

Time: 10/13/04 - 0205Z 19:05PDT
Temperature: 65? F / 18? C
Dew Point: 26? F / -3? C
Relative Humidity: 23%
Wind Speed: 17 mph / 8 m/s
Wind Gust: 19 mph / 8 m/s
Wind Direction: from the E

Column still GLOWING.

Finally, a fire we can all be on a first name basis with.
Just North of Hwy 50.
El Dorado Forest Net: 171.525.
USFS Tac 8: 168.350
Lots of spotting reported. Structure protection with El Dorado County and local units is the focus for tonight.
Dozers etc. staging for the morning.

Meanwhile, all units working the Ellis Road - Salt Springs Road area at the bottom of the Power Fire have pulled out for safety reasons. Power is running down canyon like last night.

No it is up the road. For all you folks who are not familiar with the area, this will be quick geography lesson so you have a picture... hiway 88 and 50 and80 and 4 all are on fingers that go upslope if you can picture this..
I live on Omo which is an upslope tributary along 88.
hiway 50 fire and the power fire are not very far apart... I would guess less than 10 miles easy. by air
hiway 50 closed at Emigrant trail.... traffic routed... this road goes north south to 88 it is a 'not very travelled road...'
Emigrant trail strangely comes out at the hiway 88 fire...
I am 5 miles-ish from the road closure.
The closure here give the FS the ability to turn back traffic it is a last stop place. Also there is only Cooks and Hams station and the town of Omo Ranch which is dotted with Ranches between me and Bear Resevoir.
The terrain is steep and remote. Distance to the fire as of yesterday. was aprox. 15 miles driving to the east.
I hope the fingers thing was a good analogy.
For a while I thought no one was listening here...
I have picked up a lot of banter on 172.325
Carolyn

8314. Ash fall in Placerville area

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-14 09:40:06 UTC
From: dayman2000
Topic: 8314 Message: 8314

Ash is falling tonight in the Placerville area (from Pollock Pines to Diamond Springs) and possibly further. Likely the east winds blowing smoke down the South Fork American River Canyon from the Freds fire. Enough to put a light dusting on parked cars overnight. Freds fire was estimated at 1500 acres this evening but WILL be bigger in the morning after the winds blow it around tonight. --Don

8316. Rumsey smoke going north now

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-14 14:56:46 UTC
From: Jake H
Topic: 8316 Message: 8316

Rumsey smoke plume is now going north in the upper level winds. It looks ugly south of Red Bluff, then travels up and north following the Coastal Range.

Topic: 8252 Message: 8317

Update link: http://www.srvfpd.dst.ca.us/news/rumseyfire.htm

George.Cusack@... wrote:As reported by Carolyn late yesterday, the Power Fire, which started back
on the 6th, blew up in gusty winds after breaking through containment Monday night. Containment is down to 10%. The Bear River Reservoir area, including the homes on the South side and the Campground/Resort on the North, have been evacuated. Structure protection groups are in position, and PG&E has de-energized lines in the area. Highway 88 has been closed between Omo Ranch Road on the West and Iron Mountain on the East. The ICP and base camp are packing up and moving from Lumberyard Station to Iron Mountain. CDF Camino dispatched all available county and local water tenders to the incident early this morning.
I was at Amador SO this morning, and the flow of information from the Forest Service to the county is not very good. One result is that there are all kinds of false evacuation rumors floating around. An up-country patrol deputy coming off shift this morning reported seeing extreme fire behavior during the night. County OES was receiving reports of ash falling as far away as Plymouth. As I left the SO in Jackson, a Shasta-Trinity engine strike team was rolling up the grade on Highway 88. As you drive Northwest out of the county, the Power drift smoke starts to blend with the massive amount of drift smoke coming from Rumsey. Outside my office in Elk Grove, it looks like winter.
The Forest Service is posting updates at:
http://www.fs.fed.us/r5/eldorado/incident/power/index.html
http://www.fs.fed.us/r5/eldorado/incident/power/summary.html

Current incident frequencies are:
Command: 172.325 156.7 (normally ENF Admin)
Tac 1: 168.050
Tac 2: 168.200
Air Tac 1: 166.675
Air/Gnd: 170.000
Forest Net: 171.525 156.7

I have also heard the following in use at various times since 10/6:
163.100: USFS travel and talk-in
164.150: USFS travel and talk in
169.125: Travel net
168.350: ?
153.755: Pine Grove CYA, Chief Officer to Crew Captains (yes, same frequency as the OES CESRS system).

Anyone with victor frequencies, please post.

I've been there many times. Knoxville-Berryessa road is a very rugged road. One lane and the area in there is very rough terrain. I have a friend who's parent's have a ranch North of Division Z. Don't know if they had to Evac. There really isn't anything in the area to start a fire except a human.

During the winter the road has a nickname. It's called the "7 Bridge Road". That's due to the fact that there is a river that the road crosses. When it rains in seven places the water usually rises and goes over the road. You have to drive through the water to get across. There are no bridges on that road.

By the way you can hit the Mt. Diablo HAM repeater (146.070) from Berryessa. You have to drive just North of Putah Creek to get a good shot...at least I do.

My car was had a lot of ash fall on it here in Smartsville, Yuba County, that's 10 miles west of Grass Valley and 15 miles east of Marysville. It's amazing how far it travels. Outside it looks like it's about to rain, but it's just the sky covered by smoke, no sun here either.

Carolyn,
Last I heard (last night), Power was running down-canyon from around Ellis Road towards Panther. This is when the units working the bottom there decided to pull out and spend the night up at Lumberyard. There was crowning, and they thought it might make Panther by this morning. The same reports said they expected no advance up towards 88. Been running around all morning so I haven't caught any updates.

8334. RE: [NorCalFire] Ash fall (was latest Freqs)...

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-14 21:31:10 UTC
From: Paul E. Olson
Topic: 8318 Message: 8334

I just noticed (@ 14:40) that we are now getting light ash fall in Benicia.
I would have to assume that it's from either the Freds or the Power fires -
or both.

Paul

Here is what I posted yesterday plus a couple of new ones.

Current incident frequencies are:
Command: 172.325 156.7 (normally ENF Admin)
Tac 1: 168.050
Tac 2: 168.200
Air Tac 1: 166.675
Air/Gnd: 170.000
Victor: 127.775
Forest Net: 171.525 156.7

I have also heard the following in use at various times since 10/6:
163.100: USFS travel and talk-in
164.150: USFS travel and talk in
169.125: Travel net
168.350: ?
153.755: Pine Grove CYA, Chief Officer to Crew Captains (yes, same
frequency as the OES CESRS system).
164.125: Base camp

Just a slight correction in the naming convention of the listed freqs.

163.100 and 164.150 are not USFS travel. The USFS travel net is 169.125, There keeps being miss information that this is a state freq, probably because the state uses it more than the Feds. It is used by the state and local governments under a MOU, however the controlling agency is the USFS.

163.100 is a all fed gov agencies channel for misc use. We call it a Fed CB ch. 164.150 is USFS project ch.

168.350 is the same use as 163.100

164.125 is one of the USFS Fire Camp Service Nets.

Just info, no flaming intended.

Actually, I believe my post indicated what the frequencies were actually being used for, not what their naming convention is. I have a number of listings, none of which list anything as a travel net excepp 169.125. The others were being used as I described, and quite informally.

8341. Fire pager question...

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-15 02:21:51 UTC
From: Heather Mckannay
Topic: 8318 Message: 8341

Hey,

I guess I'll start with an introduction of who I am...my name is Heather, been around for a while, haven't had any time to write to this group....I'm a volunteer firefighter up in Shasta County.

Anyway, I thought maybe you all could help me out here: I have a Minitor IV Fire pager I want to sell, and I don't know how much to sell it for. It's brand new, perfect condition with the standard drop-in base. Any ideas? Thanks!

Heather

Picking up lots of scratchy command traffic on 168.075 for Power Fire.
Maybe the new Type 1 ICT switched command from El Dorado Admin?

Earlier, I thought I heard Power Air Attack say A/G was 166.6875 and Victor
was 124.775. Yesterday, that was Fred's Victor and Power was 127.775. Can
anyone confirm this change in the morning?

Hiya Heather. Mark here, in Eureka ... the pagers go for about 300+ new, single frequency version ... here's info ...
http://alphanet.zoovy.com/category/motorola_minitor_3_pagers.allnewminitoriv/

Next issue .. I believe that pager has to be programmed using special software & connectors, so the buyer would have to get that done or have the equipment to do so ... unless, of course, they were using the same frequency & tones that you do ... and, I believe some outfits do that for their volunteers. Others on here would know more about that ..
So ... used price would be ... ??? Hey folks out there ... what, about $250? Cheers!

8348. Re: [NorCalFire] Re: latest Freqs

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-15 03:27:55 UTC
From: Cy Phenice
Topic: 8318 Message: 8348

as of 18:00

12,000 acres 35% contained

Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Strong NE-E winds continued to push the fire farther down the Mokelumne River Drainage most of the day. High fire intensity and long range spotting occurred. Highway 88 remains closed.

Current Weather Conditions
Wind Speed: 4-8 mph Temperature: 70-75
Wind Direction: East Relative Humidity: 18-23

Fuels/Materials Involved: 10 Timber (litter and understory)
10 TIMBER-MIXED CONIFER, SLASH, PLANTATIONS

Today's observed fire behavior (leave blank for non-fire events):
Spotting and crown fire runs in heavy mixed conifer timberlands and plantations

Significant events today (closures, evacuations, significant progress made, etc.):
Northeast to East winds increased long distance spotting. Fire continued to make runs in heavy timber on steep slopes. Highway 88 remains closed. Unified command with Calif. Dept. of Forestry and Fire Protection was established @ 0600.

Projected incident movement/spread during next operational period:
Fire will continue to move to the west and north across extremely steep, rocky slopes in heavy timber.

Growth Potential - High
Difficulty of Terrain - Extreme

From CDF and USFS Websites

Power Fire is 12,000 acres , 10% contained

Fred Fire is 3,000 acres also 10% contained (Kyburz area)

Rumsey Fire is 39,138 acres @ 71% contained

these are the most recent updates as of Thursday evening 2040 hours

From: Ryan Villa
Topic: 8318 Message: 8350

Give it another couple of hours, there soon will be something like 2500! :)

George, I heard traffic as of close of business today on Victor 124.775. Both AA talking to each other. I didn't hear much on 127.775 though, and I am "relatively" close to both fires.

I think all of the copters and most of the planes are staying the night in S Lake Tahoe (lucky them). Others are staying in Minden.

Air ops resuming shortly after 0800. Then the hunt for frequencies will be on again (you know they're gonna change 'em).

BTW, did anyone hear the call around 1-2pm today over I think it was USFS command or admin (not sure) about the plane that overshot the runway and ended up upside down at Placerville airport? This was reported by one of the helos. No one seriousy hurt :)

Pam,

Did you check your settings in Control Panel? Most specifically, the volume control for your sound card. Make sure the "wave" and "volume" (or main volume) in the "playback" portion of the sound card settings are both turned up. From there it should be easy listening. Also, and I assumed you have already done so, make sure the volume control in whatever media player you are using is turned up too.

The only other thing it might be is the online scanner you are listening to has a low output volume. I doubt this is the case, but I have seen it (err...I mean heard it) before.

Hope this helps, Pam.

Ryan - El Dorado County
http://eldoscanner.servebeer.com

p.s. if anyone is interested, I posted today's satellite photo of the NorCal fires on the above referenced website.

This morning everyone is talking about their handful of new frequencies. The only one I heard was the new Air to Ground for Fred's : 164.375. I assume Power will be using 170.000 still, but haven't heard anything yet.

Just heard Fred's AA talk about not being able to get into a repeater with an output of 168.700. This might be the "new command" everyone is talking about, not sure, just caught the tail end.

Excellent info Ryan. Thank you. I heard Fred Communications make a reference to a new Fred command channel on Forest Net this morning, but he did not give the frequency. I'll monitor 168.700.
Unfortunately, the new Power Command, 168.075, sounds like it is on a fairly weak portable repeater. I can still pick it up in western Amador County, but I have to listen pretty closely.
Keep us posted with what you hear up there.

LOCALLY DENSE SMOKE IS EXPECTED TO AFFECT PORTIONS OF THE WEST
SLOPES OF THE SIERRA NEVADA AND MOTHER LODE FOOTHILLS TODAY. GENERAL
SMOKEY CONDITIONS WITH THE LOCALLY DENSE SMOKE WILL CONTINUE TODAY.
THERE IS POTENTIAL FOR DENSE SMOKE IN AND NEAR THE CANYONS ALONG
THE SOUTH FORK OF THE AMERICAN RIVER AND ALSO THE MOKELUMNE RIVER.
ASH WILL ALSO CONTINUE FALL ACROSS THE SIERRA...INCLUDING THE FOOTHILLS.

...Also including my bedroom this morning.

My bedroom too. Actually SMELLS like a campfire out there (although it might be my feet!)

The Air Tac freq for Fred's today will be 171.1375. Kind of a bummer, the scanner I use for my feed is not that advanced and won't tune that directly. I have another one here that will, so I'll listen in. Fred AA just ordered 2 tankers. Should be checking in any minute. Just heard them chatting on Victor.

Any word on the Air Tac for Power??

George, I think I made a booboo yesterday. The Victor I heard all the traffic on was 127.775, not 124.775 like I had thought. You were correct all along.

If your scanner is old enough that it won't let you program in 171.1375 exactly, you can be pretty sure that its selectivity is poor enough that rounding it off 171.135 or 171.140 won't bother it a bit. You ought to be able to hear it OK.

If you try it, I'd be interested in the result... and what model scanner is it?

Harry,

It's a newer Uniden BCT-8. I agree with you though, the selectivity on Unidens in general is not that great. I have an Icom Comm Receiver also, that will tune it in. I'll keep you posted.

Update...Tankers still en route to Fred's, will be using 171.1375, and Power AA is flying with a recon helo only, too smoky for tankers right now. When it clears, they will be on Air TAC 1.

Air Attack is on 166.675 (too smoky for air activity, although they
are trying to get in there)

George indicated that 168.075 is being used as the POWER command net.
He said it is kinda weak, I haven't heard anything on it yet, but I
haven't been listening too long to it.

You also might want to try:

USFS TAC 2 168.200
White 2 154.265
White 3 154.295

I am not sure about the Whites, but I heard a bit of traffic on them
earlier and they were coming in good. Just didn't listen long enough
to determine what fire they are working.

Hope that helps, Carolyn.

8381. FREDS update

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-16 02:37:18 UTC
From: Ryan Villa
Topic: 8381 Message: 8381

The official word is 7600 acres @ 30% containment from the USFS website.

As mentioned previously, visibility was near zero almost all day. The only tanker drops were late AM/early PM and were "high level" drops due to poor visibility. Visibility should be much improved tomorrow so I assume the airshow will resume until they get a line around the whole thing and get it to hold. Unless we have huge gusty winds, my $$$ is on them doing just that tomorrow at least for Freds. I heard the shift change report and they had two divisions pretty much at mop-up, one they were almost done with the dozer line. The only real challenge they'll have is Division Zulu or the head of the fire. They still had a ways to go on that end of it.

I'd say those guys did a pretty good job for having darn near no air support all day!

Here is a link to today's sat photo of the fires courtesy of our pals @ NASA: http://eldoscanner.servebeer.com/images/oct15satpass.jpg It's a pretty big photo, you will have to scroll approx. 1/2 way down and just a bit to the right.

Ryan - El Dorado County
http://eldoscanner.servebeer.com

p.s. George, I replied to your email. If that's your work email, write me back and I'll send you the message.

8383. Rumsey lookin' good

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-16 08:46:52 UTC
From: Todd
Topic: 8383 Message: 8383

Rumsey is starting to look good. 87% containment.

http://www.fire.ca.gov/cdf/incidents/Rumsey%
20Fire_166/incident_info.html

Can see the damaged repeater site from where I work (of course the sun must be up). Can see the towers standing but no buildings. Phone service is now spotty at best since that was a Verizon & ATT location (Cingular and other services not mentioned do not work out here). It is unknown on other services that were located on the site. Nextel is decent starting from Capay, north to around the town of Rumsey with best coverage closer to the casino (Thanks to a low power site on the top of the hotel intended to service the casino).

Wow, what a damaging fire. Copters still staged on Road 78 and Highway 16 being released one-by-one. Yolo County Fairgrounds still the staging area although resources are being released to go home or to assist with Fred's & Power.

For those of you who are interested.

From: George.Cusack@alldata.com
Topic: 8387 Message: 8387

Too smokey for tankers and only 1 available. Lots of copter traffic on 122.225.
Joint operation with CDF now. All bucket drops west of West Panther Creek get billed to the state. Air Attack has an accountant up there flying around in circles keeping track of all this.

TNX Carolyn. Having 2 USFS fires in the same area has been difficult and frustrating. First, they keep changing the air and air-ground frequencies almost daily. Ryan and I suspect they have a frequency lottery going and somebody is getting rich off of this. Second, and unlike CDF, the Feds tend not to use the incident name in their tactical call signs. Instead of hearing ?Power Air Attack?, I hear ?Air Attack 05? or sometimes just ?Joe?. I have to wait until I hear a geographical reference like ?Panther Creek? to be sure of which incident I am hearing on the air frequencies. This morning I got lucky and heard them announced by Air Ops.
I was posting some ?maybe? and ?I think? info yesterday which isn't really helpful, so last night Ryan and I started sharing what we thought we were hearing off-list until we got it right. We've never met, but we had some fun with this. He is closer to Fred, and I am closer to Power.
This morning, I figured I would just post Power info so Ryan and I wouldn't double each other.
Not a very exciting day on Power. Big burnout in the Southwest corner by Panther Creek, where the fire made its big down-canyon night runs for a couple of nights.
Tons of AM traffic all day on 122.225.Most people can't get close to the fire, but if you want some good close copter photos, there are 3 helibases for Power:
Silver Lake to the East in the high country.
Westover Field at Sutter Hill near Jackson.
Frogtown in Angels Camp.

George

First time for everything I guess. But I've been monitoring this fire off and on for almost a week and a half, and I don't think I've heard ☐Power☐ more than 4 or 5 times by an AA. Good thing Power didn't have an AA with a first name of ☐Fred☐ or it really would have screwed me up.

By the time everyone reads this it will be too late, but I thought I would be the first to post this anyway.

At 0530 hours... IT IS RAINING!!!

Currently at Cache Creek Casino it is a heavy drizzle... not quite a full rain, but nonetheless it will be great help to the fire fighters in the Rumsey area. Even though it will make for slippery conditions walking on the hillside given the terrain.

I am also sure that it has reached Power and Fred's fires as well. Again... slippery conditions walking on the hillside I am sure (I am not too familiar with the area so I am guessing).

Maybe it will get heavier and actually help put the fires out. One can only hope!!!

Yes, so you can munch on Chicken Tenders while you watch them.
I believe Silver Lake Helibase is way up by the lake, quite a ways beyond Buchhorn.
I doubt you can get near Panther Creek right now. They were firing down there yesterday.
Ya, those men and women are awesome, and the coordination has been incredible. Any problems I've had sorting things out are obviously my problems, not theirs.
Just started to sprinkle down here.

Good Morning,

Started initial attack on the Fred's inc. was about
the 5 or 6th engine on scene, started hoselay around
spot fires before pulled out and sent to do structure
protection in kyburz, fire blew right past kyburz to
the north west initially meanwhile dozers punched in
line around kyburz which we layed hose in, in
preparation for a burning operation, fire beat us to
it, so CDF crews started firing out in a defensive
fashion no structures lost in kyburz... was raining
today in the valleys should help all the fires out..

8406. Fire Season ends Tehama County

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-20 15:19:05 UTC
From: Jake H
Topic: 8406 Message: 8406

11 minutes ago Fire Season was declared over in Tehama County. :(

Shasta CDF lifted most residential burning restrictions, leaving Shasta Lake, Anderson and Cottonwood requiring permits.

BLM and Lassen National Forest lifted burn restrictions.

Usually October regains itself after the first storm and fire season rekindles a few weeks, but we're drowning up here now in the rain, measured in multiple inches.

I believe this list had a great fire season. Thanks everybody for the wonderful posts. Don't
think about leaving as this list goes into winter hibernation (chimney fire season now).

Jake

8408. Re: [NorCalFire] Fire Season ends Tehama County

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-20 16:58:26 UTC
From: George.Cusack@alldata.com
Topic: 8406 Message: 8408

Below is the text of a CDF press release issued yesterday.

Sacramento- Recent rain storms and more on the way have allowed the California Department of Forestry and Fire Protection (CDF) to begin the transition out of fire season status in Northern California. By 8 a.m. next Monday, October 25, 2004, all CDF Units north of Fresno in the Valley, and north of Monterey on the Coast will be out of fire season status. The CDF Units in Southern California will remain on fire season until further notice.

Ending fire season means releasing seasonal firefighters and reducing operating hours in some CDF facilities. Some airtankers will enter winter maintenance. “Many of our Northern California Units are funded for fire season status through November 15,” said Rich Green CDF Assistant Chief for Fire Protection. “The early closing of fire season will save the State money. This is the earliest closure for the Northern and Central State since 1989.”

The National Weather Service has advised CDF management that the recent soaking rains will be followed by at least two more significant storms in the next several days in Northern California, thus lessening the threat of wildfire.

I just want to say a Big THANK YOU TO ALL OF YOU who covered the fires. I was new to this list, new to the area, and you guys are the bomb! Should So. Cal be so lucky!
The fire crews were all staged at the Plymouth fairgrounds on Monday, and it was an awesome sight.. To be a wildland firefighter .. what a person to be admired.! It's a sad sight when they all go home, especially when you know that fire season just slammed its doors closed for the season. We have had over 3 inches of rain here in the foothills, a good soaking rain. Strange for October...
But here we are!
Thank you again for all the listening, and sharing you guys did,
Thank you to all the volunteers and the fire personnel for all the hard work.
Carolyn - up country... Omo

Carolyn,
Did you get any pictures from Plymouth? I had heard that some of these poor men and women had been demobed and before they could head home were "remobed" for possible flood and mudslide duty. This included a number of agency dozers.

Now the real work begins! No more holding off work projects because of wildland season. The Job continues, Medical Aids, structure fires, MVA's, Wires down, Flooding and Sandbags... Oh my! We have had our times tossing sandbags..... Clearing storm drains, Clearing down trees, and even the cat in the tree. Lets not have a winter like Carolyn mentioned. We don't need anymore sandbags.

I am in denial that fire season was cut so short this year so in memory of fire season 2004, I will still have strictly fire frequencies scanning until Oct 31. Oct 31 I will probably attempt to stream Chico PD for their Halloween chaos "that doesn't occur." After that, scanner will switch into winter mode, scanning existing CDF and USFS dispatches, area law dispatches, and some fun oddball freqs here and there.

Can get some funny stuff from the law channels on Halloween night.

Like a Witch beating another Witch with her broom on the corner of <blank> & <blank>! Both Witches were described as wearing black clothing and tall, pointed hats. Last seen heading north on <blank> from <blank>.

(Actual call put out by Woodland PD a few years back).

I fell out of the chair when I heard that one! Too funny!

> Bmaison@...

The proper Federal name for 154.280, 154.265, and 154.295 is "154.280, 154.265, and 154.295" (No, I'm not being sarcastic.)

Federal agencies do not have direct authorization to use 154.280, 154.265, and 154.295, as those frequencies are not under the control of the NTIA (the Federal version of the FCC). All Federal Use in California is under the State of California's license and a Frequency Use Agreement. Use in other states would be under similar use agreements.

Don

8425. BCSAR's new rescue vehicle

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-10-27 06:40:33 UTC
From: Nick Caldwell
Topic: 8425 Message: 8425

Butte County Search & Rescue has been working for the past year on getting a new primary technical rescue vehicle in service. We are finally very close to achieving that goal... probably only a month away now. I have created a little addition to our website where you can see snapshots in time of the build progress, and it will be updated along the way until the entire project is completed:

http://www.buttesar.org/Rescue5/

Once we are fully done with the vehicle there will be some announcements made to the media and there is talk of some sort of public dedication or other similar event. Once I know the details on that I will pass it along to the groups. For all the radio nuts out there (like me), we have 4 antennas on the cab: 2 VHF 5/8 wave antennas, a scanner antenna, and a cell antenna.

On behalf of the team I would like to thank everyone in the community that donated time, money, goods, well-wishes, anything at all that helped make this dream turn into a reality.

Nick, KG6NMP

From: John
Topic: 8426 Message: 8429

Actually, it depends on what you mean by a USAR team. The plan for most places is to not deploy their own FEMA/OES US&R team for their own disaster. Not to say that those folks and equipment won't be used, but rather that it'd be too tough to get everyone to a central location to then deploy. They'd all already be working. As an example, should a major earthquake hit the city of San Diego, I'd be working as a Planning Section Chief for the city on a big scale, rather than as a Planning Team Manager for our FEMA/OES US&R team on a smaller scale.

That's not to say that SFFD couldn't have a very successful FEMA/OES US&R team. The experience and equipment gained would be of great benefit. SFFD should also have it's own internal rescue capability. I know they have a couple of Rescues and I'm sure they'e good. I personally don't feel that this state needs more FEMA/OES teams. The existing ones don't get enough work as it is. Good for the citizens... hard to maintain proficiency.

http://www.chicoer.com/Stories/0,1413,135~25092~2510201,00.html

BIZ BITS: Different aircraft mean special things to this area

By Laura Urseny

Chico's AERO UNION had a special place in last week's demonstration of the California Army National Guard's Fire Hawk helicopter.

The Fire Hawk is a converted Blackhawk helicopter made by Sikorsky Aircraft, and in 60 seconds can suck 1,000 gallons of water into its tank. It proved its capability during a demonstration Friday at Lake Natoma, near Sacramento.

It's that 1,000-gallon tank and system that Chico airport-based Aero Union designed and manufactures solely. Attached to the helicopter's belly, the tank draws in water via a pump and snorkel device that's dropped into a body of water.

What makes the Fire Hawk a special aircraft, according to the National Guard, is its ability to carry flame-fighting liquid and foam, as well as deliver people. The Fire Hawk can carry as many as 15, according to Aero Union, and can remove injured or endangered personnel from an area.

Currently, only five states California, Nevada, Florida, New York and Oregon have Fire Hawks in their arsenals.

Aero Union President and CEO TERRY UNSWORTH told me that his company is working on its eighth order, this one its third for Los Angeles County. Aero Union has sold one to the Oregon Army National Guard, and four to Sikorsky Aircraft as well.

Unsworth, who attended last week's event with vice president of manufacturing GLEN NEWTON, said the demonstration was actually scheduled for June, but fire outbreaks delayed it until now.

According to local JANET MARSHALL of the California Department of Forestry and Fire Protection, and another demonstration guest, the Aero Union system provides more than three times the water-carrying capability of its "bucket" predecessors.

Pam, currently the LA Cty. FD has two Firehawks at it's disposal...And
they do put out a lot of fire. Mike

Stations 10 Los Molinos, 9 El Camino, 3 Bowman, 5 Bend to cover
stations. RBFD has responded engine 2 direct to the fire, Los Molinos
110 is covering Red Bluff now.

They aren't sure if this is TGU or SHU coverage - right on the border.
Rock IC has been reporting to TGU Local for command with SHU units
covering. That might switch to SHU being command.

151.160 SHU Local
151.370 TGU Local

Powerlines down - possible cause.
Jake

Can I get some help/info on WinAmp. I have Norcalscan on it but it does not play. The timer sits on 00 & the message across the bottom shows "unknown host". I copied & pasted the address from Norcalscan site. What am I doing wrong or not doing to get it to play.

Thanks in advance

Brian

8442. Re: [NorCalFire] Tehama: Veggie Manton, update

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-11-20 23:13:57 UTC
From: Jake H
Topic: 8434 Message: 8442

Simiply click on the Listen Live! link on the left side of the page
mentioned below. That should start automatically playing in your favored
shoutcast streaming program (WinAMP, iTunes and the latest version of
RealAudio for Windows, and iTunes for Macintosh.)

The actual streaming link is http://www.norcalscan.org:8000
Jake

CDF and Company 30 with Company 71 providing mutual aid with Engine 571 and Water Tender 71 on an escaped control burn Smith Logging Road. Reported as four or five burn piles escaped - now about five acres. One hand crew responding as soon as a corrections officer is available. Increasing winds forecast here overnight.

I haven't seen anything in the news about this today (Sunday online edition Redding Record Searchlight). It got pretty quiet in the evening and I had family come over for dinner the rest of the evening so couldn't keep tabs on it. And Drew posted a fire that occurred yesterday also that was an escape control burn from 5 burn piles or something. Things have been drying out quick up here with the strong north/east winds. I don't think we're due for humidity recovery until Saturday and rain on Monday.

From: Jake H
Topic: 8453 Message: 8453

After changing servers and hosting companies my live scanner is back up and running. It was down over Thanksgiving. You can go to it at http://www.norcalscan.org and click on Online Scanner. It can support 60 users instead of 30 now. I have Tehama County area law enforcement added since it isn't fire season anymore.

It is compatible with RealAudio Player 10, WinAMP, and iTunes for Windows and Macintosh.

Enjoy!
Jake

Wow cool Jake. That should help out during the huge fires and other incidents in the area. The site loads fast even on my 3mbit connection so it must be a good hosting company ;)

8457. Apparatus equipment lists/inventories

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-12-05 18:37:49 UTC
From: John
Topic: 8457 Message: 8457

Hello all,
I'm working on a project from work. I need to compile
apparatus equipment lists from various agencies and
see if there's "stuff" we should be carrying that
we're not. Does anyone have lists of equipment or
inventories of different apparatus? I need it for
engines, truck, quints and brush apparatus. You can
either email it to me, or I can provide a snail mail
address for you to send to.

Thanks in advance,
John Fisher

Good Evening,

I sense that SDFR is having trouble filling the compartments in their new Pierce Engines... As for engine inventories, their should be a standard among the department, then specialization at the station level to meet their everyday mission for the areas they cover. This should be the same for trucks and quints. As far as brush engines, you should at least have 1400' of 1-1/2", 800' of 1", 500' of 3", a couple of each handtools, forcible entry tools, a couple of double jacket lines, standard ems gear, over the bank gear if this fits your brush engines mission, and dont forget the most important thing plenty of cold water and gatorade...

Topic: 8457 Message: 8460

Kraig,
Is there any apparatus out there that isn't already filled? We already have a standard inventory and all of our engines have the stuff in basically the same compartments, allowing for different models. The basics are already covered. But the inventory we're using now for all types of apparatus is essentially unchanged from the time I came on.

There's new stuff out there that we want to look at, but are curious about who's carrying what. One thing I know we're short on with our Type 3's is adapters. But how many? And of what size? Therefore, why reinvent the wheel. I'd like to look at what everyone else is carrying and adapt it to our mission.

John, Our general rule is carry two of every adapter, except 1.5 to 1" we carry several. Check out TFT's 2.5" to 1.5" reducer and the 1.5" to 1" reducer. They are pricey but they reduce friction loss and are just generally good. A must have item that most people don't carry are a device called a water ejector. This is great for getting water out of a static water supply for filling the engine,but you can't get close to with your apparatus and can't for some reason use your portable pump. For every one gallon of water you pump through the water ejector, you get two gallons back. Its a great tool to have. Cascade Fire Equip. has them. Also, a smooth bore nozzle or nozzles are good to have. Mike

8465. Wanted: Large CDF dispatch Audio file

Yahoo group: norcalfire (2003 — 2004)
Date: 2004-12-15 02:28:34 UTC
From: Ben
Topic: 8465 Message: 8465

Hello All.

Anyone have an audio file of a large ie. initial summertime high dispatch wildland fire call for CDF? Doesn't matter what unit.

TIA

Ben

It is to bad that most of these cams are not labeled; it would be nice to
know what you are looking at (even though SOME are obvious).

At 11:55 AM 12/15/2004, you wrote:
